today's PCB substrate technologies 88−25657
tooling approaches for laminating MLBs 86−8614
tooling for fine line multilayers 88−7187
top side probe head fixture for laser trimmer systems 85−28815
totally flexible system for PC board assembly 87−1091
transportation system for PCBs at IBM's Greenock site 88−64096
traveling salesman problem with thousands of nodes 85−23215
traveling sequence optimisation of pick and place robot, simulation as traveling salesman problem 88−44482
turnkey systems for progressive batch PCB assembly andinspection 86−1565
turnkey systems for progressive PCB assembly 85−40315
TV system for inspecting circuit boards 88−25703
two major contributors to dimensional changes are the temperature and the humidity of the environment surrounding the film 87−37732
two-sided component mounting 86−1539
two-sided SMT PCB fabrication 88−7210
UHF/VHF PCBs, CAD/CAM system for flexible design and manufacture *(Spanish)* 87−53042
ultrasonic cleaning of SMT circuit boards *(Dutch)* 87−71452
unpositioned workpieces handling robot with visual andforce sensors 86−47205
US PCB degreaser, batch cleaning 86−14665
UV cure conformal coatings key to processing ease 88−50509
UV curing technology for process automation 87−10143
UV exposure equipment for PCB production, fluorescent tubes control supply cct. design *(Spanish)* 87−37736
UV liquid photoresists, automated photographic imaging process appl. 85−11743
UV pulsed lamp activated chemical etching 85−11797
UV solder masks as insulators for PCBs 85−61574
UV-curable solder mask, definition and registration, automatic process 88−12791
vacuum lamination of multilayer PCB for void-free lamination 87−53018
vacuum-formed protective cover for PCB with electronic components 85−34329
vacuum-press technology, introduction 86−8615
vapor phase soldering basics 88−63032
vapour phase and IR reflow soldering for surface mount assembly 88−38930
vapour phase and IR solder reflow processes, dynamics and optimisation 88−11745
vapour phase reflow soldering for surface mount assembly, considerations for process optimisation 88−165
vapour phase soldering, batch and in-line systems 87−24585
vapour phase soldering, ICI's batch system approach, SMD assembly appl. 86−41432
vapour phase soldering, practical and economic aspects 87−37700
vapour phase soldering, practical experiences *(German)* 87−65186
vapour phase soldering, process and appls. 86−26628
vapour phase soldering fluids for surface mount technology 88−37956
vertical processing for PCBs 88−7176
vibration fixture for immersion wave soldering 85−1171
Vichek turnkey image anal. machines, maintaining a successful image 86−53178
video training package for PCB production line operatives 88−11668
visual inspection algorithm performance evaluation 85−34337
visual inspection of printed wiring boards using range data 88−64113
visual inspection system *(Japanese)* 88−50528
VLSI high pin count SMT package requirements and prospects 88−31509
VLSI PCBs, impact of Future Factory manufacturing technology on testing 85−34346
void-free plated through hole production and anal. 86−20948
VTRs manufacture, PWB automatic alignment system, appl. *(Japanese)* 85−14484
washing plant *(Russian)* 88−25682
waste-water treatment, case study 86−20955
wastewater treatment system to remove metals, case study 88−7200
water as key resource and waste water treatment 88−7156
water soluble flux, ESCA, detection in printed wiring boards 85−61580
watthour meters, mass production at Schlumberger Industries 88−31454
wave solder process, PCB design impact 87−73898
wave soldering, blowholing in plated-through-hole solder fillets, elimination considerations 87−37689
wave soldering and tinning reliability evaluation 86−40539
wave soldering equipment designs for SMCs 86−47207
wave soldering flux developments and trends 88−38929
wave soldering flux material to eliminate cleaning 85−23242
wave soldering machine design 86−67589
wave soldering of PCBs, fault diagnosis expert system 87−24614
wave soldering PCBs, reliability considerations 88−64089
wave soldering problems troubleshooting, statistical quality control 85−11739
wave soldering process computerization 85−40325
wave soldering process optimisation, orthogonal array design approach 86−52246
printed circuit manufacture continued
wave soldering with dry film solder mask, solder ball eval. 87−66765
Wave Watch, IBM PC based system for monitoring quality in PCB manufacture 87−66730
wave-soldering, high-first yields demand machine controls 87−17508
wave-soldering flux density meas., time of fall tells it all [wave-soldering flux density measurement] 87−45405
wavesoldering, quality improvement method 87−6242
wavesoldering airknife machine, advantages 87−16376
wavesoldering for SMD technology 85−6600
wavesoldering of discrete surface mounted devices on PWBs 85−11746
wavesoldering of surface mount devices 85−34364
wavesoldering techniques−a re-evaluation 87−66738
welded springs utilisation 85−11782
Westinghouse circuit board manufacturing, failure rates 85−55299
Westinghouse Electric Corp's PCB flexible assembly plant conveyor system 86−1546
Westinghouse technology modernization forelectronic assembly 85−50113
wet nitrogen storage streamlines SMT assembly 87−37707
wet processing, achievement of process control 88−38902
wettability meas. of solder paste materials, electronic device fabrication appls. *(Czech)* 87−56920
white residue removal from hard to clean printed wiring assemblies 88−12810
wire-wrapped ccts., speed increases by use of power planes 87−24574
wire-wrapping, benefits for prototype construction 87−5200
workcell design and implementation problems for PCB assembly 87−17528
workshop and materials handling equipment 86−1528
X-ray inspection for small PCB manufacturers 88−64108
X-ray system requirements for multilayer and populated boards 87−17523
Xebec's automated printed circuit board assembly system 86−47190
Xerox PWB plant, misregistration scrap defects 88−57100
yield prediction in printed circuit pack manufacture 87−24573
zero defect soldering programmes 87−24578
zero force matched impedance pin array interconnecting system, VLSI chip connections to PC boards 85−10493
zero quality control mistake-proof production, poka-yoke system 88−57110
Al heat sink adhesives testing and modelling for SMT PWB bonding 88−19551
Al solid capacitor technology and tests *(French)* 88−32501
Al_2O_3 films preparation *(Polish)* 86−41446
Al_2O_3-B_2O_3-SiO_2, multilayer glass-ceramic circuit board with Cu conductor, mech. props. 88−18762
Au electroplating, requirements for bondable Au for chip-on-board technology 85−61570
Cu PCB electroless plating baths, computer simulation 87−45431
Cu chemical plating of through holes and PCB surfaces in additive process 85−17969
Cu clad laminators, statistical quality control 88−38923
Cu coated base materials for printed circuits *(Spanish)* 87−32171
Cu conductors on plastic laminates in PCBs, adhesion improvement technique 85−28814
Cu, direct recycling from etching to plating 87−60004
Cu ductile electrodes deposition for printed circuit boards 86−13791
Cu, electroless deposited, props. and additive process for high-quality PCBs 86−47180
Cu electroless deposition process for PCB 87−53044
Cu electroless plating of printed circuit boards, electrochem. mechanism 88−1150
Cu electroless plating process, contaminants and their effect 85−61569
Cu electrolyte for PCB fabrication *(Hungarian)* 88−12781
Cu electrolytic plating advances in PCB manufacture 86−41424
Cu electroplated coatings for PCBs, differential plating *(Hungarian)* 86−14679
Cu electroplated layers on PCBs *(Hungarian)* 86−14677
Cu electroplating anode technology, bars and nuggets vs. Cu pellets 86−47188
Cu etching process for fine line PCBs 88−12846
Cu etching with H_2SO_4-H_2O_2 solns. 85−17984
Cu film pressing process on thermoplastic *(German)* 88−38909
Cu films, electroless plating, mech. props., thermal shock resist. *(Japanese)* 86−62930
Cu foil, electrodeposited, liquid etch 88−25695
Cu, foil, outdiffusion to Cr_2O_3 corrosion inhibitor film, rel. to lamination of printed circuit boards 86−47191
Cu foils, electrolytic stain proofing for printed circuit appls. 86−20969
Cu layers, electroplated, mechanical props. rel. to annealing and ageing *(Polish)* 87−59033
Cu plated through-hole, electroplating 87−6231
Cu plating bath additive analysis for through-hole PCBs 85−61563
Cu sputtered coatings on epoxy resin laminate, technique for improving adhesion, PC fabrication appl. 85−34326
Cu-Invar-Cu Metalcore PCBs for SMT, thermal expansion 87−59980
Cu-Mo metal cores for PCBs 86−8591
Cu-clad epoxy glass laminates for printed circuit boards of microelectronics 86−67590
H_2SO_4/H_2O_2 and other etchants for copper in PC manufacture 86−20962
Ni electroplated layers on PCBs *(Hungarian)* 86−14677
Pb-Sn solder degradation kinetics 87−66769
Pb-Sn solder, use of microstructure as a reliability indicator for solder interconnects 87−66768
Pb-Sn-Ag solder alloys, phase equilibria 87−23749
Sn electroplated layers on PCBs *(Hungarian)* 86−14677
Sn/Pb electroplated layers on PCBs *(Hungarian)* 86−14677
Sn-Pb electrodeposits, IR fusing on PCB *(Hungarian)* 85−45323
Ta chip capacitors SMT method preventing reversal 86−53182
TiN thin film, adhesion on PBI plastic produced by large-current ion implantation machine *(Japanese)* 87−1814
YAG laser soldering device for flat-packed ICs 88−57127
YAG laser soldering systems, overview 88−38899

printed circuit motors
armature assembly/testing, robotic system implementations 85−53726

printed circuit testing
3D range imager-vision processor for PWB inspection 88−57124
accelerated life testing small geometry PCBs 86−20958
ADROIT−a diagnostic rule-oriented intelligent tester 88−67684
advanced computerized burn-in system 85−23258

ATE fixture design for SMT PC testing 88−44428
ATE fixturing 88−64112
ATE for complex systems, conf., London, England (Jan. 1987) 87−31162
ATE for digital printed cct. testing *(German)* 85−3870
ATE for electronic boards, GR 2276 equipment, config., characts. and appls. *(Italian)* 85−3850
ATE for memory and logic cct. testing, system selection criteria 88−47412
ATE for PC engng. manufacturing and service tests 87−59904
ATE for VLSI board testing during manufacture 87−3374
ATE from Robert Bosch GmbH *(German)* 86−14689
ATE in Marconi TRINET integrated testing system *(German)* 85−8693
ATE manufacturer progress in 1987 by changes in technology 87−56479
ATE networking, practical approach 85−34340
ATE system for PC boards testing, telecom. equipment production appl. *(Czech)* 85−55309
ATE systems and test strategies *(German)* 88−53545
ATE systems for pre-screen testing 85−63965
ATE technique innovations and variations 88−64111
ATE technology developments in 1985, review 86−55523
ATE vacuum fixturing 86−44099
ATE with context-dependent probing 88−4282
ATE with digital oscilloscope 88−71212
automated, standardised functional instrumentation interpretation with commercial ATE 86−35224
automated, test strategies economics 88−57147
automated assembly line for PCBs using robots 87−37737
automated board handling for in-circuit test 86−35225
automated control device for PCB testing 87−32159
automated full-function tester performs assembly-sub-assembly tests 85−3843
automated in-circuit test cell implementation 86−1569
automated inspection and drilling system 88−7180
automated inspection system *(Japanese)* 88−11712
automated inspection systems 87−37704
automated inspection using fluorescence from violet or ultraviolet illumination 88−32539
automated optical inspection in PCB manufacturing process 87−37688
automated test information system, key to cost-effective production 86−27741
automated visual inspection of PCBs using parallel processor hardware 87−45422
automatic, common board description 86−8643
automatic, conf., Anaheim, CA, USA (Jan. 1985) 86−11443
automatic, converting device test vectors to an in-circuit boardtest environment 86−47204
automatic, data transfer from multi-vendor test facility to central data management system 86−38249
automatic, role of the engineering workstation in test program development 85−42866
automatic cable tester used for other purposes *(German)* 86−44101
automatic component insertion, robotics integration 88−50530
automatic contacting unit for electronic modules *(German)* 86−58133
automatic generation of test procedures, using high level (MODULA-2) language *(Slovak)* 86−14652

printed circuit testing continued
automatic information system implementation, practical guidelines 86−35221
automatic IR laser inspection instrument, solder joint integrity determ. 85−55305
automatic measuring microscope, use in quality assurance *(German)* 85−20471
automatic optical inspection of printed circuit boards 85−17944
automatic optical inspection system evaluation 88−25683
automatic PC testing, computer-independent hardware modelling package, CADDIF 87−31662
automatic PCB assembly/testing system design 86−62916
automatic PCB test methods *(German)* 88−50483
automatic PCB testing, functional testing advantages over in circuit testing 85−11749
automatic PCB/components test system, 8510 series, features *(German)* 86−11425
automatic plated through hole inspection system forprinted wiring boards 86−47176
automatic SMT testing 86−41418
automatic techniques and microprocessor-controlled equipment *(French)* 88−44423
automatic test strategies, w.r.t. cost effectiveness *(German)* 88−12710
automatic tester for printed circuits *(Russian)* 86−35185
automatic testing, vacuum adapter developments *(German)* 85−5759
automatic testing and test instrumentation, conf., Paris, France (Oct. 1984) 86−34
automatic testing equipment from GenRad *(Italian)* 88−25704
automatic testing of microprocessor system unit boards 85−58526
automatic testing techniques 87−24575
automatic video inspection system 87−77113
automatic visual inspection by image processing methods *(Finnish)* 85−1133
automatic visual inspection of solder joints 86−222
automatic visual inspection using digital image processing 85−45284
automatic visual pattern inspection method, circular feature extraction filter appl. 87−17478
automatic visual tester based on machine vision technology 85−40369
automatic visual testing 85−28797
automatic visual testing−A new class of testing for PCBs 85−34319
automating PCB test and repair 88−50508
automating testing, speed-related test and meas. 85−1168
avionic structural reliability prediction 88−5076
avionic systems maintenance, microprocessor based UUT testing in a depot environment 87−21728
bar code identification in automated testing 86−8637
bar PCB automatic inspection system 85−17951
bare and populated PCB testing 86−41398
bare board automatic inspection 87−53032
bare board CAD/ATE links compete with self-learn and manual entry modes 87−17483
bare board test and inspection assures productreliability 86−58131
bare board test for QC 87−37701
bare board test methods for high density board designs. II 88−32535
bare board test methods for high density designs 88−32603
bare board test probe selection criteria 86−53169
bare board test tooling management, advanced guide-plate fixturing 88−25687
bare board tester, using CAD data to interface to 'bed of nails' 85−23233
bare board testers find the faults before the cost soars 85−11755
bare board testing 85−34352
bare board testing, CAD appl. 85−34354
bare board testing for assembly 85−34353
bare board testing for low volume boards 85−61521
bare PCB and continuity testing and fixturing trends 86−62913
bare PCB test strategies for manufacturing yield improvement 88−19544

microprocessor based boards design for testability 88−57058
microstrip and stripline cct. boards, processing and machining guidelines for thick metal ground planes 87−52969
microstrip circuit, EM anal., Galerkin method of moments 88−50296
microstrip structures design and layout, review 88−50306
microstructural anal. for QC 85−1159
microwave antenna array using flat unidirectional folded dipoles, design for 10-15 GHz *(French)* 85−30114
microwave boards from the circuit designer's point of view 85−40306
microwave components, CAD/CAM *(German)* 87−45264
microwave PC, early years 85−220
microwave PCB reliability rel. to design planning 86−41396
microwave PTFE substrates 87−6204
migration of Ag, control by using 2,4-diamino-6-vinyl-s-triazine coatings *(Japanese)* 86−41397
military electronics, packaging for land, sea, air 85−61523
military/aerospace appls. 85−40293
Mini Puck solid-state relays using surface-mount technology 85−40286
miniature circuit boards for modern microelectronics *(German)* 85−11704
miniature ICs automated assembling *(German)* 86−28377
mixed analogue/digital circuits, simulators 87−53074
mixed connectors *(German)* 88−64117
mixed contact connectors, PC and fibre optics *(Italian)* 86−62899
MLB Cu-clad polyimide glass laminates, development 88−19480
MLB high-speed, CAD layout performance real-world constraints 87−52981
MLB test-board for GaAs standard-cell library, fully ECL-compatible 88−57820
MLBs, polymer-on-metal type, thermal and thermomech. charact., reliability aspects 88−38857
MLC capacitors, surface mounted, cracks, causes and effects 88−63997
MLC chip capacitors, quality eval. of CO_2 and Nd:YAG laser marking 86−62864
MM-wave technology, printed-element triplexer design 86−27762
MMT interactive design system *(Hungarian)* 86−20174
modern electronic devices, PCB construction *(Hungarian)* 85−14626
modular SMT connector, performance characterisation 88−71247
modular zero insertion force connector for PCBs 86−35232
module placement on PCBs, wiring length minimisation using hypergraph representation *(Japanese)* 87−44442
modules for accurate and precise meas. 88−67730
modules in air-cooled environments, non-uniform fin shapes 86−34040
moisture protective coatings for copper thick film systems 85−28835
molded and extruded cct. boards 87−1058
molded cct. interconnects, performance and advantages 88−38936
Molex C-Grid-III system of interchangeable plug-socket PCB connectors *(German)* 87−52957
Molex sockets and connectors, packaging options 86−1460
monopulse printed circuit dipole array 86−22833
MOSIS system for VLSI and PCB design/fabrication 85−23977
motion control circuit boards with significant software component 88−56591
moulded circuit boards, interconnection system for feature phones 87−8090
moulded thermoplastic PCBs, technology and impact on traditional industry 87−37650
moulded wiring board materials and processes 87−6260
multi-chip PCB hybrid for HP 18C and 28C handheld calculators, developments and testing 88−57054
multi-layer routing with short vias 87−6220
multi-link matrix card 86−53133
multi-planar type, capacitance, inductance and impedance calc. using CALCAP *(Japanese)* 86−1478
Multibus I/II product introductions 88−50068
Multibus II, 19″ design system *(German)* 86−66617
Multibus storage systems, SMS8009 multifn. virtual controller 88−50132
multichip hybrid PCB for HP-18C and HP-28C handheld calculators 88−12712
multicomponent polymers, predictive design 87−24553
multiconductive base form package (SNMIG) 87−44007
multilayer 85−17981
multilayer, processing for quality 85−23249
multilayer, thin film PCB, thermo-elastic analysis, cracks 87−59958
multilayer and flex PCBs, develop. trends and future appls. *(German)* 88−19482
multilayer backplanes, standard and custom busing 87−45382
multilayer backplanes are designed for efficiency 85−61524
multilayer backplanes require careful design specs 88−57062
multilayer board connector, E160 pin design with DIN 41 612 specification *(German)* 87−24530
multilayer boards, SMT 88−64053
multilayer boards, stress-free design, use of thermal anal. 88−38872
multilayer boards for surface mounted components *(Swedish)* 86−27748
multilayer ceramic capacitor for SMD assembled PCB, quality assurance *(German)* 86−53086
multilayer ceramic cct. board immersed in fluorocarbon, transmission line charact. study *(Japanese)* 88−38866
multilayer ceramic cct. boards, high Tc superconductors use *(Japanese)* 88−71248
multilayer ceramic circuit board, dielec. const. effect on transmission line charact. *(Japanese)* 88−50295
multilayer ceramic circuit board with copper conductors *(Japanese)* 87−45370
multilayer ceramic substrate, registration problem 85−34285
multilayer ceramic substrates, Module Design Verification System 85−1201
multilayer flexcircuit wart package 85−44516
multilayer laminate requirements for GaAs IC Technology 87−6771
multilayer PC board with blind via hole design and manufacturing process 85−34271
multilayer PC boards, changes in microsectioning requirements 85−23264
multilayer PC construction *(Dutch)* 87−17485
multilayer PCB, EM radiation, 30 to 200 MHz, moment method technique 87−68798
multilayer PCB, thermal expansion coeffs. determ., computer-aided method 87−37662
multilayer PCB for high bandwidth circuit *(Japanese)* 87−66704
multilayer PCB for SMD, low thermal expansion *(German)* 87−37655

wideband ATE switching systems, using multilayer stripline boards 86−38227
window pattern router 86−1479
wire wrap prototyping speeds PCB concept-design-production 85−11721
wire-routing problem, electrostatic solution 87−73878
wire-wrap schedule generation, SIMULA program 85−34283
wireability study for designing packaging standards for wiring boards *(Japanese)* 88−31501
wiring, crosstalk noise anal. 87−66677
wiring boards, high-density, development *(Japanese)* 86−1472
wiring design using Lee algorithm on cellular automata [PCB wiring design] *(Hungarian)* 88−64077
workstation requirements for printed wiring boardsdesign 86−53156
woven fabric composites for PCBs, performance optimisation 87−24552
X-ray lithography appl. *(Czech)* 86−1921
YACR2 symbolic channel router 86−632
yield prediction in printed circuit pack manufacture 87−24573
zero force matched impedance pin array interconnecting system 85−10493
zero insertion force high-density card-to-board connector 85−23204
Ag electromigration suppression effect 2,4-diamino-6-vinyl-s-triazine compounds 87−51839
Al EM shield for printers with flat PCBs 86−36748
Al board resin coated for chip-on-board surface mount 86−62945
Al electrolytic chip capacitors for surface mounted *(German)* 85−50060
Au alloy PWB connector contacts, vibration testing, performance degradation study 86−62902
Au/PtAu system, N_2-fireable, on cofired multilayers, digital PWB appls. 85−34284
Au-plated connector contact degradation caused by sliding wear *(Japanese)* 85−11666
C fibre-reinforced plastics, Mitsubishi Electric composite materials for space and PCB appls. *(Japanese)* 88−12094
Cu appl. to electrical contacts, contact springs and clamp-cut connectors *(German)* 86−27663
Cu clad Mo metal-cored PCB for high performance electronics 87−73871
Cu, deposits inside circular holes, distribution 88−18727
Cu electrodeposited foil technology for PCBs 87−6209
Cu electroless deposition, microstructure evolution 85−23253
Cu, electroless plating initiation on nonmetallic surfaces 85−23252
Cu foils, electrodeposited, for PCBs 85−55269
Cu foils for flexible ccts. 88−19474
Cu on Al_2O_3 ceramic for PC interconnections 88−44485
Cu paste development for polymer thick film hybrid ICs 88−7232
Cu plating of PCBs in ultrasonic field *(Russian)* 85−34335
Cu printed wiring surfaces, corrosion and the use of inhibitors *(French)* 87−66690
Cu/Invar/Cu PC laminate for surface mounted components, characts. and fabrication *(French)* 86−47189
GaAs MMIC surface-mount package 87−6086
GaAs circuits, success depend. on multilayer packaging 85−61518
GaAs device digital board systems, coaxial interconnection for high speed 87−24560
Mo for cooling power semiconductors, keeping cool when chips are down 85−44524
Ni-P electroless coatings, electronics components, thickness meas. 87−8741
Pb-Sn solder PCB joints, fatigue and thermal fatigue testing 87−65180
Pd alloy PWB connector contacts, vibration testing, performance degradation study 86−62902
Pd-Ni coating as Au substitute for PC connectors *(French)* 85−34369
Pd-Ni electroplated finish for PCB edge connectors, props. eval. 87−37641
Sn electrodeposits, whisker growth inhibition for electronic appls. 87−73867
Ta solid chip capacitor SV series *(Japanese)* 86−58080

printed wiring boards *see printed circuits*

printers
see also daisy wheel printers; ink jet printers; laser printers; matrix printers; thermal printers
64K printer buffer/convertor construction and use 86−20772
adaptors and printers, comparative review *(French)* 87−76286

buffer controller, appl.-specific IC using RAM-based logic 86−20417
carrier drive arrangement for printing, recordingand sensing systems 86−31471
coil overheating protection circuit 86−57161
color hard copy equipment for electronic still camera system *(Japanese)* 86−49822
color reproduction methods for hard-copy printer *(Japanese)* 86−23103
color resolution, hard copy technologies 87−56519
colour plotter printer for personal computers *(Japanese)* 85−14869
colour printer picture representation by fixed size dots of primary colours arrangement 87−20708
colour thermal ink-transfer printer 85−3086
colour video printer 87−41245
combined moving iron/moving coil printer armature, design for high-speed and controllability 85−62740
Commodore 64, printer delay design 85−975
conference on information displays, New Orleans, LA, USA (May 1987) 88−11595
counter/printers for measuring and recording quantities and numbers *(German)* 88−74503
CRT TV printer, video-hardcopy reproductive characteris. *(Japanese)* 87−49305
Crystal Jet and CrystalPrint VII, liquid crystal shutter printers, review and comparison with laser printers 88−40007
CrystalPrint VII and Crystal Jet, LCS printers, review 88−40007
data communications product directory 86−30360
digital image quality eval. for quantised continuous tone image 86−59320
display product/service guide 88−36150
DMM coupling to printer link, for semiconductor kinetic coeff. dependences determ. *(Russian)* 86−50140
electrode drive compensator network for soft transitions in electrolyte printing 85−40163
electronic charts for marine systems, technical view *(Japanese)* 88−16289
electronic stills from the field: an update 86−4858
electrophotographic 86−36663
electrophotographic, liq. cryst. shutter based on dual-freq. addressed guest-host mode 87−1991
electrophotographic, technology trends 85−19100
electrophotographic, technology trends 85−29999
electrophotographic colour printer *(Japanese)* 87−12640
electrophotographic displays and printers 86−31239
electrophotographic nonimpact printers, matching photoreceptor response to state-of-the-art exposure sources 87−61026
electrophotographic printer, two-colour recording process 86−63925
electrophotographic printer for producing hardcopy halftone image patterns 87−61028
electrophotographic printers with liquid crystal shutters 87−7185
Elpho 20 laserless page printer, letter-quality 85−2485
EMI reduction in printer 85−2589
ES 7140 electrostatic line printer, microcomputer controlled *(Czech)* 85−30002
ESD susceptibility and radiated emissions of EDPperipheral printers 86−15918
ESD susceptibility of mechanical structures 86−3579
facsimile printer with dual-mode encoding/print heads for high speed/quality 85−8080
gray-scale printing using ion flow printing process, dot size control characts. *(Japanese)* 87−9969
half-dot advancement of paper using stepper motor 86−56790
hard copy output technologies, conf., Los Angeles, CA, USA (Jan. 1987) 87−58516
hardware interface for TP-801 microcomputer and printer *(Chinese)* 85−54933
head driver protection circuit 86−34631
Hewlett-Packard HP-41C calculator with IR printer link 88−9544
high-resolution projector and printer, using laser-addressed liquid-crystal light valve 86−31241
high-speed printing head, using multiplexed ferroelectric liquid-crystal shutter array 88−13951
hybrid 2560 dot linear LED print head development 86−67922
IEEE-488-based test systems, PC-based controller selection 88−35778
impact print heads, vibration analysis of piezoelectric actuators 86−2572
impact printer band drives, microprocessor control 87−78686
integrated acoustooptic printer head 87−74898
interface for AI-4096 pulse analyser to numeric printer 86−31302
interfacing the CONSUL 2111 printer to the M1T 330 digital voltmeter *(Slovak)* 87−56741
internal drum film recorder architecture, application 87−63246
ion flow electrostatic printing with slit-type control electrode *(Japanese)* 85−41568
K2-35 TV signal parameter meter/MPU16-3 printer interface *(Russian)* 87−34800
Laboratory Instruments enterprise production range *(Czech)* 88−67939
LAN printer management 88−15175
laser addressed liquid crystal light modulators for colour electronic imaging with Mead paper 88−16355
laser printers, laser diode and light emitting diode for optical writing *(Japanese)* 85−39396
LED array systems for electrophotographic printers *(Japanese)* 85−35650
LED arrays for electrophotographic applications, properties 86−65234
LED printheads, energy uniformity compensation techniques using current and time control systems 87−39320
light valves addressing in printer by HV TFTs and resistors 86−50169
light valves using smectic liquid cryst., thermal switching technique, printhead appls. 85−35553
linear DC motor for graphics printer 87−43101
linear stepping motors, for typewriter and printer carriage drives *(Japanese)* 85−39036
magnetic, recording method using a multichannel head 86−58691
magnetographic printhead structure, simplified design 88−14367
magnetoresistive sensing of print actuators 86−60222
matrix printer, monolithic print wire actuator 85−1807
measurement units representation with insufficient character sets *(Croatian)* 87−20829
microcomputer appl. to experiments control and evaluation *(Czech)* 85−8707
microelectronics influence on development of computing and printer equipment *(German)* 87−52534

printers continued
miniature print relays for AC operation, design procedure and Schrack RP series *(German)* 88−57032
mobile radio systems, appl. 85−20060
mosaic printer carriage drive with TCA 955 integrated speed control 85−10150
multiplexed ferroelectric liquid crystal light shutter array, using ferroelectric liquid crystal light shutter array 88−13950
multiplexed ferroelectric liquid crystal printing head 88−40009
NEC piezoelectric impact printer head, development *(Japanese)* 88−39778
nonimpact printers using HVCMOS ICs 86−35861
optical, print head with ferroelectric liquid crystallight-shutter array 86−28916
optical scanning architectures for electronic printing appls. 88−40040
page printers magnetic, electro-optical and laser 85−35928
paper detection in line printers, photoelectric optical sensor 85−3994
paper form top/end sensor using reflective light detection 85−26335
paper roughness meas. for hard copy devices, optical method 88−16505
parallel/series converter 85−11164
PC880 Polycomputer, teleprinter used as printer *(German)* 85−51965
print head with ferroelectric liquid-crystallight-shutter array 86−68346
print quality features, quantitative anal. 88−28036
reinkable ribbon electrostatic printing system 85−24742
resistive ribbon printer, constant power drive circuit 85−61085
resonant impact printing, actuator coil driving technique 85−2512
servo-controlled foil bearing actuator, design for high-speed printer 85−10073
servomotor, DC, with magnetic encoder for office equipment, Matsushita product *(Japanese)* 85−39038
SID international symposium, San Diego, USA (May 1986). 87−3683
SmartSpooler, printer buffer for spooling 88−38514
smooth raster character expansion to create family of fonts 87−3425
SPI-3 video frame buffer memory for hard copy printer *(Japanese)* 88−50147
stepper motor acoustic noise reduction method 87−9600
stepper motor drive for printer escapement system 86−13110
Systems '87, Conf., Munich, West Germany (Oct. 1987) 88−28089
telegraphic receiving terminal using personal computer printers, manufacture *(Japanese)* 87−34049
thermal, print heads, ZrN_x thin film resistors 85−28834
thermal print heads, 64 bit Bi-CMOS sink driver 85−890
thermal printer for hard-copy from teletext and viewdata services 85−3107
thick film circuits for printers, manufacture *(German)* 87−32187
thin film electroluminescent edge emitters for solid state imaging 88−58373
time marker for a printer, calorimetric transducers certification appl. 87−63307
transient nematic liquid-crystal image bar for electrophotographic printers 88−13952
transients solution using digital storage oscilloscope 86−5366
transparent conductive coatings for electrophotographic and electrostatic imaging 87−58977
TV video printer, review *(Japanese)* 85−26024
US position indicator for printhead 85−15028
V543 digital multimeter to G2387.500 tape printer connection *(German)* 86−5360
VIC-20 ASR-33 printer for RTTY hard copy 87−48480
watthour meter test result printout signal conversion interface *(Japanese)* 86−70012
xerographic LED printer, toner repulsion from LED printhead 87−2270
XY recorder, CAMAC control device *(Russian)* 85−26389
Al EM shield for printers with flat PCBs 86−36748
CrN surface coating for the reduction of contact resistancein resistive ribbon printing 87−1815

printing

colour printing, digital image layout system 87−8573
colour printing systems, colour reproduction model rel. to light scatt. *(Japanese)* 87−31104
colour printing technology, high quality, based on electrophotography *(Japanese)* 87−19149
colour reproduction, optimum, practical implementation 85−5597
colour separation sensing technique 88−47700
colour videotex images, hardcopy reproduction 88−72208
combined cam curve automatic assembly algorithm 88−49320
component marking, print quality standards 85−28051
computer-integrated design, print, and trim of hybrid circuits 88−57191
continuous tone electrostatic printing, ion flow control characteristics 88−8425
digital screening with irrational angle values, optimal computing method 85−57434
dyed resist to enhance undercut angles attainable onreduction projection printers 86−58352
electrochromic imaging using oxidation-sensitive dyes, molecular matrix technology 87−34968
electrophotographic, technology trends 85−19100
electrophotographic color printing using elliptical laser beam scanning 87−33395
electrophotography, high quality colour printing technique using elliptical laser beam scanning 88−14338
electrostatic lithography, development control 88−34221
electrostatic platemaker with fully automatic step and repeat function *(Japanese)* 88−8424
facsimile, dye transfer thermal recording, ink sheet manufacture *(Japanese)* 87−62567
flexible PCs, design considerations and manufacturing 85−40366
hard copy output technologies, conf., Los Angeles, CA, USA (Jan. 1987) 87−58516
high resolution thick film printing, expt. study 88−1208
high-definition screen printing, stencil developments and appl. 87−24567
holographic scanners, dichromated gelatin, for printing appls., characts. 85−35911

printing continued
hybrid ccts., fine-line geometry fabrication technique 88−1258
hybrid IC manufacturing automation, screen printing, placement and lead bonding 85−55329
hybrid IC printing on large substrates 85−28860
hybrid IC printing process, registration accuracy improvement using computer aided techniques 88−57207
hybrid ICs, fine-line multilayer screen printing how to do the job better 85−28861
hybrid thick film screen printing, statistical process control 88−57208
image processing performed by colour scanner *(Japanese)* 85−8759
information displays, conf., Orlando, FL, USA (May 1985) 86−26501
ink jet electrostatic drop deflection printing 88−34248
ink-jet printing, ferrofluid appl. *(French)* 88−18266
ion flow printing, ion control characteristics of aperture electrodes 85−19107
large area imaging, production economics 85−27899
laser printing device developments and applics. 85−56888
laser-based graphics arts, blue lasers role 85−29959
lasers, high power, modulation for printing industry appls. 88−40312
LED arrays for electrophotographic applications, properties 86−65234
magneto-optic light switching array, design and appl. to optical print head 87−74885
magneto-optical line pattern generator for optical printing 86−2879
magnetographic print engine, statistical study of toner particles flow 87−39337
magnetographic printhead structure, simplified design 88−14367
magnetography and related materials problems 85−56108
magnetography transfer methods, mech. press. and press. plus electrostatic aids 87−39338
microelectronic thick-film technology and applications 87−24639
Monoprint printing meter for telephone charge recording *(German, French)* 86−23568
motion analysis of printing press using high speed video 85−47728
multi-usable printing characteristics of dye transfer sheets *(Japanese)* 88−31244
multilayer boards using PTF technology 88−12762
newspaper industry, conductivity technique for press control *(German)* 88−62832
optical recording of data on paper using CO_2 and YAG:Nd^{3+} lasers 85−2451
output usability improvement 86−52191
paper roughness meas. for hard copy devices, optical method 88−16505
PCB, screen printing thermal solder mask 87−17519
PCB fabrication, screen printing, prep. 85−1160
PCB printers, collimation meas. and evaluation 85−40348
PCB printing, mechanical positioning and techniques *(Italian)* 85−40328

crack size distrib. determ. from incomplete data sets for failure probabilities calc. 85−49402
Cramer-Rao bounds for means estimation in clustering problems 88−73204
cryptosystem, probabilistic, security definitions equivalence 88−45920
CSMA, distributed retransmission control 88−59363
CSMA, slotted nonpersistent and virtual time, distributed retransmission controls 87−55802
CSMA-CD with priority fns. to each terminal, successful transmission probability, LAN appls. 87−69414
CSMA/CD infinite population nonpersistent channel access, transmission delay distrib. model 85−63141
cyclic time of multiqueues with priorityservice rule *(Japanese)* 86−40613
Czechoslovak power system, power balance reliability during international interconnection *(Czech)* 86−6229
damage tolerance analyses, quantifying nondestructive inspection capability 85−6065
data association, track initiation and nearest neighbours 87−27395
data compression and statistical inference 88−14656
data transmission systems, open system compared with feedback system, error probability *(Polish)* 87−62486
database controlled telecommunication network system, traffic anal. 86−43369
DBS system design, threshold extension 85−37168
DC drives with thyristor convertors, voltage distortion factor in power supplies estimation *(Russian)* 85−65475
decentralised sequential probability ratio test 88−4090
decimeter wave propagation investig. at high geographic latitudes 86−29373
decision making, methodology, theory and art *(German)* 88−56104
decision true classifier design, automated approach, comments 86−69139
decision-directed segmentation, restoration of images degraded by space-variant blurs 88−66710
decision-feedback equalisers, error probability 88−27713
defect detection probability of nondestructive inspection 85−28271
delay and multiply receiver with Gaussian noise input, exceedance distribution 87−39860
delay dependent priority discipline in multi-class traffic packet switching node 88−52650
delay-loss switching system for overload protection, waiting time and traffic study 86−4067
delay-loss system with cut-off priority and state-dependent server reservation 86−16593
Dempster and Shafer's theory of measure of information *(Japanese)* 86−10235
density estimation, current developments 87−5325
detection algorithm of optical targets in clutter 87−47684
detection probability computation for multiple faults in combinatorial ccts. 87−24106
deterministic algebraic computation trees, simulating probabilistic 86−52358
diagnosability of system in presence of hybrid faults 88−6309
dice, entropy, and likelihood 86−26720
differential methods for data transmission rate increase 86−36887
digital communication systems, performance eval. using max. entropy and method of moments 87−19353
digital communication systems, simulation of the pseudo-error monitor 88−14970
digital communication systems performance eval., bounds on random variable distrib. 88−21042
digital communication systems using single parity-check code, performance eval. 88−53035
digital filtering, stochastic and deterministic computing 88−3092
digital microwave radio systems, freq. diversity effects, prediction method *(Japanese)* 88−21922
digital pair-loop network with common use of channels, traffic characts. anal. *(Japanese)* 86−69219
digital processing and simulation, statistical methods *(German)* 87−61823
digital radio, field test results for 16 QAM and 64 QAM 86−59774
digital radio channel bit-rate limitations, intersymbol interference and fading 88−45702
digital radio system performances, approx. prediction procedure for BER and outage probability 86−30615
digital radio systems, multipath fading, outage probabilities/fade margin, calc. and field expt. 86−43710
digital radio systems, outage prediction for route design 85−20008
digital signal transmission using suboptimal receiver, over symmetric multipair cables *(German)* 85−47125
digital transmission, BER measurements, Gaussian regression for curve fitting and extrapolation *(French)* 86−10232
digital transmission, probabilistic model of error bursts *(Spanish)* 86−36895
digital transmission error probability and static temporary distortions *(Polish)* 85−51968
digital transmission systems, cyclic synchronisation propagation probability 88−34939
direct sequence LPE spread spectrum signals design, confidence levels 87−40677
direct sequence spread spectrum signal acquisition using non-coherent digital correlator, performance study *(Korean)* 88−8756
direct sequence spread spectrum system, equalisation using least squares lattice filter 85−30876
direct sequence spread-spectrum communications, rapid acquisition using parallel SAW convolvers 85−63512
direct-sequence and frequency hop systems, LPI figure of merit, development and evaluation 86−30606
direct-sequence interceptor performance gains due to a partial-band receiver approach 87−40673
direct-sequence spread-spectrum modulation, probability of error 87−40702
directed networks, shortest paths with exponentially distributed arc lengths 86−66891
direction indications probability for two unresolved signals 85−37122
discrete logarithm problem, zero-knowledge proof 88−2962
discrete Markovian system steady-state probabilities *(French)* 88−38051
discrete memoryless channel capacity determ. using iteration procedure 85−7790
discrete Weibull distribution 85−16852
discrete-time cyclic-service systems, waiting times 88−34852

probability continued
discrete-time queueing system with stochastic number of servers, anal. 86−26700

increasing failure rate components system closure under formation of coherent systems 85−60808
independent sets in random sparse graphs 85−292
inequalities concerning random subsets of set 87−75668
inference, probabilistic interpretation involving fuzzy quantification 85−49440
information closeness measures, Higashi-Klir's conjecture, comment 86−3728
information measure consideration based on Dempster-Shafer theory 87−7638
information measures, β-sufficient partition construction 88−58989
information measures and Bayes probability of error, relationship 88−27707
information measures in evidence and possibility theories 88−8638
information theory, extreme symmetry and the directed divergence 85−7778
information theory, HDB3 state diagram 85−13442
information theory, normalized measures of entropy 86−64155
information-theoretic description of EM fields in complex environments 87−68702
information-theoretic measures characterisation 87−61544
input regulation control based on periodical monitoringusing call gapping control *(Japanese)* 85−63140
insulation, breakdown probability assessment, up-and-down method 88−71834
insulation breakdown probability anal. by up-and-down method 86−47906
insulation strength tests results, likelihood function maximisation *(Polish)* 87−11993
insulator pollution risk, probability anal., *(Polish)* 86−18854
integrated services network, individual loss probabilities calc. 87−19987
integrated services network, loss probabilities *(Japanese)* 86−59446
integrated voice/data multiplexer for nonfixed number of voice calls, performance anal. 88−52608
integrated voice/data multiplexing with voice blocking and limited waiting room for data 85−42117
intensity fluctuations in atmospheric laser propagation, amplifier saturation effects 87−54585
inter-test intervals determ. , Soviet recommended procedure 88−74228
Interconnected National System of Argentina, probabilistic model for anal. and planning *(Spanish)* 85−43554
interconnected networks, performance anal. of polling system with single buffers 87−13383
interconnected power system load carrying capability, loss of load probability calculations 85−26975
interconnected power system planning, voltage stability anal., probabilistic approach 86−50929
interference and narrowband signal mixture, expt. data, probability charact. determ. 86−68795
intermediate parameter relaxation scheme and appl. *(Chinese)* 88−27990
intersymbol interference channels, maximum likelihood sequence detection, upper bound on error probability 87−39554
inverse normal and lognormal distributions forreliability design 86−40593
inversion of incomplete gamma function, Hansen's method appl. 86−23032
investment optimisation in project represented by Graphic Evaluation and Review Technique network 85−28145
ion implantation in amorphous targets, Monte Carlo simulation model 87−74190
ISDN, measured loss probability and grade-of-service, anal. 88−59743
ISDN flow control with limited buffering and discouragement 88−41432
isolated word recognition by Hidden Markov Model 87−47601
isolated words, speaker independent recognition 87−47621
isolated words speaker independent recognition via telephone lines, emission probability modelling 86−69006
Ito's calculus extension via stochastic variation calculus *(French)* 85−39608
Jackson networks, sojourn time distrib. in heavy traffic 87−55400
Japan joint probabilities of rainfall rate *(Japanese)* 86−37847

probability continued
joint statistics of amplitude and phase of a signal with co-channel interference 88−45721
JPDAM algorithm simplification 87−8340
k-out-of-n:G system, with single repair, steady-state availability 85−39589
k-out-of-n systems reliability computing algorithm using inclusion-exclusion method 85−39588
K-terminal network reliability computation, factoring algorithm using polygon-to-chain reductions 85−46668
KSPP cable, probability characts. of near-end crosstalk in digital communication systems 86−37687
Kullback principle for suboptimum decoding 88−66322
labelling problem, confidence-based approach 88−28097
LAN, token ring system with nonexhaustive service, diffusion approx. 87−13382
land mobile radio channels, error probability anal. of digital partial response CPM with differential detection 87−69955
land mobile radio system subject to fading/shadowing, outage probability 85−57989
Laplacian-Gaussian edge detection, error probabilities 86−49035
large channel-switching networks, reduced description by phenomenological approach 87−48251
laser mode-locking threshold, statistics 85−35664
laser pulses with constant false alarm rate probability, detection *(Spanish)* 85−13602
layered free access network, optimum struct. study and blocking probability calc. *(Japanese)* 88−73408
level-sensitive scan design networks 88−19078
lexical stress recognition using hidden Markov models 88−66366
lidar design, false alarm and detection probability factors 88−28983
life tests, fixed number test plan design based on Kullback-Leibler information 86−13556
lifetime distribution identities 86−61976
lightning, impulsive radiation in USW band 87−54615
lightning flash probability calc. for protection of structures 86−61182
line-of-sight angle error to remote object, probabilistic props. 88−24630
linear equations system related to transportation problem 86−46166
linear hypotheses testing in contingency tables with zero cell counts 86−57372
linear maps for error corrective dimensionality reduction of binary templates 88−59258
linear motors, reliability estimation, from long-term tests of single samples *(Russian)* 85−21653
linear sequential circuits, Walsh function representation and noise anal. 85−33791
LMS adaptive filter weights, probability density function 87−61927
load flow equations, probabilistic anal. 87−9055
load flow equations for power systems, multiple soln. anal. 88−5257
local access radio interference due to building reflections, computer simulation 87−26870
local network model with random multiple access 87−69623
location system with direction finding stations, systems parameters influence on accuracy *(German)* 86−37952
log-linear representations of positive probabilities, extension theorems 86−46165
log-T detector in K-distributed clutter 87−49142
logarithmic information minimisation 87−27121
logic ccts., signal reliability eval. method 88−6753
logic control devices, effective reliability *(Russian)* 86−40997
logic testing, probabilistic fault grading software, Intellitest/PFG 86−14093
Logotext model for large vocabulary isolated word recognition 85−13498
long-term generation expansion planning, based on maximum principle and Gaussian distribution functions 85−38465
longest Hamiltonian tour problem, probabilistic anal. 88−24638
longwall power demand estimation by probability distribution functions 86−45891
loss in PCM link systems, point-to-point loss calculation method 88−2942
loss systems for one and two-way calls, traffic study *(Japanese)* 86−59444
LPI performance evaluation and parameter optimization for time-hop spread-spectrum systems 87−40678
LPI performance of optical and mm-wave systems, comparison 87−40736
LPI techniques in the underwater acoustic channel 87−42285
LSI ccts., radiation hardness assurance based on system reliability models 88−24607
LSI chips, statistical calculation of fault detectionprobabilities by fast fault simulation 86−49955
LSI logic circuit self testing, signature cct. design, error detecting probability anal. *(Japanese)* 85−54850
LWR sequence timing, significance to probabilistic safety assessment modelling 88−62116
M(t)/M/N loss system, blocking probability eval. using numerical method 86−26697
m polynomials values 87−58845
M-ary DPSK in fast Rician fading and Gaussian noise, error probability formula 88−8663
M-ary FSK with limited-discrimination-integrator detector, error probability, narrow-band filters effect 86−10241
M-link multiplexing over the quadrature communications channel 85−7962
./M/1 queues in series, interchangeability, probabilistic proof 88−31597
$M/G^{a,b}/1$ and related nonbulk queues, steady-state probabilities, computational anal. 87−65304
M/G/1 queue, Markov-modulated, busy period and buffer overflow time 87−65301
M/G/1 queue, Markov-modulated, stationary distribution 87−65300
M/G/1 queues with group arrivals and exhaustive service discipline 88−31592
magnetographic print engine, statistical study of toner particles flow 87−39337
main subscriber stations, market segmentation *(German)* 85−19906
Malliavin's operator on Wienner-Poisson space 85−49417
man-machine systems, operator, data reception characts. determ. 85−36167
man-made RFI, probability distribs. of effective voltages, limits calculation 86−15937
manufacturing industries, electricity supply outage effects, probabilistic and statistical anal. 87−16203
MAP estimate for entropy maximization, autoregressive model 85−49487
marine radar iceberg detection model, verification study 87−28656
marine radars, subclutter visibility 86−37920
Markov process, convergence time of limiting probabilities, derivation *(Japanese)* 88−56111
probability continued
Markov queueing networks with symmetric standby channels 88−11830
Markov reliability analysis, probability bound estimation method 86−240
Markov system, steady-state probability and frequency calc. stable algorithm 87−58716
Markovian Petri net protocols with product form solution 87−55807
Markovian processes, simultaneous filtering, a posteriori probability distributions struct. 88−66504
matching failure probability distribution to test data 85−44542
maximum distance separable codes, probability of undetected error 85−7811
maximum entropy and lottery 87−51928
maximum entropy and reliability distributions 87−23400
maximum entropy methods in EM, geophys. and US imaging 85−57011
maximum entropy power spectral estimation oftwo-dimensional signal *(Korean)* 85−57391
maximum likelihood and minimum-entropy classification, relationship 85−30136
maximum likelihood estimation automatic calc. program 85−5876
maximum likelihood estimation of a class of non-Gaussian densities with application to deconvolution 87−61922
maximum likelihood estimation of magnitude-squared coherence 88−27901
maximum likelihood mean. freq. estimator, probability density 87−47665
maximum likelihood methods for linear and log-linear models in categorical data 85−44591
maximum likelihood synchronizers with arbitrary symbol probabilities, unified struct. 87−39823
maximum-likelihood confidence areas applied to binomial distribution *(German)* 87−72876
maximum-likelihood parameter estimation, role of max. entropy and appls. 87−75828
mean residual life function, asymptotic behaviour 88−18532
mean time to achieve a failure-free requirement 85−54202
mean time to achieve a failure-free requirement withimperfect repair 85−60802
mean time to failure calc., simple Markovian method 87−65249
measure preserving transformations isomorphism 87−61543
measurement accuracy improvement using a priori information 87−8493
measurement results transmission in remote control systems 85−64045
measurement series distributions evaluation, parameter estimation 88−67619
measurement uncertainty, probability assignment to systematic deviations by the principle of maximum entropy 88−15883
measuring systems, unbiased-eval. compression *(Russian)* 87−63205
measuring systems with search and control devices, stationary probability distribution anal. 87−56464
memoryless discrete channel, improved upper bound of decoding error probability 88−72749
metro system total accident probability 85−22203
MFSK/SS fast-hopping system, partial-band jamming, coding and nonlinear diversity processing 88−46860
microtopographic roughness parameters determ. from surface sections 87−3753
microwave Earth-space links, tropospheric amplitude scintillations, probability density fn. 85−57017
microwave multiple-hop network, rain attenuation, outage performance prediction 88−21943
microwave satellite communication system, site diversity model 87−49014
MIL-STD-781C fixed time test for MTBF demonstration, effect of redundancy 88−56078
military complex strategic communications networks, connection survivability 86−49126
military costing using computer-aided logistic support, success probability study 88−61720
minimal spanning trees in undirected network with exponentially distributed arc weights 88−49722
minimum relative entropy inversion, state spaces and initial estimates, appl. to spectral anal. 88−34544
missing information in microprocessor-supervised systems, calcs. *(Chinese)* 88−58982
missing speech segments recovery in packet voice communications, waveform substitution techniques 87−19420
missing speech segments recovery in packet voice communication, waveform substitution techniques 87−19453
mission effectiveness model for a system with several mission types 85−39592
mixed delay and loss systems with renewal and Poisson inputs, eval. 88−66792
mixed input queueing model, input control anal. based on discrete monitoring 86−69205
mixed renewal and Poisson inputs queueing modelwith a finite waiting room *(Japanese)* 85−54236
mixture likelihood clustering, generalised, texture image segmentation appl. 87−62196
model for TV interference probability by industrial scientific and medical equipment 87−28769
model of non-Gaussian periodically nonstationary radio signals 88−72551
modified iterated codes with improved code rate *(Japanese)* 88−52353
monitoring, metrological characteristics, errors in determ. 86−11395
monitoring reliability estimation, use of two-stage operational checks 85−47783
monopulse resolution of interferometric ambiguities 86−49708
morphological filters, statistical results and image restoration appl. 88−28018
multi-administration telephone networks, equitable transit charges 87−69577
multi-circuit power transmissions, reliability appraisal of line insulation *(Russian)* 85−59751
multi-dimensional soft-decision unique word detection, theoretical study *(Japanese)* 87−27415
multi-h partial-response phase codes, error probability 87−61578
multi-level input control method, queueing model anal. 85−25207
multi-link packet transmission systems, allocation algorithms, performance evaluation *(Japanese)* 86−23205
multi-media packet switching system with packet burst generation, traffic characts. *(Japanese)* 87−55387
multi-node queueing system, delay characts. anal. *(Japanese)* 88−73406
multi-output combinatorial logic systems noise anal. of soft errors *(Chinese)* 86−34661

probability continued
multi-packet transmission on erroneous channel, characts. study *(Japanese)* 87−27693
multi-peak properties of level-crossing intervals of random process 85−19296
multi-service cct.-switched system with call restriction mechanism, hierarchical learning control *(Japanese)* 87−55386
multi-target tracking, algorithm for combinatorial problem solving 86−23941
multiaccess channel, maximisation of one-step throughput 87−75975
multiaccess communications, stochastic approx. methods for decentralised control 85−51825
multibeam packet satellite systems with conflict free scheduling 87−20442
multicategory information processing, a priori class probabilities estimation 86−48732
multichannel computer network, different probability access when finding carrying signal 85−13673
multichannel systems with variable mode of operation, reliability estimated 85−60848
multidimensional normal probability integral, asymptotic value 88−346
multidimensional quantiser, binary indices assignment to codevectors, algorithm 88−2973
multidimensional signal detection, optimal projection 88−52430
multihop packet radio networks, routing strategies 86−17218
multilevel modulation systems, performance in presence of phase noise 86−22889
multilevel-multiresolution technique for computer vision via renormalization group ideas 88−52583
multimachine power systems, probabilistic assessment of small disturbance stability 87−64104
multinomial distribution, Bayes-Laplace statistic 86−313
multipath outage probability on digital radio, propagation parameters and prediction 86−69603
multipath time delay estimation, large and small error performance limits 86−43220
multiphase balanced circuits, parabolic Fokker-Planck-Kolmogorov equation determination *(Russian)* 87−16777
multiphase system with identical service 87−5317
multiple access direct sequence PSK spread spectrum system, error probability eval. *(Polish)* 87−55962
multiple access spread spectrum systems, outage probability due to autointerference 87−40672
multiple measurement effects on correct inference of measured quantity, probability matrix study *(Polish)* 85−31283
multiple PRF pulse Doppler radar, range ambiguity resolution 87−63043
multiple sensor data combination for automatic target acquisition, statistically optimum methods 85−8458
multiple target tracking by probabilistic data association using neural networks 88−74002
multiple time-scale Markov processes, structural decomposition 88−31628
multiple-scale measuring systems, synthesis 88−74226
multiple-variable functions on random variables, change of probability distrib. *(German)* 86−4698
multiplicative limit of the probability of correct identification for coherent reception 88−46061
multisensor estimation with uncertain meas., block Kalman filter appl. 87−27502
multisensor navigation, decentralized filtering and redundancy management 87−50490
multiserver queue, optimisation problem 86−62079
multiserver queues with *m*-phase synchronous fluctuation of traffic intensity 88−34865
multislot bit rate calls carried by trunk group with modularity, traffic characts. study *(Japanese)* 88−59452
multistage monitoring, conditional-risk calc. 88−67664
multistage multidetector binary hypothesis-testing, decentralized dynamic decision making 88−46114
multistate coherent systems, existence of series and parallel coherent systems 85−39582
multistate Markov models and struct. props. of transition rate matrix 88−31548
multiuser asymptotic efficiency, optimum 87−7881
multivariate data clustering/anal., mixed-mode, statistical knowledge synthesis 88−14769
(N, T) replacement policy anal., model 86−13558
narrowband BPSK system protection with adaptive array 88−8665
narrowband interference excision, comparison of weighted and nonweighted transform domain processing systems 85−30891
narrowband random signal, duration distrib. of periods 87−13007
narrowband signal subspace processing, performance 87−19772
narrowband signals detection, multilevel quantisation 88−52433
near optimal blind deconvolution 88−73041
nearest continued fractions with stochasticallyindependent and identically distributed digits 86−66718
network access congestion control mechanisms, dynamic behaviour 86−54627
network reliability, practical implementation of factoring theorem 88−70162
network reliability analysis using 2-connected digraph reductions 85−46670
network reliability bounding using consecutive minimal cutsets 88−43740
network reliability evaluation using probabilityexpressions 86−61974
network reliability with arc failures and repairs 88−70163
network-based speaker-independent connected-word recognition system 87−19546
networks anal. and design, combinatorial optimisation problems 85−46671
new predictor algorithm for prediction of processes of rational-fraction spectral density function exploiting data of the current instant derived from Hermite sampling 87−69202
Neyman-Pearson and Bayes interval estimates for sampling by attributes, EMP anal. 85−22316
NMOS PLA testing, fault models 87−691
noise-voltage generator with smoothly variable kurtosis, design method 87−35108
noisy electronic system, symmetry breaking, state selection and sensitivity 87−391
noisy multiple-access channels, upper bounds on decoding error probability 87−39653
non-axisymmetric particle beam shaping systems, current density calc. allowing for chromatic aberration *(Russian)* 86−42770
non-Gaussian processes, multiple-alternative distinction method 85−51618
probability continued
non-Gaussian random processes, influence of filter, theoretical study 87−27362
non-Gaussian signal detection, PDF models *(French)* 88−8780
non-maintained parallel systems subject to hardware failure/human errors, reliability anal. 85−33234
noncoherent signals with gamma-distribution of energy probability, detection characts. 88−40962
nondeterministic versus probabilistic linear searchalgorithms 86−19940
nondiversity receivers performance, for spread spectrum in indoor wireless communications 86−10976
nonGaussian process, detection of changes in props. 86−37075
nonGaussian signal envelope in nonGaussian noise, statistical characteristics 88−46066
nonGaussian signal probabilistic model, characteristics 85−36164
nonGaussian signals, distinguish using average signal power 88−21176
nonlinear filtering, approximation method comparison 88−46065
nonlinear filtering algorithms, use of splines 88−27958
nonlinear stochastic ordinary diff. eqns., mathematical theory 86−62158
nonmonotonic behaviour of probability of errors of block codes 86−29752
nonparametric analysis of the dependence ofdichotomous vectors 86−52343
nonparametric estimation of a functional of aprobability density 86−46167
nonparametric radar detection, suboptimum rank test 87−34640
nonparametric radar signal detectors with randomization of the detection criterion 87−63019
nonregenerating power networks without loops, reliability, exponential and Weibull models *(Russian)* 87−64118
nonregeneration points interpreted Petri net, probable behaviour anal. by Markov process *(Japanese)* 85−5899
nonstationary normal process, overshoots duration distrib. 87−61547
nonstationary signal analysis, decision and classification directed methods 88−73036
normal distribution, one-sided confidence limits on upper and lower tail areas 85−5896
normal distributions, criteria for coefficients of variation 85−60835
normal distributions, two-sided tolerance limits robustness anal. by digital simulation 85−5895
normal probabilities eval. of symmetric regions 88−56097
normality of $XY(X^2+Y^2)^{1/2}$ when X and Y are normal, proofs 88−63151
nuclear power plant, reliability engineering technique *(Japanese)* 88−17261
nuclear power plant operator/manager advisory expert system with probabilistic risk assessment 88−69111
nuclear power plant probabilistic risk assessment, truncation methodology for large fault trees evaluation 85−39590
nuclear power plants, seismic margin reviews for probability risk assessment using screening approach 88−42942
nuclear reactor plant probabilistic safety studies 86−32952
nuclear reactor reliability models for safety assessment 85−38739
nuclear reactors, operational improvements evaluation, probabilistic cost-based method 86−39303
numerical analysis problem, difficulty probability 88−49759
numerical method for calculating state probabilities for queueing systems 88−11828
odd integers, representation as sums of primes and powers of two 85−10592
open and short-circuit reliability of systems of identical items 87−31334
operational behaviour of a complex system operating under different weather conditions 88−70176
operational readiness of safety systems 88−256
optical cables with fibre reinforced plastic tension member, lifetime estimation method *(Japanese)* 86−17401
optical channel, signal synthesis 87−55139
optical communication, direct detection systems, error probability evaluation methods 88−28839
optical communications error probability in quantum mechanical channel, rigorous derivation *(Japanese)* 88−58997
optical data transmission, algorithms for spatial laser beacon acquisition 86−49590
optical fibre splice loss from one-way OTDR measurements, probability model 88−26815
optical fibres, polarisation fluctuation in terms of probabilities 87−74734
optical fibres, strength and fatigue, Weibull probability function 87−32997
optical information systems, adaptation problem 86−30031
optical pulsed signals detector, probability characteris. invariance 87−55261
optimal and suboptimal distributed decision fusion 88−72943
optimal classification regions for normal random vectors 88−56117
optimal inspection policy with two types of imperfect inspection probabilities 87−16438
optimal linear-quadratic systems for detection and estimation 88−66490
optimal quantization of noisy signals 87−47790
optimal sampling schemes for Gaussian hypothesis testing problem 87−39863
optimal time and space compression of test responses for VLSI designs 88−19080
optimisation of probability dependent functionals, linearisation methods 87−5352
optimum first-order time delay tracker 88−27702
optimum inspection policies using inspection density 85−39564
optimum linear detector for a binary composite hypothesis testing problem 88−14662
optimum probability filters sensitivity anal. 86−43272
orbit control of two satellites in the same geostationary position *(Japanese)* 87−29858
order-α weighted information energy 87−47448
ordered groups with faulty channels, loss probability anal. *(German)* 85−7779
oscillatory stochastic integrals and a positiveFeynman-Kac formula 85−49439
outage probability computation and cellular coverage for mobile radio 88−60031
overflow probabilities in buffers with Markov-interrupted services, engineering calculation 88−21374
overflow queueing models, iterative methods 87−65394
overhead power lines, IEC/TC 11 recommendations, on wind load probabilities *(German)* 86−12456
overhead power lines, sag and distortion effects of conductor heating in hot climates *(Russian)* 87−4408
overhead power transmission lines, reliability design 86−18841
overload control strategy, anal. using fluid approx. *(Japanese)* 87−40024
packet broadcast network with priority-free capture schemes, performance analysis 86−64404

probability continued
packet switching computer network, dynamic evaluation of error level in data link 88−66773
packet-switched computer communication network hop level flow control 88−14864
packet-switched virtual circuit network, asymptotic qualitative anal. 85−7974
PAM receiver error probability, influence of cycle slipping 88−8661
PAM system including timing jitter, game theoretical approach 86−54405
parallel circuits, probabilistic interpretation 88−70412
parameter spaces searching with noisy linear constraints 88−73349
parametric signal anal., suboptimum max. likelihood approach 88−73163
parent population parameter estimation from incomplete data 88−49623
partially correlated Rayleigh targets, exact detection probability determ. 86−49709
partially coupled events joint probabilities 86−34094
partially hidden object recognition 85−46907
partially observed linear systems with non-Gaussian initial conditions, filtering formulae 86−37094
passenger waiting time at transit stops 85−54245
pattern classification, error rates of nearest neighbour and Bayes methods 87−47903
pattern recognition, distance functions using density estimates 85−30449
pattern recognition, probabilistic inference system 85−30405
pattern recognition, test theory using fast algorithm 88−59310
pattern recognition using fuzzy techniques and possibilities 86−10469
pattern recognition using nearest neighbour method, training sets and a priori probabilities 88−73206
PCM, SNR, time functions, probability densities and quantising curves *(German)* 86−64171
PCM frame time distrib. in multiplexed digital transmission, performance eval. 87−27699
performance monitoring for joint operation by a group of moving objects 88−63076
periodically sampled queue with alternative active and interruption phases, model, signalling system appl. 87−55391
periodically sampled queues, general model 86−310
permanent magnets inspection, magnetic parameters permissible values selection 85−46014
permutation problems, iterative methods for approx. soln., neighbourhood graphs *(German)* 88−38086
personal rapid transit systems, grade-separated interchange, control algorithm and traffic anal. *(Japanese)* 85−16321
perspective image, iterative method for locating a vanishing point *(Japanese)* 86−10497
Petri nets with deterministic and exponential transition firing times 87−23512
PH/PH/1 and PH/PH/1/C files, steady-state probabilities calc. *(French)* 86−26707
PH/PH/1 queue, steady-state probabilities 88−38055
phase-coherent frequency-hopped spread spectrum systems, partial-band interference, performance anal. 88−46861
phase-manipulated signals, correlation props. of linear derivative systems 86−22867
phonetic to French transcription, probabilistic grammar 86−16263
photomultiplier photon counting suitability, probability criterion 85−55418
picture processing, position estimation by centroid, accuracy determ. 88−46219
piecewise polynomial probability densities, moments computation technique 87−65288
planar assignment problem, heuristic algorithms *(Japanese)* 86−40810
PLAs, random pattern testability 88−19097
PLL in fading channels, digital, statistical analysis 85−25081
plotting probability density function of resultant error with two or more components 87−28886
point process, classification and data analysis 88−56113
point-to-area cellular propagation models, advantages 86−4532
Poisson and Gaussian noise, probability distribution 85−22300
Poisson noise adaptive filtering, local statistics appl. 88−46298
Poisson processes with uncertain rate functions, minimax discrimination 86−13627
Poisson random counting measures, robust discrimination 87−51937
portable radio telephone systems, service availability location probability estimation 88−73843
possibilistic uncertainty and information functions classification 88−8641
power arcs following faults, hazards calc. *(German)* 85−10434
power cables, thermal analysis and ampacity calcs., using probabilistic approach 85−9506
power distribution network, optimization development with probability information onload increase *(Polish)* 86−18787
power distribution networks, load point reliability indices, approx. probability distribs. eval. 88−75158
power distribution node harmonics, probabilistic modelling 87−78097
power distribution system design, probabilistic techniques appl. 88−10898
power electronic equipment, exchange components demand in prefailure phase *(German)* 85−16822
power engineering, method for constructing Pareto sets in hierarchical structures 87−58808
power flow, probability/statistical characteristics and applications *(Russian)* 88−17112
power generating plant capacity expansion with uncertain primary fuel prices 85−43568
power generating system reliability, computational aspects of Equivalent Load Method 87−9139
power generation, short term scheduling using probabilistic and categorical weather forecasting 86−12338
power generation from alternative energy sources, probabilistic production costing 85−59840
power generation system, capacity outage table approximation based on unit outage size modelling 85−15532
power generators subsystems, algebraic method for reliability calculations 87−36536
power in load nodes, probability distribution *(Russian)* 85−15558
power overhead line load ratings, probabilistic considerations for real time operation 86−12467
power overhead line loads, weather induced, probability anal. 86−6379
power plant develop. methodology under incomplete information 88−75230
power plant reliability evaluation by Boolean function expansion algorithm technique 87−30072
probability continued
power supply voltage quality indices probability indices determ. *(Russian)* 85−32093
power system, probabilistic operation, transmission capacity and environmental constraints 85−43535
power system capacity planning, mathematical programming models loss-of-load probability constraints incorporation 85−21156
power system demand regimes probability anal. 87−64075
power system digital distance protection, based on adaptive Kalman filtering 85−48614
power system earthing system, sensitivity anal. of accident probability 85−59806
power system interconnection, active power and frequency variations, probability model 85−38422
power system load averaging using probabilistic models *(Russian)* 87−15123
power system operation, probabilistic simulation for maintenance scheduling of generating facilities 85−9449
power system parameters probability anal. using nodal equations *(Russian)* 85−64867
power system planning, reliability and security, probabilistic approach 86−56393
power system probabilistic load flow considering network outages 85−43507
power system protections reliability modelling 85−4675
power system reactive power optimisation, assessment using probability methods *(Russian)* 85−53265
power system reliability and production costing indexes, calc. using Esscher's approximation 86−18696
power system scheduling method to satisfy NO emission and power supply probability 87−42373
power system security control, ϵ-optimal generation schedule using iterative procedure 85−21135
power system transmission capacity expansion planning with economic dispatching and flow evaluation 87−57586
power system under transmission constrained economic dispatch, probabilistic simulation 86−56380
power systems, bivariate probability load distribution and incremental power production costs 86−32633
power systems, economical load distribution under certain decision criteria *(Russian)* 87−15143
power systems, interconnected, operating reserve determ. and its influence on operating costs 85−32071
power systems, probabilistic security dispatch under normal and stormy weather conditions 86−65644
power systems, production cost evaluation with energy limited units by the segmentation technique 88−5305
power systems, uncertainty modelling in long-range planning 87−30141
power transmission lines, electromagnetic coupling and magnetic field safety anal. 85−27060
power transmission system planning, reliability evaluation, probabilistic approach 88−68854
PPM encoded stretched optical pulses, error performance of soft decision decoding *(Japanese)* 87−54880
PREDICT−probabilistic estimation of digital circuittestability 86−1013
predicting fault coverage from probabilistictestability 86−46071
prediction intervals for the 2-parameter exponential distribution using incomplete data 85−16850
preventive replacement policy for units subject to intermittent demand 85−33241
primary digital transmission systems, regenerator sections, probability modelling 87−48366
printed character recognition using Markov models 88−21348
priority 2-out-of-N:F parallel redundant system availability 85−60814
priority multichannel CSMA/CD protocol 87−27713
privacy-protecting protocol, secure, for personal information transmission between organisations 88−40823
probabilistic cryptosystems, notion of security 88−40839
probabilistic design, computational algorithm for reliability bounds 86−46127
probabilistic primality testing, observations 88−40843
probabilistic reasoning but logic of actions 87−36578
probabilistic reliability charact. computation, graph method *(Czech)* 86−61967
probability oriented speech recognition, hypotheses stemming and processing technique *(German)* 87−2484
probability-of-failure, accurate calculation method 85−5833
process failure detection in the case of Markov noise 88−59125
product and process specification anal. using statistics and probability 88−24596
product codes, new 4-step decoder perform., decoding bit error probability 87−54923
production loss prediction, analytical system availability techniques and microcomputer model 86−66634
protocol services, performance specification 86−10837
proximity effect in electron lithography *(Czech)* 87−45724
PSEUDO-POS language model having a redefinedvocabulary 86−29968
pseudo-random PSK sequences demodulation, noise immunity of digital demodulator determ. 87−47474
pseudonoise sequences, general periodic correlation fn. model, statistical props. 86−37004
pseudorandom test sequences for combinatorial ccts., probability models 88−19076
pseudorandom testing of combinatorial circuits, probability models 88−32129
PSK modulation, error probability anal. 85−2737
PSK system interference suppression, using adaptive array antennas 88−14518
PSK systems with interference, error probability computation 86−3747
PSK with intersymbol and adjacent channel interference, error probability 88−34550
PSK-TDMA carrier recovery, transient probability response of cycle slip 85−13462
pulsed-signal detection using null-gating for interference suppression 86−37064
purely random sequences, prop. of sample autocovariance and appl. 88−14724
PWR 900 boiler tube lifetime and bundle inspection, statistical anal., probabilistic method 88−62176
PWR plant-specific availability modelling 87−9286
PWR risk appraisal, source term reassessment 87−42611

probability continued
QAM digital radio systems with interference, multipath outage probability 87−34396
QPSK, decision aided max. likelihood carrier recovery, bit error probability performance 87−39821
quadratic entropy, cross entropy and dissimilarity measures 86−13624
quadratic signal processing, distribution of positive-definite Gaussian quadratic forms 88−27912
quadric reliability indices 87−23425
quadtree, soft linked, cascaded ring structure using flexible linkage concept 88−73358
quality control, extremal statistics order appls. 88−31512
quantification method interpretation in terms of underlying probability *(Japanese)* 87−58790
quantisation, optimum, and ρ-distance algorithms 87−54888
quantised stationary signal, first and second- order moments estimation 86−36941
quantization error in differential PCM of Laplacianincrement inputs *(Japanese)* 86−43182
quantization of the stationary state probability inline code algorithm *(Czech)* 86−68986
quantum-limited imaging, use of Grenander's sieves 87−48248
quasi-deterministic signal detection, asymptotically optimum rank algorithms 85−13556
quasi-Newton methods, cancellation errors 87−10308
quasi-optimum estimation of random pulse access time *(Russian)* 86−59284
quasi-pulsed interference, applicability of lognormal model to statistical description 85−51459
quasiharmonic signals, synthesised by digital-analogue transducer, distortion factor probability charact. *(Russian)* 85−30277
queue with feedback and server intermittently available, explicit time dependent solutions 87−23456
queue with two thresholds, steady-state probability 88−280
queueing model, explicit probabilities calc. 86−13616
queueing network models for aircraft availability and spares management 85−22303
queueing systems, approx. techniques for performance measures, teletraffic type approach 88−59341
queueing systems, light-traffic type, optimal buffer allocation 88−43763
queueing systems anal. with randomly changing population states 88−34841
queueing theory, GI|G|n|0 system, almost-Poisson input, stationary state probability 85−28095
queueing-blocking system with two arrival streams and guard channels 88−34851
queuing theory, random memory arrivals and heterogeneous servers 86−7599
r-out-of-k:G system, distribution-free confidence bound for Pr{Y<X} 86−34122
R-R interval state transition probability matrices, texture anal. 88−48186
radar, clutter residuals, modelling and estimation 85−37090
radar, noisy multidimensional Gaussian signals classification, reliability and information content *(Russian)* 88−22186
radar, slowly fluctuating target, multiple detection 86−4700
radar CFAR problems in a non-Gaussian clutter environment, threshold estimation technique 86−30851
radar CFAR problems in Weibull clutter 85−37092
radar clutter suppression, simulation *(Japanese)* 86−11166
radar detection probabilities evaluation 88−15507
radar detection probabilities evaluation, by steepest descent integration 85−14335
radar noise source calibration considerations *(German)* 86−43885
radar range performance air/air interception, evaluation criteria *(French)* 87−13765
radar target glint/receiver signals joint representation 86−55331
radiation hardness, step stress meas., statistical anal. 85−18397
radio, random phase vectors sum, probability density function of squared envelope 86−4472
radio channel with Rician fading and Gaussian noise, binary transmission error probability *(Polish)* 87−54791
radio channels, nonGaussian interference, probability density approx. 86−16089
radio communications equipment, unforeseen interference probability 88−9396
radio echoes from meteors, amplitude-time selector of reflections *(Russian)* 85−3354
radio image construction of object, max. probability method 88−66681
radio links, distributed parameters, prob. of falling below specified level 88−72717
radio systems, crest factor interference and noise, error probability estimation 86−30611
radio systems, digital, 16-QAM and 64 QAM, field test results, comparison with sweep meas. 87−28396
radio systems, digital, intersymbol interference probability density 87−34404
radio systems sensitivity anal. of digital modulation technique to frequency selective fading 86−4471
rainfall, simultaneous occurrence probabilities among locations in Japan, rel. to satellite communications 87−2298
RAM systems functional testing, probabilistic algorithm 86−46830
random access communication and graph entropy 88−66250
random access communication and graph entropy 87−54796
random bichromatic graph, asymptotic probability distribution of the degrees of vertices 85−294
random binary sources, information and probability theories *(Italian)* 85−36151
random communication networks, decentralised estimation and control 86−16767
random equations *(Rumanian)* 85−10587
random graphs in n-cube, components 87−31398
random multiple-access channel with unknown interference probabilities, adaptive algorithm 87−55423
random network model of message transmission 87−27688
random pattern testability of digital designs, improved techniques for estimating signal probabilities 87−24105
random power system harmonics, probability distrib. 85−64844
random process, divider output, characteristics determ. 88−31621
random processes, sufficient sequences and state space 86−34118
random sampling, vel. spectra distortion and reconstruction, fast Fourier transform anal. 87−19697
probability continued
random sequence of independent rectangular pulses, probability characteris. 88−3044
random sequences, property changes, nonsequential detection 88−31617
random sets and fuzzy sets 85−16862
random signal treatment, probability distribution function 85−37398
random testing of MC-6800 microprocessors 86−41150
random time replacement used for the coupling of random fields 88−49624
random variable and its inverse distrib. fn., simple general approxs. 86−46170
random variate generation for Monte Carlo experiments 85−60811
random-signal detection in additive noise, rank statistics 88−27980
randomly inhomogeneous media, wave propag., most probable characteristic determ. 88−45677
randomly-phased sine wave combinations, probability distributions 86−29828
range data segmentation. max. likelihood approach 88−73286
range image data segmentation, max. likelihood approach 88−52512
rapid Rayleigh fading channels, error probability for optimal and suboptimal quadratic receivers 87−34350
raster display image information content interpolation estimation 86−54532
rate−1/2 convolutional codes with QPSK on Rayleigh fading channel, performance bounds 86−68974
rate and distortion of vector quantization *(Chinese)* 88−40778
Rayleigh fading environment, capacity of radio system with diversity 88−46102
Rayleigh processes, first and second passage times 87−51938
re-sampling procedures for reducing bias of error rateestimation in multinomial classification 86−57309
reactor coolant pump motor failure rates, prediction using probabilistic techniques 87−71889
reactors, small, for district heating, probabilistic safety anal. 86−56569
real-time meas. of probability density functions 87−3361
real-time measurement of time varying probability density functions 87−44120
reasoning systems, consistency problem of statistical independence assumptions 87−51946
receiver noise immunity evaluation using a functional-based model with probabilistic transfer characteristic 88−67548
receptor immunity limits establishment bases, EM environment 87−26863
rechargeable battery optimisation on basis of required reliability level 86−66637
recognition of stream of directly unobservable random events 86−37117
recursive filtering algorithms for systems with piecewise-linear nonlinearities 87−19630
recursive image registration with application to motion estimation 87−33743
recursive piecewise-linear filtering, applied problems 87−27366
redundant systems, reliability, BASIC program 86−46141
redundant systems with dependent human error, unavailability analysis 85−22280
redundant systems with partially energised standby units, common-cause failure and human error modelling 87−65257
Reed-Solomon coded freq. hop spread-spectrum communication systems, multiple-access capability 87−40703
Reed-Solomon codes, decoder error probability 87−54922
Reed-Solomon codes, performance probabilities 87−68994
rejection probability in meas. instruments testing , interval estimates 88−74223
relative entropy method implementation using iterative algorithm, probability mass function estimation 88−70260
relative useful information axiomatic characterisation 86−43117
relative-entropy minimisation with uncertain constraints, appl. to spectrum anal. 88−34545
relaxation scene labelling, compatibility support functions 87−48077
relay protection network aperiodic current probabilistic characteristics rel. to switching phase *(Russian)* 88−10904
reliability charact. calc., condition parameter based approach 87−65258
reliability discipline and technology, in historical perspective−1930 to 1984 85−39586
reliability growth, rationale for a modified Duane model 85−16826
reliability growth forecasting from attribute integer data 86−66636
reliability of three-state device networks 87−36545
reliability quantification by numerical solution of integral equations 85−60809
reliability test and analysis categories, probability and relevance-free theory 86−40591
reliability theory, Bayes sensitivity analysis when using the beta distribution as a prior 88−63090
reliability theory, event-trees with small transition probabilities, incremental resource allocation 86−52323
reliable network design, reduction to graph extremal problem, validity 88−24858
repair-part support by spares provision by cannibalization, for US Air Force F-106 simulators 85−60800
repairable components reliability anal., during early failure period *(Chinese)* 85−10552
repairable systems, stochastic behaviour and profit function of a systemwith precautionary measures under abnormal weather 86−7564
repairs/failures, expected numbers, direct computation using integral eqn. approach 85−33233
repetitive probability integrals, properties 85−16847
replacement models, discrete and continuous distributions 88−31550
residential photovoltaic system, economic eval. using probability model 87−51095
retransmission protocols in processor interconnection networks, performance evaluation 85−42283
RF ignition and detonation hazards, British Standards and probabilistic factors 86−66589
RF ignition and detonation hazards, probabilistic factors eval. 87−10113
RF ignition and detonation hazards analyses, probabilistic factors and British standards 87−31268
RF noise, amplitude probability distrib. 86−36747
RFI, probability problem 86−15935
Rice-Cramer-Leadbetter level crossing formulas, generalisation to harmonisable processes 87−51944
risk assessment, uncertainty propagation analysis, Monte Carlo method without sorting, appl. 85−28108
Risk Management Query System 86−57274
RMS eye closure, error probability, interference effect approx. 86−64168

probability continued
robust and verifiable cryptographically secure electionscheme 86−22930
robust BFSK FH-SS communication system, performance anal. in partial band noise jamming 87−40675
robust classification procedures 88−56115
robust distributed block and sequential continuous-time detection 88−46123
robust sequential detect. procedure *(Chinese)* 88−34623
robustness of a modified greatest-of CFAR detector 87−34632
routing in network with unreliable links 88−52671
RSA and Rabin encryption functions, complexity of part/whole computation 88−45913
run-length limited codes, max.-likelihood decoding 88−52355
S-ALDHA multi hop networks, throughput and delay 88−41577
S/N distribution function for combining median signal predetection optimum diversity *(Chinese)* 86−64231
safety, gasoline ignition under HVAC transmission lines during vehicle refuelling, probability 86−13423
safety/risk probabilistic assessment *(Japanese)* 88−6217
sample estimate of the entropy of a random vector 88−27726
sampling inspection of lot lifetime, Bayesian reliability study with Type I censoring 88−43723
SARSAT signals identification 87−56230
satellite channels for distributed data systems 85−14150
satellite communication, variable cct. assignment appl. methods 88−60078
satellite launch vehicle Bayesian reliability assessment 85−33217
satellite links, rain fade duration, prob. distribution calcs. using lognormal Markov model 87−47189
Saudi Arabian least cost network design 87−34019
scale-space filtering, uniqueness of Gaussian kernel 86−43307
scan statistic tail probabilities for testing nonrandom clustering, improved upper bound 88−56112
scene segmentation from visual motion using global optimization 87−47900
search radar evaluation by the normalized cumulativeprobability of detection curves 87−3218
segmentation, multi-modal, using Markov random fields 88−8873
self-calibration of six-port in the presence of noise 88−60894
semi-custom circuits, probability based design verification 86−41068
semiconductor diode, reliability study, probabilistic anal. *(Polish)* 85−34918
semiconductor laser intensity fluctuations, effect on communication system performance, error probability 87−34570
semicustom design verification based on probabilities 86−35789
semistable distributions in R^d 85−60836
separability measures and Bayes probability of error, relationship 88−27708
sequence of Bernoulli trials with preselected number of successes, maximum likelihood estimator 86−48914
sequential Bayesian classification, stopping rules with thresholds *(Japanese)* 88−72966
sequential decoding, BER performance study *(Japanese)* 87−2455
sequential detection algorithms for multiple composite hypothesis testing 86−3911
sequential lifetime testing, interval estimation 85−33249
sequential signal detection, real time, architectures 88−27950
series-parallel systems availability charact. prediction 85−39587
shift register with feedbacks, probabilistic anal. for test generator *(Russian)* 87−44738
shock proof systems, reliability considerations *(German)* 86−7475
short-circuit currents, probability charact. *(Russian)* 86−6414
shortest-path problem for graphs with random arc-lengths 85−22323
signal acquisition probability for correlation algorithm 87−7753
signal amplitudes, log-normal distribution, probability density of elevation and range noise 87−13756
signal code combinations described by gamma distrib., occurrence probability 86−16312
signal detection, double threshold detector analysis 85−57360
signal detection, maximum likelihood direction finding estimation algorithm, mean square error determ. 85−7907
signal detection, X^2 test appl. 87−61993
signal detection in noise, stability 85−51679
signal detection on a background of interference inan acoustooptical spectrum analyzer 86−16306
signal detection theory, statistical, relationship to Hough transform 88−66612
signal discrimination, rejection decision probability vector minimisation 86−29878
signal processing 87−39842
signal source location by nonlinear eigenstructure-based harmonic processing 87−56302
signal understanding, probabilistic control strategies 88−59087
signal-fn. reconstruction in terms of finite data set *(Russian)* 87−27419
signal/narrowband noise sum, prob. distribution of instantaneous freq. 87−68918
signals detection time, automation with continuous sets, probability density anal. 85−36279
signals in Gaussian white noise, sequential testing for several signals 85−7789
signals reception with unknown delay, modulating noise presence 87−39780
signature anal. for binary sequence data control, validity *(Russian)* 86−14096
signature analysis, reliability *(Russian)* 88−57738
signature analysis, use of faulty signatures 88−19082
signature analysis register used in self-testing networks, aliasing errors analysis 87−24109
signature analysis registers, aliasing errors with primitive and nonprimitive polynomials 88−19083
signature analysis registers behaviour monitoring, fast analysis 88−19084
signature circuit for LSI self-testing, error detecting probability analysis 86−67169
signature ct. for LSI testing, analysis and proposal 88−19079
signature recognition through spectral analysis 87−62297
simulated annealing anal. for optimisation 86−52374
simultaneous service model with finite capacity in a data-flow control scheme *(Japanese)* 88−21392
sine-wave signal discrete phase detector, anal. 87−39781
single phase autoreclosure system off-time, probability charact. of operating parameters *(Russian)* 88−30955
single server two unit system, s-expected number of inspections and repairs, cost benefit analysis 85−22181
single-channel queueing problem with intermittently available server, time dependent solution 87−23455
probability continued
single-line queueing system with relative priority and exponentially bounded waiting time 85−28099
single-server queueing system, asymptotic distribution of queue length 87−10239
single-server two-unit system with slow switch/random service, cost-benefit anal. 85−33237
singular value decomposition based algorithms, threshold anal. 88−73076
sinusoid extraction from white noise, Prony modelling of higher-order correlation function 88−73077
SIRIO satellite for attenuation statistics in Italy 85−20120
slotted ALOHA line networks, performance anal. 88−8923
slotted ALOHA system, multiple access protocols, approx. performance evaluation 86−30117
slotted ALOHA systems, optimal control by retransmission probability 85−52075
SLP recourse problems with arbitrary multivariate distribs., independent case solution 88−70241
soil model, two layer, parameters estimation, statistical, from driven rod measurements, for power system earthing design 85−9539
solid-waste steam power plant planning, risk management using probability criteria 85−15875
sonar, passive, trajectory plotting by triangulation *(French)* 88−22225
sonar, range resolution, optimal sequences for detection using a matched filter binary integrator 87−63077
sound field, logarithmic least mean square estimation 87−63080
source coding theorem and large deviation theory 87−54990
source-to-*K*-terminal reliability in directed graph, recursive algorithm 86−46129
space division packet switch, input vs. output queueing 87−40029
spark gaps, high energy, performance evaluation, math. model 85−5313
SPC ESS, delay-loss system for overload protection, performance study 85−57548
SPC-CCIS-telephone networks, dynamic channel allocation 85−63242
speaker-independent English consonant recognition in continuous speech 87−47628
speaker-independent English phoneme recognition by a stochastic dynamic time warping method and a statistical method *(Japanese)* 87−39707
speckled images, modelling and segmentation 87−62246
spectral properties of moving L-estimates of independent data 87−61872
speech interpolation, digital, overload computation as function of traffic offered 85−46736
speech recogniser, language model component, probabilities estimation from sparse data 87−39690
speech recognition, acoustic word model estimation, relation between modelling approaches 88−66339
speech recognition, continuous, phone superclasses automatic generation and evaluation 87−47600
speech recognition, stochastic segment modelling using the estimate-maximize algorithm [speech recognition] 88−66364
speech recognition systems, probabilistic model, error probability estimators 85−13496
speech signals, noiseless encoding 87−75741
spoken word variation and probability estimation 86−48837
spread spectrum capture capability networks, collision resolution algorithms 87−40704
spread spectrum communication modem based on SAW convolvers, synchronisation 85−30880
spread spectrum signals, as SNR estimator, appl. of a binary quantising digital matched filter 86−29959
spread-spectrum packet radio networks, freq. hopped, packet error probability 88−41515
square roots computation, simple and fast probabilistic algorithm appl. 87−23447
square-law detector-logarithmic amplifier, false alarm and threshold probability 86−37026
stable slotted ALOHA systems, delay anal. 86−54626
standby device optimal design, reliability of repair facilities 87−31359
standby equipment reliability when subjected to periodic testing 87−58728
staring mosaic sensor in geosynchronous orbit data, image processing for target detection 85−31078
state-dependent queues, unifying diffusion model 87−55378
static priority queues with application to a computer network 88−49627
stationary Gaussian process, locating maximum by sequential search 88−24629
stationary Markov renewal process on the whole time axis 88−31626
stationary processes, recursive probability density estimators, almost sure convergence rates 87−51943
stationary processes, weakly dependent, recursive probability density estimation 86−59182
statistical cct. design, yield gradient estimation for non-differentiable density fns., yield optimisation appl. 86−66939
statistical characteristics of the ratio of correlated Rice random variables 88−2915
statistical methods applied to decision making in management 86−13357
statistical modelling of accident consequence processes 87−23290
statistical pattern recognition models, optimal linear feature selection 85−51726
statistical probability equivalents for composite power supply systems, STAT-REI equivalent *(Russian)* 87−77961
statistical symbol classification, supervised, general software system 87−48071
statistically dependent elements redundancy *(Spanish)* 85−22278
stereo imaging system quantisation error 88−73303
still picture encoding with successive clustering and predictive vector quantisation *(Japanese)* 87−48002
stochastic flow network with capacity-constraints and failures at branches and nodes, reliability anal. 87−31333
stochastic networks, probability distribution function approximation 85−49438
stochastic orderings of probability distributions, meas. representation 86−62005
stochastic Petri nets, anal. by transition rate matrix decomposition 87−61545
stochastic power systems, availability evaluation, generating function approach 85−32131
stochastic programming, probabilistic constrained problems, dual method 87−5349
stochastic selective conversion 86−24254

probability continued
stochastic signal processing of incomplete observation data with amplitude limitation and state estimation under the existence of additional noise 88−34713
stochastic systems, evolution of nth probability density and entropy function 88−63155
storage processes with Markov additive input and output 85−290
strict consecutive-k-out-of-n:F systems, failure probability 88−38027
strict-consecutive-k-out-of-n:F system, closed formulas for failure probability 87−58721
strong law of large numbers for unbounded randomsets in a separable Banach space 85−49418
structural pattern recognition, sequential inference of Markov networks by dynamic programming 87−39927
structural reliability, strength-stress reln., probability estimation 88−31545
submicron devices, scaling laws and yield implications for VLSI 88−44811
substation earthing systems, probabilistic evaluation of safety *(French)* 85−32622
substation strain bus system, probabilistic short-circuit uprating 86−66124
successive damage shock model based on Palm probability 85−44548
suppressed-carrier N-ary PSK signals, tracking, N-phase digital tanlock loop appl. 86−3718
surveillance system evaluation, multitarget tracking technique 88−28937
switch level random pattern testability analysis , controllability and observability calc. 88−70717
switching impulse breakdown of sphere/plane air gap, humidity and gas density effect 88−20177
switching systems with nonuniform load, loss probability calc. 85−8252
switching units, dynamic control under conditions of limited carrying capacity 85−7965
symmetry and reversible symmetry concerning generalized directed divergence 88−52318
system failure, general probability 85−5830
system failure, probability of component or subsystem failure before system failure 85−5831
system failure probability, improved upper and lower bounds 88−6323
system failure probability eval. using new Monte Carlo method 87−58717
system for recognizing 1D normal sets, time parameters optimisation 86−37086
system reliability bounds determ. 86−7571
system reliability in the presence of common-causefailures 86−46128
system reliability modelling, process dependent failure and error repetition, probabilistic and meas. approach 87−31326
t distribution−a derivation, calculation of probabilities, and computer programs 88−6363
tactical land-mobile radio environment, interference probability computation 86−30676
tamed RM receiver, carrier and clock recovery, synchronisation study 86−30613
target detection simulation by passive sonobuoy field for aircraft-carrier task force protection 88−68682
target tracking, distributed, with probabilistic data association 88−40986
target-oriented optical imagery simulation, Monte Carlo methods 88−21323
targets range resolution, likelihood and ad hoc approaches 85−25918
TDMA and FDMA channels, bit error performance, delay and probability 87−40035
TDMA networks with bursts of traffic, nodes calc. *(German)* 86−54396
telecommunication equipment, reliability analysis using Bayesian techniques 85−7989
telecommunication lines, impulsive noise charcts., statistical eval. *(Japanese)* 87−13551
telecommunication M(t)/M(t)/1 loss system, blocking probability determ. 85−19612
telecommunication network reliability estimation by nonedge-intersecting chains/cuts method, computational effectiveness 87−48276
telecommunication network traffic engineering techniques, with waiting facilities 85−19657
telecommunication networks, end-to-end blocking probability and repeated call attempts *(Japanese)* 88−21475
telecommunication networks, note on contention 85−25003
telecommunication services, hierarchically organised systems, service availability evaluation 85−42037
telecommunication traffic, heterogeneous, with no queueing, optimal service allocation 88−46367
telecommunication traffic analysis of a network with extensive alternative routing and mutual overflow 88−14565
telecommunications, planning system with uncertain demands, optimal time interval 86−64528
telegraph message indexing system, automatic, efficiency factors probability estimation 88−34999
telephone junction network optimisation method under end-to-end blocking probability constraints 85−19696
telephone network dimensioning models, comparison 85−19683
telephone network sizing procedure using probability distrib. of traffic data 86−64579
telephone networks, routing optimisation 87−13278
telephone short-cut trunk ccts. engineering with consideration of daily traffic variations between links *(Japanese)* 87−76220
telephone traffic, time to system blockage, Erlang formula generalisation 88−73501
telephone traffic calcs., statistical methods and probability concept 87−13283
telephone traffic parameters estimation in exchange 88−3445
telephony, subscriber trunk group design, based on repeated calls and waiting 85−8267
testability by random test patterns of faults 87−24117
texture segmentation using Voronoi polygons 88−73299
thermal imager, relation between instantaneous field of view and recognition performance *(Japanese)* 85−19531
thermal power stations, technical reliability planning, effects on annual production costs *(German)* 87−50984
three-dimensional object recognition from single two-dimensional images 87−39869
three-stage switching networks for N:1 multiconnection, charcts. and traffic handling performance *(Japanese)* 87−48286
three-state device networks, reliability eval. using probability tree procedure 87−157
three-state standby redundant electronic equipment, failure and cost anal. 86−13582
probability continued
thyristor convertor parasitic sensitivity and failure probability evaluation 86−66174
thyristor reliability charcts., estimation algorithm for determining influence of electrophysical parameters *(Polish)* 88−13361
time dependent queueing system with two parallel channels, theoretical study 88−18555
time multiplex networks with multiple access and burst traffic, node computation *(German)* 86−37209
time-dependent queueing problem with departures having random memory 85−44586
time-series variation of answer's probability distribution by a selection model *(Japanese)* 87−51782
time-varying spectral probability estimation 87−62041
timed Petri net models of queueing systems 88−49626
timed Petri net probability semantics 87−23511
token ring system with priority message classes, approximation 88−21635
token-ring systems with limited service, traffic anal. *(Japanese)* 87−55745
tolerance test efficiency analysis, using programmable microcalculators 87−108
touch screen displays, one-dimensional parallax error compensation 88−16341
track biases and coalescence with probabilistic dataassociation 86−23947
traffic anal. of combined loss and delay system *(Japanese)* 86−59445
traffic analysis of loss-delay combined model with batch arrivals 87−19986
traffic study of loss systems for one-way and two-way calls 87−19985
trafficability and reliability analysis for the digital switching network 88−41480
transient signals, systems synthesis for adaptive processing, probability criteria based 88−14709
transition meas. of amplitude probability density distrib. 86−57236
transition process of probability distribution of answers in regard to students' discussion in instruction *(Japanese)* 87−51783
transmission network reliability, probabilistic transfer capability anal. 86−18778
transmission network short-circuit currents, probability charcts. *(Russian)* 85−64872
transmission system improvement priority determ., probabilistic approach 87−78054
transmission system overhead lines, effect on insulation and insulators of steeply-rising lightning discharges *(Russian)* 85−59752
transmission system performance methods, probabilistic transfer capability 85−64865
transparent random structures, distrib. function of probability determ., time interval summing methods *(Czech)* 86−50017
transposition ciphers, error probabilities 88−59046
trellis coded QAM, bit error probability over cross coupled multidimensional channels 87−39591
trellis codes, performance eval. 87−54893
trellis codes with multilevel AM, error probability criterion, optimisation 87−2428
triangulation ranging, time delay meas. errors modelling by conditional beta density functions 87−69123
trunk groups with mixed two-way and one-way trunks, optimal design considerations *(Japanese)* 88−21551
trunk reservation equalisation for mixtures of several bandwidth traffic, loss probability expression *(Japanese)* 87−76224
truth estimation using logic analysers in digital information perception *(Russian)* 88−74301
TST type switching networks using sequential path hunting mode, approx. performance eval. *(Japanese)* 88−21393
tunable facet model likelihood generators for boundary pixel detection 88−28095
turbine blade service life under irregular loading, fatigue crack probability analysis 85−15843
turbulent atmospheric, radiation energy propagation, statistical modelling 86−22657
two interconnected power systems, impact of load management and joint ownership of generation 85−43510
two-branch switch and stay diversity system output, PDF calc., comment 87−13180
two-channel system, zero-crossings probability of random processes 88−40958
two-channel time delay estimation, worst case error probability, lower bounds 86−16460
two-dimensional discrete stochastic congruences in communications 87−47823
two-dimensional spatial patterns analysis, IC manufacture appl. 86−28393
two-level system optimal recognition algorithms, numerical methods 88−21359
two-measuring devices unification, Markov-Gaussian random process estimation 87−47773
two-moment approximation for a buffer designproblem requiring a small rejection probability 85−51526
two-node Markov chain, correlation coeff. determ. 87−23463
two-node Markov chain, meas. of stationary state probabilities 87−44116
two-parameter exponential distrib., optimum two-sided confidence interval for location parameter 86−250
two-phase queueing system with multiplicative distribution of the stationary probabilities 88−31606
two-pole networks with unreliable arcs, math. expectation of throughput, two-sided estimates 88−31569
two-priority packet broadcast channel, stability conditions 85−57574
two-unit cold standby system, two operation/repair modes, cost anal. 85−33229
two-unit cold standby system with two-phase repair and preventive maintenance 86−40575
two-unit electronic parallel redundant system with overloading effect, cost anal 86−13566
two-unit parallel system with inspection and bivariate exponential life times, availability anal. 85−33230
two-unit priority standby system with imperfect switch and arbitrary distribs., cost anal. 85−33228
two-unit standby system with delayed replacement, cost anal. 85−33231
TWT, amplification of random signals, anal. 87−45524
unbiased bits from sources of weak randomness and probabilistic communication complexity 88−45819
unbiased reconstructions determination 86−3729
uncertainty and information possibilistic measures uniqueness 88−8640
uncertainty spaces−entropy and the coding theorem 85−30169

probability continued
undirected network, monte Carlo sampling plan for estimating reliability parameters and related functions 87−51931
unifilar and Markov sources, minimax universal noiseless coding 88−27783
uniform distribution identification, test statistic and appl. to probability plotting 87−58788
uniform estimation of an unknown probabilitydistribution density 86−36886
unique work detection in low carrier/noise ratio condition, hardware and performance study *(Japanese)* 87−23999
UNIX STREAMS communication buffer allocation algorithm based on Erlang traffic model 88−52964
USSR national power system investigation, steady state probability analysis methods *(Russian)* 85−21072
vacuum spark gap switches, probability of recovery to withstand voltage 85−27129
variable cct. assignment in satellite communications, traffic anal. and appl. methods *(Japanese)* 87−28482
variable-dwell time PN acquisition systems, performance evaluation 85−30157
vector optical field, optimum processing in presence of atmospheric distortions 88−8483
vector quantisers, optimisation algorithm *(Slovak)* 87−12882
vector quantizers with tree encoding *(Slovak)* 87−33617
VHF wideband power amplifiers, undesirable oscillations reduction 86−34572
video, nonreturn to zero recording, performance anal. of partial response systems 86−69941
violation probability in coded signal transmission using Markov chains *(Polish)* 87−61904
virtual time CSMA protocol for integrated voice-data 85−8222
Viterbi decoding, probability of error due to metric ties 87−54891
Viterbi decoding using importance sampling 88−34562
VLSI ccts, testability, test generation algorithms, using non-backtracking heuristics 86−47738
VLSI-like model, randomized routing on fat-trees 86−21801
VLSIC structural failures analysis, using RYE realistic yield simulator 88−13533
voiced/unvoiced decisions optimisation in nonstationary noise environments 87−33652
waiting system with two stages and blocking probability 88−63147
wald's identity and sequential test performance with dependent data 88−31627
Walsh signals with differential modulation, data transmission 88−46069
waveform parameters estimation for arbitrary confidence levels 87−70531
weak signals in nongaussian noise of unknown power, video detection rules 85−20342
Weibull, lognormal and gamma distribs., 3-parameter, estimation 85−44592
Weibull distribution, three-parameter, properties of moment estimators 85−16851
Weibull distribution graphical identification, human factors 85−5901
Weibull failure-distribution function calc. on basis of statistical growth model *(German)* 87−154
Weibull process modified max. likelihood estimators, reliability analyses 88−63099
Weibull reliability and quantiles, confidence limits 86−248
weighted decoding, probability distribution reestimation *(French)* 88−21071
weighted pyramid and elliptical vector quantizers 87−54886
Wiener-Hermite expansion coefficients of wave field, linear equations, random rough surface scattering 86−68705
Wigner-Ville distrib., time and lag window selection 87−62023
wind energy conversion/storage system simulation, probabilistic model 85−27369
wind turbines, annual energy output predeterm. using statistical Rayleigh distrib. *(Romanian)* 88−37122
GaAs adders, stochastic propagation delays 88−32179
Si, energy deposited by mesons in 1-μm sites, probability distrib. 87−32225

probes
see also electron probes; plasma probes
1 THz bandwidth probing of devices and integrated circuits using electro-optic sampling 88−39653
3D eddy current NDT phenomena, defect detection 86−40805
3D tactile sensing probe head *(Japanese)* 87−21037
8-channel logic analyser, add-on unit design *(German)* 87−14233
8-channel logic analyser, intelligent probe and trigger auxiliary *(German)* 87−63304
10 MHz undersea sound attenuation probe for submicron bubble and particulate determ. 85−4470
'sniffer' probe of He, leak detection of nuclear power plant vessels *(Chinese)* 86−38370
acoustic probe based apparatus, for space charge field meas. in solid dielectrics 85−8801
active loop antennas, appl. as probes for EM field meas. 88−8615
active probe scaler 400-1300 MHz 86−55806
active RF probe design for spectrum analysers 87−29159
active wideband probes, for EM pulse electric-field strength meas. 85−48037
adjacent field measuring probe, Hewlett-Packard HP 11940A, electronic equipment EM emission testing appl. *(French)* 87−77350
air-flow direction detector system 85−3955
analogue test probe type AP2 *(German)* 87−14375
antenna arrays, defective elements location, near-field probe as diagnostic tool 88−72687
antenna near field meas., probe for amplitude and phase meas. of 3D EM fields *(German)* 85−3951
antenna near-field measurements using directive probes 86−29626
antennas, planar near-field correction parameters for linearly polarised probes, accurate determ. 88−72665
antennas in waveguide, mutual impedance anal. 88−2735
antennas on structures near fields prediction and meas. 86−16022
Argus eye, optical correction in SMD fixing systems *(German)* 88−50513
atmospheric optical probe signal processing by optical Markov filtering *(Russian)* 86−25408
automatic point probe apparatus for elec. testing of cryoelectronic devices at 78K 85−47837
automatic prober movement control, wafer test site coverage 87−60537
automobile engine oil temp. meas. using thick film probes *(Polish)* 85−3948
balloon-borne chemiluminescent sonde for tropospheric and stratospheric NO meas. 85−4452
bare board test methods for high density designs 88−32603
bare board test probe selection criteria 86−53169
batch fermentation pH meas. probe design and construction criteria 86−24827
beam probing for IC and wafer inspection 86−53762
bi-directional velocity probes for pool-fire tests 88−35924
bias probe meas. of electric fields, assessment and improvement 87−49863
blood cell counter sampling probes, amplifier design considerations 86−50574
broadband electric-field probe using resist. tapered dipoles 87−8729
broadband isotropic elec. field, probe with tapered-resistive dipoles, 100 kHz-18 GHz use 87−41581
broadband isotropic electric-field probe with tapered resistive dipoles for 100 kHz-18 GHz 87−29222
broadband transmission cell for calibrating RF and microwave field probes 86−31622
buried objects probing by underground radar *(Japanese)* 85−8447
capacitance transducer with a point-like probe for receiving acoustic emissions 85−3971
capacitative wired ball field probe for electric field strength meas., lightning phenomena *(German)* 86−55799
capacitive, for spark gap voltage meas. 86−17952
capacitive field probes for measurement of transientelectric fields and voltages *(German)* 85−58650
capacitive probe for HV nanosecond pulses 87−14301
capacitive sensors for voltage measurements in pulse power systems 85−26322
cerebral probe implantation method, spatial viewing, simulator using floating line concept 87−63807
chip transfer head with programmable probe centerlines 86−58521
cholesteric liquid crystal temperature probes *(Spanish)* 85−4145
circuit testing, probe impedance as cause of signal distortion 85−52719
circular microstrip ring antenna, probe excited, input impedance anal. 86−3682
close-field probe, Hewlett-Packard 11940A, hand-held mag. field sensor for EMI troubleshooting 86−31398
CMOS oscilloscopic meas., probe choice *(German)* 85−11163
CMOS/TTL logic probe 85−31501
coaxial, open-circuit, microwave dielectric meas. developments at NPL 86−31620
coaxial, time domain spectroscopy for dielectric props. meas. 87−14484
coaxial cable dielectric coating method for VLSI device test appls. 85−34232
coaxial cable leakage surface wave direction detection by strip line directional-coupler probe 88−59958
coaxial line, in situ procedure for dielectric props. meas. 86−44392
coaxial line excited monopole probes for in situ permittivity meas. 88−16070
coaxial probe antenna in arbitrarily terminated rectangular waveguide 85−46615
coaxial probes with finite ground plane for biological dielec. props. meas. 88−36416
coaxially fed hollow probe in a rectangular waveguide 85−57080
combination probe for high-frequency unsteady aerodynamic meas. 88−47474
contact profile meters, sensor tips control, gauge marks fabrication *(Slovak)* 87−70797
contactless electrical connections to circuits on semiconductor chips 85−40823
contactless internal mode probing; IC high-speed testing and trends requirements 87−25478
continuity tester, audio indication 85−11445
coplanar waveguide, microwave probe system tests GaAs MMICs 87−11055
COSEC-squared antenna patterns prediction from near-field meas. 86−22818
CRO probes, design, characts. and appls. *(German)* 86−38421
cross-field amplifier measurements with a rotating RFE-field probe 86−62996
cryogenic wafer prober, design and performance 86−20406
CTD sonde for profiling speeds upto 7-10 ms^{-1} 86−60961
current density monitor for intense relativistic electron beams 87−14660
cylindrical near-field meas., personal computer appl. 88−2714
dB/dt probe for fast current pulse meas. in hostile environments 88−47507
DC machine characterisation by spiral probes and rotor current transformers *(Rumanian)* 86−6779
deep space station at Usada with 64 m diameter antenna 86−69735
diagnostic testing of probe cable 87−6179
dielectric resonator external Q when probe-coupled 86−53010
differentiator probe, high speed, response characteristics 88−16041
digital magnetic fluxmeter using unijunction transistor probe, design and implementation 88−22684
dilution probe techniques for continuous source emission monitoring 86−44465
dipole probe development, for dielectric props. meas. of biological substances 86−44639
directional scanning of complex electromagneticenvironments 86−22595
directional sensitivity of unplated slanted-wire probes 87−56906
double resonance NMR probe for electromagnets 88−27462
double resonant transformer, 500 kV, for HV probes and resistor materials testing 87−22509
dual mode cavities, modelling of coupling by coaxial probes 88−70988
E-field microwave three-axis probe with submillimeter dimensions 87−14328
eddy current, probe for testing mildly ferromag. tubing 85−473
eddy current coil impedance in crack vicinity 85−10879
eddy current NDT probe phenomena, finite element anal., impedance and mesh structure considerations 86−42761
eddy current probe, errors in resist. meas. of cylindrical testpieces 86−57499
eddy current probe, microwave FMR, and signal processing methods 85−17041
eddy current probe, pulsed, design parameters, flaw detection and characterisation 85−17039
eddy current probe coupling method using air-bearing 85−17040
eddy current probe design and testing, exptl. methods 85−6094
eddy current probe impedance plane trajectories, Fourier descriptor classification 85−10880

probes continued
eddy current probe with ferrite ore, model, development and verification 85−10885
eddy current probes, 2-dimensional modelling, application to nondestructive testing *(French)* 85−24721
eddy current probes with improved signal/noise properties 88−22583
eddy current signal calculations for surface breaking cracks 85−6095
eddy current surface probes, double coil design and finite element analysis 85−10887
eddy current system, stat. detection model 85−6096
eddy current tape-head probe, design, eval. and characts. 85−10886
eddy current test samples, probes and scanning system 85−6093
eddy current testers, shielded probe sensitivity and design 86−66871
eddy current testing probes for aircraft inspection 87−8584
eddy-current parametric transducer with improvedcharacteristics 86−57500
electric current perturbation probe, model and optimisation problem 85−10884
electric field meas., probe position determ. using differential transformations *(Russian)* 85−26431
electric field probes, flat, 60 Hz, calibration 85−37694
electrical and optical measurements of fast risetime, high power pulser 85−4060
electrical conductivity measurement of Si wafers by point probes *(Rumanian)* 86−5480
electrical prober for lithographic processing equipment eval. in IC submicron fabrication 87−11865
electrical resistivity, four-point probe, ultrahigh vacuum compatibility 87−35168
electrical test probe alignment aid 86−60115
electro-optic probing of electric fields 87−3702
electro-optic sampling probe for microstrip transmission line on GaAs substrate 85−2084
electro-optical probe for IC testing, full-field modeling 88−2059
electrochemical probe with chromoamperometric controller for dissolved O_2 concentration determ. 88−74339
electron beam probe technique for voltage/freq. meas. for IC testing *(Dutch)* 86−35743
electron-beam probing, charging phenomena and voltage contrast anal. *(Japanese)* 86−47646
electronic liquid level regulation system with alarm/metering facilities *(Spanish)* 85−15084
electronic probes, for various measurements in bore holes for oil prospecting *(Swedish)* 85−21003
electrostatic hazards in powder silos 88−34216
electrostatic microprobes for charge measurement on powders 85−46540
electrostatic potential measurement, fixed probe method 87−49865
electrostatic precipitators back-discharge bipolar current probe 87−3563
electrostatic voltage measurement, probe design using vibrating diaphragm 85−8916
EM field pattern automatic meas. system, EM environment analysis 86−70185
EM immune RF probe, LED and optical fibre appl. 86−5444
EM induction testing of concrete reinforced with steel bars 88−18820
EMC testing of elec. equipment, use of test probes for interference sources location *(German)* 88−45715
EMC/RFI measurement methodologies, review 85−46590
EMI field impedance estimation by sniffer probe and oscilloscope 87−75461
EMI meas., anechoic chambers and field probes 87−14512
EMI meas. using current probe and spectrum analyser 87−75468
EMI problem soln. with oscilloscope and sniffer probe, implementation prescreening 87−75462
enzyme electrodes, biochemical assessment of patients appl. 88−16677
equivalent current meas. technique, current probe methods comparison 86−38476
Ethernet network measurement with logic analyser *(German)* 85−47882
Euler-column probe for SMT assemblies 86−53129
failure mode criteria comparison in EM environments 86−24744
fast measurement techniques for research in dielectrics 87−21208
ferromagnetic probes and their application *(Czech)* 87−63399
ferroprobe excitation, maximum field strength calc. 85−48036
ferroprobe with controllable nonlinear elec. resist. in exciting current, magnetic flaw detection appl. 88−70377
fiber optic differential temp. probe, using light absorption in GaAs 88−47551
fiber optic microwave power probe 87−41481
fibre heterodyne interferometer probe, small displacement meas. appl. 88−22627
fibre optic probes for ophthalmology 87−29732
fibre optic refractometer for liquids, probe config. using freq.-domain reflectometry 85−56296
fibre optic sensors, microcapsule assembling technique 88−42113
fibre optic temperature probe system for use in coal combustors 88−16153
fibre optic temperature probe using semiconductor sensor 88−7905
fibre optic temperature sensor with wavelength-dependent detection using GaAs sensor 88−42138
fibre-optic vibration probe, based on laser Doppler velocimeter 87−29081
field simulation errors introduced by vibrating conducting probe *(Russian)* 88−34214
five-port reflectometer using a three probes scheme 88−29629
fixturing techniques of SMD probing 87−11168
flow velocity meas. in stirred tanks, hot-film const. temp anemometer probes 87−8602
focused ion beam system for submicron lithography 87−11537
four-probe resistances on nonuniform structures, alternative approach to calc. 86−24673
gas turbines, blades, eddy current probe for QC *(German)* 87−78528
ground-noise probe, battery powered cct. 87−14266
Gunn diode manufacture, probe techniques for semicond. diagnostics based on noise current characts. 87−45250
Hall, superconductors upper critical field anisotropy meas., using low-temp. sample-rotating cryostat 88−53836
Hall probe for measuring high currents in superconductingcoils 86−55803
Hall probe preamplifier, low-noise 86−65186
hazardous microwave radiation meas. probe 88−47667
heat flux probe characts. analysis 88−35936
heterodyne interferometric laser probe to measure continuous ultrasonic displacements 85−35948
high-power microwave measurement, coaxial E-field probe design 85−37737
high-speed devices and ICs, 1 THz-bandwidth prober using electro-optic technique 88−11703
probes continued
hot wire anemometer for meas. in boundary layers and wakes 87−70893
hot wire probes, unplated normal wire, directional sensitivity obs. 86−24510
hot wire probes dynamic behaviour obs. 85−52736
hot-wire, flow analysis based on mean velocity and pressuredderivatives 86−44472
hot-wire anemometer, turbulence data correction due to angle deviation 86−44473
hot-wire anemometer compensated for ambient temperature variations 87−14615
hot-wire device for liquid water content meas. in laboratory clouds 86−60391
hot-wire probes, crossed- and triple-wire designs, directional sensitivities determ. 88−68082
hot-wire probes, direction sensitivity obs. 86−44250
hot-wire probes, temp. and yaw-angle sensitivities investigation 88−74352
hot-wire probes calibration, using self-contained motorised cart 87−21275
hot-wire probes calibration at low velocities, with variable temp. 88−47468
hot-wire technique for simultaneous measurement of instantaneous velocities in 3D flows 87−63570
hot-wire X-array probes for Reynolds stresses meas., stem configuration effects obs. 86−24476
HP54100 A/D digitising oscilloscope, high performance probe system 86−60273
HV motors, overload-temperature protection *(German)* 86−56698
HV surge wave meas., low-impedance probe design 88−5392
hydroelectric generator stator slot wedge tightness meas. instrument 86−51572
IBM ESD simulator probe construction and performance 88−2476
IC probe card developments, yield improvements 87−38337
ideal waveguide-to-coaxial transmission line probe transitions using full band matched monopole 88−70994
impedance probe for local void fraction profiles meas. 88−53665
implantable multielectrode array with on-chip signal processing, neural prostheses/biopotential recording appls. 87−21561
implantable multielectrode array with on-chip signal processing, microprobe for biopotentials recording 87−21575
in situ electric probe method for determining the dielectric properties of materials 88−60878
in-situ probe type SO_2 analyser for stack emissions monitoring 86−5576
induction, MSW anal. in YIG thin films 85−50849
infinite line pressure probe, turbine research appl. 86−17930
input impedance of antennas inside enclosures 86−29588
insulating film detection on solder pads and interconnections of VLSI 86−15204
ion implantation process control, data management advances 85−34818
ion-sensitive FETs, monolithic probe development for pH and ionic conc. meas. appls. 85−23811
ISFET pH-microprobe development for in vivo ion conc. meas. in blood *(Korean)* 86−60713
Josephson integrated circuits, cryo-prober *(Japanese)* 86−34719
Kelvin probe, piezoelectric driven, for work function and contact potential meas. 85−7123
Kelvin probe design and performance for topographic work functions study *(French)* 88−74351
keyboard membrane switch assembly, test probe 85−23191
King-type probe for surface field meas. 88−16066
King-type probe for surface field meas. 87−14327
L200 functional tester, autoprobing feature 86−31150
laboratory eddy current imaging system, computerised image processing 85−26255
Lambda probe for measuring excess air during combustion *(German)* 86−38603
laser beam diameter meas. by plane edge probe 86−36548
laser probe for LSI fault anal. *(Japanese)* 88−27350
laser probe resolution improvement, 3/2-order PLL design 86−31364
LDPE insulation, space charge distrib., field probe techniques 88−71852
LF, MF and HF bands, universally applicable field strength measuring probe development 86−5443
linear dimensions of workpiece meas., force exerted by jet eddy probe determ. 85−3966
logic analyser complexity increase rel. to cost decrease 87−28996
logic probe, appl. to TV equipment servicing 86−17627
logic probe, construction details 85−31415
logic probe, low-cost design using LED indicators 86−20404
logic probe for microprocessor system testing *(Russian)* 87−37111
logic probe for TTL and CMOS, 5 MΩ input impedance 86−34720
logic probe for TTL and CMOS ICs design with acoustic/LED indicators *(Spanish)* 87−37109
logic probe use in electronic equipment, servicing *(Spanish)* 86−57747
logic probes for use with Tektronix DAS9100 logic analyser *(French)* 86−20397
logic test probe, design and construction for CMOS and TTL ccts. *(German)* 85−11127
LSI IC probing, point contact, electron beam and laser raster probes *(German)* 85−50640
magnetic field probes with negative feedback loop inductive coupled search coils *(German)* 87−56637
magnetic heads, ideal with ideal windings in the presence of a permeable media underlayer 86−2595
magnetic probe heads with ideal windings, analytical expression for field 85−46003
magnetic probes for small-signal detection in large-background field 88−53664
material permittivity meas. using nondestructive microwave reflectometry 86−55813
materials anal. of failed flex circuit using laser microprobe mass spectrometry 87−6208
MBE, substrate temp. probe using RHEED pattern transitions 88−24728
metal probe, electrodynamic theory 86−54242
metallic body location using circular loop test probe, impedance variation study *(German)* 88−52096
meter of focussed laser beam section *(Russian)* 88−27036
micro ISFET for biomedical research 87−57057
microelectronic probe contact resistance factors, meas. and control 86−14723
micromanipulator acid probe isolation 85−49348
microstrip diagnostics using surface scanning probe 87−21073
microstrip-patch element phased arrays, expt. results 87−27070

probes continued
microwave amplitude/phase detect., EM field probe, fibre optic transmission 85−20611
microwave dielectric spectrum of vegetation material 87−63996
microwave electric-field probes near cylindrical model of human body, responses 85−52851
microwave field strength probe, submillimeter three-axis design 88−16067
microwave field visualisation using probe based on modulated scatterer technique 87−70779
microwave IC probe for on-wafer meas. 87−49906
microwave wafer probing, calibration methods 85−1062
microwave wafer probing, techniques for MMIC testing and one-/two-port calibrations 85−48077
microwave wideband wafer probing, techniques for planar devices, review 88−42266
miniature broadband isotropic magnetic field probe 85−26285
miniature electric field probes calibration and amplification 88−74341
miniature RF E-field probe calibration 88−53680
miniature RF field probe in magnetrons, performance 87−11294
MM-wave wafer probes, 0-50 GHz operation, calibration standards, design and appls. 87−52822
MMIC testing using microwave wafer probe, planar calibration standards verification techniques 88−50383
modified three-antenna technique for improved polarisation meas. 88−72664
monopole probes for in situ permittivity meas., coaxial line excited 87−70765
multi-coiled eddy current probes, design, output voltage calibration 86−525
multi-megajoule solid liner implosions using SHIVA STAR capacitor bank 88−43396
multi-pin probe system for dielec. breakdown meas. 86−31591
multichannel recording array, neural activity probe 85−59352
multielement antenna, amplitude-phase distribution meas., algorithm for probe optimisation 86−54377
multielement antenna system, radio feeders field probing, interaction effects 85−62918
multilayer gas humidity probes using thin film technology, design and meas characts. *(Polish)* 86−11529
multilayered Earth, induction sounding 85−38335
multimode laser-diode probe for optical detection of charge modulation in Si ICs 87−74353
nanosecond capacitive voltage divider 85−52745
nanosecond-current probe for high voltage experiments 85−3976
near-field antenna meas., probe position errors correction using computer 86−68867
needles, electrical contact behaviour *(German)* 86−1429
neutron probe for in situ prompt γ-ray activation analysis of seawater 88−61663
NMR magnetometer with low-noise limited oscillator 87−52436
non-contact picosecond prober for integrated circuit testing 87−46134
noncontact inspection using laser triangulation probe 87−12643
noncontacting optical probe with optical microscope and dual chopper 87−56647
nondestructive resistivity meas. of III-V semiconductors, using four-point probe meter 87−70756
noninvasive optical fiber photoacoustic microprobe 86−2797
ohmic contact between probe and semiconductor structure, automatic formation 86−17889
open-ended coaxial-line probe, appl. in dielectric meas. 87−70758
optical, MSW anal. in YIG thin films 85−50849
optical distance meas. probe for rapid automatic calibration on machine tools *(German)* 87−29125
optical inspection probes, compact laser diode sources 88−29426
optical measuring systems for machine tools, VEB Feinmess Dresden prod. program 86−24436
optical noncontacting probe for detection of displacement, position, and angle *(Japanese)* 86−38343
optical probe for on-line meas. of velopharyngeal valve opening 87−35393
optical probe for wetness and efficiency meas. in low press. steam turbines 87−51041
optical probes for VLSI high speed device testing and internal node diagnostics 88−13507
optical sampling of GHz charge density modulation in Si bipolar transistors 87−67214
optical/electronic meas. sensor for in-line inspection, high-speed signal processing 87−29106
oscilloscope input resistance increase *(Czech)* 87−49819
oscilloscope probe, measurement errors *(French)* 85−26368
parallel array hot wire anemometer probes , flow interference effect 88−74636
partial discharge probe M 4202 for discharge detection *(German)* 88−39745
PC, digital electronic card testability enhancement, shift register probe 85−23211
PCB casting, perforated plate probe holder production *(Russian)* 86−47183
PCB continuity testing, false errors elimination in high volume production operation 86−35220
PCB fault diagnosis, fault dictionary and guided probe analysis integration 87−24601
PCB on-grid test point translation system 85−61531
Peltier probe flowmeter, performance analysis 87−29111
pH meas. probe simulation for development/repair purposes *(German)* 85−52724
phase fronts curvature influence of high-power and probe waves on scattering from artificial ionospheric quasiperiodic array 85−24831
phased array element acousto-electric response meas., diffr. effects 87−71445
photoelectric suction probe far drop size meas., with automatic adjustment *(German)* 85−48100
photoemissive probing of high-speed signals 88−13512
photoresistor interface to microcomputer, light-level meter appl. 87−70647
piezoelectric, momentum and kinetic energy of drops meas. 87−70886
Pitot combination probe, velocity and pressure distrib. meas. behind hydraulic turbine runners 87−14614
plasma covered cylindrical body, probe fed rectangular cavity, input impedance 88−2736
Pockels effect probe, surface breakdown characterisation 88−58241
position determ. of pulp-froth interface 85−15039
power density meters calibration, at RF and microwave freq. 86−65265
power flux density probes calibration, multioctave devices appl. 87−50467
probes continued
power line disturbance voltage meas., broadband network 88−75226
power plant continuous vibration monitoring and diagnostics 87−56847
Poynting vector probe for measuring power at extremely low power factor 88−60683
preamplifier for use with selective microvoltmeter 87−56597
precision differential voltage probe for transientrecorder 86−50189
pressure probes, 3-D, study and realisation using pressure-voltage transducers and DVM *(Italian)* 87−8613
primary humidity sensors for upper-air radio probes, metrological characts. 85−64341
probe mutual impedance in a rectangular waveguide, theoretical study 85−41674
probe pins, electrical contact behaviour *(German)* 86−8542
probing EM fields in lossy spheres and cylinders simulating biological objects 85−4058
probing techniques become crucial above 500 MHz 88−4519
pulse direction logic probe 85−20547
pulse power generators, traveling wave anal. with combined E and H-field probe 87−22614
pulsed electrostatic probes characts., excitation and meas. cct. 85−26437
PWBs, spring probe selection 88−32580
radar target forward scattering meas., by planar near field scanning 87−13782
radiation through grounded dielectric substrate, anal. 87−7604
railgun accelerators of macroparticles, parameters meas. 88−40504
rapid near-field antenna testing via arrays of modulated scattering probes 88−72661
rectangular waveguide, mutual impedance between probes 88−27562
relativistic electron beam current and position monitor 87−14661
REMAG 2 instrument for NDT of ferromagnetic coatings *(Czech)* 86−50059
remote-sensing in mining−a review of techniques and applications 85−43499
remotely controlled crossed coils NMR probe 87−56799
resistance probes in the science laboratory, direct and indirect meas. 88−16430
resistance thermometer probe self-heating effect *(Polish)* 86−17942
resistivity correction factor for the four-probe method 88−22739
RF EM fields, environmental monitoring for human safety, radiation probe configs. 87−50466
RF exposure measurements in FM/TV broadcasting towers, by continuously recording instrument 85−38260
RF no-load active probe cct. 86−17913
Rhode & Schwarz logic analysers, microprocessor probes *(German)* 86−70069
ring wire anemometer, calibration and cooling laws 88−22797
ring wire anemometer, small-scale turbulence meas. 88−22798
robot mechanical linkage for two simultaneous displacements of probes 85−167
Rohde & Schwarz microprocessor probes for logic analysis system LAS 87−56584
rotating slant-sensor hot-wire probe, cross-jet mixing flow meas. appl. 88−47469
sapphire, artificial, for contact photocoagulation and tissue vaporisation with Nd:YAG laser 86−25299
scanning capacitance microscopy, non-contacting surface profiling appl. 88−36217
scanning electroelastic line scanned electrodynamic transduction techniques for defect detection 85−10895
scanning microwave probe, radiating and nonradiating open struct., mode anal. 87−49907
Sea-Bird temp. and cond. probes, dynamic response calibration 87−71374
semiconductor device on-line process control, resistivity meas. appls. 87−60251
semiconductor wafer probe space transformer assembly with pluggablecomponent feature 86−15203
semiconductor wafer testing, dual-mode Z-stage mechanism 86−41632
semiconductor wafers, dual-mode Z-stage mechanism 86−41633
semiconductors, laser processing, Raman microprobe quantitative anal. 86−41638
sensor research, appls. and functions *(German)* 88−35919
sensors, bioelectronic, based on studies of honey bee's brain 88−74786
SERS as in-situ probe of laser microchem. processes 86−41639
shear stress measurements on heat transfer surfaces 88−47470
sheet dielectric defect-location probe 87−8599
side-looking fiber-optic probe with a focused spot 85−29580
six-point-probe meter models, 101 and 101C, sheet resist. meas. 86−5478
size limitations of electric field probes 85−14958
SMD boards, building fixtures and selecting probes 87−37714
SMT in-circuit testability design rules, test fixtures and probes 88−32649
SMT PCB testing, moving-probe tester design and accuracy 88−32667
SMT testable assemblies, probe access 87−24584
soil, dielec. const. meas., four-probe method 86−38520
split coaxial line UHF probes fabrication for high-resolution NMR expts. 88−9966
split fibre probe, two-dimensional flow behind turbine guide vanes meas. 86−24837
spreading resistance probes, calibration, standard reference materials 86−4940
stack probe for CO and O_2 analysis 86−60225
steam-generator tubes crack detect., numerical 2-D model of eddy currents 85−27246
stenosis determ. in turbulent blood flow using dual-transducer pulsed Doppler US system *(Japanese)* 87−71112
straightness measurement system with error correction 87−77397
subnanosecond accurate meas. of high-speed IC package and interconnect parasitics 88−68043
surface charge distrib. conversion by electrostatic induction method 86−11690
surface potential distribution meas. *(Polish)* 85−37813
surface potential probe, for capillary and gravity water waves meas. 86−55895
surface roughness meas., head characts. *(Japanese)* 87−29059
temperature, using Si n-p-n transistor, atmospheric studies and meteorological appls. 88−10545
temperature probes, thermoelectric and resistance types, characts., props. and reliability *(German)* 87−14587
test probe indicating AC or DC voltage over 4 to 220 V range 86−44369

probes continued
tetrafluoromethane plasma etching and diagnostics characts. study using elec. probe method *(Korean)* 87−45792
thermal power station effects on environment, influence of drives for air and fuel supply *(Slovak)* 87−4551
thermal probe apparatus using Seebeck effect, semiconductor material diagnostics 86−28086
thermistor probe based flowmeter and temp. sensor 88−22551
thermocouple probe for digital multimeter 85−37575
thin-film multiple electrode probes: possibilities andlimitations 86−44659
thin-film optical waveguides, transmission loss meas. using rectangular glass probe 86−2750
three-axial fibre-film system for meteorological turbulence meas., calibration 88−5154
three-coordinate probe systems on machine tools 86−24769
three-dimensional axisymmetric eddy-current probe coil with ferrite core 87−77204
three-state TTL logic probe 85−11123
time-correlated carrier counting, probe method for deep level charactn. with ns resolution 86−50212
top side probe head fixture for laser trimmer systems 85−28815
toroidal ferromagnetic probes, theory and expt. *(Czech)* 87−56652
tracking of deep space probes, using dual speed pseudonoise ranging system 88−15567
transcutaneous pO_2 probe based on mass spectrometry with low stirring effect 85−48214
transient ground rise meas. in gas-insulated switchgear, using subnanosecond resistive HV dividers 87−58253
transient ground rise meas. in switchgear, Newi nanosecond resistive HV probes appl. 87−56645
transmission line current sensor 86−17960
transonic wind tunnel, combination probe for HF unsteady aerodynamic meas. 87−71217
transverse EM cell for standard E and H-field generation, calibration, errors eval. 88−47509
TTL ccts. testing, probe design with counter and storage *(Czech)* 86−57791
TTL probes, design *(German)* 87−43957
twin-wire resistance probes for elevation measurement, design 87−41611
twin-wire resistance probes for elevation measurement 88−16503
twin-wire resistance-probe water manometer characts. 87−56662
underwater optical probe for laser Doppler anemometry 87−14557
universal logic probe design *(German)* 87−59324
universal TTL probe *(German)* 87−31781
US, tuning and matching network 88−23207
US Doppler probe assessment by scanned hydrophone 86−60726
US multitransducer, castings near surface flaws detection 88−23208
US submerged rotary probe, boiler tube wall thickness meas. 88−23744
US tissue fragmentation devices, mode-of-action model and probe expt. 87−4026
Vega spacecraft, Halley's comet imaging system *(Dutch)* 86−60989
verification fixture for matrix/prober interface IC testing 86−58525
vibrating capacitor measurement of surface charge 85−4101
vibrating probes construction for electrical current meas. in solution 88−53669
Vicalloy-I annular permanent magnet B/H characts. meas. technique 85−58852
virtual probe for transverse electric field ratio in Zn meas. 86−5474
VLSI bus structured boards, effective logic diagnostics 86−1550
VLSI circuit debug using e-beam probing 87−74392
wafer probing, microcomputer control of two-dimensional positioning *(German)* 85−37445
wafer probing automation 88−39551
wafer probing techniques at microwave freqs. 88−36192
wafer probing/inspection trends with increased densities 86−63365
waveguide-to-microstrip probe transitions for MM-wave device/cct. charactn. appls., design 88−70985
wide-band active probe, design 87−72792
wideband probing, transauroral HF channel 88−21937
wind tunnel, high speed, seven-hole probes calibration 87−71221
wire-cylinder electrostatic precipitator, pressure meas. in active electrical zone, probe technique 86−48538
work function meas. microKelvin, probe 88−53670
$BaTiO_3$ ceramics, positive temp. coeff. of resist., icing probe, helicopter appls. 86−55619
Bi bolometer design for probe use in MM-wave planar ccts. 86−47067
$Cd_xHg_{1-x}Te$ Hall probes, for magnetic studies of Nb_3Sn superconductors 87−41465
CdTe detector based single probe system, computerised, medical appl. *(Japanese)* 86−44647
CdTe nuclear probe for tumor intra-operative scanning 88−36501
^{252}Cf-HPGe probe for in situ prompt γ-ray activation anal. of water pollutants 88−48388
GaAs MMIC testing, electrooptic sampling meas. with polarised light 88−993
GaAs high-speed IC anal. with electro-optic probes 88−39630
He-Ne laser, working mixture pressure and impurities determ., using additional probe 85−46445
Hg probe design optimisation, for semiconductor doping profiles determ. 85−1654
Hg probe for MIS struct. meas. *(German)* 85−61789
Hg, with stabilised contact area, for nondestructive testing of planar semiconductor structures 87−56640
Hg-SiO_2-Si MOS struct. inhomogeneities investigation using small-size Hg probe 85−18183
YIG, LPE films, microwave magnetostatic waves, magnetic induction probe studies 87−32845

concrete production QC, computerised statistical anal. 88−18513
continuous casting plants with computer control *(German)* 86−45845
continuous ingot casting house, automation system from Siemens *(German)* 88−6059
continuous process line, modern, description and considerations 87−4820

process computer control continued
continuous resistance heating plant, microelectronic controls 86−33856
control and meas. of vacuum 87−77457
controller PCA 5 software 86−31176
Contronic P process control system, data communication fault and operation diagnosis *(German)* 87−40496
COROMATIC microcomputer control system, for electrostatic precipitators 86−25917
current fault protection switches, safety testing using industrial robots *(German)* 86−18878
custom VLSI manufacture, testchip/data anal. software for technology develop. and process control 87−1639
Czechoslovak development of automated control systems power engineering appls. *(Czech)* 88−17041
data inspection, computerised system for small and medium processes *(German)* 86−4958
databus cables for industrial process plants, uses and installation 86−37701
decentralised process control in industry, man-machine communications *(German)* 86−30372
diagnostic software for process control systems 88−53542
digital control for drives and auxiliaries 88−69748
distributed microprocessor control systems based on thebroadcast principle 86−10838
distributed process control, communications systems *(Hungarian)* 85−52053
distributed process control communication systems traffic optimisation, flying horizon method *(Bulgarian)* 87−19367
district heating power plant process control and communication computer system *(German)* 86−19120
dosage system for fodder production *(Italian)* 85−31603
drop forge LIM drives, SCR switching control methods 88−69950
drying, fabric temp. profile meas. and control 87−5119
dual vapour inline vapour phase soldering system, computer control 85−33175
Dynbaver systems 85−4348
electric connector/electronic component plating facility using computers and statistical process control 87−16371
electric drive control by microcomputer 87−31023
electric furnace power control using thyristors for steel heat treatment appls. 88−69948
electric heating equipment, energy saving using process computer control *(German)* 85−60551
electric ore-treatment furnaces with computer control, algorithm identification 85−44314
electrical equipment for continuous casting and hot rolling plant producing Al strip 86−40321
electrical interference, process control computing, immunity tests *(Czech)* 86−64013
electro-thermal process control, laboratory teaching module 87−31171
electrochemical processing in electronic industry, control software and hardware *(Russian)* 88−57165
electron beam image projection system with automatic wafer handling 86−21314
electron beam welder 86−7340
electron beam welder, computer controlled, new generation, Mitsubishi Electric 85−16490
electron-beam lithography, computer-controlled pattern writing system, pattern generator 85−29101
electron-beam wafer transfer system, microprocessor-based architecture 88−26108
electronic equipment manufacture, CIM and real-time process control 86−26591
electronic process control systems, disturbance problems, CIGRE work, review 88−17040
electronics in social development, conf., Lucknow, India (Oct. 1986) 87−72659
electroplating line microcomputer-based automatic control and monitoring 85−44341
electroplating plants, recent case histories 85−27884
electrothermal unit and ultrasound medical instrument microprocessor control for automation 88−16699
Enco membrane switch panels used in the packaging industry 88−43680
energy requirements optimisation using microprocessor based control systems *(Italian)* 88−31224
expert system for process monitoring and PCB inspection 87−45450
explosion-proof motors, machining process development 86−45854
factory automation, semiconductor manufacturing, current theories 86−19831
failure detection and wear sensing using computer vision based tool image processing, unmanned metal-cutting applications 88−22517
fault detection by two-stage correlation methods, quality control appl. *(German)* 87−51884
fibre optic autonomous decentralised double loop network system 87−20488
fibre optic high speed loop network system for distributed computer control 87−20489
fibre optics for process control 88−51437
fibre spinning machines, AC speed control equipment, THYFREC-V400 86−12776
fibre-optic LANs for process control *(Russian)* 85−47229
Field Bus, LAN for process control 88−15153
field bus in factory and process plant automation standard digital communication system 88−14917
field bus network of intelligent sensors *(Japanese)* 88−41316
field bus systems, serial time-multiplexed, objectives and appls. *(German)* 88−21594
film thickness meas., color vision meas. system 88−29653
flue gas cleaning in coal-fired power stations, distributed microprocessor based control 88−17370
foil dielectrics manufacturing process management software 88−1812
foundry practice of elec. equipment manufacturing industry, metal conservation 85−65658
fuel combustion quality control in Czechoslovak power industry *(Czech)* 87−22009
Fuji total process control system *(Japanese)* 87−2891
galvanic coating process lines, automated computation of cyclogram control programs *(Russian)* 88−70111
galvanic coating process lines, computerised control *(Russian)* 88−70110
gas metal arc welding machines, computer controlled for furnace chambers manuf. 85−22016

process computer control continued
gas production wells and treatment plant control and monitoring equipment, BBC-PROCONTROL I 86−52091
gas-tungsten-arc welding computerisation 87−16210
gate arrays, managing large volume of design/manufacturing/test data 85−1729
Gradas-EVU interactive graphical information and documentation system for monitoring MV distribution networks *(German)* 85−32144
grain handling and feed production industry, electrical equipment and process control system 86−19683
graphic display design aid *(French)* 88−42195
groundwood paper mill, expert system for electricity demand optimisation 88−62829
Hagenwerder power station, microelectronic control system for charging coal bunkers *(German)* 86−65940
HAS-1000 automated hybrid assembly system 85−11815
Heidelberg sewage works, Brown Boveri supplied electrical and computer control equipment 85−65687
height sensor characteristics of Melcut-3DCM laser cutting machine 87−7476
Heilbronn (Germany) cogeneration station control with redundant bus system 87−51031
high-volume wafer fabrication and ASIC manufacturing, automation trends and CIM implementation 87−25454
holographic three-dimensional image preprocessor for welding control feedback 85−53977
hot rolling mills drive techniques automation, microcomputer assisted *(German)* 85−53961
hot steel strip mill, LAN appl. *(Japanese)* 86−4291
hot strip mill, downcoiler modernisation, control system 87−43684
HP's PC-10 Semiconductor Productivity Network for remote monitoring and control of semiconductor processing 85−61801
hybrid gas/induction furnace with microprocessor control for steel tube reheating 86−19623
hybrid IC manufacture, AtuoTool I. A human focus on the deveiopment of software for tool control 88−25748
hybrid IC production automation methods 85−23299
hybrid LAN for process control system data transmission and acquisition 88−46619
hybrid local area network system 85−13930
hydroelectric plant control equipment 87−9408
IBM Charlotte facility, automating a printed circuit card line 88−12774
IBM mask-making shop, integrated approach for improved yields, process control and turn-times 88−13292
IC burn-in computerisation trend 86−13447
IC manufacturing process 85−6619
identification of process, microprocessor-based assembler-generated binary test signals 88−15954
in-process wafer test and measurement, development trends 88−31469
induction heating process control, computer aided software elaboration 86−71127
industrial control using token-ring LANs *(German)* 88−52842
industrial distributed process control computers, earthing techniques for safe operation 88−24504
industrial electronics, control and instrum., IECON '85, conf., San Francisco, CA, USA, 1985 86−40386
industrial LANS, design and protocols *(French)* 86−23449
industrial LANs for distributed control *(Spanish)* 85−30675
industrial level measurement techniques−a review *(German)* 85−4163
industrial process automation, state-of-the-art and future trends 87−43849
industrial process control data acquisition systems, selection *(French)* 88−35870
industrial process recorder, based on microprocessor and optical sensor technologies 86−24403
industrial use of personal computer in processinstrumentation *(Japanese)* 86−31155
information network system, S-NET, for integrated steel plant 86−10814
inspection by computer vision, optimal location of equipment 88−43730
instrument making, checkout operations, anal. of state of automation *(Russian)* 85−20444
instrumentation and control advancements in industry, conf., Houston, USA (Oct. 1984) 86−48
integrated meas. system in industrial process computer control system *(Italian)* 88−41956
intelligent peripheral closed-loop control module Siemens IP 252 for DC drives 87−16087
intelligent support system design for power plants 88−30330
ion beam machining, micromechanical element batch fabrication 87−36486
ion implanter, high current, Veeco VHC-120, concept, operation and performance 85−34770
ion implanters, high current, computer automation 85−34775
ion implanters, SEMI Semiconductor Equipment Communication Standard 85−34777
JUPITER system develop., SUMINET-3200 fibre optic LAN at Mizushima steel factory 88−59679
KLAASP alignment, inspection and meas. system, machine vision appls. 85−5780
knowledge based systems conf. Marseilles, France (Dec.1986) 88−37835
knowledge-based control hardware and temperature sensing 85−64316
LAN, bus structured, real-time, multiple random access protocol 86−10813
LAN, metal manufacture appl. 85−63285
LAN, reliable distribution networks for controlling industrial systems *(Spanish)* 85−30679
LAN, siemens Sinec H1 for PLCs *(Spanish)* 87−62589
LAN for industrial application, process location strategy 87−69706
LAN in process control systems *(Japanese)* 88−9138
LANs for industrial process control *(Spanish)* 87−13397
LANs for process control data, status and future developments *(German)* 88−15083
laser automatic microprocessor control system 88−65920
laser circle cutting in moving plastic, software controlled system 88−45594
laser cutting equipment for sheet metal fabrication *(German)* 87−47026
laser hardfacing of jet engine turbine blades 87−47044
laser in process monitoring, laser beam analyser and acoustic mirror 88−2433
laser photoplotting as an integral part of CIM 87−37722
laser processing, fully automated, of elec. steel 88−2436
laser uses in aircraft gas turbine fabrication, improved productivity and quality 87−47041
laser welding of automotive gear components 87−47045

process computer control continued
layer coil winding machine with personal computer interface 87−16380
Limikont−a microprocessor controller for automatic control of production processes *(Russian)* 88−6906
liquid metal granulation, electromagnetic process computer control using specialised power supplies *(Russian)* 85−60578
local networks, distributed process control system appls. *(Russian)* 85−57787
logic design using finite state modelling 85−695
loop transmission procedure adequate fordistributed computer control system *(Japanese)* 85−52082
LOTUNET−A LAN for process control 86−64715
Loviisa NPS process computer systems, replacement and development 88−48666
low-cost automation and appls. conf., Valencia, Spain (Nov. 1986) 88−37836
low-power AC adjustable-speed drive control 87−15650
LSI design management system, ASTA 87−65713
LSI fabrication processes using flexible manufacturing systems *(Japanese)* 85−7015
LSI process controller chip for textile dyeing machine, design 88−50209
LSI wafer production transfer system design 88−13453
machine components heat treatment using plasma technology and furnaces 87−5089
machine vision for process control 87−10207
MACTUS 620 digital instrumentation and controlsystem 85−52645
manufactured product weight monitoring by GEM80 microcontroller 86−38580
manufacturing plant automation, MIS/process control integration, communication as key 88−59690
MAP, development for process industries 87−62609
MAP and plant databases, integration 88−59692
MAP and PROWAY critique 88−15145
MAP and the Manufacturing Message Specification in the process industries 88−59691
MAP in process industries, user survey, disadvantages and Version 3.0 87−76343
MAPs, broadband LANs, backup provision 87−76309
materials processing control, nondestructive evaluation techniques appl. 85−54551
MBE artificially layered struct., automatic process control 87−73082
measurement sampling system *(German)* 87−70519
measuring devices for flexible series manufacture *(German)* 85−37440
mechanical testing, computer controlled, real-time multi-user system 86−62310
metal heating, induction unit control algorithms and systems using microprocessor devices 88−18215
metal vacuum melting, status and trends 86−13199
MetaTorch, laser seam tracking system for welding robots 87−7461
microcomputer applications, conf. Budapest, Hungary (Sept. 1987) 88−31301
microcomputer hardware and software appl. conf. Beverley Hills, CA, USA (Feb. 1986) 87−16280
microcomputer networks, in small companies, bimetallic strip temp. regulator QC 88−37953
microcomputer-based batch processing control system for dosing and weighing 86−18191
microelectronics advisory systems and computer-aided operative process control *(German)* 88−12162
microfabrication, data management and process control 85−45512
microprocessor control of DC and AC drive convertors and rectifiers *(German)* 86−26330
microprocessor for process control, testable NMOS, IC 85−33970
microprocessor system for controlling technological process of Se treatment of electrophotographic cylinders *(Russian)* 88−44826
microprocessor-based event sequence recorder for process industries 85−26201
microwave in-line automated curing of die attach epoxies and conformal coatings 86−57222
mining, longwall face automation, single-ended ranging drum shearer system 86−7359
MINUPROX−an advanced proximity correction technique for the IBM EL-2 electron beam tool 85−1698
modern brewery design, operation and maintenance 86−40350
MODIAC 2 system for transmission of data, audio and visual signals and digitalised video *(Italian)* 88−28442
MODIAC local communication network for process control 85−19889
modular power units, processor-controlled production line 85−60754
monitoring and data logging of process industry automation 88−53541
monochannel computer network with nonhomogeneous flows of short messages, multiple access control 88−8883
motor drive and PC improved user friendliness using microprocessors 88−11409
mould inspection for Si pellets by 3D vision system 88−31533
multichip packages rapid prototyping using computer controlled ink-jet direct write 88−64147
multimicroprocessor image processing system concept *(Polish)* 85−20556
multiple wire and cable insulating lines, host computer control 85−34226
networked process temp. instrumentation 88−41947
no-break power supply selection *(Danish)* 86−12893
no-hands board handling 87−45407
nonferrous rolling trains, control and regulation systems 85−60583
nonrotatable tube butt joint TIG welding in Ar, automatic control system 87−79242
Novellus Concept One, continuous automated dielectric film CVD system 88−12068
nuclear power station automated process control system improvement 85−59894
oil refinery power facilities, distributed digital control *(Japanese)* 87−71540
on-line syntactic anal. method, safety of sequential systems 87−23438
online production control computerised lab. systems in steelworks, EMC aspects 85−2609
opencast machines, stored program control and automation soln. appl. 88−18281
optical data highway, high-speed industrial control systems appl. 85−63650
optical fibre cabling machine, computer control system 87−13742
optical fibre drawing machine, microcomputer control *(Czech)* 86−42300
optical fibre drawing system, microprocessor-controlled, config. and operation *(German)* 85−50946
optical fibre production microprocessor control system *(Czech)* 87−74685
process computer control continued
optical fibres, tapered, single-mode, laser diode appl. *(German)* 85−46150
optical fibres for data communication in distributed process control systems *(German)* 87−13744
optical LAN, industrial appl. 85−13966
optimisation by low-cost digital instrument system 86−24344
optoelectronic LAN for industrial appls. *(Czech)* 88−60121
ore-grinding rod mill material corrosion meas. and control by A/D telemetry 88−67683
overall monitoring system, appl. of personal computer *(Japanese)* 86−31154
overburden conveyor bridge complex automation using audatec process mastering system 88−18282
parametric interpretation expert system for interpreting semiconductor fabrication test data 87−38060
particle accelerator process control systems, user-friendly 86−38662
PARTNERBUS from Brown Boveri, communication bus linking computers in LANs 85−63278
PASS, visual sensor for seam tracking and on-line process control in arc welding 85−14817
PC boards manufacture and mounting, CIM technology appl. *(German)* 87−1076
PCB, prototype CIM system 87−45432
PCB CAM systems 87−37694
PCB drilling operation, how to computerise 87−53050
PCB drilling operation computerization 87−60011
PCB fabrication with statistical process control 87−11215
PCB loading, co-axial vacuum insertion head for use on computer-controlled module insertion machine 85−6602
PCB manufacture, automated wet processing 88−38891
PCB manufacture and testing, using computer vision 87−1071
PCB manufacture wet process and water treatment 86−58168
PCB plating lines, statistical process control QC method for anticipating problems 88−57091
PCB post-solder cleaning cycle computerization 86−1506
PCB process control, IBM-PC appl. 85−55270
PCB process/QC lab 88−57105
PCB production, direct numeric control units applications 87−37710
PCB tab connector plating, rack and automatic plating lines 85−17973
pCB technology in transition 87−45429
PCB wave soldering process computerization 85−40325
PCBs, CAM for under $100000 88−25659
PCBs, precision production-ready phototools 87−37730
PCBs, robot insertion of nonstandard components 86−14651
personal computer appl. to process control and monitoring *(Japanese)* 86−31153
personal computer applications in process instrumentation *(Japanese)* 86−31152
petroleum refining at Nippon, advanced process information and control system using FACOM CAPTAIN terminals *(Japanese)* 85−63267
photocassette label identification by visual pattern classification 88−34813
piezoresistive pressure sensors for automation, characts. *(German)* 88−4382
plant information network set-up for statistical process control 86−19799
plant inspection, composed instrumentation *(Japanese)* 88−4292
plastic components fabrication process computer control 85−44340
plastic industry continuous production process line control systems, polymer thickness control, algorithmization 87−43703
plate liquid extractor with oscillatory reluctance linear motor, μC controlled 86−71163
power laboratory expts. modernization 88−24396
power station automation using ursamar 5001 microprocessor control system 87−30288
power station boiler process control computer requirements *(German)* 86−6574
power station computer control system reliability assessment *(Russian)* 85−27273
power station microcomputer operating and control system commissioning experience *(German)* 86−12654
power stations, control optimisation using mathematical models *(Dutch)* 87−57852
PRAUT, process computer systems aid decisions in power plant control and monitoring, Brown Boveri 85−15694
PRAUT for higher-order power control and optimization in the combined cycle power plant Tung Hsiao 85−15855
PRECICONTROL automated process control system for electrostatic precipitators 86−25916
Precision 5000, automated intermetal dielectric and oxide film CVD system 88−12069
predictor displays for complex, dynamic tasks: a preliminary investigation 87−22056
pressure-sintering machine, ECE-450 multiprocessor based control system *(German)* 87−64998
process weighing techniques for batch monitoring and control 88−10144
processor-controlled sheathing of electric conductors 87−50817
PROCONTROL P digital distributed control and monitoring systems for power plants, Brown Boveri 85−15692
PROD, VLSI fabrication process fault diagnosis system 86−61919
programmable controllers 15th conference, Detroit, MI, USA (April 1986) 86−66550
programmable full-automatic plasma CVD system for semiconductor growth 87−323
projection welding technology, process control 87−31099
PROLEI process automation system using TV screen as control panel and mouse for functions *(German)* 87−77031
PROMIS process management information system for semiconductor industry 85−7053
proximity switches as sensing devices for factory automation *(Japanese)* 88−16075
pulp and paper industry, conf., Vancouver, BC, Canada (June 1987) 87−58533
pulp and paper industry process computer control system with distributed hierarchical structure 87−43711
pulsed arc welding process control by IBM PC 88−6069
PWB exposure machines reach for high resolution andthroughput 86−35200
PWB shop chemical automation system 87−45430
PWB solder quality variables control using IBM PC 87−37698
QC, management attitudes 88−220
quality assurance for process control technology *(German)* 88−37993
quality assurance system, computer-aided, for AG Motor Meter manuf. *(German)* 88−24593
quality control, automatic measurement, machine tools *(Dutch)* 87−8506

process computer control continued
quality control, process inspection sensor *(Japanese)* 88−16074
rail traffic systems, computerised organisation and central *(German)* 85−32767
real-time semiconductor processing control using fabrication monitoring 88−13069
resistance welding microprocessor control device feeding three single-phase transformers *(Spanish)* 87−79246
ripple control system controlled and monitored by processcomputers 86−12287
robot process groups, network architecture design for hazardous environments 88−67028
rolling mills, Hitachi control systems, new developments 86−19647
rolling mills automation, application of systems approach for the design 85−21979
rotors press. casting, technology and equipments 85−65660
rubber and plastics industries, electrical engineering problems, conf., Akron, OH, USA (Apr. 1986) 87−27
rubber and plastics industries electrical engineering problems, conf., Akron, OH, USA (Apr. 1985) 85−60671
sawmill, increased sideboard yield and customer oriented production via edger optimisation 88−34196
secure and reliable user access in process control by personal computer 87−76395
semiautomated gauge-block calibration and process-controlled system 86−65098
SEMICON/West 84, Conf., San Mateo, CA, USA (May 1984) 85−5648
Semicon/West 85, conf., San Mateo, CA, USA (May 1985) 86−52133
semiconductor CAM, structured distrib. network approach 88−1744
semiconductor device manufacture and testing, SMART expert system appl. 87−36477
semiconductor diffusion furnaces microcomputer control system, design aspects *(Polish)* 88−6038
semiconductor process control and design, computer-aided process modelling 85−1725
semiconductor process development using RS/1 to ease data anal. 85−61815
semiconductor processing, Si Czochralski crystal growth, digital control 85−33398
semiconductor wafer automation, process conditions and equipment 86−1861
semiconductor wafer fabrication, automated processing equipment 87−36468
semiconductor wafer fabrication automation, flexible, information and communication 85−34747
semiconductor wafer handling robot for angular positioning 85−34745
semiconductor wafer pick-up tool, robotics appl. for automatic wafer handling 85−54120
sensor monitoring by digital I/O node card, config. and appl. 86−59645
sensors for automatic control systems *(Spanish)* 88−16045
sensors with AI for sixth sense, capacity of advanced sensors *(Dutch)* 88−53662
serial data communication system, TELEPERM M, decentralised process control appl. *(German)* 86−10742
shape tracing system using eight optical sensors, velocity-controlled 88−74444
sheet metal power presses, compact press controller presentation 88−11519
Siemens FM100 field multiplexer for petroleum industry, flameproof *(Spanish)* 86−59715
Siemens SINEC communications network for automation systems 86−10799
Siemens SINEC H1 bus system for process communications 86−10796
Siemens SINEC H1 LAN, configuring, testing and start-up 86−10797
SIHEL, hierarchical simulator, impact of simulation on manufacturing systems design *(French)* 88−44018
SIMATIC S5 automation system, data link systems 86−10798
SINAUT ST1 station control system 87−48407
SINEC communication system, Siemens development of Open Systems Interconnection for manufacturing environment 87−48406
sintering plant in Fukuyama Works, Japan, computer control system *(Japanese)* 88−6067
skin pass rolling mill using cycloconvertor-fed induction drives, computerised control system 88−37775
small and medium businesses, process innovation and automation by microelectronics *(German)* 86−46035
small-section rolling and wire mill automation system 87−51664
smart US sensor system for fluid system process monitoring 87−71453
SMCIPS: an IBM PC based expert system for surface mounted technology 88−25638
SMD, computer control of assembly with machine vision controller 86−14702
SMD insertion process, automatic control *(German)* 88−38910
SMD placement system, CAD data-driven, high-density components prep. 88−38888
SMT inspection, automated real-time X-ray imaging and interpretation 88−32668
SMT rework system, microprocessor control 88−19542
SMT state of the art in surface placement with placement correction for board distortion 88−12837
software communication and coordination system for power network load distribution and switching *(German)* 86−65630
solder paste surface mounting using computer controlled compressed air dispenser *(German)* 88−37958
soldering, quality booster 85−34313
statistical control for VLSI fabrication processes 88−64744
statistical process control: higher quality through worksite data management in semiconductor manufacture 88−64675
statistical QC by PC in manufacturing processes *(Spanish)* 88−6296
statistical quality control, semi-automatic meas./recording equipment *(Spanish)* 87−51885
steam turbine control microprocessor system 86−25931
steel, batch manufacturing in electric furnaces, cybernetic control system 86−13195
steel and iron industry, Hitachi digital speed control equipment for motor drives 86−19648
steel bar rolling mills control using distributed microprocessors 87−43683
steel hot strip mill thickness control system design and implementation 86−45847

process computer control continued
steel industry, computer-aided work schedules, production process evaluation *(German)* 85−16468
steel industry, production control computer and EM environment 87−12753
steel making process analysis, measuring techniques *(German)* 85−10254
steel mill, electronic frequency converters for accurate computer control *(Swedish)* 87−79236
steel mill automated high-shelf store using process control computer *(German)* 88−6058
steel-melting furnace control system, automated process stage recognition 87−72592
Subeca PGM/1000 process gas management system 88−55957

resistance furnaces, control and process regulation *(German)* 86−40296
resistance welding machine control using ELTROS III microelectronic controller 86−71156
RF level measurement, use in process industries 88−29705
rubber industry, application of DC motor drives for process control 85−10284
rubber industry process drives, coordination of motor drives with programmable controllers 85−10286
safety barriers for meas. transmitters 88−16047
screen printing for electronics manufacture 85−39550
self controlling analyzing measuring systems *(German)* 85−64323
self-correcting cryogenic wind tunnel at OMERA/CERT 86−32436
semiconductor device manufacturing, scanning laser image generation as diagnostic tool 87−16364
semiconductor device on-line process control, resistivity meas. appls. 87−60251
semiconductor diffusion process characterisation, m DOT case study−-productivity improvement through process control 85−45565
semiconductor industry, liquid particle counting, methodology develop. and statistical process control 88−1490
semiconductor manufacture, effluent gas scrubbing 85−40573
semiconductor manufacturing 85−40574
semiconductor manufacturing, NC system 86−28244
semiconductor photomask inspection contamination reduction 87−6789
semiconductor process control using spectroscopic ellipsometry *(Dutch)* 87−67035
semiconductor process gas flows, mass flow controllers 86−21335
semiconductor process parametric testing from design to production 86−19832
semiconductor processes, computer-based anal. 86−34465
semiconductor processing chemicals ionic contamination determ. 85−61814
semiconductor processing equipment control system 87−23314
semiconductor technology, dielec. process monitoring, appl. of contour maps and statistical control charts 88−13081
semiconductor technology, oxide growth control by real-time simulation 87−6603
semiconductor wafer surface defects, automated detection by laser scanning 85−210
sensor designs and applications 88−42044
sensors, conf., Detroit, MI, USA (Sept. 1987) 88−24365
sensors and transducers for process control 88−42068
sensors for biotechnology, conf, London, UK (March 1988) 88−37870
sensors for process control 88−71381
serial links for multichannel control 86−37491
sewage plant instrumentation and control system design *(German)* 85−10295
ships's bottom shell plate automatic welding from overhead position *(Japanese)* 86−13204
Si_3N_4 film edges, etched, slope control during plasma-enhanced CVD 87−5448
signal conditioning for electrical plant problems 88−16005
signal transmission in process control systems under the environment of electromagnetic noises *(Japanese)* 85−2590
single line interrogated transmission system for multiple channel data acquisition and control 85−64052
single-card transfer manufacturing, dynamic process control 88−38892
single-mode optical fibre preforms, dimension control in VAD process 87−7082
smart transmitters to communicate with distributed control system 87−8586
SMD boards, real-time X-ray process control for solder joint integrity 88−12828
SMT joint differential thermal expansion stress overcome by solder vol. control 88−32662
SMT mixed-technology assembly 88−57095
SMT real-time X-ray imaging for process verification 88−12838
soft soldering processes and visual inspection standards 88−43700
solar cell arrays production testing using IR technology, space appls. 88−49139
soldering techniques to help process and quality control, handbook 88−69983
solderless contacts, process controls 88−19461
solid-state relays for control system appls. 87−32134
spray etching, automatic end-point detection in mask making 85−61806
statistical process control, advantages over traditional QC 88−31532
statistical process control, appls. *(German)* 88−43727
statistical process control and quality control in manufacture 87−31320
statistical process control combined with classical assumption check for integrated quality inspection method *(German)* 88−43728
statistical process control for improved production QC 88−18509
statistical process control for improved quality 88−24586
statistical process control for manufacturing appls., case histories presentation 88−56052
statistical process control for manufacturing improvement 88−37999
statistical process control implementation, management aspects 87−44025
statistical process control implementation, people oriented approach 86−61962
statistical process control implementation and benefits 87−44026
statistical process control implementation flowchart 86−52301
statistical process control implementation in manufacturing industries 87−51889
statistical process control of coating thickness 87−70804
statistical process control plan 86−7547
steelmaking arc furnace, computer-aided monitoring and process control *(German)* 87−43676
STM, advances in reflow soldering process control 88−12821
subbituminous coal and lignite chemical structure and liquefaction reactivity 87−42554
submicron electron beam process control 88−57557
submicron photolithography, defocus effects 87−38384
submicron semicond. geometries inspection/process control, LMS 2000 metrology system using laser interferometry 88−18451
process control continued
surface mounting, integrity of solder joints as a function of reflowtemperature 87−6274
synchronous motors over wide speed ranges, motor selection 88−62332
system moments method for reducing fabrication variability 88−1498
tape materials production line, phase control of multimotor electric drives *(Russian)* 86−66379
telemetry, benefits in process control 86−17853
temperature meas. and control. use of analogue pulse counter *(Czech)* 86−24808
TH-8000 automation system for production processes *(Dutch)* 87−96
thermionic converter using Cs vapour pressure, operating condition optimisation 86−33714
thermoelectric coolers test station, use of HP Touchscreen 87−3417
thermosetting resin systems, dielectric props. meas. for cure process monitoring and control 86−65255
thick film hybrid substrates with Cu conductors/compatible resistors, statistical process control database 86−53272
thick film resistor laser trimming, process control 88−50556
thick film resistors, print thickness limits, process control techniques 85−28849
thin film sensor for pressure transducers, fabrication and appl. *(German)* 85−64128
thin film strain gauge elements for meas. and data transmission in processed involving fluids 88−29306
thyristor power supplies for electrotechnological installations 86−45855
time domain reflectometry-based fluid level sensor 88−42081
torque transducers, operating principles, process control and quality assurance appls. 88−16090
total manufacturing process control for product quality control 88−18523
total quality control and JIT production, productivity gains 87−36449
transformer cooling system thermal and hydrodynamic process control and boosting *(Russian)* 88−11265
transformer manufacture, statistical process control model 86−67540
transmitter chip, AD693 85−42917
transmitters with microprocessors for remote process control 88−15019
trends in distributed process control 86−31121
tyre cord surface analysis by glow discharge spectroscopy 86−19867
ULSI processing gases, achieving future requirements 87−6805
ULSI yield loss mechanisms and defect tolerance 88−64734
US sensor appl. *(German)* 87−57452
US wire bonding, quality control 85−45340
use of fibre optics 86−42243
UV liquid photoresists, automated photographic imaging process appl. 85−11743
vacuum deposition plants, automatic control 85−16980
variable speed drives and inverters in process automation *(German)* 88−49173
video colour display system PAN 30 for process visualisation and control *(German)* 85−8620
video linewidth measuring systems for critical dimens. control 85−15036
VLSI, test structures and expert systems for process control 88−7720
VLSI equipment manufacture, ATE techniques for linewidth, resistivity and registration control 85−62027
VLSI fabrication process control modelling techniques 86−67942
VLSI fabrication processes, statistical control 88−6255
VLSI FET etching process modelling via Kalman filter and channel length control 87−53696
VLSI micropatterning process control through fully automatic inspection and measurement in a production environment 88−7718
VLSI multilevel wiring defect monitor test structure 85−40863
VLSI photolithography, process control eval. using response surface anal. procedure 87−11902
VLSI process control chip parametric test as a tool for increasing engineering yield 88−64742
VLSI wafer processing and testing on basis of elec. test devices 86−1873
VLSI/ULSI manufacture, developments in high precision metrology tools for critical dimension control 88−57744
wafer characterization of an epi reactor using sheet resistance mapping 87−16647
wafer fabrication, developments in process control 87−16359
water quality improvements and VLSI defect density 87−6806
wave soldering, process control study 85−54114
wire stranding process automation 86−20872
X-ray fluorescence technique 86−18117
xerographic copier, process control functions *(Japanese)* 85−29996
Au ball/wedge wire bonding, statistical process control 88−7244
Cr-Ni film resistor sputtering with automatic gas regulation *(German)* 88−71249
Cu magnet wire industry, wire drawing cpds. 86−62883
Cu plated through-hole, PCBs, electroplating 87−6231
Cu thick film multilayer interconnect boards, failure mechanisms and process control requirements 86−62969
GaAs MMIC, determining cct. robustness to material and process variations 86−41355
GaAs wafers, automatic on-wafer probing of devices and ICs from DC to 1 MHz 86−44152
Ni electroless deposition, real-time rate monitor evaluation 88−10130
Pb-acid battery manufacture, QC practices to improve quality, cost and reliability 87−23377
Si MBE, doping level control by feedback 87−10379
poly-Si trench isolation technology, structure for defect location and density meas. 86−35751
Si wafers, surface defect charactn. by laser scanning technique 88−7440
ZnO toolbit mounted sensors for process control in lathe and milling machine appls. 88−56359

document control systems, computerized 86−40474
drilling equipment for PCB *(Japanese)* 87−45445
Dronningborg electronics in agriculture *(Danish)* 87−72645
electric motor production CIM, incorporating CAD *(French)* 88−62292
electronic assemblies, automation and flexibility *(German)* 87−51836
electronic assembly workcell stoppages, schedule recovery strategies simulation 87−36480
electronic components manufacture, product identification marks using LaserMark laser coding system 85−150
electronic equipment, marking of components, boards, and packages 88−57087
electronic equipment manufacture, Plessey Microsystems programme for computer-aided production 85−60735
electronic equipment power supplies, flexible manufacture using JIT at Coutant Electronics 88−12705
electronic product manufacture and EMC test sites, statistical process control 88−58889
electronics company, rebuilding sales, production and material management systems 85−44452
electronics distribution, growth in UK 86−154
energy and production management systems 87−30103
energy dispersive X-ray fluoresc. analysis, industrial appls. 85−54581
epitaxial wafer production, planning and scheduling 87−60600
Ericsson product reliability and maintainability calc., DEPEND system 86−57246
ESD control, realistic and systematic plan 86−58502
failure analysis for automatic identification systems 88−6327
flexible manufacturing systems, concurrent lots scheduling, modelling by closed queueing network anal. 85−16747
flexible manufacturing systems, hierarchical production scheduling scheme, performance study 85−16746
flexible robotic installation design for microengineering to meet JIT constraints 88−63021
flexible semiconductor assembly line automation, management 88−18479
fluorescent lamps production control, equipment and procedures *(Hungarian)* 85−32856
FMS communications network 85−63376
FMS in electronic assembly, production management, case study 88−18480
force sensors production, using Japanese KANBAN principle *(German)* 85−37578
graphical problem-solving techniques for process improvement−a change of direction at RCA-ESD 88−62994
hard disc drive spindles, system identification: an experimental verification 88−18514
high-volume wafer fabrication and ASIC manufacturing, automation trends and CIM implementation 87−25454
Hitachi computer connection *(Japanese)* 87−2892
Hong Kong electronics industry, just-in-time production appl. 88−18433
hybrid IC manufacturing, component part number substitution in materials requirements planning 88−11715
hybrid IC printing process, registration accuracy improvement using computer aided techniques 88−57207
IC electrostatic discharge damage, susceptibility 85−12343
IC fabrication, Just-in-Time approach 86−52238
IC manufacturing, material control automation 88−26483
IC production areas, contamination impurity finding *(Dutch)* 88−26380
incoming quality control, new approach 87−58703
industrial enterprise, communication within 88−62993
industrial enterprise production planning systems for delivery improvements 88−49472
industrial trucks with centralised material flow systems, infrared communication appl. 88−41272
inspection, repeated meas. to reduce meas. error effect 88−43718
integrated factory in industrial environment, CAD, CAE, ATE 85−33138
integrated metrological systems for inspection automation, theoretical aspects 87−72882
Integrated Nuclear Plant Piping System development *(Japanese)* 85−59885
intelligent opto-electronic device for measurement of diameter *(German)* 87−51855
internal time, analysis of routine productions global behaviour *(German)* 86−40503
ion implantation, real-time monitoring using optical dosimetry 88−57451
Japanese just-in-time production and inventory system, kanban system 87−58642
JIT, about face 87−58670
JIT, concepts and implications of introduction into British industry 88−130
JIT concepts, overview 87−58668
JIT implementation in low-volume board shop, pilot project 88−25713
just-in-time for electronic production 87−51841
just-in-time manufacturing and quality control implementation 87−58649
Kawasaki Steel Corp., steel making and slabbing production control system change-over *(Japanese)* 85−33122
labels, matching appl. requirements and materials 88−55945

production control continued
LAN, metal manufacture appl. 85−63285
laser interferometer appl. in machine tool industry *(Czech)* 85−8957
laser interferometer for optical components testing *(Czech)* 86−10036
logistical management of product mfg. using automated systems *(German)* 88−49427
LSI fabrication processes using flexible manufacturing systems *(Japanese)* 85−7015
LSI mass production oscillation characts., math. modelling 86−35734
machine design, construction and production preparation, using MINING 1 graphics software system *(Czech)* 85−32489
machine vision for statistical process control system and inspection 88−38012
made-to-order product engineering changes within MRP II system 87−23310
manufacturing control and capacity planning 88−26183
manufacturing quality planning using computerised prod. control *(German)* 88−49565
manufacturing technology and the role of manufacturing research 88−24537
manufacturing with automated inventory management and materials handling 88−1250
measuring and laboratory instruments quality and reliability assurance *(Czech)* 85−5810
measuring equipment operation in production process control *(German)* 87−41315
Merlin Gerin, production automation, circuit breaker example *(Dutch)* 87−43946
mica capacitors, close tolerance selective assembly method, simulation and prototype production system 85−44504
microelectronics manufacture, production scheduling improvement by microcomputer simulation 88−31466
microsectioning as process control tool 88−64090
Microsoft Project management package 86−7491
mixed SMT/through-hole component electronic assembly, process control for optical inspection minimisation 88−12827
modular control system for batch production, printed circuit manufacture appl. 85−60746
modular power units, processor-controlled production line 85−60754
MOS transistors, threshold voltage, average impurity conc. 87−11772
multiechelon production inventory systems, integer multiple lot sizes, efficiency 85−54121
multilayer circuit manufacture, prod. and quality control assurances *(German)* 88−50523
NDT automated systems, production line appls. 87−56516
NINO's EMS 12000 communications system *(German)* 85−13714
nuclear plant piping support system development *(Japanese)* 87−50931
parts handling system, computerised control of conveyor and robot manipulators 85−60739
parts obsolescence, avoidance examples 88−6222
PC assembly shop manufacturing system development by conceptual model 85−50102
PC cards, optimised manufacture using statistical quality control *(French)* 85−55281
PC testing for SMC technology, thermography appls. in production control *(French)* 87−17535
PCB, bar-code system 86−14683
PCB, electroless plating bath control 86−27710
PCB, statistical quality control approach for high yields achievement 86−8639
PCB assembling, vision assisted light assembly robot system orientation 88−25710
PCB assembly, flexible, small batch production approach 88−50529
PCB assembly, LISP-based heuristic scheduler appl. 87−11183
PCB assembly operations redesign for flexibility and economic efficiency at Wang 88−32636
PCB assembly technology and production solution 87−1089
PCB ATE and automated production process from Zehntel *(French)* 86−20929
PCB automatic assembly line, design and operation *(Italian)* 88−1155
PCB electroplating hoist scheduling model 88−71215
PCB identification, bar code label materials selection criteria 88−57092
PCB test networking for real-time quality control 86−20973
PCB wave soldering, use of IR radiometers for sensing the source of wave soldering defects 88−32575
permanent magnet castings, thermomag. treatment regimes optimisation 87−51662
planar directed networks, multicommodity flow problem *(Japanese)* 87−44441
planning, standardisation and balancing method *(Russian)* 85−5726
planning and control system introduction using SIDA concept *(German)* 88−18434
polarising filters for conveyor belt reflective optical monitors with high interference rejection *(German)* 86−55730
polyimide-glass multilayer board lamination, dimens. control 86−62940
power cable prod., microprocessor control in industry 85−4632
PRE-control sampling plan performance characterisation 87−65227
process flow control 86−41456
product design, assembly-oriented, rationalisation 88−43671
production quality costs, concept 86−34060
PROLEI process automation system using TV screen as control panel and mouse for functions *(German)* 87−77031
PTH, PCB, through-hole coverage keys 87−45409
PWB manufacture, bar code technology appl. 87−11165
quality checking by digital image processing *(German)* 86−46046
quality control, computerised system *(Russian)* 85−205
quality design for CIM 88−38016
quality technology *(Italian)* 87−44013
reference model of production control systems 87−23318
repair cost limit replacement policy under imperfect inspection 88−63077
scheduling analysis, modeling and pricing 87−34261
scheduling system for high technology products 88−70094
scheduling to minimize total penalties due toearliness and tardiness 86−7488
semiconductor device manufacture, use of decision support desktop CAM system 88−31440
semiconductor device manufacture and testing, SMART expert system appl. 87−36477
semiconductor factory management modelling and implementation 86−52239
production control continued
semiconductor manufacture, overall production planning tool 86−63217
semiconductor manufacturing, NC system 86−28244
semiconductor production planning and scheduling hierarchical framework 86−52214
semiconductor wafer fabrication, automated processing equipment 87−36468
semiconductor wafer fabrication by photolithography, capacity planning 87−60260
short-term production management system *(German)* 86−34014
SMD boards, real-time X-ray process control for solder joint integrity 88−12828
SMT mixed-technology PCB assemblies production, continuous flow manufacturing 88−32578
SPC software for quality control in German car components manufacturing/supply industry *(German)* 88−24590
speech recognitions, just in time applications 88−27825
statistical process control for manufacturing appls., case histories presentation 88−56052
statistical process control implementation flowchart 86−52301
statistical QC, variance analysis in quality assurance *(German)* 88−38010
steel industry, computer-aided work schedules, production process evaluation *(German)* 85−16468
steel industry computers and the EM environment 87−12753
stepping motor control on a CNC measuring projector *(German)* 88−17658
surface mounted technology , management 88−71243
surface roughness meas. by light scattering method, principle and appls. *(German)* 85−64294
systems engineering, production system management appl. *(Italian)* 86−46036
technology-automation, order processing and job organisation, development *(German)* 85−60725
TH-8000 automation system for production processes *(Dutch)* 87−96
thick film hybrid substrates with Cu conductors/compatible resistors, statistical process control database 86−53272
thick film MLC chip capacitors, yield maximisation using decision analysis 87−66781
thick film resistor design curve construction for high yield 88−57171
three-dimensional co-ordinate meas. instrument applications *(German)* 86−18125
through-hole PCBs, machine vision system to detect missing components prior to soldering 88−25709
Tokyo Gas Co. Ltd. production and supply control system, review *(Japanese)* 85−33121
total production control in the steel industry *(Italian)* 87−31087
total quality control, Japanese approach, job/organisation design 87−5268
total quality control and JIT production, productivity gains 87−36449
total quality control for CIT, quality, productivity, and the competitive position 87−58702
twisted turbine blade manufacture, flexible production system using robots and expert system *(Dutch)* 88−31468
ultra-thin tungsten wires production control, using real-time laser and microcomputer system 88−49503
uniformly-shifting process, algorithm for economically setting 88−56038
using bar codes improves management control 87−56472
VHF/UHF radiotelephones for industrial processes control 86−64564
videography, high-speed, use as problem solving/research tool in plant environment 86−5086
vision-controlled production system, automatic template selection technique for local pattern matching method *(Japanese)* 85−57510
visual inspection system, high-speed, elec. switch production appl. 88−4497
VLSI CIM systems, information management aspects 87−67529
VLSI failure analysis, deprocessing locates IC failure causes 87−59464
VLSI manufacturing, dynamic production scheduling 86−58573
wafer fabrication plant scheduling 86−40508
Westinghouse circuit board manufacturing, failure rates 85−55299
Westinghouse technology modernization forelectronic assembly 85−50113
workcell controller, knowledge-based, for production planning in electronic industry 88−55940
X-ray diffractometer control of film and foilthickness 86−5517
zero quality control mistake-proof production, poka-yoke system 88−57110
AlGaAs-GaAs space solar cells, LPE production and characterisation 87−4907
Pb-acid battery manufacture, QC practices to improve quality, cost and reliability 87−23377

production schedules *see production control*

production testing
4ESS Switching Project, stress testing large switching systems 85−19966
5ESS switching systems, factory system testing 86−10903
26 GHz wafer probing for MMIC development and manufacture 87−8722
250 MHz pattern generator for IC testing 88−4499
256K DRAMs with redundancy, production test and repair 85−40069
500 kW Pb-acid battery for peak shaving energy storage testing and evaluation 85−27619
A/D convertor, 10-bit, testing with digital VLSI tester 87−31967
AC voltage metrology, using solid-state fixed-range thermal voltage convertor 88−60851
AE of graphite with stress concentration *(Japanese)* 87−59030
aircraft gas turbine engine, computerised testing under transient conditions, metrological support 86−31266
analog design and prototype testing 88−15956
application specific ICs, testing methods and equipment *(German)* 86−63358
ARITMA PC manufacturing and testing equipment *(Czech)* 87−66755
Arnold expert systems for production test code generation 87−31287
articles with large demagnetisation factor, inspection by combined transducer 86−5194
ASIC, focused tester for industry 88−18465
ASIC design tools and ATE systems integration 88−1701
ASIC devices, high pin-count, prober/handler interface 87−32635
ASIC prototype inspection in production environment *(French)* 88−64691
ASIC systems, quality assurance and reliability *(German)* 88−33283
ASIC test data management system sizing 88−18461
ASIC test needs 87−67479
ASIC testing, design verification systems versus full-blown VLSI ATE 88−18457
ASIC testing−the MEGACELL solution using BIST 88−38506
ASIC testing using semiconductor ATE 87−74350
ASICs, ATE 88−12280

production testing continued
ASICs design and manufacture, TPG2 automatic test program generation system 88−15958
ASICs development, common environment for product design and test 88−71732
assembled boards testing, using in-circuit ATE *(Czech)* 85−6608
assembled PCBs, automatic visual testing−A new class of testing for PCBs 85−34319
assembly strategic test plan development 88−32648
asynchronous motors, ATE system *(German)* 86−70896
ATE, conf., Anaheim, CA, USA (Jan. 1988) 88−70013

ATE, functional testing in production 86−40513
ATE, pre-screening procedures 86−24284
ATE, tailoring test program work 86−20933
ATE alternatives, economic overview 88−60596
ATE calibration, economic model 86−44137
ATE Conference, London, England (April 1987) 88−62892
ATE enhancement by temperature-stress techniques 86−17744
ATE fmax testing in high-volume production environment 87−36475
ATE for electronic equipment testing, conf., Boston, MA, USA (June 1985) 86−34065
ATE for flexible disk drive testing 86−2599
ATE for production testing 85−31328
ATE for production testing and repair, Fluke 9100 series 88−11722
ATE implementation, system considerations 86−7514
ATE industry, status, technological trends and future prospects 85−22163
ATE manufacturer progress in 1987 by changes in technology 87−56479
ATE measurement accuracy 87−56481
ATE modular concept for Swedish multivariable combat aircraft 85−31350
ATE network on wafer-sort area, case history 87−25476
ATE networks in manufacturing environment, process control loop model 88−60599
ATE software, standard language for instrument control, weapons appl. 85−31367
ATE software, test-oriented languages for ATE, operating systems 85−20486
ATE system for PC boards testing, telecom. equipment production appl. *(Czech)* 85−55309
ATE test head requirements for low-cost VLSI testing 87−32634
ATE test strategies for 1990s *(German)* 88−41954
ATE-based, production testing information utilisation improvement 87−111
audatec control system testing and inspection during prod. *(German)* 88−67671
automated inspection for reticle qualification in fineline wafer stepper prod. facility 86−13521
automated optical inspection 87−32617
automated radiation testing of ICs at the wafer stage 85−7052
automated rigid disc testing workcell 86−66605
automated testing implementation 88−18418
automated visual inspection 86−14698
automated wafer inspection system, multi-functional 86−13524
automatic, hardware and software interface to hardwareverification tools 86−46064
automatic component tester 86−40512
automatic inspection of parts with complex geometry *(French)* 86−32610
automatic optical inspection, industrial appls., European viewpoint 87−77101
automatic PCB/components test system, 8510 series, features *(German)* 86−11425
automatic photoheterodyne interferometric system for control of optical details 88−67666
automatic plated through hole inspection system forprinted wiring boards 86−47176
automatic spectrum analyser, modular system with 100 Hz to 325 GHz range 85−37520
automatic test equipment, overview of available equipment *(Italian)* 88−67662
automatic testing of microprocessor system unit boards 85−58526
automatic thick film conductor testing in production environment 87−6283
automatic visual alignment and inspection of electronic components 87−16415
automating PCB test and repair 88−50508
automation in small companies using microcomputer networks, bimetallic strip temp. regulator QC appl. 88−37953
automation of parametric testing in semiconductor IC manufacturing 88−57747
automobile engine/transmission automated production test system for quality assurance *(Japanese)* 85−31327
ball bond shear test, methodology and appls. 85−55938
bare and populated PCB testing 86−41398
bare board test probe selection criteria 86−53169
bare board testers find the faults before the cost soars 85−11755
bare PCB test strategies for manufacturing yield improvement 88−19544
bare PCB testing, economics 86−27703
bareboard inner layer testing, testability considerations 86−1568
beam probing for IC and wafer inspection 86−53762
binary search: A technique adapted to failure analysis diagnostics used for ATE production testing 87−28937
BISS XXXX burn-in system, characts., performance and appl. *(Italian)* 88−70101
bit-map graphics for VLSI memory analysis 85−61254
bonded stripline assembly, process/quality control, inspection and failure anal. using US testing 86−26603
built-in-test and self repair mechanisms in a digital correlator integrated circuit 85−34027
burn-in, role in IC production and QC, commercial implications 88−20028
burn-in comprehensive tests, technical and economic merits 87−65177
burn-in computerisation trend 86−13447
burn-in impact on IC reliability, electronic manufacturers' guideline 86−46139
burn-in monitoring systems appl. 85−54117
burn-in programme anal. 85−44544
burn-in systems, boards and sockets, develop. trends 88−6246
burn-in systems, computer-based, for automatic control and documentation 86−44126
burn-in systems for components, boards and subassemblies 85−44491
burn-in systems for VLSI devices 88−33286
burn-in technique appl. in UK 88−11721
burn-in testing at high temp. using Ni-Be 440 connectors 86−13442
production testing continued
burn-in yield criteria, basis for setting 85−60741
burn-in/screening test services, status report 85−44486
bus structured boards, performance testing 86−8636
bus-structured PCB testing strategies 88−44454
CA/EDMT systems, buyer's guide for companies 85−16766
cable insulation quality control, thermal response to hot filament penetration obs. *(German)* 88−38792
cable sheath water vapour and gas diffusion meas. *(French)* 87−5264
CAE-ATE link, design for testability improvement 87−65178
CAE/CAD workstations, test programs generation for production testing 85−58503
capacitive continuity testing of multilayer hybridsubstrates: its capabilities and limitations 86−53258
capacitors, artificial stimulation of excess LF noise 85−55200
car radio subassembly production with in-circuit testing *(German)* 86−26609
car transmission testing equipment *(Japanese)* 87−49494
cards with surfaces mounted components, testing *(French)* 85−45322
CCD image sensors, testing with ATE 87−20861
CD, surface waviness and roundness measurement in pits 86−5601
CD jitter meters on prod. line 87−35001
ceramic, low-density, radiography and X-ray computer tomography effectiveness for controlling articles 86−26949
chain coding of large line scanned images, PCB inspection appl. 87−20998
chip carrier based systems and their testability 85−10510
chip identification reader 85−49364
choosing test strategies for maximising throughput 85−34342
circuit design, manufacture and testing, using simulation tools 85−35063
circuit pack test data acquisition and management at AT&T 87−23320
clocks testing using photoelectric transducer 88−35926
CMOS ICs, quiescent power supply current meas. 88−20127
CMOS integrated cell library, CAE system, semicustom and CAD tools 85−17252
CMOS process problem debugging using complementary defect monitors 88−13591
CMOS VLSI ccts. testing, tools, concepts and expt. results 86−47836
coaxial cable testing for production control, instrumentation and methods *(Italian)* 88−19438
codec testing using synchronized analog and digitalsignals 85−63392
colour CRT panels, automatic inspection using vision processor 88−50606
colour TV picture tubes, automatic adjustment based on sequential method *(French)* 87−70253
colour TV set, automatic purity meas. system *(Japanese)* 87−8403
Columbia 2000 PCB performance tester, bus-timing emulation test techniques 86−1549
combined robot/meas. instrument development and appls. *(Japanese)* 88−15942
compact disc automatic production testing system from YEWCAT *(Japanese)* 87−28875
complexity analysis of digital circuit tests 85−33748
compliant ground clamp for personal computer testing 86−57193
component-module test policy decision, economic model 86−61961
componentwise diagnosis of hybrid units, multilevel model *(Russian)* 86−1530
composite material, nondestructive meas. of dielec. permeability by nonsteady frequency-phase method 87−16748
composite materials nondestructive testing, real-time thermography appl. 85−49667
computer, controlled quality control system, with test facilities, Komeg equipment *(German)* 86−13519
computer controlled fully automated calibration of pressure gauges *(German)* 87−77251
computer ESD evaluation tests, statistical considerations 88−2478
computer products, complexity, test, and the productivity challenge of the90's 86−46061
computer-aided test and analysis 85−42861
computerised meas. technology developments 86−57204
computerized burn-in process using new universal burn-inchamber 85−61556
condensation soldering fluids eval. and characterisation 88−11743
conference, Philadelphia, USA (October 1984) 85−32904
conference on integration of test with design and manufacture, Washington, DC, USA (Sept. 1987) 88−15894
conference on test and meas., San Jose, CA, USA (May 1985) 86−13290
connector contacts made from thin precious metal clad inlay materials 85−11688
consultant's analysis of the electronic test and measurement instrumentation market *(French)* 87−5216
consumer electronics production testing, PTA computer *(Japanese)* 88−29231
contact resistance current dependency meas., in low-current level switches 87−11114
contact resistance current dependency meas. in low current level switches, automated system 88−12678
contactless measuring technique for testing VHS video cassettes *(German)* 88−9835
contactor automatic assembly line 86−46050
continuity/isolation testing of multilayer hybrids and surface mounted boards 85−153
control system component testing at Indramat *(German)* 85−201
coordinate meas. techniques with decentralised microcomputer processing *(German)* 86−31638
crack resistance characteristics determ. in crack arrest stage, test machine 86−46417
cross-correlation estimation for time delay measurement 85−14570
current supply subassemblies production, quality assurance *(German)* 87−4783
custom integrated ccts. on wafers, packages and boards, inexpensive microprocessor testing 87−31286
Czechoslovak practices of accrediting electrical and electronic products *(Czech)* 87−5208
data products automatic testing, tool bit from BNR 85−58537
Decracktor for online surface crack detection of continuously cast hot slabs 87−52225
Delta-12, fast production tester for line and trunk telephone exchange boards 87−34269
density measurement of porous objects under prod. conditions by γ radiography 86−7867
design-to-ATE link restrains testing cost 86−20934

production testing continued
designing and manufacturing for test 88−63004
diagnostic electrostatic discharge mapping 86−52225
diameter continuous monitoring, wires, filament and cables production testing appl. 85−48090
die attach screen on ATE 85−54129
digital complex boards production testing, using field, type functional board testers 88−71240
digital data acquisition devices, using string linear displacement convertors 86−31267
digital IC testing, automated system *(Russian)* 87−14098
digital PCB simulators are no longer a novelty 88−57075
direct stepped wafer lithography, charactn. tools in inspection and process control 88−19871
disc drive power supply testing 85−39539
disc drive test and maintenance, importance of correlation and calibration 85−62192
disc drives production testing, planning for testability 85−44489
discrete devices, testable designs, methods and implementation 85−54110
disk pack particle count behaviour, statistical model 85−54157
DRAM back-bias testing 86−8207
drilling test for PC shops 86−58126
drives, intelligent measurement methods in quality control and testing 87−4992
dual test site, single-pass, automatic isolation voltage/DCparametric testing now a reality 86−40515
dynamic RAM back-bias testing, cast and time reduction 86−20519
ECL and SMD board in-circuit tester with 4096 test points 86−27726
eddy current facilities, data processing algorithms for interfering parameters 86−549
EEPROM testing to guarantee functional and reliability specifications 86−46809
electric machine commutator insulating segments, automatic shape and orientation checking during manufacture 87−22238
electrical and electronic products testing, international standardisation of testing practices *(Czech)* 87−5207
electrical feed systems, automatic inspection and in-circuit testing for QC *(Italian)* 87−36455
electromagnets for high-energy physics appls., quality assurance tests 87−54496
electronic and electrical components testing, activities of Czechoslovak Electrotechnical Testing Institute *(Czech)* 87−5206
electronic ccts., future trends, impact on test engineers education 86−47729
electronic components 86−155
electronic components, hybrids and cct. packages, thermography technology for characts. and performance verification 86−13466
electronic components, operational life testing at AT&T 86−26599
electronic components and equipment testing in manufacturing environment, test strategy optimisation 88−60595
electronic equipment, ATE, flexible system with modular construction and reconfigurability 85−42846
electronic equipment, financial implications of test floor operations analysis 86−46062
electronic equipment, incoming quality management and codestiny 86−223
electronic equipment, production line QC using acoustic emission testing techniques *(French)* 87−44010
electronic equipment, quality assurance and production testing *(Slovenian)* 88−63008
electronic equipment, testing problems prevention 86−26593
electronic equipment automation testing, ETI 120 ATE system *(French)* 87−56469
electronic equipment calibration on production floor 87−77068
electronic equipment design, development, production and support, vertical compatibility 88−29261
electronic equipment manufacture, AC power contamination impact 88−24534
electronic equipment manufacture testing, CAD/ATE integration 86−170
electronic equipment test strategies, management perspective 88−11723
electronic equipment test strategy development 88−70129
electronic equipment testing, test data management system 88−22465
electronic equipment testing, using computer-aided test process models, quality and economic effects 85−47817
electronic equipment testing based on key signatures 86−57188
electronic equipment testing using polynomial-shaped meas. signals 85−33163
electronic manufacturing quality impact on throughput and cost of test and rework 87−23322
electronic modules, test program development system based on theHP-9000 family of computers 86−49943
electronic production efficiency, conf., Birmingham, England, (April/May 1985) 86−13292
electronic production stress screening faster than burn-in 85−10527
electronic products, vibration stress screening technique for quality control *(Italian)* 88−55948
electronic products at Brown Boveri Corporation 85−60730
electronics assembly manufacture, cost reduction and throughput improvement by test data utilisation 88−55969
electrostatic discharge failure rate prediction for products 85−166
encapsulated wire joint bond test 85−11772
engineering workstation adaption of prototype and production tests 85−58500
environmental, stress screening of electronic hardware 86−66610
environmental influences classification *(German)* 86−66600
environmental stress screening using random vibration 88−31459
epoxy spacers, influence of X-rays on partial discharges in voids 88−24536
EPROM programmer, effect on production speed and cost 85−45041
equipment changes for competitiveness 86−26594
error characts. determ., parameter deviations 85−8671
errors determ., for indirect test condition specification 85−63925
ESCAPE simulator for assessing ATE on a cost-avoidance basis 85−14599
ET-v2 expert system for troubleshooting 88−60593
EWSD quality in production and operation *(German)* 88−46815
exploratory data analysis for semiconductormanufacturing 85−60742
exploratory data analysis in semiconductor device manufacture 85−39536
extruded cable surface flaw inspection using scattered light based technique 85−58641
extruded power cables, DC testing 86−65711
Factron 750 combinatorial tester *(Italian)* 86−31146
fibre optic process density meter *(Japanese)* 86−31460
fibre optics test standards, effect on production efficiency 86−15468

production testing continued
field service and production testing using common technology 88−31472
financial impact of tester reliability improvements 87−23431
fine-line PCBs, how to evaluate developing and etching 88−7196
flatness and distortion measurements in semiconductor manufacturing 85−35141
flexible media products, testing using zoned demark criteria 86−28641
flip-flops testing, partial scan approach 88−12338
floppy disk testing machine 87−8512
focal plane arrays testing, Rockwell automated cryogenic testing facility 86−31219
forgings, large, with varying microstruct. through cross section, US monitoring, soundability 85−10857
Fourier anal. for high speed inspection 88−56050
functional testing of completed power supplies 88−32007
future factory, technological trends and issues 85−55313
future factory PCB production test strategies 85−55314
gap distance meas. between magnetic head and disc, interference method 87−29296
gas discharge device to test for signal plane to signalplane incipient shorts in drilled but unplated circuitcards and boards 87−1084
gas-turbine production-testing complex *(Russian)* 86−55538
general environmental compliance testing 88−6256
general model for classical group testing problem 85−22270
GenRad 2720 ATE Performance Test System for PCBs 85−8698
global system of quality management *(French)* 85−33198
GR 2750 ATE system for in-circuit and functional testing of complex cct. boards *(German)* 88−15918
group probing strategy for testing large number of chips 87−38467
group testing procedure and optimum group size 85−22269
Gunn diode manufacture, probe techniques for semicond. diagnostics based on noise current characts. 87−45250
hearing aids, microprocessor-based ATE 86−18380
heavy plate, eval. according to US testing and delivery standards using electronic data processing *(German)* 85−10869
heterostructure lasers, by resonant attenuated total reflection spectroscopy 88−2279
heuristic step towards design and manufacturing integration 87−14084
Hewlett-Packard's proposed coordinated test strategy for MDM MicroSystems 88−55967
Hewlett-Packard HP3235A test and programmable switch unit, config. and appl. *(French)* 88−9862
HF quartz crystal resonator fabrication, identification and meas. problems 85−35269
HF VLSI test systems, evolution of test heads 87−67494
high performance PCB tester, economic justification model 86−17750
high speed hi-pot stress test 86−7556
high-performance handler for 300-mil dynamic RAM testing 85−63972
high-speed A/D and D/A convertors testing, test fixture design 88−19236
high-speed test techniques, survey 88−39622
high-volume PCB cross-sectional analysis for plated-through hole boards 85−34314
hipot and ground continuity testing to identify elec. hazards 87−72803
hipot testing requirements overview 86−57185
Hippocrates, IC process diagnoss methodology 87−38465
holography application to factory floor design and testing problems 87−16720
HP 70000 modularised spectrum analyser for production-line appls. 85−47900
HV power cables voltage tests, by AC, DC and pulse voltages *(Slovak)* 86−32769
hybrid devices, failure anal., prod. testing, and design verification using thermography systems 85−28874
hybrid IC, active test placement probe 87−6294
hybrid IC thermal imaging for production testing 87−17567
hybrid microcircuit, moisture content, effect of screen tests and burn-in 87−1120
hybrids and PCB testing, using thermographic imaging systems 85−39543
IC, low temp. test aids 85−55336
IC, using Megatest Q2/62 tester, universal signal; routing card development system 86−49948
IC chip protection against electrostatic discharge damage 85−7000
IC chip testing, parallel quality test machine 88−50947
IC custom and semi-custom technology, custom and semi-custom IC technology 85−1655
IC design verification, using MONET-X2 program 86−7510
IC fault location, marginal voltage technique validation, using electron and laser beams 86−2308
IC final test programs, instability 88−7721
IC functional testing 87−46151
IC handlers for thermal testing 87−36472
IC manufacture, qualification measures 87−5257
IC manufacture and design for quality and reliability, book 88−6101
IC network, test construction 86−57762
IC product reliability test costs *(German)* 87−58707
IC production and testing, TV imaging systems for positioning and inspection appls. *(Slovak)* 85−28040
IC reliability increase during development and production *(Czech)* 85−22287
IC submicron linewidth meas., computer-controlled cassette to cassette electron beam system 87−11871
IC submicron linewidth meas., SCANLINE dedicated fabrication line SEM system 87−11870
IC testing, conf., London, England (Jan. 1987) 87−43816
IC testing, conference, Lausanne, Switzerland (Oct. 1983) 87−65060
IC testing, systems solutions based on electro-optic sampling to high speed IC test problems 88−39631
IC testing with voltage contrast electron probe 88−7719
IC verification system, automatic, 81810S, testing and QC appls. *(German)* 87−49455
IC wafer probe testing, parametric testing to link design and fabrication 87−46149
ICs, extended pad for testing package parts 85−40821
ICs and PC boards, electrical design for testability 86−5022
IEE guidelines for assuring testability 88−38017
illuminated displays meas. using interactive digital video lightmeter 88−16330
in-circuit test, bed-of-nails test fixtures design and manufacture automation 86−8578
in-circuit test adaptor and program profitability *(German)* 86−26614

production testing continued
in-circuit test generation, computer-aided engineering information adaptation 85−37454
in-circuit testers backdriving and mode forcing, MOD standard 88−35833
in-circuit testers development for hybrid and large-scale linear devices 86−1592
in-circuit testers for analogue LSI 86−1562
in-circuit testing, ISDN implications 88−60591
in-circuit testing, necessity rel. to cost justification 87−17502
in-circuit testing, new challenges 87−11185
in-circuit testing and equipment maintenance 86−1561
in-circuit testing process, optimisation 88−57088
in-circuit testing strategies *(German)* 86−14670
in-process wafer test and measurement, development trends 88−31469
inductors and passive inductive components, ATE system for production line use *(German)* 88−15912
instrument for checking the spraying of holes inprinted boards *(Russian)* 85−50106
insulated wire, selection of 3 kHz spark testing potentials 87−52924
insulation testing 86−153
insulation testing, safety aspects 86−9329
integrated approach to test and repair information management 86−34029
integrated component release testing for electronics production *(German)* 87−31277
integrated logic systems, PC card testing and VLSI design integration 86−870
integrating test into production, total quality control and statistical quality control concepts 87−51853
intelligent meas., conf., Jena, Germany (June 1986) 86−57095
interconnect testing with boundary scan 88−13534
ion engine, 10000 hours neutralizer hollow cathode endurance test 85−31919
ion implantation, troubleshooting, testing and process control 88−57450
IR inspection of jet engine turbine blades, computerised system 87−15021
IR microimaging appl. in design, manufacture and testing, economic justifications 88−1741
ISDN testing requirements, mixed-signal ATE solution 87−33980
just-in-time production of VLSI circuit boards, test process management 88−70127
keyboard testing equipment using pneumatic cylinders, Itronic-Fuchs A8274 85−60734
KLAASP alignment, inspection and meas. system, machine vision appls. 85−5780
laboratory automation *(French)* 88−56047
LAN cable automated production testing 87−34328
laser diode characts. meas., ATE system design *(Japanese)* 86−31136
laser guided weapons, ground laser designator test set 86−43907
laser interferometer for optical components testing *(Czech)* 86−10036
laser-scanner system for testing compact discs *(German)* 87−70278
LCD inspection using pattern recognition in manufacturing *(German)* 88−20449
LCD module testing, using automatic production tester *(French)* 86−5374
legislative aspects, personnel training and validation 86−102
LF equipment, Amber 5500LF test set *(German)* 86−46034
linear dimensions monitoring using TV system 87−70795
loaded PCB inspection, automatic visual testing equipment 85−34303
loaded PCBs, low-cost ATE 85−11736
logic analysers, production test appls., microprocessor development stations 85−37529
logic devices testing, productivity improvement through parallel testing 88−63607
loudspeaker driver parameter meas. techniques 86−17688
LSI fabrication, confocal scanning laser microscopy use in three-dimens. metrology for submicron lithography 87−38429
LSI ICs, parallel testing of random logic ccts. 85−40042
LSI/VLSI ATE costs, single-chip test systems 85−23872
LSI/VLSI cct. production test systems, development trends *(Polish)* 87−46091
LSI/VLSI testing, cost and speed barriers, testability design approach 86−47741
LWIR seeker/sensor production testing , US Army requirements and techniques 88−70112
machine vision, industrial inspection appls. 87−44018
machinery noise emission meas., East German standards and legislation *(German)* 86−31735
magnetic bubble memory ATE developments 87−12062
magnetic disc manufacture, optical method of magnetic particle contamination identification 87−25794
magnetic disc surface nondestructive analysis using FTIR spectroscopy 87−25849
magnetic disc tester calibration, laser scribing technique for discs with predictable defects 86−28642
magnetic heads gaps meas., automated image sharing microscope development 87−18522
magnetic tape drives, production tolerances influence on speed fluctuation *(German)* 86−58674
magnetic wires, displaced singular hysteresis loop, statistical parameters determ. 88−51168
mainframe linear IC testers offloading, testing costs reduction 85−37425
manned space vehicle testing philosophy changes 86−60881
manufactured product testing and certification in USSR government ministry *(Russian)* 88−70109
manufacturer's view of ESD control 88−18473
manufacturing integration in production testing and QC 88−18446
manufacturing test system, planning and managing considerations 86−19816
Marconi Checkmate benchtop tester for alarm production testing 88−11704
mask inspection, SVG-160 mask comparator 86−21306
matched glass-to-metal seal improvements by controlledatmosphere metal oxidation 87−130
MC68030 32-bit microprocessor, caches testing 88−19202
MDM Microsystems−test strategy for growth 88−55968
MDM MicroSystems case study, test strategy recommendations 88−57148
MDM MicroSystems test proposal 88−55966
ME9301A chromatic dispersion meas. set for optical fibres *(Japanese)* 88−13790
memory board testing for quality improvement, Excel ATE system 86−4954
memory IC testing, economic aspects 86−27307
memory repair strategy for production, w.r.t. capital costs reduction 86−46831
production testing continued
metrological testing of coordinate measuring machines(CMMs) *(German)* 86−17798
micro-distortion measuring system using holographic technique with $Bi_{12}SiO_{20}$ elements 85−58892
microchip lead wire bonds, quality testing using acoustic emission meas. 87−23331
microcircuit surface analysis techniques for production facility quality control appls. 85−39525
microcomputer board maintenance and testing trends *(French)* 85−54927
microcomputer-aided QC system and cards *(German)* 87−5265
microelectronic products testing, future outlook 86−60140
microelectronic test structures statistical parametric variation estimation 87−65167
microprocessor boards fault detection and isolation, using synchronous high-speed sensor system 85−42869
microprocessor systems testability design 85−34332
microwave dielec. substrate meas. method 88−74575
microwave power devices, distortion characts. using vector meas. method 86−8450
microwave radio relay systems, factory testing 87−77096
microwave tube/system interface problem 85−55401
microwave wideband wafer probing, techniques for planar devices, review 88−42266
MIDATA, Marconi integrated design and test automation for electronic products 87−20835
military electronic systems, test program set development, vertical compatibility 87−20883
miniature fuse breaking capacity test conditions for homogeneous series testing 87−66671
miniature fuse quality standards and automatic testing problems 87−66669
MITEG: an integrated test program generation system 88−22450
mixed-signal LSI/VLSI automatic test equipment 86−38207
MLBs, automating PWB cross-sectional analysis to meet military requirements 88−32610
mm-wave guidance systems testing, ATE techniques for high-volume production 86−43903
model of functional inspection of production *(Russian)* 87−10201
modem manufacturing tests 88−73751
modular board test systems, high-power 900 series system 88−15947
modular conveyer system for TV set production line subassembly testing *(German)* 88−37932
modular monitoring devices, specialised sets, for electric machine components meas. 85−43105
modular test equipment production, testing and performance 88−35848
module in-place testing without backdriving 85−11771
monitoring of product-specimen parameters, meas. errors-reliability relationship 87−65166
monolithic ICs, probing using contactless electrical connections to circuits 85−40823
MOS and CMOS IC's testing using automatic test program generator 85−40926
MOS capacitors in wafer, discharge test method as process control *(German)* 85−34751
MOS IC ion implant monitoring with thermal wave technology 86−28503
MOS microprocessor circuits, burn-in test optimization 88−50155
Motorola MC68HC11 microcomputer testability 86−46069
Motorola microprocessors, self-test trends 85−33964
MTL/I^2L memories cct. for testing word line levels 86−35847
multilayer boards with Cu-clad invar substrates, thermal efficiency 86−8629
multilayer dielectric structures testing by multifrequency methods 85−44817
multilayer PC manufacture, thermal anal. as production testing tool *(French)* 85−10469
multilayer PCB testing, thermal anal. techniques 86−1497
multilayer PCB testing of inner layers 86−58128
multilayer printed circuit board characterization by thermal analysis 85−34361
multiple test stations with IEEE-488 bus, for electronic equipment testing 86−38252
multisite IC handler development 87−6281
multiuser programming system in ATE environment 86−4993
Multiwire elec. bare board testing at manufacturing stage 85−39563
nanometer meas. technology in electronics industry, current status *(Japanese)* 87−25416
NASV 30 computerised instrument for IC functional testing and component trimming with laser beam *(Italian)* 88−27344
NDT methods, mech. and EM, review *(Italian)* 87−44415
near field probe as a research and development tool 86−24524
new product testing for QA *(German)* 87−31305
nm.-scale feature meas. technology *(Japanese)* 87−25413
noise meas. equipment, compact design, implementation and features 87−58671
noncontact vision system for PCB assembly line 86−1553
nonlinear microwave devices noise immunity and EMC meas., using integrated automatic system 87−63507
nonvolatile memory test, cost reduction techniques 86−46066
Northern Telecom, use of Wayne Kerr Impact 8510 PCB tester 87−59997
nuclear component manufacture, quality testing and its documentation *(German)* 86−52076
operating instruction for product quality *(German)* 85−54118
optical checking of unmounted printed circuit boards *(German)* 88−38912
optical feature extraction for high-speed inspection 88−47422
optical fibre links fault detection method 85−1989
optical fibre loss meas. system, detector selection for production testing 87−68151
optical fibres and cables 86−30768
optical microscopes appl., development trends 86−1936
optical parallel processor for product inspection 88−52554
optical roughness meas., production appl. 85−37765
optical subsystem production of fire control system, using electro-optical ATE 85−31339
optocouplers test strategy, burn-in and temp. cycling tests *(German)* 88−45296
ORANGE LINE, production line for electronics product final assembly and testing *(Japanese)* 88−11711
OTDR for optical fibre cable meas. 87−8304
Over Fault Coverage in PCB test systems 88−63028
pacemakers, automated tester system, development 86−5998
PAG robot based inspection islands 85−20489

production testing continued
paperless test development activity—electronic transfer of information required for test documentation 88—74283
parametric wafer test equipment, third-generation development 85—61956
patterned-wafer inspection trends 87—38428
PBX system testing, ABNER burn-in monitor and error reporting system 87—28293
PC, bareboard fault detection using automated optical inspection 86—27717
PC bare board testing, CAD appl. 85—34354
PC bare-board testing using Kryterion 4000 bare-board test system 87—52966
PC board assembly, role of statistical quality control, using HP test system 86—173
PC board handling for in-circuit test 86—35225
PC boards, microprocessor-based troubleshooter, Pioneer's 9000 series 85—20456
PC boards, self-contained robotic test cell appl. 85—33159

PCB manufacture, use of automated inspection systems 87—37704
PCB manufacturing environment, test program development 88—38903
production testing continued
PCB manufacturing test cell, use in planning analysis and design simulation of CIM systems 88—32567
PCB mounting using robot, peripheral measuring station *(German)* 88—7206
PCB pattern inspection using image input system *(Japanese)* 85—23213
PCB performance in-circuit test technique 87—11167
PCB performance testing—the way ahead 85—34331
PCB plated-through-hole solder joints, quality control and production line testing 85—28798
PCB plating ductility process monitor 85—34327
PCB production, inspection and testing 85—23232
PCB production testers, Fluke models 9100 A and 9105 A for maintenance testing *(French)* 88—12758
PCB quality management computer system, GenRad Tracs *(German)* 85—6593
PCB semiautomatic test equipment for assembly problems 85—23246
PCB strategy development approach 88—50503
PCB surface prep. for dry film photoresist lamination 88—64103
PCB test and repair operations model for high-volume production line 88—31474
PCB test data analysis for product defect prevention 88—32654
PCB test methods, automatic *(German)* 88—50483
PCB test preparation using intelligent post processors 88—57151
PCB test strategies, automated, economic aspects 88—57147
PCB test strategies w.r.t. cost 88—57145
PCB test system automation with digital oscilloscope 88—71212
PCB testers require high technology to meet PCB requirements 86—20921
PCB testing, ATE vacuum fixturing 86—44099
PCB testing, capacitance meas. by two-terminal method 86—35227
PCB testing, computer-aided industry strategies in 1987 and 1988 88—64094
PCB testing, considerations for medium sized business *(German)* 87—32164
PCB testing, efficiency *(Italian)* 87—37715
PCB testing, re-emergence of functional testing 87—6269
PCB testing, system emulation approach, Ironman system 86—53177
PCB testing, throughput gains rel. to test quality 85—55283
PCB testing efforts minimisation, Hewlett-Packard experiences 88—57146
PCB throughput optimisation via customised test strategy 85—40339
PCB using ATE, board test time more important than initial cost 85—34292
PCB with mixed mounting grids, uniform test pattern arrangement 85—45325
PCB zero defect testing philosophy 88—50502
PCBs, advanced computerized burn-in system 85—23258
PCBs, ATE technique innovations and variations 88—64111
PCBs, automatic SMT testing 86—41418
PCBs, automatic visual testing 85—28797
PCBs, automating the small production line 88—12775
PCBs, channel card architecture for channelling test efficiency 85—34311
PCBs, design of test apparatus, complexity *(German)* 85—50098
PCBs, developing a strategic PCA test plan 88—19545
PCBs, dimensional stability of epoxy glass laminates 85—40342
PCBs, equipped, multistage testing concept *(German)* 87—53053
PCBs, flexibility—the key to circuit board testing 85—34293
PCBs, for higher yield: test or inspect bare PCBs? 87—53021
PCBs, function tester *(German)* 87—66752
PCBs, functional and in-circuit testing, comparison *(Spanish)* 86—14690
PCBs, HV bare board testing requirements 87—11174
PCBs, in-circuit and functional ATE meets the challenge of the loaded board 85—23222
PCBs, integrated approach to low cost ATE 87—37721
PCBs, interface for electronic card tester 86—8597
PCBs, Kineticon system for simultaneous circuit burn-in and testing 87—52965
PCBs, linking the test island to the manufacturing mainland 88—1135
PCBs, loaded, software allows performance test 88—64093
PCBs, modern testing technology, QC basis *(German)* 87—73897
PCBs, multilayer mass lamination QC inspection plan 88—7190
PCBs, optical inspection and elec. testing techniques, comparison for QC appls. *(Italian)* 88—1153
PCBs, performance testing options 87—11172
PCBs, power dissipation in plane under test 85—55300
PCBs, pre-screen testing 87—73892
PCBs, pre-screen testing for assembly fault diagnosis 87—1070
PCBs, prescreen test systems to find 80% of faults 85—61540
PCBs, sequencing and timing requirements for VLSI testing 85—34341
PCBs, test data management to reduce quality costs *(German)* 87—66753
PCBs of small geometry, accelerated life testing 86—20958
PCs, bare board testing 85—34352
PCs, bare board testing for assembly 85—34353
Personal Computers, method to utilize ROM-based power-on-self-test code in manufacturing test 87—10122
photomask inspection instrument, DKG-160, automatic misalignment compensation system 86—24305
pick-and-place machine based/testing , comparison with in-circuit testing 88—71241
PIES, parametric interpretation expert system for semiconductor fabrication process test data 87—53318
piezoceramic transducers, internal defect detection, NDT method 87—56670
pipe-surface inspection using laser techniques and fibre optic bundle photodetector system *(Japanese)* 85—5813
PLC-driven latch testers, use at Chrysler 88—49494
PLDs, mastering test aspects eases PLD system testing 88—32096
plug-in 11-GHz LNA module with ground plane tuner 87—6130
portable diagnostic tester for a standardized tachometer system 85—47901
powder metallurgy materials, Brinell hardness test results reliability analysis 86—40806
power MOSFETs, ruggedness test *(German)* 88—71550
power pack test system, computer-aided, realisation and flexibility 86—24337
power supply specification and front panel test vision system 88—31460
power supply testing using ATE 86—55534
power transformers, on-pole, computerised online inspection system *(Japanese)* 85—39069
PRE-control sampling plan performance characterisation 87—65227
precision gauge system, microcomputer-based devices 85—37419
prepreg testing in PCB fabrication, resin melt viscosity charactn. method 86—35193
printed wiring assemblies noncontact testing, using real-time IR system 85—50107

production testing continued
probing ASIC devices at wafer level 87−1604
product reliability test, Weibull-distributed life expectancy *(German)* 86−34101
production line insulation testing. I 86−152
programmable bus emulation technique for processor basedand peripheral printed circuit boards 86−46913
programmable logic device testing 88−70742
programmable logic devices, using AUTOPAL test process 86−49946
programmable logic devices failures and testing, simulation, functional and signature vectors appl. 87−640
PROSPECT rule-based system for chip testability partitioning and evaluating 87−24113
pseudo-asynchronous testing using a synchronous test system architecture 88−20070
PTFE laminates, test fixtures modification for dielec. const. determ. 88−60879
PWA, computer-aided solderability testing for receivinginspection 86−1502
PWB assemblies burn-in consideration, fresh-air cooling 87−11164
PWB manufacture, bar code technology appl. 87−11165
PWB reliability specifications and considerations in manufacturing and assembly 85−34318
PWB testing, CAD to ATE process automation 88−57150
PWBs, inspection device for testing mounted condition of chip components *(Japanese)* 87−6271
PWRs, use of NDT during manuf. and in-service inspection, French developments 85−27239
quality and responsibility aspects *(German)* 87−36457
quality assurance, optimal test schedules w.r.t. quality achieved, cost and time *(German)* 87−36458
quality monitoring using condition monitoring techniques 88−43722
quartz, crystal resonators, motional capacitance and Q-factor meas., method using T-transmission two-ports *(Polish)* 86−53860
quartz clock device manufacture, process equipment *(Polish)* 86−13453
quartz resonators, parameters meas. using T-transmission three-port method 87−60724
RAM components testing, minimal set of patterns determ. 88−19152
RAM diagnostic 86−46798
rapid testing of ionic contamination on printed wiring boards and assemblies 87−11208
redundancy test for 1 Mbit DRAM using multi-bit-test mode 87−37300
redundant memory wafer test and repair, productivity increase using network links 85−35062
reliable short/open tester 86−8600
remote terminal unit production, testing using MIL STD-1553 standard *(German)* 88−24519
reshaping board test 88−1146
resistive products, resistance measurement during manufacture *(Russian)* 85−58843
RF and microwave CAE/CAD tools for production environment 87−428
RF test equipment 88−67661
RF/microwave production ATE, progress report 88−11709
ROMs and EPROMs production testing, using limited battery of tests 87−749
seam-position detector for electric-resistancewelded tubes, IR/visible type, online US ATE appl., *(Japanese)* 86−38386
self-excited vacuum-tube oscillators, automatic monitoring system 88−12245
semiconductor components testing, using Zehnder-Mach interferometer *(Czech)* 87−10118
semiconductor device, burn-in combined with parallel testing, economic benefits 88−18464
semiconductor device burn-in techniques in manufacture, alternatives and inspection equipment *(Italian)* 87−45837
semiconductor device manufacture and testing, SMART expert system appl. 87−36477
semiconductor device NDT by spectroscopic ellipsometry, ultra-short laser pulses and SAW 85−61025
semiconductor device production testing, parametric tester architecture for capacitance meas. 88−18460
semiconductor device testing, using LV SEM 87−112
semiconductor devices, fluorinated liquids for testing 87−16360
semiconductor equipment testing, multistation manufacturing test 85−39541
semiconductor IC burn-in reliability testing 86−28397
semiconductor ICs, acceptance test procedures for quality control *(German)* 88−71643
semiconductor manufacture, failure-analysis service usage and role 85−6981
semiconductor manufacturing, CIM, role of test area networks 87−36471
semiconductor process parametric testing from design to production 86−19832
semiconductor production, parametric test system trends 88−13092
semiconductor production appls. of SEM 88−7422
semiconductor production line, scanning electron microscope use for critical dimension meas. 87−11718
semiconductor test equipment viewed as an auto-alignmentsystem 86−46063
semiconductors device manufacture, errors reduction in C-V curve meas. 88−36204
SENTPEX, functional test pattern extractor for semicustom ATE 86−58575
sequential-test techniques maximize throughput in tests 87−65158
shadow-mask CRT display, resolution meas., automated technique using IBM PC 88−16328
shell of complex profile, deform. determ. under thermal and mech. loading, UDM-1 unit design 86−46415
shock accelerometer, testing techniques for high shock levels *(German)* 86−11725
single mode fibre dispersion, routine meas. for factory and field environments 86−53993
smart power device testing and characterisation problems 88−32006
smart power device testing and economics, ATE system for production testing 87−46146
smart power ICs testing, ATE selection, effectiveness efficiency 88−22448
SMD, probing for a way to achieve test access 86−47162
SMD board test and test automation 87−60000
SMD PCB testing 87−45444
SMD probing techniques 86−7498
SMD technology for PCs, test procedures *(French)* 87−66763
SMD testing, device handlers and board fixtures 88−32537
SMPS, achieving flexible power testing 86−46527
SMT, developing a way to beat the pack 86−47163
SMT, in-circuit programming 87−66741
SMT, putting testability into perspective 86−47151
SMT, testability guidelines for bare substrates and PC board assemblies 88−57139
SMT automatic inspection, PCB and hybrid appls. 87−51883
SMT boards, in-circuit high-volume testing, design approach 88−57143
SMT boards in-circuit testing in production environment 88−19528
SMT changes the face of board testing 86−27712
SMT in-circuit test fixture selection 88−32631
SMT in-circuit testability design rules, test fixtures and probes 88−32649
SMT PCB testing, moving-probe tester design and accuracy 88−32667
software convergence of test program parameters 85−33158
solar cell arrays production testing using IR technology, space appls. 88−49139
solder-joint inspection system 87−51842
solvent cleaning tests for PWBs 88−1139
source-control-drawing ICs for military, testing programmes 86−35739
speeding up test program generation 86−55535
Sperry 36/72 bit CMOS micromainframe chip set testing 87−24020
spread spectrum test criteria and methods, GPS and JTIDS projects appl. 85−31132
steel, rolled stock, combined methods of mag. inspection and stat. prediction of mech. props. 86−57498
steel, US inclusion cleanliness assessment *(French)* 85−6062
straightness tester, GM-1200, high-accuracy fast mobile, for use in precision manufacturing 86−24768
stress screening, definition and economics 85−44528
stress screens for IC flaw detection 87−43962
stress sensor for solar cell quality inspection 87−21051
submicron IC production, SEM as inspection and testing tool 87−32619
substantially symmetrical components meas., production and quality assurance appls. *(German)* 87−70807
surface defects real-time inspection, using dedicated image processing 88−49502
surface mount devices, easy access aids 85−34333
surface mount devices, in-circuit testing 85−34309
surface mount manufacturing acceptance procedures for QC, reliability, inspection and testing *(French)* 87−66764
surface mount soldering yield improvement test 86−47209
surface mount technology board built-in test enhancement 86−8596
surface mounted devices testing on PC boards 86−1571
surface mounted technology, testing problems 85−55266
surface roughness parameters determ., accuracy and applicability to production testing 87−3762
surface-mounted assemblies, solder joint failure assessment, mech. cycling test 86−41443
surface-mounted device testability problems 86−47173
surface-mounted devices, board-testing systems 85−28807
switch assembly with statistical process control robotic testing 88−31465
Syllog prototype manufacturing knowledge base system 86−159
synchronized electrostatic discharge for studyingelectrostatic discharge susceptibility 86−52224
System 12 in-factory testing, expert system appl. 87−2993
system functions and cost/benefit analysis 87−72794
system test developments in 1987 88−63005
T-circuit testability circuit solves SMT board access problems 86−47167
TAB device burn-in problems and solutions 88−7215
tachogenerators acceptance testing, using ATE 86−4968
Technician's Assistant, an electronic troubleshooting tool 88−18468
Tektronix 2432 digital storage CRO, use in ATE system for medium scale production *(German)* 88−42184
Tektronix IC test systems, DAS 9200, Delta series and LT 1000, features *(German)* 87−28906
telecommunication equipment production, reliability assurance *(German)* 86−4124
telecommunications equipment automatic testing, effects on product quality and economics 87−77111
telecommunications market, digital solution to an analogue problem 85−33134
telecommunications products cleanliness criteria, correlation between surface insulation resistance and solvent extract conductivity testing 88−64083
telecoms need fast accurate testing, ATE appl. 85−33153
telephone handset ATE, benchtop equipment 85−13993
telephone IC elec. charcts., semi-automatic measurement, test equipment *(Polish)* 86−13444
test area, step towards CIM 88−15945
test data transfer to central data management system 85−57776
test during burn-in, benefit and cost comparisons 88−70102
test networks−application begets design 85−60755
thermal calibration sources with dynamic MRT and scene simulation 88−74420
thermal IR sensing for diagnostics and control, conf., Orlando, FL, USA (Apr. 1988) 88−62860
thermal testing electronics devices and assemblies inliquid perfluorocarbons 85−60757
thermodynamic control of electronic components and subassemblies *(French)* 87−16366
thermography systems for PCB testing applications 85−40324
thermoprinting heads manufacture and testing, microcomputer-aided *(German)* 87−16363
Thermovision 880-real-time instrument for IR thermography of electronic cct. boards *(French)* 88−47592
thick film hybrid ceramic ccts., surface mount testing and test in master methods 88−57223
thickness testing on continuous strip steel 86−18118
third-party test house role in electronics industry 86−4991
timing accuracy and yield estimation, using computer models 87−36476
timing equipment design and testing using standalone logic analysers 88−47446
timing faults in digital device isolation, using in-circuit tester 86−9249
timing meas. on TTL/CMOS devices, in manufacturing/incoming inspection environment 86−46747
tolerance test efficiency analysis, using programmable microcalculators 87−108
touch screen appls. 87−10117
transistors automatic testing w.r.t. volume of parts 87−72804

production testing continued
TV and VCR production, centralised quality control system 86−61952
TV channel selectors, prod. testing, freq. response meas. errors 85−5772
tyre testing by holographic interferometry, digital analysis 86−524
universal card testers in semiconductor manufacturing *(Dutch)* 87−20847
user interfaces and artificial intelligence developments 87−56507
validation test, Marconi Checkmate system *(French)* 86−55521
variable access latch test 86−52800
vehicle and automotive component manufacture, EMC common test technique for vehicle and automotive component manufacture 86−48620
verification fixture for matrix/prober interface IC testing 86−58525
VHSIC design and testing 88−20072
VIM quality control system for materials testing/identification during equipment manufacture *(French)* 85−10541
VLSI, digital tester selection, systematic approach 87−53663
VLSI, flexible approach to test generation for scan design circuits 88−38507
VLSI, multiplexed timing sources 86−28376
VLSI, production testing of devices and boards 86−66594
VLSI and LSI testing methods 86−28371
VLSI ATE, Enertec/Sentry S-15, PDP 11 microcomputer-controlled system *(French)* 86−24282
VLSI based PCB testing 85−34334
VLSI board synergistic production test system 85−55291
VLSI boards, methodical strategies approach 88−55964
VLSI ccts., testability analysis versus fault simulation 85−40844
VLSI ccts. testability analysis, yield and quality improvement 85−40843
VLSI ccts. testing, statistical AC test coverage 87−23327
VLSI custom devices, automatic insertion of self-test features, economic viability 87−25480
VLSI design and testing, bridging gap between CAE and ATE 86−35841
VLSI device characterization for accurate delay measurements under transmission line effects 87−67495
VLSI digital testing, design for testability 88−38505
VLSI equipment manufacture, ATE techniques for linewidth, resistivity and registration control 85−62027
VLSI failure mechanism through applic. of failure analysis methodology 85−54904
VLSI in-situ testing, reliability and economics aspects, monitored burn-in system 85−40841
VLSI life cycle cost, impact of mixed-mode self-test 85−42860
VLSI logic chips, design system generated, performance screening 85−54862
VLSI manufacture, contaminants detection using lasers in automated visual inspection 87−46073
VLSI manufacture, factory automation of Mitsubishi Electric's Saijo plant *(Japanese)* 87−65168
VLSI manufacture, fault-isolation test chip for CMOS process charactn. 87−1772
VLSI metallisation reliability monitoring at wafer level, breakdown energy of metal technique 86−15085
VLSI on-chip test as a lower tier of built-in test 86−9247
VLSI production test economics 88−24533
VLSI production tests, software environment 87−11833
VLSI products, hot electron problems anal. by gated emission microscopy 87−1618
VLSI products testing, 250 MHz advanced test system with per-pin architecture 88−13535
VLSI RAMs, testing sub-assemblies on an automatic testsystem 85−33923
VLSI RAMs and ROMs memory testing requirements 87−5890
VLSI self-test augmentation, with ATE diagnostics 86−8295
VLSI test strategy development, using network of queues 88−18466
VLSI tester, design 85−55878
VLSI testing, noise problems 86−26598
VLSI/LSI devices, using at-speed testers 86−21633
VLSIC structural failures analysis, using RYE realistic yield simulator 88−13533
volatile memory wafer testing, production efficiency improvement by parallel programming 86−46827
wafer inspection methods comparison, particle monitoring in production environment 88−39569
wafer level electromigration tests for productionmonitoring 86−15084
wafer probing, review 87−6807
wafer probing equipment and techniques for analyticalapplications 85−60784
wafer processing linewidth meas. system, pilot line photo process 86−15006
waveform digitisers effective bits characterisation 87−41363
weapon systems, field supported, product assurance 86−66625
Winchester drive flaw mapping acceleration, using analogue tester 85−56102
wires thickness meas., using optoelectronic meas. instrument *(German)* 85−64343
workstations in production design/test integration, computer appl. 86−57187
X-ray based testing of surface mount cards and other components *(French)* 88−64057
x-ray system for electronics process verification 87−43956
X-Y autoprobing on L200 functional testing 86−46068
Xebec's automated printed circuit board assembly system 86−47190
YEWCAT, computer-aided testing system using YEWMAC computer *(Japanese)* 86−38218
yield diagnosis through tester data interpretation 88−13532
GaAlAs-GaAs semicond. laser reliability, effects of screening 88−65694
GaAs FET, electromigration rel. to reliability, effects of current field and passivation 85−55860
GaAs IC testing in production environment 87−52516
GaAs IC ultrahigh speed eval. for engineering charactn. 88−38478
GaAs MMIC manufacture, low cost packaging/reliability testing procedure 87−59902
GaAs MMIC on-wafer testing 86−61912
GaAs MMICs, low-cost packaging/testing procedure for manufacturing 87−73732
GaAs devices, ATE problems and solns. 85−33135
GaAs devices testing, with digital in-circuit test system 87−24600
GaAs epitaxial structs., physical parameters meas., quality testing, automatic methods for MESFET and MMIC manufacture 87−74017
GaAs multiplexer/demultiplexer pair using MSI BFL. 16/8-bit, 2 Gbit/s, design and testing 88−70694
Hg ion thruster with 8 cm diameter, endurance test 85−31918
HgCdTe IR, detector arrays, failure analysis 85−58720
Pt resistance temp. detectors, processing conditions effects 87−70619

information science and technology trends conf., London, UK (Jan. 1987) 88−62902
integrated systems, human factors rule 88−28615
intellectual collaboration within industries, universities and professional institutions 87−22954
IR sensing, commercial, 1986 status of professionalism 87−14162
IR thermographic professionals, proposed code of ethics 88−13
Italian society, engineers' traditional and future status 85−44427
Japan Society of Instrument and Control Engineers, future administration *(Japanese)* 86−13599
Japanese engineering challenge 86−13391
knowledge workers environment, educators' responsibilities 88−37874
knowledge workers environment, employers' responsibilities 88−37801
knowledge workers environment, engineers responsibilities 88−37800
legal style in specifications 88−6176
making presentations and conducting meetings, effectiveness improvement 87−31206
management functions in operations, research and service 88−49455
management symbiotic approach 86−13389
matrix management structures, quality of working life and engineering productivity 87−61
measurement and calibration, training and staff requirements 88−6150

professional aspects continued
metrology, training, centres and clubs, survey 88−6149
National Council of Engineers of US, scoring procedure 87−31226
negotianeering−the human side of engineering 86−13390
Nigerian society, definition and perception of engineers 85−44429
nuclear weapon deployment 85−44562
occupational burnout, anal. and treatment, social styles role 88−62877
product design process and role in management of technology 87−72749
productivity increases due to electronic messaging 86−16828
progressive companies, practices 85−44388
retraining in high technology areas 87−23169
reward management planning model for consulting engineers 86−7464
RF engineer profile 88−63115
safety, liability for the dissemination of defective information 88−6175
safety, technical writer's responsibility 88−6211
safety labels: What to put in them, how to write them, and where to place them 88−6210
science court for frankness in hard vs. soft technology debate 85−44556
self disclosure 86−13368
Semiconductor Safety Association activities 87−43923
silicon compilers, effects on engineers 86−643
systems development, role of software support organisation 86−30151
systems engineering, production system management appl. *(Italian)* 86−46036
technical communication, researching and understanding legal responsibilities 88−6174
technical communication education, ethical factors affecting curriculum design 88−6141
technical editor/writer organization, motivation through information/communication blitz 85−44572
telecommunications manager, new career 85−10366
telecommunications personnel, searching for talent 88−21449
top-down communication 86−13364
trends in engineers' relationship to French society 85−44426
USA engineers' role, past, present and future 85−44431
USA industrial R and D computer use 87−10081
USSR, classification characteristic of engineer *(Russian)* 87−43739
warnings, on-product labels, communication model for determining appropriateness 88−6214
warnings and instructions, human factor and product liability 88−6213
women graduate students in engineering 86−13319
women in computer and electrical engineering fields in Spain, overview 86−13254
women in engineering, factors affecting participation 86−13255
women in engineering, impact of cooperative education on career development 86−13320
women in engineering, reentry and career change programs 86−13321
women in information technology engineering in Britain 86−13253
women in science and engineering, education and careers, overview 86−13318
women scientists and engineers in the US Army 86−13322
writer's purpose, audience and tasks 87−43827
writing of electrical specifications and standards, techniques 86−7583

program and system documentation *see system documentation*

program assemblers
68000 chip, assembler programming *(French)* 87−17123
cross-assemblers and cross inverse assemblers for microprocessor systems *(Russian)* 85−795
Morse decoding program using Z80 Mode 2 interrupts 85−51963
NEC incircuit emulator for V70 microprocessor *(Japanese)* 88−19193
PALASM-II, macro-PAL-assembler for thesystem-development with programmable logic *(German)* 86−20431
programmable signal processor assemblers and simulators 87−19671
signal processor code optimisation of digital networks 86−62635
universal motor speed control using cross-assembler and INTEL 8751 microcontroller 87−58030

program compilers
abstract machine data structure for non-proceduralfunctional models 86−20500
AT & T DSP32C DSP chip, floating decimal point *(German)* 88−19176
B-1B centralised test program set integration facility 88−35826
BCC180 multitasking computer/controller 88−25222
built-in self-testing circuits, fast signature simulation tool 87−65695
C^3: a system and methodology for the development of module generators 87−38450
C compiler for 8-bit MCU *(German)* 86−27339
C compiler for MC68HC11 86−46900
C compilers, speeding single-chip-microprocessor development 86−57849
CHILL compiler, enhancement and evaluation *(Japanese)* 85−42358
COSMOS: a compiled simulator for MOS circuits 87−65694
courses in American schools, survey 85−22148
DeSmet C development package 86−55063
digital systems synthesis by delayed binding of decisions 86−21774
DIMPL high level language and compiler for DSP implementation of linear digital networks *(Japanese)* 88−38351
DSP32C floating point DSP with optimizing C compiler 88−73017
ESS, global optimization with interval anal. *(Japanese)* 87−40577
Estelle/83 compiler, written in PROLOG 88−9231
Flamel: A high level hardware compiler 87−38363
flight control software for test generation, Ada units 87−42073
hardware compiler chip, rumours of Japanese blueprint 85−35071
hardware design languages, appls. 85−40022
HLL compilers and DSP run-time libraries make DSP-system programming easy 88−59201
Imco picture processing system, knowledge based using microprocessors and CMOS arrays *(German)* 88−34746
INMOS T414 transputer for parallel software development 88−25221
intelligent link system language processor, compiler-interpreter design 85−13936
ISO class 2 transport protocol implementation, semi-automatic approach 87−55798
logic device design language, compiler based 85−22791
logic simulation, increasing computing speed 86−615
LSI digital signal processor, Pascal compiler and debugging tool 85−46753
menu screen generation software tool for VLSI ATE programming and operation, using menu screen generation software tool 87−34951
MOS parallel logic simulation, circuit description language and compiler *(Japanese)* 87−36885
NEC V60 and V70 microprocessors, use of registers by compilers 88−50198

program compilers continued
NTT DSP, compiler implementation for DSSP1 *(Japanese)* 88−46073
polyphase-network filter bank, micro-DSP and silicon compiler comparison 87−24365
protocol validation, automated tool based on extended numerical Petri net 88−21413
prototype linear module compiler 87−60579
real time signal processors design and programming, innovative compiler 87−49635
RISC microprocessor chip, Motorola 88000, design approach for use with optimising compilers 88−50157
SDL and FOPS specification language principles and implementation 88−59420
SDL hardware compiler for VLSI logic design automation *(Korean)* 87−634
specification compilation of dispersed control architecture for burst switching 86−49389
supercomputing, conf., Athens, Greece, (June, 1987) 88−69999
syntax-directed translation of concurrent programs into self-timed circuits 88−44109
telecommunication software, change anal. tool 86−49167
UNIX, ties with RISC architecture 86−63431
Unix user conf. Phoenix, AZ, USA (June 1987) 87−65087
GaAs computer system design, compiler-writer's view 88−33355

program correctness proving *see program verification; programming theory*

program debugging
see also program testing
ATE program integration, debugging utility appl. 85−54786
CANDU reactors, computer control program testing 85−59973
diagnosis and repair expert system, and automobile electrics and programs 86−45800
digital switching system, ADSS (Automated Debugging Support System) 85−47357
display computer with partial VLSI implementation 85−863
distributed signal processor, dedicated simulation facility 88−3081
error detection rate comparison with VLSI design debugging 85−35134
Fetex 100L exchange, temporary memory freeze dump anal. for debugging 88−35299
graphical animated design and debugging tool, GADD 88−8938
linear IC testers, test program debugging environment 87−41357
logic analysers, development 85−47897
LSI digital signal processor, Pascal compiler and debugging tool 85−46753
MATE operating system debugging and re-hosting, software tools 87−20894
microprocessor-based systems, real-time software debug, state analysers 85−14693
NEC high level language debugger for V60/V70 microprocessor *(Japanese)* 88−19194
Nutcracker, Ethernet development tool and debugger 85−25493
PACS system, prototype storage system experience at Univ. N. Carolina (USA) 87−29838
processor software status indicator 86−34680
protocols tracing using automated validation tools 86−30345
second-generation transputers, hardware and software auxiliaries for appl. *(German)* 88−6894
SoftAnalyst and Interactive State Analyzer from Northwest Instrument Systems 87−20844
software and hardware development tools for the automotive industry 87−31101
telecommunication switching systems, real time software debug and test practices at Italtel and Telettra 85−19974
TRON, Toshiba TX1 32-bit microprocessor 88−50180
universal motor speed control using cross-assembler and INTEL 8751 microcontroller 87−58030
VLSI devices test program development, high-speed window-based pattern debugger 88−29251
VLSI test program debugging package 86−49949
VLSI test system simulation, test programs debugging and analysis 85−42870
X.25 protocol testing program for SM-4 computers 85−25464
X-10 System, installation and testing *(Japanese)* 86−4433
XFACET computer for assembly language programming education 88−70052

program diagnostics
see also program testing
DIPS VLSI processors, maintenance support systems 85−844

program editors *see text editing*

program generators *see automatic programming*

program interpreters
883D single chip microprocessor with Tiny-BASIC-MP interpreter *(German)* 85−40123
8051 processor with built-in BASIC interpreter *(French)* 85−33949
8052AH microcontroller, simplification of microsystem design 86−8284
automatic translations from SDL specifications into CHILL implementations, experience and problems 86−49202
BASIC interpreter on Motorola 68000 processor *(German)* 86−41891
concurrent interpretive language for sequence control of accelerators *(Japanese)* 88−42362
CPU clusters functional testing, using DIP software tools package 86−49945
experiment command interpreter and 2.5 Mband interfaces 87−13438
HP 3065 board test system, interpreter-based board test programming environment 85−11714
ICEWATER language and interpreter for VLSI layout CAD 85−1673
Intel 8052 AH microcontroller with BASIC interpreter *(German)* 85−45068
Intel MSC BASIC-52 microcontroller with BASIC interpreter *(German)* 85−61301
intelligent link system language processor, compiler-interpreter design 85−13936
LOTOS executable specification language interpreter for protocols 87−20201
module generation language and interpreter 88−63476
Prolog hardware interpreter, VLSI architecture 87−66240
symbolic interpreter for running in Prolog for protocol analysis 86−69233
V-language for polymorphic architectures and algorithms 87−75907
VLSI Prolog interpreter 87−60619
VLSI test program translation between testers 87−41358
VLSI tester-per-pin ATE, generic test program translator 88−29249

program listings *see complete computer programs*

program loading techniques *see data handling*

program processors

programmable array logic *see cellular arrays*

programmable controllers
for applications, see relevant control application e.g. chemical industry; control of specific variables
see also control systems; programmed control
3-phase brushless DC motor with monolithic CMOS controller 87−51238
900 MW fossil-fueled power station control system, programmable controller appls. 86−33105
80960KB 32-bit microcontrollers for industrial appls. *(German)* 88−50166
AC adjustable freq. drive controllers, digital communications 88−31086
AC cycloconverter fed variable speed drive, multiprocessing system 87−58485
activity time switch to promote exercise in physical therapy 87−21641
Am 29PL141 single chip fuse programmable controller 86−67257
audatec process mastering system, complex testing 88−11718
automated cranes using DC drives, control system using PLC-base LAN 88−31250
automated manufacture using Siemens' SIMATIC ranges of programmable controllers *(Italian)* 87−43972
automated manufacturing communication network, flexible interlinking using coaxial cables *(German)* 88−35086
automatic control system protection using programmed controller *(Italian)* 87−64210
automation and programmable controllers for contractors 88−37903
back-to-back tie HVDC power systems, redundant, fault-tolerant programmable control 86−25491
BPS 5000 programmable controller for mining excavators 88−11462
brushless DC motor controller, high performance monolithic, motorola MC 33034 87−51239
C-LINE industrial LAN, connects IT and programmable controllers *(French)* 87−76391
cement industry process automation for QC and monitoring *(German)* 88−6074
Chrysler ups quality with PLC-driven latch testers 88−49494
CIM system for programmable controller manufacture 88−159
class Re/4/4 main-line locomotives for Swiss private railways 88−37663
communication cabling installation 88−53109
communications with fibre optics 87−40966
Conemaugh coal-fired steam plant, USA, PLCs appl. for perform. improvement 88−43051
conference, Detroit, MI, USA (April 1986) 86−66550

programmable controllers continued
control circuit options, safety comparison guidelines 88−11693
control systems applications *(Italian)* 87−40327
custom design considerations 86−19808
cyclograms appl. for design of counters in programmable logic controllers *(Russian)* 87−24296
DB 600 diagnostic subassembly for PC 600 control system, for system fault diagnosis *(German)* 88−29247
DC drives programmable controllers appl. 85−65490
design methodology of microprogrammed controllers for custom CMOS IC's 87−74435
digital control for drives and auxiliaries 88−69748
digital LED display for programmable logic controller, BCD and Schmitt trigger inputs *(German)* 88−16269
direct memory access controllers (DMA) *(Spanish)* 87−44836
distributed machine control uses zoned logic, isolated controllers, fiber optics 88−3969
distribution substation capacitor banks control using programmable controllers 85−38494
electric motor motion control using microcomputer-based PC 88−75577
electronic connectors inspection, use of PLCs for speed 88−49556
electronic programmable controllers for industrial use 85−32665
electronic test equipment, oscilloscope user interface, PC for telecontrol and fibre-optic instrumentation 87−41309
ELSA electrogalvanising line appl. *(French)* 85−21992
EMI effects *(French)* 88−14404
engineer training, educational courses 88−62911
engineering problems in rubber and plastics industries, conf., Akron, Ohio (April 1987) 87−65080
Esso Augusta refinery, with external supply and in-plant power generation, load shedding using programmable controllers and microcomputers 85−60620
Ethernet controller chip, Intel 82586, user programmable operational parameters 86−69433
EX series programmable controllers for complete control of factory automation 87−69672
extruded steel tube induction heating installation, control by computer and programmable controllers 85−39367
factory LANs for PLC interconnection *(Italian)* 86−16878
factory networking 85−13913
fibre optic communications 86−69472
force and motion control components, integration methods into systems 87−70813
Framatome N4 1400 MWe nuclear power plants, control and instrumentation 88−17313
fusion expts., programmable logic controllers in Large Coil Task Facility 85−4234
GEMDRIVE-MICRO user-programmable digital drive controller 88−11414
GEnet carrier band LAN interface for stored program control systems *(German)* 88−9121
heat trace control using PLCs 88−23559
Hewlett-Packard, plate rack type multiprogrammer and IEEE controller 488 *(Italian)* 88−60548
HVDC system management using intelligent controllers, perform investig. 88−61893
hydroelectric power station appls. *(Chinese)* 86−61414
IBM PC/PLC interfacing for factory automation 88−52982
IBM/PC/PLC link 88−52981
improving controller programs 87−16981
induction motor wound stator fabrication by robotics complex with programmable logic controllers 87−78659
industrial electronics, developments in 1987 88−35921
industrial engineering undergraduate course, programmable logic controllers 88−24408
industrial motor controllers, computers and microelectronics 87−22677
installation, programming and forward planning 87−23269
INTEL 8052AH microcontroller for programmable logic control systems *(German)* 88−6890
Intel 8096 microcontroller, high-speed output programming 86−67238
intelligent manufacturing systems, IMS 85, conf., Chicago, IL, USA (Oct. 1985) 87−36344
intelligent peripheral closed-loop control module Siemens IP 252 for DC drives 87−16087
intelligent power switching modules for PLCs 88−75852
intelligent sensors with digital processing, impact on programmable controllers 86−24480
limestone crushing/screening plant automation, using simulation model, programmable controller and personal computer 85−27906
linear induction motor and programmable controller, Compumotor LM Series 85−44019
logic devices in control automata synthesis 85−17264
manufacturing automation protocol implementation via programmable and cell controllers 86−69474
Marggraff MRC 28/16 programmable controller *(German)* 85−22906
marine vessel generator control using microcomputer programmed controllers *(Japanese)* 88−37171
MC68000 based control system for DC motor driven six-joint robotic arm 88−48998
MICREX-F series network system, F-Net 87−62625
mineral crushing plant automation using programmable controller and PC 88−24303
miniature brushless DC motor/encoder, processor controlled, for incremental motion control 87−51240
motion control, digital, with PWM controller chip and incremental encoder interface chip 87−45000
motor control appl., safety and security considerations 85−16009
motor control centre components packaging, programmable and solid state controllers 88−18125
motor drive and PC improved user friendliness using microprocessors 88−11409

EM gun armature, current distribution determ. by least square fitting of BDOT coil voltage 88−40517
EM gun engagement model 87−7512
EM launch technology, 3rd Symposium, Austin, TX, USA (April 1986) 87−22956
EM launcher and projectile compatibility, influence on exterior ballistics 87−26716
EM mass drivers, projectile velocity calc. 87−47125
expendable instrumentation modules pneumatic orbital launching 87−42063
flash radiography for the analysis of penetrator/target interactions 88−53948
gas pressure ablation water driver, ship propulsion appl. 88−11465
high velocity electrothermal mass launchers 88−40525
hot air tunnel for base bleed experimentation 86−38877
hypervelocity impact studies using a rotating mirror framing laser shadowgraph camera 88−51981
hypervelocity railguns, plasma armature growth and drag. importance of high injection velocity 88−40518
inductive store powered augmented railguns, projectile oscillations 88−40509
jet reaction control system for autonomous precision munition 88−17025
liquid nitrogen-cooled aluminium inductor, design fabrication and testing 85−5161
magnetic linear accelerator (MAGLAC), switching studies 87−21320
metallic projectile, electromagnetic braking model calcs. 85−56982
plasma driven railgun, projectile acceleration 88−40506
pulsed power, conf. Albuquerque, NM, USA (June 1984) 85−22
pulsed power electromagnetically launched projectile system, modelling 87−19160
radar cross-sections, analytical and experimental results 86−55345
rail gun accelerator development and performance 87−26719
rail gun projectile in-bore velocity meas. 87−26657
rail guns for aerospace propulsion, projectile and rail friction study 85−31934
railgun, compulsator-driven rapid-fire, design and operation 87−19168
railgun, plasma armature brightness temp. meas. 88−40522
railgun, three-stage, incorporating puff switching 88−34265
railgun accelerators of macroparticles, general charact. 88−40503
railgun accelerators of macroparticles, parameters meas. 88−40504
railgun bore material test results 88−40513
railgun bores, EMEMT concept, use to overcome ablation of rail 88−40512
railgun develop. for ultrahigh-pressure research 88−40505
railgun diagnostics and performance test results 87−26680
railgun plasma armature struct. 88−40521
railgun plasma armatures, partition functions 88−40515
railgun projectile velocity meas., shorted transmission-line method 87−26711
railgun recoil and relativity 87−47124
railgun recoil and relativity 87−68737
railguns, high pressure acceleration of arc driven metal slug 87−19162
railguns, hypervelocity, armature options 88−40514
reconnection gun, computational modeling, diffusion-convection problem 88−40519
reconnection gun description and experimental performance 87−26664
resonant cavity launcher with Faraday shield for ICRH 86−42805
resonant railgun concept using magnetic switches for repetitive operation 87−19166
shot motion meas. of small calibre guns, using microwave interferometry 86−38561
single stage induction mass driver (SSIMD) with capacitor storage, drive coil and driven ring 87−19164
Strategic Defence Initiative, threat and counter measures 87−63064
Strategic Defence Initiative, weaponry 86−9712
surface pressure measurements on a transonic spinningprojectile 85−64658
thermal hypervelocity launcher technology 87−26701
viscous drag on high vel. plasma armature 88−40520
yaw angle measurement using optoelectronic system 86−5528
Li-$SOCl_2$ reserve battery for projectile electronic fuzing 88−17838

projectors (optical) *see optical projectors*

heuristic cct. simulation using PROLOG 86−34708
non-numerical circuit design and anal. using Prolog 87−65751

PROM
1 M-bit EPROMs from US/Japanese manufacturers *(Japanese)* 86−62599
1 Mbit CMOS EPROM high-performance memory cell technology 86−46848
1 Mbit dense flash EEPROMs compete for UV-PROM sockets 88−38516
1 Mbit EPROM, nonvolatile, disc storage alternative 85−33899
1-Mbit EPROM, high speed with Ti-silicided gate 85−35178
1Mb EPROM developed with 100 ns access time 85−12414
2K CMOS EEPROM with I^2C bus for consumer electronics 85−61284
3-phase invertor using digital PWM control circuit and EPROM 88−30907
4 Mb EPROM VLSI multichip packaging using thin film interconnection technology on Si substrate 88−50565
4-Kbyte EEPROM on MC68HC805C4 single-chip microcomputer 86−34837
5 V E^2PROM, features 85−11268
7-bit counter using PROM and octal latch, cct. 85−6397
8-bit microcomputer chips, EEPROM on chips 85−40113
16 V8 Generic Array Logic EEPROM technology revitalises PLAs 86−46674
16-bit EPROM microcontroller with alterable I/O and buswidth, appls. 88−803
20 ns CMOS PLD for asynchronous appls. 88−70686
28C256 EEPROM IC using CMOS technology *(German)* 87−66164
28C256 EEPROM offers enhanced page mode for fast programming 86−57837
64 Kbit and above for permanent program storage 85−17374
64-kb CMOS EEPROM with page mode 88−19158
64K byte-erasable 5V only EEPROM using Hi-MNOS II technology 85−35170
64K EEPROM, 5 V only byte erasable 85−17381
64K EEPROM, future prospects and their technology 85−17376
80 ns address-data multiplex 1 Mb CMOS EPROM *(German)* 87−59487
128K MOS EPROM with encrypted read access 86−14216
256 KBit CMOS EPROM *(German)* 87−44822
256K EEPROM, future design possibilities 86−41090
256K EPROM, fast programmable with on-chip test ccts. 85−35179
256K mask programmable ROM series with 256K EPROM compatibility 85−54887
256K NMOS EPROM using double poly-Si E/D NMOS technology 85−61281
256K/1 Mb CMOS EPROMs, high-performance CMOS technology 86−46849
512 kbit EPROMs, correct programming *(German)* 85−54868
2001 and 2004 nonvolatile RAMs from Intel 85−61255
2500-gate PLD with subdivisable macrocells 88−70687
2716, read/write socket for use in a read-only socket for an EPROM 85−11203
2716 EPROM doubling up for 4096-byte storage 85−11230
2732 programming using 2716 PROM programming module 85−11256
8751H secure EPROMS−a microcontroller offering of proprietary software projection 85−11264
9000-gate CMOS user-programmable gate array 88−70688
27128 EPROM for loading PC-DOS in 2 seconds *(German)* 87−10875
27513 EPROM, overcoming addressing limitations with page-addressedEPROMs 86−34755
27916 KEPROM approach locks out software pirates 85−55910
addressable controller for a large size displaypanel 86−38456
advanced high voltage CMOS process for custom logic circuits with embedded EEPROM 88−70707
algorithmic state machines based designs, use of multiplexers in their synthesis 86−57528
Altera RP1800, high-speed CMOS EPLD 88−6863
alterable MCUs, single-chip microcomputers with E^2PROM 88−801
Am27C1024 1Mb CMOS EPROM 86−47789
application specific EEPROMs: General Instrument'sER1000, nonvolatile counter 86−1183
applications in automobiles for engine performance improvements 88−55702
AR-10/11 audio response board and audio data PROMdevelopment software for AR-11 *(Japanese)* 86−22945
artifact free imaging of memories using STEM 85−61277
BCC180 multitasking computer/controller 88−25222
BiCMOS advanced standard cell library provides mixed digital analog and EEPROM single-chip solns. 88−64713
bipolar PROM, Texas Instruments TBP38S16 device, design and charactS: using IMPACT process 86−1070
bipolar PROMs, adaptor for programming *(German)* 85−23930
bipolar PROMs, props and appls *(German)* 86−52841
bus interface controller IC, Intel 5CBIC 87−44987
capacity minimisation of PROM using vertical algorithm flow chart *(Russian)* 87−31893
car odometer, EEPROM protection 86−45790
CAT35C704 4 k EEPROM with data protection and flexibility 88−56612
PROM continued
cheque card format IC cards *(German)* 87−5906
CHMOS VLSI RAM and PROM test problems *(Italian)* 86−14188
CMOS 256k EEPROM 87−59491
CMOS 256K EPROM VLSI design and evaluation tool based onprocess-device-circuit numerical simulation system 86−58624
CMOS E^2PALs mean in-circuit reprogramming 87−37180
CMOS EEPROM, 256 K, very-high-endurance, autoredundant Q-cell 88−6825
CMOS EEPROM, 256K, 5 V only operation, design using barrier height lowering technique 86−34819
CMOS EEPROM, 35 ns 64K 86−20539
CMOS EEPROM, 512K, single transistor EEPROM cell appl. 86−46845
CMOS EEPROM, 64 kbit, HN58C65 87−37278
CMOS EEPROM, 64K, dual control gate cells, 50 ns access time, 200 μs programming 86−41129
CMOS EEPROM, 64K, NEC μPD28C64, design and features *(Japanese)* 87−31898
CMOS EEPROM memory cell, non avalanche injection based, VLSI scaling down compatibility simulation 87−24186
CMOS EEPROM radio identification code transceiver, microwave field powered 87−59480
CMOS EEPROM reliability, effects of processing 88−755
CMOS EEPROM technology; high performance, 256K 86−46846
CMOS EEPROMs, technological breakthrough 86−46817
CMOS EEPROMs XL48C64, XL46C16, and XL46C32 for high-speed low-power appls. 86−1076
CMOS electrically erasable PLA using EEPROM n-well technology, 25 hr propag. delay 88−6811
CMOS EPROM, 100 ns 256K, design with redundant fuse elements 86−8251
CMOS EPROM, 120 ns 4 Mb 87−59489
CMOS EPROM, 128K, low-power high-speed device, config. and charact. *(Japanese)* 86−34790
CMOS EPROM, 1 Mb, with FAMOS cell area of 8.5 μm^2 88−38542
CMOS EPROM, 1 Mb asynchronous device with 80 ns access time 86−8257
CMOS EPROM, 1 Mb device with page mode programming 86−8256
CMOS EPROM, 1 Mb with 13.5 μm^2 cell 87−59488
CMOS EPROM, 1 Mbit, AMD 27C1024 *(French)* 86−46790
CMOS EPROM, 1 Mbit, from Toshiba 87−31890
CMOS EPROM, 1 Mbit, HN27C101 and HN27C301 87−37277
CMOS EPROM, 1 Mbit, technology 86−20551
CMOS EPROM, 1-Mbit 87−17068
CMOS EPROM, 256K, design, charactS. and performance 86−34814
CMOS EPROM, 256K, Hitachi HN27C256, design and performance 86−41094
CMOS EPROM, 25 ns 16K, 4-transistor cell config. for speed improvement 86−8250
CMOS EPROM, 27C257 MBUS, 256 K device with byte serial bus interface, automotive appls. 87−73454
CMOS EPROM, 4 Mbit, 120 ns, design with redundancy scheme 88−6823
CMOS EPROM, 4 Mbit, one-time-programmable test cct. implementation 88−6882
CMOS EPROM, 95 ns 256K, latch-up free design using poly-Si PMOS FETs 86−8252
CMOS EPROM, Mbit capacity, Am27C1024 86−14178
CMOS EPROM, optically-induced latch-up and other failure modes, expt. study 85−49850
CMOS EPROM, split gate type, 256 K, 50 ns, design and performance 88−6881
CMOS EPROM programmable bus interface controller 87−59399
CMOS EPROM speed and power *(Italian)* 86−67218
CMOS EPROM technology, three-transistor cell 87−44852
CMOS EPROMs, 4 Mbit, submicron process and device technologies 88−38539
CMOS EPROMs, megabit, technology 85−49879
CMOS generic array logic EEPROM 85−45045
CMOS high-speed EPROMs 87−73441
CMOS low-power programmable decoder/EPROM/RAM chip 88−63666
CMOS memories *(Swedish)* 85−45040
CMOS PLDs, high performance, and applications 88−6862
CMOS programmable logic modules using EEPROM cells, Lattice Semiconductor device GAL 16V8 *(German)* 86−20428
CMOS PROM, 25 ns 16K, using four-transistor cell and differential design techniques 86−20538
CMOS PROM, with polysilicon fusible links, radiation hardening 86−34785
CMOS PROM arrays, programming technique using laser beam scanning 87−66173
CMOS PROM interfaces with COSMAC 85−49848
CMOS RAMSs and PROMs, more is better 86−1079
CMOS single-transistor elec. erasable nonvolatile memory technology 88−70780
CMOS split-gate EPROM, 256 K, 50 ns, high-speed device with row redundancy 88−32202
CMOS SRAM and PROM, heavy particle induced latch-up, ^{253}Cf source 85−22884
CMOS UV EPROMs and EEPROMs moving into 1 Mbit and multimegabit regions 88−19123
CMOS VLSI submicron static memory technology and process integration 86−20563
CMOS-RAM and EPROM-modules for K1520 microcomputer *(German)* 85−33912
coding verification for programs in PROM and PLD components *(Italian)* 86−67217
common latch and timer circuit socket for E^2PROM writing 86−41121
computer development engineering hardware and software conf., New York, USA (April 1985) 86−41118
configurable EEPROMS for ASICS 88−63681
control automata construction using programmable logic devices 85−17264
convolutional encoder and threshold decoder, design 88−3691
COP 800 microcontroller family with EEPROM, charactS. and programming aspects *(Italian)* 88−776
crosspoint switch, PLD approach 86−62524
Cypress CMOS PLDs 86−27249
data security techniques using microcomputers with on-chip EEPROM 85−17520
dedicated microprocessors with integrated PROM, product review *(Italian)* 88−63700

PROM continued
DENI Microsystems SP85 EPROM programmer, low-cost design *(Italian)* 87−73444
device programmers, product report 85−54863
diagnostics on the chip. A new concept facilitates the testing of systems *(German)* 85−11300
digital multiple storage for weather satellite images 85−49869
digital phase and frequency programmable sinewave synthesizer 87−56714
digital tuning system IC with EEPROM, NEC μPD1717CU CMOS single-chip microcontroller *(Japanese)* 87−31937
digital tuning system with EPROM block, NEC μPD17P00 family *(Japanese)* 87−31938
digitally adjustable supply for an EPROM programmer *(German)* 85−33628
distributed DFT, methods and devices 87−27388
double layer poly for EPROM interconnect 88−32212
e^2 CMOS programmable logic−flexibility and testability 87−6922
E^2 PROM technology in smart cards 86−41120
E^2PROM, system impact 85−17443
E^2PROM memory cell design using 1-μm lithography 85−49882
E^2PROM nonvolatile memory chips 86−1067
E^2PROM speed and power breakthroughs, XL2816A and XL2817A packages 85−49871
E^2PROM technologies, trends and develops. 87−44850
e^2PROMs: a new tool for software and hardwareenhancement 86−1077
E^2PROMs, features and applications 85−17446
E^2PROMs, reliability comparison of FLOTOX and textured-polysilicon technologies 88−754
E^2PROMs, serial design 85−11269
E^2PROMs, use as non-volatile stores *(German)* 85−6323
E^2PROMs with textured poly-Si floating gate, reliability 86−46816
EAPROM, dangling bonds in Si_3N_4 films for MNOS memory 85−40534
EAROM, 32 kbit type, MN1234, design with single 5 V power supply operation *(Japanese)* 86−52839
EAROM, nitride barrier avalanche-injection MIS cell struct. for high-speed write/erase 85−28523
EAROM using floating gate MOS transistor with Si-rich Si_3N_4 injector layers 88−742
EBS-2−an EPROM-based sequencer ASIC 88−70691
EEPROM: the universal memory device 86−46819
EEPROM, 256 K, flash type using triple poly-Si technology 87−66169
EEPROM, 256K, flash type using triple poly-Si technology 86−8253
EEPROM, 256K, with high-performance single-polysilicon cell 87−5881
EEPROM, 64K, Motorola MCM2864 device, design, features and appls. 86−1072
EEPROM, 64K, n-channel, design with extended temp. and page mode operation 86−8254
EEPROM, Exel XL2816A, Xicor X2864A, designing with 85−28512
EEPROM, flash type, 128 K, design using double poly-Si technology 88−6824
EEPROM, high-density, optimum design of dual-control gate cell 86−8239
EEPROM, high-density FETMOS cell using oxide/nitride/oxide inter-poly-Si dielecs. 86−41130
EEPROM, high-density single poly-Si struct. with lowered barrier height oxide for VLSI 86−41131
EEPROM, market and growth potential 85−11267
EEPROM, MCM2833, 32K, features and performance 86−27318
EEPROM, microprocessor and microcomputer appls. 87−757
EEPROM, Xicor devices, characts., performance and appls. *(Italian)* 85−774
EEPROM, Xicor X28256 device, design and performance *(Italian)* 87−44824
EEPROM's applications in mini and microcomputers 88−50152
EEPROM and NOVRAM, review *(Italian)* 85−61274
EEPROM and silicon compilation for ASICs 87−759
EEPROM arrays testing, using 8-bit HCMOS single-chip microcomputer 86−46832
EEPROM cell, ultra-high density with textured poly-Si floating gate 87−44857
EEPROM cell using a low barrier height tunneloxide 86−41116
EEPROM cell with one half barrier height oxide, VLSI fabrication technology 85−49896
EEPROM cells, floating-gate, anal. and modelling 86−62595
EEPROM data loss, write/erase cycling effects 86−46847
EEPROM device, single-transistor, using single-polysilicon technology 87−37280
EEPROM device family using NMOS and CMOS technologies 86−1073
EEPROM devices; oxide layers charactn. 87−17971
EEPROM devices, floating gate, modelling of write/erase and charge retention characts. 85−17418
EEPROM devices using nitridized SiO_2 86−35567
EEPROM features, revolutionary advances 85−11270
EEPROM floating-gate memory cell. charact. investig. 88−6852
EEPROM for microprocessors and custom logic, design using 2.5 μm n-well CMOS technology 85−45047
EEPROM generations, programming regimes and appls. *(Czech)* 88−70762
EEPROM market growth accelerates as standards, secondsources emerge 86−27316
EEPROM MCU's, past, present, and future 88−802
EEPROM memory devices, enhanced field emission from plasma-texturised $Si-SiO_2$ interfaces 86−28050
EEPROM memory module, NMC 9817, config. and appl. *(German)* 85−28525
EEPROM of 2nd generation *(German)* 86−52820
EEPROM on 72720 microcomputer chip provides system adaptability 86−34827
EEPROM on-chip single-chip microcomputer 87−37327
EEPROM programmable logic chip for design in one day 86−47803
EEPROM single transistor electrically alterable cell 86−20526
EEPROM standards and reliability: an interim report 85−22855
EEPROM technology, 64K IMS 3630 86−27317
EEPROM technology, breaking through speed and power barriers 86−27319
EEPROM technology, standardisation and reliability problems 86−20545
EEPROM technology advances and competition 86−1024
EEPROM testing to guarantee functional and reliability specifications 86−46809
EEPROM tunnel oxide endurance for 9.3 nm thick oxide 87−17974
EEPROM tunnel-type cell using 3 μm CMOS process, fabrication and characts. *(Korean)* 86−57833

PROM continued
EEPROM with data protection circuitry, Intel device D 2817 A, design and characts. *(German)* 85−6310
EEPROM with four-state memory, using floating-gate memory cells 87−52578
EEPROM with LV tunnel write for dense arrays 85−33903
EEPROMs, 35 ns 64K devices using n-well process 86−8255
EEPROMs, capabilities and state of development *(German)* 87−59461
EEPROMs, characteristics and appls. *(French)* 87−24180
EEPROMs, flash, memory of future *(German)* 88−63672
EEPROMs, floating gate tunnel oxide devices, programming mode depend. degradation study 88−38536
EEPROMs, high endurance and fast write cycle time considerations 86−1071
EEPROMs, high performance, lower access times 88−6843
EEPROMs, market and reliability *(French)* 85−33897
EEPROMs, X28256 series with higher storage density *(German)* 87−31868
EEPROMs Am9864 and Am2864A, features and appls. 86−1075
EEPROMs close to breakthrough *(German)* 86−52819
EEPROMs come of age with control and interfaceintegration 86−1056
EEPROMs for digital and analogue appls., Swiss R&D projects *(French)* 88−33313
EEPROMs for military appls. 88−70748
EEPROMs gear up to challenge bipolar and static memories 87−17061
EEPROMs in single-chip microcomputers, utilisation for automotive electronics 86−46899
EEPROMs move into standard cell libraries, manufacturers' approaches 86−57814
EEPROMs provide more memory space 87−758
EEPROMs technological aspects, programming and erase techniques 86−1074
EEPROMs with and without error correction code, reliability enhancement 87−44858
EEPROMs with on-chip error correction, endurance and reliability 87−59456
EEPROMs with on-chip error correction, MTBF calc. 88−32187
EEROM: a memory device that improves systemperformance 86−46818
EEROM, nonvolatile memory technology and usage 86−20518
EEROM adaptive security for single chip microcomputers 85−11265
EEROMs for military appls. 85−28514
electrically erasable PLD, 11000 fuse logic array/input/output macrocell, 105 μm n-well CMOS implementation 88−63615
electrically erasable PROM, overview 87−756
electronic equipment programmable checking device, using BASIC language *(Hungarian)* 86−19826
emitter bipolar type, design with diagnostic registers, construction and appls. *(German)* 85−17382
Emulo-8, EPROM emulator, building project 86−34750
environmental testing of UV-EPROMS, EE-PROMS, and fusible-link PROMS, airborne appls. 88−761
EP600 EPROM, offer range of flip-flops and clocks 85−61250
EPB 1400 programmable bus peripheral cct. 87−74416
EPLD architectures of the future *(Spanish)* 88−6851
EPLDs with multiple array matrix architecture, Altera EPM series *(Italian)* 88−70650
EPROM, 128K, using encryption of pseudorandom numbers to enable read access 87−5884
EPROM, 1 Mbit, based on 1.2 μm minimum design rule technology 85−22879
EPROM, 1 Mbit device from Intel, config. and characts *(Italian)* 86−41092
EPROM, 256K, high-speed high-density device using n-channel technology *(Japanese)* 86−34791
EPROM, 512K-bit, fine processing development techniques *(Japanese)* 87−10878
EPROM, densely arrayed config. with LV write and erase functions 85−22894
EPROM, EEPROM and fuse-PROM technologies for programmable devices 88−744
EPROM, failure modes, passivation film defects 85−54901
EPROM, FAMOS type, design, characts. and fabrication using focused B ion beam implantation 87−59452
EPROM, floating gate transistors, switching degradation 87−18175
EPROM, high-speed 1 Mb device with $TiSi_2$ gate, design and characts. 85−49894
EPROM, Intel 27916 MOS IC, 128 Kbits, design with readout access protection *(French)* 85−45042
EPROM, JMC Promac Model 2A MOS device programmer programs megabit EPROMs in seconds *(German)* 88−44163
EPROM, minimal programmer 87−52569
EPROM, poly-oxide/nitride/oxide structs. for highly reliable cells, fabrication and characts. 85−49895
EPROM, RAM and DRAM, development *(Italian)* 86−20543
EPROM, trench self-aligned technology 87−24194
EPROM, windowless plastic versions, nonvolatile semiconductor memory technologies 86−20520
EPROM 1 Mbit family from NEC, design and characts. *(Japanese)* 87−31897
EPROM applications 86−1066
EPROM as peripheral memory for Z80 systems *(German)* 86−46795
EPROM burner, self made EPROM programming system *(German)* 87−24177
EPROM capacity enlarging on PCs *(German)* 88−19127
EPROM card add-on module for C 64 and C 128 *(German)* 88−12368
EPROM cell and array for VLSI 87−24195
EPROM cell array, self-aligned contactless cell technology 87−44853
EPROM cell struct. for erasable programmable logic devices compatible with single poly gate process 87−24128
EPROM cell struct. with sidewall floating gate, operation, characts. and fabrication 87−59453
EPROM cell with side-wall floating gate for high-density PROM IMC FEIC IC technology 86−46850
EPROM cells with submicron feature size, gate current injection technique 85−49900
EPROM chip development (1970-85) *(German)* 86−14185
EPROM development 88−56620
EPROM developments in capacity and power 85−11234
EPROM device using focused B ion beam implantation, FAMOS type struct and characts. 87−24203
EPROM devices, plastic encapsulated, UV transmissive passivation, moisture resistive 85−6327

PROM continued
EPROM duplicator cct. 85−22857
EPROM emulator, review *(German)* 85−49865
EPROM enhances TMS32010 μC's memory 87−44864
EPROM eraser, timer for correct radiation time 85−11231
EPROM expansion for AIM 65 microcomputer *(Italian)* 85−28521
EPROM fabrication and charact., NMOS process 85−22897
EPROM floppy with hardware boot *(German)* 86−62596
EPROM in CMOS technology, struct., operation, charact. and appl. *(German)* 87−24159
EPROM intelligent programming method *(German)* 88−6847
EPROM memories, MOS devices, architecture, operation and programming *(Spanish)* 86−27305
EPROM module and programmer for KC 85/3 *(German)* 88−56628
EPROM n-channel funnel-shaped transistors, double-hump substrate current obs. 86−21552
EPROM passivation technique, UV transparent process *(Italian)* 85−33895
EPROM practical considerations for programming *(Spanish)* 88−56609
EPROM process technology, oxide-nitride-oxide interpoly structs. 88−12375
EPROM production, comparison of Waferscale and Cypress devices *(Swedish)* 88−12366
EPROM programmer, design 87−10883
EPROM programmer, design and construction *(Spanish)* 86−52842
EPROM programmer, microcomputer interface for recording and reading *(Spanish)* 85−49868
EPROM programmer, software techniques 85−22858
EPROM programmer and Handi-type typewriter, FORTH-based designs 86−57841
EPROM programmer based on Z8 85−28513
EPROM programmer for KC 85/2 and KC 85/3 computers *(German)* 87−73446
EPROM programmer for SC84 microcomputer 85−11242
EPROM programmer for student hardware research lab. 87−31166
EPROM programmer from ZX81 *(German)* 85−49858
EPROM programmers, evaluating device programmers−by yield 88−44167
EPROM programming, menu system, hardware design *(German)* 85−17416

EPROM programming at longer word lengths 87−37269
EPROM programming device *(German)* 88−70761
EPROM programming instrument for C64 *(German)* 85−54885
EPROM programming of CPUs, bootstrap firmware 86−34752
EPROM programming set for 21 V, 28-pin EPROMs 86−27281
EPROM programming unit for the Atari ST *(German)* 87−746
EPROM programming units and systems *(German)* 85−11238
EPROM selector 85−40077
EPROM simulator, development system for MHB 8035, 8084 and 8748 single-chip microcomputers *(Czech)* 87−66184
EPROM storage of digitised speech for voice response information system 85−3168
EPROM structure, 5-V programming, with source-side injection 87−44851
EPROM submicron cells, charactn., and suppression of drain coupling 88−25184
EPROM survey, from 2716 to 27210 *(German)* 87−24176
EPROM techniques in application-specific ICs *(German)* 86−52818
EPROM U2732 programming device *(German)* 88−6848
EPROM-simulator *(German)* 87−59459
EPROM/SRAM package, design appls. 85−17411
EPROMs, 15 years of programmable Si *(German)* 86−14186
EPROMs, 512 kbit devices, Intel 27512 and 27513, HMOS-II implementation with redundancy *(German)* 85−22851
EPROMs, 512k bit, interface circuitry and programming algorithms 86−1025
EPROMs, appl. of shallow trench isolated buried N^+ FAMOS transistors 88−6874
EPROMs, digitally set programmed voltage generation with IC TL 497 *(German)* 87−44821
EPROMs, economics and appls. 85−17441
EPROMs, EEPROMs and NOVRAMs, survey *(Polish)* 87−59451
EPROMs, high density, state-of-the-art 85−49870
EPROMs, Intel 27512/27513 512K devices incorporating firmware, programming aspects *(Italian)* 86−34758
EPROMs, large-capacity with high writing speeds 85−22898
EPROMs, larger capacity for new memory tasks 85−54880
EPROMs, mass production initiatives 85−17445
EPROMS, PALS, and surface mount: programming considerations 87−60015
EPROMs, partial reprogramming 85−28515
EPROMs, processor embedded, array programming 86−1048
EPROMs, self-aligned planar array cell for ultra high density device, process technology 88−38537
EPROMs−erasure and re-programming 87−5862
EPROMs for mc 68000 computer *(German)* 85−54884
erasable programmable logic devices, A+Plus software package 85−28446
erasable programmable logic devices, EPLDs, and development system *(German)* 86−34679
erasable PROM programmers for large memories up to 512K *(Italian)* 87−44825
erasable/programmable solid-state memories 86−20515
error detection and correction using PROM for high speed with ECAD IC 86−27190
ETOX based flash memories, reliability performance 88−50150
FAMOS trench isolation to enhance programming efficiency and isolation in high density ULSI EPROMs 88−70768
FAMOS trench-isolated N^+ transistors for high-density EPROMS 87−37282
faulty-cell identification *(German)* 85−11225
features of latest devices from RAMs to EEPROM 85−11233
field programmable devices and their programmers 85−11232
field programmable gate arrays, use of PROM technology 86−27250
flash E^2PROM cell using triple poly-Si technology 85−49881
flash EEPROM using double polysilicon technology 87−59490
flash EEPROMs, principles for use 87−44826
flash EEPROMs bridge the gap between UVEPROM and EEPROM 88−56623
flash memory chips, electrically erasable, development, operating principles and charact. *(Italian)* 88−70754

PROM continued
flash memory chips, erasable programmable devices with single transistor cells and central processor 88−70752
flash-erase EEPROM cell with an asymmetric source and drain structure 88−38540
floating gate EEPROM degradation rel. thermal oxide conduction 85−49884
floating-gate EPROM with trench-gate-oxide structure, effect on operation 88−56615
FLOTOX EEPROM memory cell, erase/write characteristics *(Chinese)* 86−8202
four quadrant AC motor drive, power factor improvement, online optimised pulse pattern 88−24189
function-specific Buster and SAM architectures for programmable ccts. *(French)* 88−56542
fusable bipolar PROM, 35 ns, 128K 87−17070
fuse-programmable controller chip for distributed systems, Am29PL141 86−14242
general-purpose high speed EPROM programmer *(Chinese)* 85−40072
GIM DSP320EE12, on-chip EEPROM for CMOS IC flexibility 87−59522
hardware aid for programming and testing of programmable memories *(Croatian)* 85−40067
hardware interface for TP-801 microcomputer and printer *(Chinese)* 85−54933
high performance CMOS process for the next generationEPROM 85−49880
high performance EEPROM using low barrier height tunnel oxide 85−40107
high speed, appl. as programmable logic elements 85−17364
high speed programmable logic eases next generation system design−overview 88−44146
high speed PROM programming routines and modern PROMprogramming equipment requirements *(German)* 86−20524
high-speed PROMs with on-chip registers and diagnostics 85−17442
Hilevel DS 5000 microcoding development system with memory emulation/logic anal. capability, VLSI/ASIC appls. *(Italian)* 88−70620
Hitachi CMOS 8 bit microcomputer family incorporating on-chip EEPROM 88−32240
HMOS II E 512-kbit EPROM, types and features, Intel *(French)* 85−6309
hot-hole erasable memory cell 87−744
IC card with a microprocessor *(Japanese)* 88−184
IC tester, computer controlled, design 85−22233
ideal PAL devices, requirements 88−6802
in-circuit programming techniques *(Italian)* 86−62590
in-circuit PROM programmer to speed up operation and reduce costs *(French)* 87−52571

proportional control
automatic temperature controller for incubators *(Russian)* 86−5564
current source invertor-fed induction motor drive system control without speed sensor 86−70920
DAT (DA) series of induction motors with frequency control, dynamic characts. *(Russian)* 87−58084
DC motor load-insensitive position control system, microprocessor-based 87−43056
DC-DC convertors in hysteretic current mode, frequency stabilisation 87−22585
electric generator stabilisation, proportional action automatic field control *(Russian)* 87−4665
electrohydraulic controller for Kaplan turbine *(Czech)* 86−25946
EMG signals processing for proportional control *(Korean)* 85−15323
HV ACDC power system stabilisation, control strategy eval. 86−18698
HV ACDC power systems, stabilisation of multimachine system 86−18695
interconnected power systems, automatic field control, steady state stability and damping *(Russian)* 85−59552
microcalorimeter, gas-solution, heat binding curves determ. 87−49985
muscle force regulation in human lower extremity using functional elec. stimulation, control system design and eval. 88−54629
power station drainage water neutralisation using automatic regulation system *(Russian)* 87−4548
rapid optical annealing system, semiconductor, process control 87−11587
self-adaptive myoelectric processor, automatic calibration to amputee's muscle movements 87−29818
solenoids, calc. using finite elements *(German)* 85−2493
solenoids for valves *(German)* 88−45652
synchronous generator digital voltage controller with 16-bit microprocessor *(Croatian)* 86−61498
temperature controller using solid-state heat pump 85−11480
temperature controller with diode sensor *(Czech)* 85−17761
three-phase induction motor speed control using proportional drive 86−6760
valve performance characteristics and applications 85−30015
VTOL aircraft, robust control, variable struct. approach 85−4400

proportional counters
see also position sensitive particle detectors
2-D detector for photon counting appl. 88−4872
8-hit sample and hold circuit for drift chamber *(Chinese)* 85−31714
accelerator detector, liquid scintillator and proportional drift tubes for monopole searches 85−31747
air proportional counters, detection efficiency 87−35356
air proportional counters, water and ethanol vapour effects 87−50143
Akeno proportional calorimeter for magnetic monopole search in air showers 85−15243
Aleph EM calorimeter, gaseous calorimeter operated in high mag. field 85−9041
ALEPH expt. highly segmented EM calorimeter, electron-pion separation 88−22948
ALEPH time projection chamber, gating grid 87−21428
ALEPH time projection chamber, TPC90 test model 87−21426
ALEPH time projection chamber, wire gain and track distortion studies 87−21427
analogue signals optimal processing, from drift chamber 88−16660
area detector data acquisition system for proteincrystallography using multiple-energy anomalousdispersion techniques 86−60571
ARGUS vertex drift chamber, design and performance 87−21424
attenuation length measurements in narrow drift channels 87−29458
automated equipment for measuring radiation, Czechoslovak (Tesla) models *(Czech)* 85−9088
automated method for measuring wire tensions in multiwire chambers 88−61128
automatic recording system for proportional counter with pulse-shape analysis 86−5836
avalanche growth, concentration depend. in Kr+cyclohexane mixtures 87−3888
axonal transport study, multiple proportional counter, design and construction 85−4294
background in escape gated detectors for hard X-rayastronomy 86−65348
background rejection method using field-adjusting electrodes 85−37980
background suppression in a gas scintillation proportional counter for exotic X-rays 87−29462
balloon-borne telescope for hard X-ray astronomy 85−31769
barrel calorimeter performance at PEP high resolution spectrometer 86−70317
BES main drift chamber, testing by the K2 Test Beam of the KEK Proton Synchrotron *(Chinese)* 88−22911
BNL hypernuclear spectrometer-drift chamber system 85−26728
Bragg curve spectroscopy and position sensitive detector system 85−4236
breakdown phenomena associated with very large gains in drift chambers 87−29452
calibration of soft X-ray sources and instruments, 1986 status 87−14815
calorimeters using thin MWPCs operating in a high gain mode 87−29447

proportional counters continued
CARUZ total absorption range telescope, proton/pion meas., electronics 88−42431
cathode metal selection, w.r.t. ^{238}U contamination 87−71022
cathode read-out proportional chambers, detection accuracy study 85−52969
cathode readout MWPC for ISTRA setup 85−20815
CDF, central EM calorimeter, electron response maps 88−47988
CDF, EM calorimeter, small angle regions 88−47984
CDF, fast hardware track finder for central tracking chamber trigger 88−54404
CDF, RABBIT data acquisition front end system 88−54402
CDF, two level, FASTBUS bared trigger system 88−54400
CDF calorimetry 88−29859
CDF central and endwall hadron calorimeter 88−47987
CDF central and forward tracking chambers 88−29839
CDF central calorimeters, cosmic ray test 88−47989
CDF central drift tube array, design, construction and streamer mode operation 88−48023
CDF central electromagnetic calorimeter 88−47985
CDF central EM calorimeter, calibration systems 88−47990
CDF central muon chambers, electronic levelling system, operation and readout 88−48019
CDF central muon level-1 trigger electronics for central muon drift chamber 88−54401
CDF central tracking chamber, design and construction 88−48021
CDF central tracking chamber, drift velocity and Lorentz angle meas. 86−70350
CDF detector at Fermilab, overview, physics capabilities and subsystems 88−74741
CDF end plug electromagnetic calorimeter using conductive plastic proportional tubes 88−47986
CDF FASTBUS data acquisition front end system 88−54403
CDF forward muon system, PSL TDC and UW HOPU module operation 88−48020
CDF forward/backward hadron calorimeter 88−47983
CDF forward/backward hadron calorimeter using proportional tubes 87−41837
CDF vertex time projection chamber, construction and electronics 88−48022
CDF vertex time projection chamber, prototype flash ADC system 87−77578
central drift chamber for BES, 45° prototype, beam test results *(Chinese)* 88−61074
central drift chamber for BES, prototype construction and testing *(Chinese)* 88−42417
central drift chamber for rare kaon decay spectrometer, design 86−50317
Central Tracking Chamber of Fermilab Collider Detector, performance in tagging $pp \rightarrow W^+W^- + X$, $W \rightarrow tb(l\nu_l)$, $\sqrt{s} = 17$ TeV 88−4836
chamber with HV electrodes, using Al foil 85−9079
charge division in a small proportional chamber constructed with aluminized mylar tubes 88−74742
charge division position sensitive proportional detectors 86−60561
charge position readout devices for imaging photon detectors 88−36391
charge sensitive 16-channel amplifier-discriminator board for MWPC 85−20852
charged particle and rel. nuclei registering proportional chambers for SIGMA and ANOMALON expts. 87−21408
charged-particle spectrometer using plastic scintillators and MWPC for neutron-induced reactions study 85−52989
Cherenkov radiation recording, by wire chamber operating in self-quenched streamer mode 86−60592
Cherenkov radiation ring spectrometers using proportional and drift chambers, accelerator appls., review 88−54449
Cherenkov ring imaging detector, prototype tests at SLD expt. 87−41835
CLEO II detector construction at Cornell electron storage ring 88−48002
CLEO II drift chamber, design and construction 87−21416
coaxial counters, gain dependence on count rate due to space charge 86−70329
coaxial proportional counters, gas amplification meas. 86−18241
collider vertex detectors, prospects 88−29848
compact multiwire proportional chamber system with 250 μm wire spacing 85−43236
complex ions, neutralisation in proportional counters and MWPCs, cathode effects 87−29454
conf., Munich, Germany, March 1986 87−22963
conf., Vienna, Austria, February 1986 87−22962
conference, High energy particle physics, London, UK (Apr. 1988) 88−62898
conference, Stanford, CA, USA (July 1985) 86−60533
count rate effect, influence of quench gas 86−5788
CP/M VMEBUS control system for MWPC HV power supplies 87−22541
curved anode wire chambers for X-ray diffr. appl. 85−31771
curved razor-blade proportional counter for X-ray diffraction studies 86−50350
cylindrical drift chamber for CMD-2 detector at VEPP-2M 87−21412
cylindrical drift chamber for Mark II detector at SLAC 85−43238
cylindrical drift chambers, 3-D track and vertex fitting 85−37913
cylindrical tissue equivalent proportional counters, calibration method 86−50363
D0 detector, implementation of goals, component performance data 88−36377
D0 transition radiation detector 88−29857
data acquisition and processing, using standard CAMAC Module 88−4820
delay line drift chamber, 2.5×1.5 m operational experience 85−59176
delay line type X-ray position sensitive proportional counter with cylindrical cathode strips *(Japanese)* 85−59204
DELPHI barrel electromagnetic calorimeter flash ADC based digitizer 87−44968
DELPHI Barrel RICH Prototype, detection efficiency and spatial resolution, diffusion coeff. for gas mixtures 88−68234
DELPHI Barrel RICH Prototype, detector performance for particle identification. 88−68235
Delphi Experiment, TPC trigger 87−41875
DELPHI high density projection chamber 88−29862
Delphi time projection chamber, contiguity trigger 87−63685
DELPHI time projection chamber, space meas. accuracy tests on half-scale prototype 87−21430
Delphi TPC prototype, readout system 85−43279
Delphi TPC prototype performance test 85−43177

proportional counters continued
DELPHI TPC readout, preprocessing and data acquisition 85−9058
digital X-ray imaging installation using one-coord. multiwire chamber 85−59234
digital X-ray imaging system using MWPC 87−77545
dimethyl ether as a drift-chamber gas 87−8843
dimethyl ether drift chamber, performance 86−5785
dimethyl ether precision drift chamber vertex detector 88−10245
Diogene 4π detector at Saturne 88−10243
discriminator for proportional drift detector 87−63687
double wire drift chambers for in-beam expt. at LEAR 87−29457
Dϕ detector status at Fermilab pp̄ collider, beam test results 88−48001
drift chamber, 2D, construction and performance *(Chinese)* 87−70996
drift chamber, 2D, delay-line read-out *(Chinese)* 87−70997
drift chamber, 3 m×1 m, construction, operation and electronics 88−68239
drift chamber, cylindrical, multi-layer, for low-energy p̄p expt. 86−25117
drift chamber, diamond shaped cathode pads for longit. coord. meas. 85−52971
drift chamber, electrodeless operating characteristics 85−64459
drift chamber, electron drift velocity meas. as function of electric field *(Chinese)* 85−48178
drift chamber, longit. position meas. using charge division read-out 85−9036
drift chamber, maximum allowable O_2 contamination in xenon-methane gas, electron attachment coefficient measurement 88−54412
drift chamber, multicell, for L3-LEP muon spectrometer, calibration 88−22968
drift chamber, multiwire circular electrodeless, design details 85−64458
drift chamber, performance for colliding beam expts. 85−4215
drift chamber, precision imager prototype, resolution 85−15181
drift chamber at CLEO II, construction 86−50315
drift chamber calibration using lasers, review 87−29538
drift chamber characts. in beam of slow nuclear fragments 86−44588
drift chamber constructed of aluminized mylar tubes 87−35351
drift chamber construction for SPS 86−65334
drift chamber development, spatial resolution and counting rate improvement, review 88−54435
drift chamber for high-energy heavy ions 87−35338
drift chamber for MARK III detector at SPEAR, performance 85−15175
drift chamber for PEP-4 expt., cosmic ray test *(Chinese)* 85−48179
drift chamber for the Mark II detector at SLAC Linear Collider 87−21418
drift chamber front end electronics 85−43242
drift chamber in DELPHI expt., variable drift velocity study 87−41860
drift chamber prototype performance test 85−43175
drift chamber readout with flash ADC, time and spatial resolution 86−32157
drift chamber signals, digitised signal waveform anal. 86−32158
drift chamber use for cluster counting, primary ionisation meas. 85−9080
drift chamber vertex detectors for SLC/LEP 88−29844
drift chamber wires, hydrocarbon polymerisation mechanism, PEP storage ring, SLAC 85−64461
drift chamber with 100 MHz FADC readout, time, spatial, energy and double track resolutions 88−68283
drift chambers, appl. as high-resolution tracking devices for high energy physics 88−42410
drift chambers, controlled geometry, prototype tests 85−52968
drift chambers, high resolution design geometry 86−44550
drift chambers, high resolution drift cells 86−5784
drift chambers, laser calibration 85−48187
drift chambers, performance degradation test *(Chinese)* 85−59199
drift chambers, performance test with on-line microcomputer *(Chinese)* 85−59197
drift chambers, resolution of right-left ambiguity using low-noise amplifier 85−11044
drift chambers, search for best timing strategy, computer simulation 85−9035
drift chambers, shaper amplifier with symmetric feedback 86−60621
drift chambers, space charge effects obs. using N_2 laser 85−4201
drift chambers array, resolution study 85−9037
drift chambers for a large-area, high-precision muon spectrometer 87−35339
drift chambers for D0, waveform digitizers 87−63684
drift chambers for L3-LEP muon detector 88−42413
drift chambers for SPES4 spectrometer 87−63631
drift chambers for the observation of multitracks incosmic ray air showers 86−70331
drift chambers with controlled charge collection geometry for the NA34/HELIOS experiment 87−21407
drift chambers with long drift paths, pulse shape simulation 87−77540
drift chambers with stereo wires, 3D track and vertex fitting 85−4228
drift collection calorimeter prototype, energy resolution meas. 88−61105
drift properties of electrons in methane and methane noble gas mixtures 87−29459
drift tube, accurate two-dimensional readout using time division and vernier pads 87−50151
drift tube array, computer computer controlled wire tension measurement system used during construction 88−54399
drift tube time resolution improvement, use of pulse trailing edge 87−71018
drift tubes, performance 85−15180
drift tubes, wire tension meas. method 85−43190
drift tubes for low P_t physics at SSC 88−68290
drift tubes in VENUS muon detector, tension meas. system 87−29494
drift-collection calorimeter, construction and operation 85−43251
drift-pots for small angle elastic scattering at the Fermilab Collider 87−21405
drift-tube counters and readout electronics of VENUS muon detector 87−77538
electroluminescent track chambers 85−43164
electromagnetic calorimeter, 2-dimens. MWPC stack 88−22920
electron avalanche, Monte Carlo simulation 85−43230
electron identification using a synchrotron radiationdetector 86−60580
electron identification using synchrotron radiation 88−29855
electronically collimated gamma camera utilizing gas scintillation 88−22977
electrostatic proton decay detector, 3D elec. field calc. 88−54392
EM shower position determination, accuracy of wide-gap drift chamber 87−3891
endcap shower counters for MARK III detector 85−20812
energy resolution obtained with a multistepproportional counter 86−65350
escape-gated two chamber proportional counter for Auger electron and X-ray meas. 87−71014

proportional counters continued
event classification with the BEBC internal picket fence 87−29474
exo-electrons energy meas., using gas flow proportional counter 85−37937
Exosat gas scintillation proportional counter, in-orbit performance 85−43196
experimental apparatus at future high energy machines, Miniato, Italy (May 84) 85−39410
fast integrating multiware beam profile monitor withdigital readout 86−50268
fast neutron personnel dosimeters using proton recoil proportional counters 88−68257
fast tracking detector using multidrift tubes 88−29846
fibre optic data acquisition from high-current wire chamber 88−16647
fine-grained single gap shower chamber with analogue read-out 85−9038
fluorocarbon polymer film proportional counter, holes cond. under α-particles irradiation 85−52967
fly's eye neutron position sensitive detector, data quality tests 85−15231
FRAMM spectrometer, vertex detector geometrical reconstruction program 87−41871
gamma camera, BaF_2-MWPC combination, for PET imaging 88−61295
gamma camera, BaF_2-MWPC combination, for PET imaging 88−61296
gamma camera, electronically collimated, gas scintillation utilisation 87−35398
gamma camera, pressurised Xe wire chamber, clinical applics. using short-lived ^{178}Ta 88−61294
gamma camera based on multiwire position-sensitive detector 85−48227
gas amplification coeff. meas., analytic formula selection 85−26708
gas amplification factor in neon-nitrogen filled proportional counters 88−68250
gas amplification for Ar-based gas mixtures, methane and CO_2 conc. effects 88−74757
gas amplification of proportional counters withcathodes of rectangular cross section 87−3898
gas amplification stabilisation in low radioactivity meas. using simple electronic device 85−31756
gas counter, discharge ion distrib. shape transition around anode wire 88−61088
gas flow, for energy analysis of photoelectrons with X-ray diffraction 86−44574
gas flow proportional counter for ultra-low level ^{85}Kr measurements 86−70348
gas flow prototype array, gas pressure, temperature and oxygen contamination effects on signal amplitude *(Chinese)* 88−22910
gas gain formula for proportional counters 85−37907
gas gain in proportional counters, meas. and parametrisation 85−37931
gas mixture liquefaction at low temp. 86−70313
gas mixtures, Monte Carlo calcs. of electron transport 87−63635
gas proportional telescope used to investigate rare reactions induced by 3 MeV neutrons 87−14742
gas sampling calorimeter using conductive plastic tube 85−26687
gas sampling EM calorimeter with cond. plastic tubes 85−43187
gas scintillation proportional counter, high-press., for medical X- and γ-ray imaging, energy resolution 86−38766
gas scintillation proportional counter on Spacelab 1 performance and calibration 88−10237
gas scintillation proportional counters, use of photosensitive gases and liquids 85−43222
gas-discharge counter, Cu cathode fabrication natural radioactive nuclides removal 88−38971
gas-scintillation proportional detector for exotic atom X-rays, background suppression 88−29796
gaseous detectors, proportional vs. semiproportional 86−32164
gaseous X-ray detectors, oxygen contamination effects on Ar and Xe gas fillings 88−61148
gate wire photodetector for high flux operation 88−29882
GRAND, γ-ray source detect. via secondary electrons meas. 88−29819
grazing incidence spectrometer with multielement spectral detector, absolute calibration from 20 to 430 Å 87−14813
GUT mag. monopole search using at. induction mechanism and Penning effect 85−31694
hadron calorimeter with proportional tubes and pad readout 87−41838
high counting rate detection system for meas. of charged particle spectra 85−26702
high density lead glass tubing projection chamber, operation and appl. 87−41854
high density spiral projection chamber, end-cap detectors for OBELIX expt. at LEAR 87−21415
high energy accelerators, perspectives for experimental apparatus, seminar, San Minato, Italy (May 1986) 87−63642
high gain thin gap multiwire gas detector for the OPAL hadron calorimeter 87−29448
high pressure multielement proportional counter, characteristics 87−14738
high pressure proportional counter development 87−21434
high pressure Xe gas time projection chamber, electron trajectories, Monte Carlo simulation 87−29477
high rate proportional chamber, operation and appls. 87−41841
high resolution 2-dimensional readout of drift chambers 87−29464
high resolution vertex chamber, test of full scale sector 87−21423
high resolution vertex drift chamber for Mark II SLC Upgrade detector, prototype results 87−21419
high spatial resolution positron emission tomograph 87−21457
high speed pulse digitization in driftless gas scintillation proportional counters 88−61116
high voltage control and monitoring system for proportional chambers 88−61096
High-density Projection Chamber, production process and calibration 87−63645
High-density Projection Chamber EM calorimeter, charge transmission props. 87−50149
high-pressure parallel grid position sensitive gas scintillation proportional counter 85−43198
high-pressure parallel-grid gas scintillation proportional counter for X-ray astronomy 85−48176
high-speed two-coordinate profilometer, using proportional chamber 88−61036
HISPET project, high spatial resolution positron emission tomograph using MWPC 85−43265
hodoscopic module for ANI expt. complex 87−71019
horizontal drift chambers for focal plane polarimeter 87−29497

proportional counters continued
HPC calorimeter, cathode readout proportional chamber, design and construction 86−65332
Iarocci tubes, practical experience 88−29861
imaging gas scintillation proportional counter with microchannel plate readout 85−43199
imaging proportional chamber, appls. 88−61102
induction drift chamber 87−21409
induction drift chamber as high rate vertex detector for ZEUS expt. 88−29845
integral discriminator, eight channel, for recording proportional counter signals 86−60616
ionisation clusters registration by electroluminescent drift chamber 88−36366
ionisation losses meas. using A/D convertor, high-speed parallel CAMAC-compatible design 88−16024
ionising particle detection using supercond. tunnel junctions, expt. results 85−48184
JADE muon detector, construction and operation 85−64456
JADE muon detector, identification of high energy muons 85−64457
JADE vertex detector at PETRA, meas. of short-live particles 87−57043
jet chamber with long drift paths in mag. field, pulse shape anal. 87−29456
jet chambers, electrostatic properties and performance 86−44551
jet type drift chamber, potential, electric field, anal. soln. 88−29824
L3+1 detector for heavy stable particle detection 88−68279
L3 high resolution muon drift chambers, systematic errors in track position meas. 87−21413
large acceptance mag. detector for CEBAF 87−21398
large area multitube proportional counter 86−65347
large area transition radiation detectors for electron identification at CERN UA6 expt. 87−29446
large drift chambers for future detectors 88−22942
large oven transmission proportional counters, counting rate plateau at low organic vapour pressure 88−61149
laser calibration scheme for the UA1 central detector at high luminosity (ACOL) 88−22945
laser induced ionisation in proportional counters seeded with low ionisation potential vapours 85−4217
LEP fastbus data acquisition system calibration system for MWPC *(Spanish)* 87−50122
limited streamer drift tubes with conductive plastic walls, cathode readout 87−14763
liquid argon calorimetry at HERA, the H1 calorimeter 88−22952
logarithmic detection system suitable for 4π detection in nucleus-nucleus collisions 85−64469
long-drift calorimeter modules for the Soudan 2nucleon decay detector 86−50318
low background gas scintillation proportional counter 88−29837
low background telescope system for $^{12}C(n,\alpha)$ meas. 87−50176
low matter density cylindrical proportional chambers 87−14735
low pressure counters in radiation protection, response and sensitivity 85−26817
low-background β-counting system, calibration, environmental sampling appl. 87−57036
low-level counting facility for ^{14}C dating 87−14743
low-pressure wire chamber coupled to BaF_2 scintillator, recent developments 85−4200
low-temperature proportional counters, recent developments 87−41855
LU-2 GeV linear electron accelerator, computerised detection system using multiwire proportional chambers 88−36365
macromolecular crystallography, area detector diffractometer 86−60674
magnetic monopoles, scintillator-proportional counter search 85−31743
magnetic spectrometer based on multiwire proportionalchambers 86−50447
Mark III vertex chamber design and prototype test results 88−68288
MARK III vertex chamber using dimethyl ether 88−29847
MARK J time expansion chamber, operating experience 88−29843
MASPIK magnetic spectrometer, proportional chambers system design 88−61154
MD-1 detector, proportional chambers with delay line readout 87−21406
mesh chambers for positron emission tomography 86−50500
MICHIE cylindrical drift chamber, readout system 85−59180
micro vertex detector for experiment UA1 at the CERNSp$\bar{p}$S collider 86−50312
microchannel plate for low-energy positive ion detection 86−32156
microdosimetric counters in radiation protection, conf., Homburg/Saar, Germany (May 1984) 85−22053
microdosimetric dose equiv. meters, design optimisation 85−26819
microdosimetric proportional counters exposed to neutrons, numerical estimates of response functions 85−26818
microdosimetric radiation protection instruments, intercomparison, n and γ detection 87−42034
microprocessor controlled high density multiwire proportional chambers, 2D angular correlation of positron annihilation 87−21458
microstrip vertex detector for E687 expt. at Tevatron 87−21421
microvertex detector for UA1 expt., design and operation 87−21425
milk samples, ^{90}Sr-^{90}Y, ^{89}Sr activity meas. by proportional counter *(Spanish)* 88−42411
mini drift chamber, characteristics 87−77555
miniature drift chamber, construction and behaviour 87−21410
mixed field dose equivalent measuring instruments 85−26813
mixed field dosimetry device for average quality factor and dose equivalent meas. 85−26810
modular multidrift vertex detector 87−21422
modular multidrift vertex detector, track resolution 86−50314
monopole flux limits from the Soudan I expt. 85−31744
MSA/MWPC detector, digital beta autoradiography system 86−18320
multichannel drift chambers, data register and processor 86−25134
multichannel drift chambers, test system for electronic instrumentation checking 86−5804
multielement proportional chamber, for ^{136}Xe $\beta\beta$ decay 87−29540
multielement proportional chamber for double β-decay expts. 87−14739
multielement proportional chamber for double beta-decay expt. 87−14733
multilayered foils as entrance windows and spectral filters for image convertors in ultrasoft X-ray region 88−23017
multiparameter focal plane detector for QMG/2 mag. spectrometer 85−37904
multipin gas-discharge detector with ball-tipped anodes 88−29830
multiple neutron event detector 87−14741
multisectional wire chamber for pulsed X-ray and VUV studies 87−21435

proportional counters continued
multistep avalanche chamber coupled to solid photocathode, single photoelectrons imaging 85−15186
multistep avalanche detector system for digital autoradiography 88−29835
multistep chamber for digital radiochromatography imaging 85−59187
multistep proportional chamber using TMAE for Cherenkov ring imaging 85−9067
multistep proportional counter, performance, X-ray astronomy appl. 87−63676
multitracer digital β− autoradiography with MWPCs 85−43206
multitube drift chamber, small angle elastic scattering detector for SSC 88−10278
multitube drift chamber for LHC or SSC 87−63653
multitube proportional chambers for EM shower localisation 85−15187
multiwire chamber applications to EM radiation detection in nucl. medicine 88−61289
multiwire chamber system for neutron spectra meas. 85−26703
multiwire chambers, cathode charge distrib. meas. and theory 85−20817
multiwire chambers, cathode charge distribs., approx. and empirical formulae 85−20818
multiwire chambers, UV photon detection and Cherenkov ring imaging 86−65361
multiwire chambers filament tension meas., using automated electronic tensometer 87−21291
multiwire drift chamber, electric field calcs. *(Chinese)* 87−14747
multiwire emission detector 86−5802
multiwire gas proportional counter for soft X-ray position detection 87−57040
multiwire imaging proportional counter for 0.1 to 10 keV X-ray telescope 86−50368
multiwire linear X-ray detector and dataacquisition system for the Daresbury SRS 86−60563
multiwire position sensitive chambers for compound anal. in thin layer chromatography 87−14745
multiwire position sensitive proportional chamber *(Rumanian)* 87−8860
multiwire proportional chamber, high density, investigation for neutral particle detection appls. *(Chinese)* 88−42418
multiwire proportional chamber for inclined trajectories 86−70325
multiwire proportional chamber for the curved crystal spectrometer *(Chinese)* 85−43157
multiwire proportional chamber for X-ray detectors, with 4.5 m^2 area 88−68265
multiwire proportional chamber imaging device with delay line readout *(Chinese)* 86−11911
multiwire proportional chambers containing TMAE, low pressure aging effects 88−61104
multiwire proportional chambers with information pickup from cathode 86−5807
multiwire proportional counter, spectral resolving power 85−4219
multiwire proportional counter space point finding processor 87−29469
multiwire proportional counter with spherical drift chamber for protein crystallography with X-rays and gamma-rays 87−63630
multiwire proportional counters, gain dependence on count rate due to space charge 86−70329
multiwire proportional counters, planar prototype chamber 85−52961
multiwire proportional detector for Cherenkov ring imaging system, construction and operation 88−61103
multiwire secondary emission beam profile monitorwith 20 μm resolution 86−60502
multiwire sensors, H ion beams charged and neutral components meas. 88−29765
multiwire tissue equivalent proportional counter, fabrication 85−37918
multiwire tissue equivalent proportional counters, performance for neutron dosimetry 85−37919
multiwire vertical drift chamber in QMG/2 spectrometer 86−60584
multiwire X-ray detector for digital subtraction angiography, resolution, high rate behaviour and image distortions 88−61298
muon chambers of ARGUS detector, design, testing and use 87−29514
muon identification system, use of proportional counter 87−8854
MUPPATS, multiparticle 3D imaging detector system 86−44567
MWPC, cathode charge distrib., small anode-cathode separation 88−68254
MWPC, cathode charge distrib. in anode wire direction 85−37929
MWPC, centroid finding cathode readouts, capacitive charge division 88−68215
MWPC, cylindrical, self-supporting, for $\bar{p}p$ expts., constructional details 85−4229
MWPC, self-supporting and cylindrical, 2D readout 86−44560
MWPC advanced detector applications in medical imaging 88−61301
MWPC applications to time resolved X-ray studies on muscle 88−61293
MWPC clinical requirements for positron emission tomography imaging 88−61290
MWPC ΔE-E telescope for (n,Z) studies in continuous energy neutron beam 88−68246
MWPC developments at RAL for medical imaging 88−61299
MWPC filled with TMAE, UV sensitive, performance 86−44559
MWPC for high flux beam monitoring, design and performance 87−57021
MWPC for X-ray spectroscopy 88−16634
MWPC imaging, derandomising buffer and microcomputer memory 87−29463
MWPC in streamer chamber triggering system 87−29511
MWPC performance, math. modelling 85−4209
MWPC positron camera, image enhancement in PET scanning, algorithm development 88−61304
MWPC positron camera developed at Rutherford Appleton Laboratory 85−4286
MWPC positron camera evaluation for clinical PET imaging 88−61302
MWPC use in three-dimensional PET imaging, HISPET prototype tests 88−61300
MWPC with CF_4-hydrocarbon gas mixtures, high counting rate, design/operating details 85−64460
MWPC X-ray imaging detector, performance 86−5783
MWPCs, 3D algorithm for induced charge distrib. calc. 87−21414
MWPCs, automatic wire-winding machine 87−77533
nanosecond pulses delay and recording module, using high-speed memory IC 88−16659
NBS α-particle calibration services 88−68267
NBS large-area alpha-particle counting systems 88−10241
neural networks and cellular automata, appl. to high energy physics expts. 88−68281

proportional counters continued
neutrino calorimeter drift chambers, computerised signal recording apparatus 86−18249
neutron detector for reactor nucleus instrumentation *(Japanese)* 86−39413
neutron dosimetry, correction factor determ. using proton recoil proportional counters 88−68258
neutron dosimetry and microdosimetry, time-projection-chamber-based, digital approach 88−68256
neutron tests of position-sensitive detectors at ILL 85−15214
neutron time correlation counter, high performance, design, operation 86−32187
OD-2 one-coordinate X-ray detector 88−16637
OPAL central detector z-coordinate drift chamber system 88−29877
OPAL jet chamber 88−29840
OPAL jet chamber full scale prototype 87−21417
OPAL vertex detector with stereo wires, track fitting 87−77554
optical, proportional, continuously operating avalanche chamber 87−71005
parallel plate drift chamber, drift velocity meas., signal shape, cell geometry effects 86−65382
parallel processing of flash-ADC data for the Jet-Chamber of JADE 88−22999
parallel-plate avalanche chamber with a gated drift-chamber readout 88−74743
parallel-plate time projection chamber operation in amagnetic field 86−60583
partition noise theory appl. to wedge and strip position sensing element 88−29836
peak detector based on drift chambers, electronic cct. 86−60619
Penning mixtures in cylindrical proportional counter, quenching 87−63629
personal alarm neutron dosemeters 85−26807
phantom microdosimetric spectrometer, ionising radiation quality meas. 87−4047
pictorial drift chamber model *(Chinese)* 86−65388
pin detector, design, performance 85−64480
pion muon identification in the ALEPH detector using the discriminant analysis 88−22950
planar electrodeless drift chamber, detection efficiency, charge spectra *(Chinese)* 85−48180
polypropylene films, leak rates for air and isobutane 86−32162
position detection of 17-25 keV X-rays in Kr and Xe filled proportional chambers 86−50333
position sensitive counter, characteristics 87−50124
position sensitive counter, partially resistive anode wire, characteristics 87−50123
position sensitive detectors, high count rate, for synchrotron radiation expts. 87−29537
position sensitive multiwire detector, unidimensional, development and image resolution 87−41832
position sensitive neutron counting with gas filled detectors 85−15205
position sensitive proportional counter, 2-D position encoding 86−32176
position sensitive proportional counter, signal depend. on pulse height, gas gain 85−64455
position sensitive proportional counter for ^{3}H labelled gas movement meas. 85−37936
position sensitive wire chambers, resolution and rate behavior, appl. in new hadron colliders 88−10265
position-sensitive, elimination of end effect, ^{14}C activity meas. 87−77523
positron camera, HIDAC, for PET imaging, clinical applics 88−61292
positron camera, HIDAC, for PET imaging, clinical eval. 88−61303
positron camera, MWPC prototype RAL, clinical trials at Royal Marsden Hosp. 88−61291
positron camera for industrial appl. 87−29471
positron computerised tomography camera using MWPCs as detectors *(Chinese)* 88−68354
positron emission tomograph simulation, high spatial resolution, based on multiwire proportional chambers, imaging capabilities 87−77645
positron emission tomography system for small vol. imaging, SHARP prototype performance 88−61297
positron imaging, electron gamma shower for Monte Carlo calcs. 87−21461
positron-sensitive proportional chamber for time-resolved meas. using intense X-ray sources 85−37935
precision drift chamber vertex detector prototype using dimethyl ether, test results 88−68287
pressure control for $4\pi\beta$-γ coincidence counting *(Japanese)* 85−31717
pressurise vertex drift chamber for MAC detector, design, construction, prototype tests and performance 88−10244
projection chamber, high-density for DELPHI expt. 85−43250
projection chamber for Delphi detector 85−43181
projection chamber in large vol. sampling calorimeter 85−9040
proton recoil proportional counter for neutron spectrometry, effect of charged particles 85−31706
proton-recoil proportional-counter array for neutron-image construction, reactor fuel motion meas. 85−43203
radial semiconductor drift chambers, signal rise times and energy resolution 88−4800
radial semiconductor drift chambers, step noise effects on energy resolution 87−50150
radial wire drift chambers for CDF forwardtracking 86−50320
radial wire drift chambers for forward tracking 85−43237
radiation damage to drift chambers, lab. study of aging effects 87−29453
radiation dose-rate monitors, proportional counter feedback biasing method 85−48360
radioactive impurity determination in activity meas. 86−44543
recoil-proton detectors, electric field distortion corrections for neutron spectrum meas. 88−48003
rectangular drift chamber cells with 100 MHz FADC readout 88−54432
rectangular drift tube for muon identifier 87−63665
REM measuring instrument, tissue equivalent proportional counter 86−50354
resistive plastic proportional counters, cathode charge distribution 86−56039
resistive plate counters 88−22944
resistive wire proportional detectors for Q3D mag. spectrograph 87−71007
resonance tensiometer for multiwire chambers *(Spanish)* 87−50121
RICH MWPC pad readout by using custom microplex IC 88−68220
ring anticoincidence shield detector *(Chinese)* 86−56043
ring imaging Cherenkov detector for Fermilab expt. 665 88−61099
ring-imaging Cherenkov counter for large transverse momentum hadron identification 86−65355
proportional counters continued
scintillation proportional chamber, high-press. gas, detect. efficiency 87−41945
selection system for particles with lifetimes of 1-0.1 psec, in vertex detector 87−8872
self-quenching streamer discharge under extremely large amounts of quenching gas 87−14764
semiconductor drift chamber, signal pulse processing, passive filter calcs. 88−36374
semiconductor drift chambers for position and energy meas. 85−43170
semiconductor drift detectors, position and energy resolution 86−65336
shaping a stationary tubular electron beam of highperveance in a longitudinal magnetic field 86−25081
single drifting electrons in gases, longit. and transverse diffusion meas. 85−48170
single photon detectors with optically shielded wires, operation in transverse mag. fields 87−21431
single wire, cathode strips, position sensing, nonlinearity 88−36355
single-wire drift tubes, response to variations in wire diameter and gas filling 87−57024
SLD central drift chamber, analysis of digitized waveforms 86−50313
SLD central drift chamber, two-cell prototype 87−21411
SLD drift chamber prototype, performance 86−50316
SLD solenoid multipurpose detector at SLAC Linear Collider 88−36383
SLD warm Fe pre-prototype calorimeter, performance 86−50322
soft X-ray detectors for Mossbauer spectroscopy *(Czech)* 88−16635
soft X-ray fluorescence ultrahigh vacuum compatible proportional counters for EXAFS in surface studies 88−23022
soft X-ray microscope detector systems for high photon rates 88−23021
soft X-ray radiometry source and detector standards 88−23019
spherical counters, microdosimetric neutron kerma factors measurements at 14-18 MeV 85−59189
spherical proportional counters for microdosimetry, anomaly in performance 86−70439
spherical tissue equivalent proportional counter, n-γ dose separation *(Czech)* 86−32154
spherical tissue-equivalent proportional counter withcoaxial electric field 87−3948
SQS adjustable field drift chamber, counting rate plateaus, resolution, efficiency *(Chinese)* 85−31713
SSC calorimeter options 88−68289
SSC central drift chamber, variation on straw chamber theme 88−10273
SSC central drift tracker, wire stability studies 88−10272
Stanford Linear Collider Detector, central drift chamber, front end electronics 88−61177
straw tubes central tracking detector for SSC 88−10271
tapered cell drift chamber, high field operation and varying gas pressure 86−50397
tapered cell drift chamber, operation in high mag. fields and different gas pressures 86−32192
tapered cell drift chamber development 85−26698
TASSO vertex detector, small pressurised drift chamber design and performance 85−31693
Techniques and Concepts of High-Energy Physics IV, conf., St. Croix, Virgin Islands (June 1986) 88−37848
thermal-neutron registration channel 87−29515
thermally stimulated exoelectron emission dosemeters, fast automatic readout 86−65117
thin-gap gas chambers for hadronic calorimetry 88−29863
three-dimensional He-recoil MWPC for fast polarizedneutrons 87−3894
three-dimensional resolution determ. of drift chambers, in π-e and K-e expts. 85−26707
Time expansion chamber as a vertex detector 88−22984
time expansion chamber as vertex detector for MARK J at DESY 87−21420
time projection chamber, avalanche broadening due to wire E×B effect 87−21429
time projection chamber, coordinate meas. and space resolution 88−36380
time projection chamber, $e^{+}e^{-}$ physics appls., conf., Sant Feliu de Guixols, Spain (March 1986) 88−31297
time projection chamber, electronics, CAMAC interface, design 88−23002
time projection chamber, magnetic and electric field inhomogeneities meas. 85−43239
time projection chamber, Monte Carlo simulation of positron spectrum of muon decay data 88−61165
time projection chamber, principle, structure and performance *(Chinese)* 86−70334
time projection chamber, pulse shape digitizer 86−65343
time projection chamber, real time data acquisition system 88−16627
time projection chamber, synchronously gated, ion trapping props. 86−5779
time projection chamber, wire gain improvement near frame 85−59177
time projection chamber for ^{136}Xe double beta decay expt., design 88−36381
time projection chamber for heavy-ion collisions, trends and perspectives 88−61169
time-projection chambers 85−4223
time-resolved muscle expts., data acquisition system 85−43351
time-to-amplitude convertor for electroluminescent drift chamber 87−71035
tissue-equivalent proportional counter based dose equiv. meter, problems in use 85−26823
tissue-equivalent proportional counters, dose equiv. response to low energy neutrons 85−26820
tissue-equivalent proportional counters used as radiation protection dosemeters, calibration 85−26825
toluene impurity detection in proportional counter gas by resonant 2-photon ionisation spectroscopy 87−29450
TOPAZ time projection chamber, design, construction and calibration 87−21432
TOPAZ time projection chamber, FASTBUS digitizer system 87−35366
TOPAZ time projection chamber, performance of field-shaping strips 86−50319
TOPAZ time projection chamber performance 88−68216
TOPAZ TPC-trigger, design, performance 88−68217
total dose meter, pocketsize 85−59190
TPC, field inhomogeneities calibration with laser rays 85−43179
TPC, gated grid system for drift field distortion suppression 85−37900
TPC, space resolution 87−14758
TPC, zig-zag shaped pads for cathode readout 85−43188
TPC as wide angle vertex detector in Omega spectrometer 85−43176
TPC at TRIUMF to study rare decay 85−9054

proportional counters continued
TPC central detector of DELPHI expt. in LEP 85−9057
TPC for ALEPH expt. in LEP 85−9056
TPC gating, mag. field effects 85−37901
TPC vertex chamber, readout and trigger electronics 88−61191
track finding with the Mark II/SLC drift chamber 87−29465
transition radiation detector for electron identification in a high energy experiment 87−29473
transition radiation detectors for electron identification up to 100 GeV 87−29444
tube arrays for photon shower location 85−26699
tubes design with 30 mm diameter 87−50165
two-arm spectrometer using multiwire proportional chambers and plastic scintillators 88−48039
two-dimensional angular correlation of positron annihilation apparatus 87−29530
two-dimensional automated X-ray detector for diffraction experiments 87−63670
two-dimensional beam image monitor 88−54086
UA1 central detector at present and future luminosity (ACOL) 87−63652
UA2 upgrade cylindrical transition radiation detector 88−22949
UA2 vertex detector, FASTBUS based 100 MHz FADC system for drift chambers 87−29460
ultra-soft X-rays from storage rings, absolute intensities meas. 85−31691
underground searches for anomalous penetrating particles, GUT monopoles, quarks, heavy charged particles 85−15242
UV photon detection using multistep proportional chamber 85−43243
vector drift chambers, track finding and fitting 85−48186
vector multicell drift chambers 88−29841
VENUS central drift chamber, charged particles, pattern recognition algorithm 87−3906
VENUS detector, Pb scintillator luminosity monitor, performance at $\sqrt{s}$=50, 52 GeV 88−68236
VENUS drift chamber, global pattern recognition method 87−29543
vertex detectors, intermediate boson decay products 88−42441
wavelength dependence of laser induced ionisation inproportional counters 86−25123
Wellblech chamber, multi-cellular vertex drift device for high energy colliders 88−4852
Wide Band Spectrometer for the solar flare satellite Solar-A 88−29935
wide-gap electrodeless drift chamber, characts. and use at HYPERON spectrometer 87−8837
wire chamber advances for Mossbauer spectroscopy expts. 87−21404
wire chamber ageing characts. with tetrafluoromethane/isobutane and Ar/ethane mixtures 88−61101
wire chambers, aging problems, models and design parameters, review 87−29455
wire chambers, charge and current on all electrodes, fast and accurate 3D calc. 85−43205
wire chambers, effects of end plates on resolution 87−63632
wire chambers, extended parametrization of gas amplification 87−77558
wire chambers, use in structural biology 87−29442
wire chambers as transition radiation detector for cosmic ray muons 87−41858
wire chambers in medical imaging, conf., Corsendonk, Belgium (June 87) 88−55780
wire gaseous coordinate detectors and their applications in biomedical research 87−50127
wireless time projection chamber, prototype testing 87−41834
X-ray absolute intensity meas. by proportional counter *(Chinese)* 86−11835
X-ray astronomy, appl. of position sensitive multiwire proportional counters 88−61161
X-ray detection, using gas electroluminescent proportional detector with photocathode in working chamber 88−16648
X-ray fluorescence proportional counter for SEXAFSstudies of low-Z adsorbates 86−60567
X-ray imaging spectrophotometer, gas scintillation proportional counter-based, astrophysical appls. 88−61207
X-ray position detection, 6 μm position resolution, use of wire proportional chambers 87−29541
X-ray position detection with a gas proportional chamber 85−43226
X-ray position sensitive proportional counter (PSPC)of the Rosat telescope 86−32168
X-ray telescope, ROSAT, focal plane instrumentation 88−23023
X-ray transition radiation detector using proportional chamber 88−48044
zero degree facility for (n,px) meas., design, preliminary results 86−70353
ZEUS Central Tracking Detector, cell design and electrostatic optimisation 88−54433
ZEUS detector at HERA, charged particle tracking 88−48008
β-γ 4π coincidence method for parent-daughter decay in non-equilibrium 85−52974
ep experiments at HERA, struct. fns., machine and detector status 88−68293
$\bar{p}p$—ξ (2220)—$\phi\phi$(KK), possible LEAR expt., detector system characts. 85−20833
Al drift-tube counters in VENUS, Monte Carlo simulations of delta ray effects 87−77539
Ar gas, Fano factor meas. by proportional scintillation method 85−18001
Ar liquid detector, electron extraction and multiplication in gaseous phase 88−10247
Ar, liquid ionisation drift chamber, coordinate resolution 87−29495
Ar, liquid time projection chamber, large scale purification system 87−71004
Ar-CH_4 flow-type proportional counter, ^{3}H surface contamination meas. 88−16643
Ar-CO_2 gas mixtures, drift and diffusion of electrons 85−37902
Ar-N_2 gas scintillation drift chamber, spatial and energy resolution 85−4220
Ar-TEA gas mixtures, emission spectra in proportional counter 87−35352
Ar-methane mixture, low temp. operation of proportional counter 86−70327
Ar-methane proportional chamber gases and gaseous additives ionisation by UV lasers 85−31701
^{10}B-lined proportional counters for FBR applications 85−48174
BF_3 detector with polyethylene moderator, response function determ. by time-of-flight method 85−43165
BF_3 long life counter development for nuclear reactors 85−4226
BF_3 long-life counters, development, use of activated charcoal layer 85−48173
BaF_2 calorimeter tower with wire chamber readout, test results 85−26696
BaF_2, calorimetry with photosensitive wire chamber readout 88−29870
proportional counters continued
BaF_2-TMAE detector, photoelectron yield, wavelength depend. 88−4798
BaF_2-TMAE multiwire proportional chamber detector props. 86−50309
C filaments as anode in MWPC, charge division, coordinates for single electrons 86−50334
^{14}C gas-proportional-counting method, appl. of pulse-shape discrimination 87−77826
H filled, neutron spectra meas., proton recoil distrib. 85−37941
H filled neutron spectrometry system 85−37940
H, high press. TPC performance 85−9055
^{3}H, activity meas. in proportional counter 87−14744
^{3}H labeled gas movement meas. using multielement position sensitive proportional counter 88−54393
^{3}H surface contamination monitor with windowless air proportional counter as β detector 85−53105
He filled counter at low temp., operation 88−22931
He proportional tubes, mag. monopole search 87−50159
He/CH_4 flow proportional counter, energy resolution in X-e$^-$ coincidence Mossbauer scattering experiment 85−64474
He-filled proportional counter for low temps. and appl. to cryogenic resonance-electron Mossbauer spectroscopy 87−35360
He-methane mixture, low temp. operation of proportional counter 86−70327
^{3}He multiwire area detector for the small-angle neutron scatteringfacility at Riso 86−5813
^{3}He neutron detectors for well-logging environments 88−61622
^{3}He proportional counter for neutrons, benchmark test by HP85 computer *(French)* 85−15198
Kr-TEA gas mixtures, emission spectra in proportional counter 87−35352
NaI π^0 and η^0 detector, energy resolutions by Monte Carlo simulations 87−29506
Ne-Ar proportional counter, low temp. operation 88−16626
PG-glass drift calorimeter, performance 86−50326
Pb glass tubing matrices in MWPCs and TPC for medical and high energy physics 85−59205
Pu monitoring in lung, low background proportional counter development 85−48228
Si drift chamber for two-dimensional particle detection 87−14750
Si drift chambers, electron dynamics 87−29548
Si drift chambers, performance and characteristics 85−9072
Si drift detector, prototype, fabrication and testing 88−4801
Si radial drift chambers for low noise radiation detection 87−29470
T, low-level detection, proportional counter-based on-line meas. system *(Japanese)* 88−68228
U calorimeter with proportional chamber readout, Monte Carlo simulation study 87−41865
U calorimeters, proportional counter readout 88−47991
Xe MWPC Pu lung monitor, background reduction by pulse shape discrimination 88−54422
Xe TPC for double beta decay expts., background rejection efficiency calc. 88−54397

magnetic levitation TRANSRAPID 06 vehicle, power supply and propulsion system 87−5067
marine reactors, status and problems *(Japanese)* 88−24229
missile with throttleable ducted rocket propulsion, speed control 88−54834
nuclear-powered ships, safety standards 86−7222
railguns, power sources 88−34266
ship propulsion, Stirling power for waste heat recovery [shippropulsion] from diesel engine exhausts 86−33804
ship propulsion using gas turbines, advanced technology evaluation 85−53899
ships, IEEE recommended practices for electrical installations and automatic control systems 85−49171
ships, Royal Princess cruise liner, propulsion, power generation and power supplies 85−16298
Siemens, four-circuit DC motor for submarine propulsion 85−60489
Stirling engine, large coal-fired, technology and competitors 86−51445
Sulzer A20 diesel engine heavy-fuel operation capabilities for marine propulsion 85−53580
three shaft marine gas turbine, mathematical model and dynamic analysis *(Chinese)* 86−19556
two-stroke uniflow marine propulsion diesel engines modernisation concept 85−39257
prospecting (geophysical) *see geophysical prospecting*

prosthetic power supplies
batteries for artificial hearts 87−42016
biomedical battery operated equipment, split power rails, design alternatives 86−50460
cochlear prosthesis, transcutaneous signal and power transmission for implants via coupled coils *(German)* 86−50632
cylindrical linear pulse motor for artificial heart actuator 87−42023
DC-DC converter, miniature, for energy producing implantable devices 88−54639
electrohydraulic ventricular assist device 86−32379
electronic power and control of artificial limbs, electronic power and control 86−56186
heart, elec. artificial, testing and characterising a portable power source 87−50419
implantable devices for electrical stimulation of tissue 86−38816
implantable Stirling engine for artificial heart powering 86−32376
inductive transdermal power and data link with coupling insensitive gain, wide-band and efficient method 87−50408
left ventricular assist system based on electrohydraulic energy convertor 86−32377
left ventricular assist system implanted control and power electronics 86−32378
miniature Stirling engine, thermal energy storage powered, for powering implantable ventricular assist devices 85−59353
myoelectric control systems, improved battery saving device 86−38813
myoelectric signal multi-microprocessor control system 86−5997
neural prosthetic implants, mm- and sub-mm-sized, RF powering 88−54625
neurological prosthesis power supply: inductive RF link with improved performance 87−63841
pacemaker power sources, review 85−4360
PVDF film, implantable physiological power supply appl. 85−15350
RF coils in implantable devices: misalignment anal. and design procedure 87−50409
self-energising active plantar-flexion above-knee prosthesis: concept andpreliminary design 86−32368
solid state batteries, pacemakers for cardiac implantation *(Spanish)* 85−64636
transcutaneous AC transmission to implanted blood pump 86−32375
transcutaneous energy transmission system, series-tuned, for implanted mech. circulatory assist device, modification 87−4041
transcutaneous energy transmission system for high-power prosthetics, implantable blood pump appl. 86−56198
transdermal links with coupling-insensitive gain for powering implanted devices 88−42576
tubular self-synchronous motor for artificial heartpump drive 86−44703

EMG training device with automatic data storage for amputees *(German)* 88−61445
engineering aspects 86−38817
engineering in medicine and biology, conf., Niagara Falls, NY, USA (Sept. 1987) 88−18336
epimysial electrodes, monopolar and bipolar, recruitment props. 86−60815
epoxy moulding system for the encapsulation ofmicroelectronic devices suitable for implantation 86−38814
ethical concerns in clinical trials of medical devices and implants 88−68444
ethical issues in the clinical trials of medical devices and implants 88−42477
five-link finger hand model, touch control mechanism 85−53095
foot pressure sensor for use in lower extremityneuroprosthetic development 86−25188
functional neuromuscular stimulation hands, clinical efficacy assessment 87−21679
functional neuromuscular stimulation system, implantable and externally powered, development and eval. 88−48237
hand, functional neuromuscular stimulation system, control using man/machine interface 88−61466
hand function control, neuroprosthesis implementation, example of effective teamwork 87−42022
hearing aid, cochlear prosthesis implant, electrical model, analogue simulation *(German)* 85−38236
heart replacement systems, math. and mech. circulatory simulators 85−31881
heart valve, sounds time-domain modelling 86−29941
heart valve test apparatus, microcomputer-based data acquisition system 87−21664
heart valves, relative performance, power meas. 85−38221
heart valves, vel. and turbulent shear stress near, laser Doppler anemometer for meas. 86−32260
hip joint endoprosthesis, 150 MHz telemetry appl. *(German)* 85−64635
hip prostheses design and manufacture using generalized cylinders method and CT images *(French)* 88−23122
hip replacement surgery using robots 88−74874
holographic testing appl. in medical device industry 87−21666
image processing ties to CAD/CAM produces customized prostheses 86−16514
implantable devices for electrical stimulation of tissue 86−38816
implantable devices for the treatment of cardiac arrhythmias 87−21665
implantable gait simulation using microprocessor-controlled trigger switches 87−21680
implantable goniometer, design and implementation, neural prostheses control appl. 86−44629
implantable hermetic packages, low-technology sealing method 88−23118
implantable integrated sensors for physiological research and prostheses, packaging considerations 86−44630
implantable medical hybrids, design guidelines and fabrication techniques 85−38224
implantable middle ear hearing aid, obs. on cats and humans 88−68484
implantable multielectrode array with on-chip signal processing, neural prostheses/biopotential recording appls. 87−21561
implantable neuromuscular stimulator, 4-channel, for functional elec. stimulation 88−48236
implantable prosthetics, reliability characterisations 85−31880
implantable stimulation system for gait appls. in stroke and spinal cord injured patients 88−48235
implantable stimulator, multichannel, for versatile control of paralysed muscle 87−71169
implantable telemetry system, use of numerical model 87−8550
implanted cardiostimulators, polymeric insulation degradation *(Czech)* 87−14933
implanted electrical stimulators, use for treating scoliosis in children 85−38232
implanted electronic systems, use of analog signal processing circuitry 87−6918
implanted electronic systems, use of multipurpose microcoded controllers 87−5848
implanted stimulators: logarithmic coding, range finding and handshaking 86−38835
implants for nerve stimulation in paraplegic patients, gate array appls. 87−21663
inductively coupled oscillating circuits for medical appls. 87−52427
integrated and intelligent sensor systems, impact on medical equipment and methods 86−25179
intracochlear electrodes, Pt, chronically stimulated, SEM obs. 86−12024
ISFET modelling using SPICE, for biosensor studies *(Italian)* 88−1618
knee replacement, load transfer evaluation, test methodology 87−77691
labial-doubles-recognition method for substitution hearing aid 87−47577

prosthetics continued
laryngectomees, speech prosthesis system using mouth-opening detector and electro-palatograph *(Japanese)* 87−29816
LSI CMOS custom chip for cochlear implant 85−26790
medical electronics developments, review *(Italian)* 87−8951
microelectrode arrays for chronic implant neural prosthesis 88−48242
microelectronic axon processor Si chip neuroprosthesis, development 88−54656
microelectronic implants, technological developments *(Dutch)* 86−60818
micropower pulse-position modulator, implanted myoelectric control system appl. 87−4037
microprocessor based trainer for both single-site and two-site myoelectric prostheses 88−61452
mitral valve, remote-controlled, development and use 87−8949
multichannel auditory prostheses, comparisons of processing strategies 88−68488
multichannel recording array, neural activity probe 85−59352
multielectrode neurological prostheses for restoration of motor function, develops. 87−50415
muscle stimulator, totally implantable, with automatic daily cycling 86−18376
myoelectric control of prosthetic devices, skin-electrode interface model 86−12032
myoelectric signal amplifier design 86−60820
neural prostheses, current density profiles of surface mounted and recessed electrodes 88−16785
neural prostheses, sensors 85−38237
neural prosthesis microelectrode arrays, 2D, design 88−54631
neural stimulator, externally programmable microcontroller based 85−43441
neurological prosthesis, life of Pt and Pt-Ir stimulating electrodes 85−26796
neurological prosthesis construction at MRC 88−54624
neurological prosthesis-making, review 88−5012
neurological prosthetics, rel. to actively balanced biphasic stimulating pulses, historical background etc. 86−25306
neurological prosthetics, rel. to actively biphasic stimulating pulses, pH changes etc. 86−25307
optical noncontact 3D body measurement for prosthetics fitting 87−21531
orthopaedic implants, multichannel strain gauge telemetry system 88−30048
pacemaker design and artificial intelligence techniques 86−18379
PAM-FM multichannel implantable patient-monitor telemetry system 88−61342
Parylene-C coated microelectrodes as long-term implants, monkey obs., neuroprostheses appl. 88−23117
physiological sensors for chronic implantation 87−14937
piezoelectric neural prosthesis to enhance nerve regeneration 88−54632
Polychrest: a development system forradio-frequency-coupled implants 86−38812
polyelectrode stimulation with an implantable device, nerve elec. field anal. 86−32382
precision engineering for medical electronics, design considerations *(Japanese)* 87−35442
pressure sensor for chronic in-vivo use, fabrication technology 85−53100
programmable signal processing/stimulation system for multi-electrode cochlear implant 88−73159
real-time digital speech processing system for an auditory prosthesis 88−72858
recessed electrode, meas. and models of pot. fields above, neural prostheses appl. 88−68489
rehabilitation engineering, development 85−43440
rehabilitation of handicapped, technology, conf., Minneapolis, MN, USA (June 1986) 87−16294

electrical installation engineering, conf., London, UK (June 1988) 88−55830
electrical installation explosion protection, European standards review *(French)* 88−24507
electrical installations, earth/neutral systems, protection of personnel *(French)* 85−9540
electrical installations in agriculture, fire causes and protection *(Slovak)* 85−10417
electrical installations protected against explosive gas atmospheres, European standards 88−6200
electrical installations safety in buildings, National Electrical Code aspects 87−36429
electrical maintenance personnel, protection against shocks, causes and measures *(Italian)* 85−33097
electrical shocks, protection in LV installations *(Spanish)* 87−5190
electrical/electronic components protective plastic materials, technological advances 85−17002
Electricity distribution, conf., Brighton, England (May, 1985) 85−60581
electrometer amplifiers using Topgate JFET technique, low loss designs with protection features *(German)* 88−25007
electron-beam rectifiers for power supplies, protection against breakdown 88−55437
electronic and computer equipment, seismic support on raised floors 87−162
electronic assemblies, sheet resistance measurement of buried shielding layers 87−44000
electronic circuits and equipment, protection from interference *(French)* 85−36036
electronic components forced air cooling, use of box-type frames *(Czech)* 85−39560
electronic device installation, earthing considerations, EMC and protection aspects *(German)* 85−36040
electronic devices protection against electrostatic discharges, cellular packaging surface resistivity determ. 87−51865
electronic equipment, EMP effects and control 86−22717
electronic equipment, faulty operation due to electrostatic discharges, protection standards *(German)* 85−24707
electronic equipment, protection against electric shock, classification develop. 86−57167
electronic equipment, worldwide review of power disturbances 88−49040
electronic equipment power supplies, configs., protection and interf. suppression aspects *(German)* 86−713
electronic equipment protection, fuse technology *(French)* 87−66652
electronic equipment protection by varistors, transient suppression *(French)* 87−24488
electronic packaging to protect sensitive components 87−72821
electronic safety circuits *(Italian)* 86−61902
electronic systems, EM induction screening and protection techniques *(Italian)* 85−46580
electronics equipment protection against EMP, hardening study and validation *(French)* 87−7550
electronics manufacture, static control protection 85−33146
electrostatic discharge awareness and control programme for electronics production 86−149
electrostatic discharge control program for manufacturing environment 87−47092
electrostatic discharge protection cct. using inversely operated transistor 85−5768
electrostatic discharge protection evaluation 87−23274

protection continued
electrostatic discharge protective workstations procurement, acceptance test requirements 88−68699
electrostatic discharge test equipment for electronic equipment damage prevention 88−15948
electrostatic discharges, electrical models, protective circuits and future perspectives *(Norwegian)* 86−3425
electrostatic discharges and their influence on electronic instruments *(Czech)* 85−23858
electrostatic discharges as cause of system failures, simulation study and protection 87−54476
electrostatic effects and protection techniques for electronic systems 87−46249
electrostatic storage deflection sparks, protection measures 85−5733
electrostatics, production facilities protection 85−22214
EM protection and shielding effectiveness meas. 88−72582
EMC design, equipment manufacture and component selection 87−26880
EMI, protection and screening techniques *(German)* 88−72571
EMI protected plug connectors with integrated low-pass filters *(German)* 88−57044
EMI sources, equipment protection *(French)* 87−54612
EMI/EMC, protection circuits and diodes for interference suppression *(Spanish)* 88−8496
EMI/RFI protection of electronic equipment housings, design and construction aspects of seals *(French)* 87−43994
EMP, general guidance 86−59096
EMP, military radios protection 88−52245
EMP, nuclear, radio equipment protection 85−62794
EMP protection 87−54590
EMP protection devices, low pass passive filters appl. 85−36061
EMP protection for antennas 85−19229
EMP protection of mobile radio equipment 85−36056
EMP protection unit for communication lines 85−36060
EMP suppression, transient protected connectors 88−14423
EMP/EMI connector with filtering and protection features, design to military specifications 87−17469
encapsulation to protect computer in arctic conditions, data gathering and transmission system *(Finnish)* 87−34132
enclosures to protect electronic equipment against RFI, EMP, and seismic shock 85−185
endoscopic equipment, elec. safety problems and protective measures 88−68501
energy management at Gdansk sea port, elec. current shock protection *(Polish)* 88−69053
entry control system for Technical Area 55 85−131
equipotential connections for protection against elec. shocks *(Spanish)* 87−71749
equivalent circuit for single-phase contact between human and three-phase network 86−40875
escalating arcing ground fault phenomenon, effect of preventative solns. on equipment specifications 87−30252
ESD, efficient protection against electrostatic loads and elec. overstresses *(Italian)* 88−20841
ESD, static discharge guard device 87−26612
ESD buffer network for IC protection, voltage divider config. 87−6875
ESD damage to electronic components, protection aspects *(Spanish)* 88−52060
ESD equipment protection with emissions controls 86−29295
ESD protection materials test procedures 86−46060
ESD-related hot spots, thermal anal., IC input protection device appl. 88−71814
exploration protected electrostatic paint spray guns, testing *(German)* 86−61910
explosibility test chamber for dusts and gases 85−37533
explosion protected installations in meas. and regulation technology *(German)* 87−43904
eye, opt. characts. of closed goggles 88−68502
fast algorithms for time-varying symmetrical components *(German)* 87−78183
fault current protections schemes to standard DIN VDE 0664, earth leakage cct. breaker exam. *(German)* 88−55061
fault protection in high power pulse modulators 87−37081
fences construction, protection and maintenance *(Czech)* 87−51680
fibre optic communication-sensing system using single optical fibre 88−39940
fire, intelligent systems, introduction 85−10413
fire protection for cables and conductors in pipes *(German)* 87−78132
fish farm, pH control system *(Russian)* 85−26500
flexible interconnection conduit system for protection, reliability, versatility etc. 88−10888
floor finishes evaluation, w.r.t. static limiting performance 87−47096
flyback convertor SMPS, 10 W, control and protection using TDA 4814 IC 88−75730
frost damage prevention, electric heating applications and costs *(German)* 87−22896
fuse technology, principles, operating characts. and standards, review *(German)* 87−24540
fuses, modern compact, advantages over circuit breakers, operating ranges 88−11315
fuses, quick-break, for three-phase bridge circuit rectifier protection *(Hungarian)* 87−15929
fuses, technology, operation and characts *(Italian)* 87−52961
gas monitoring systems using semiconductor sensors, appl. in gas-air mixture explosion protection *(German)* 88−124
gate array, technology, layout, and electrostatic protection system *(Italian)* 85−706
gate turn-off thyristors, protection cct. *(German)* 85−49722
glass plant primary power distribution switchyard, reliability and protection 88−31246
Grand Coulee hydroelectric facility, fibre optic communication system, appl., testing 88−48806
ground faults, branch circuit protective device failure analysis 87−4444
GTO PWM inverter for AC motor drives, control method and protection system 86−39962
GTO PWM power convertors, resonant snubber cct. study 88−69543
GTO thyristor, dynamic props., control methods and protection *(German)* 87−11759
GTO thyristor, high-speed snubberless operation using gate drive technique 87−38239
GTO thyristor protection, snubber cct. charactn. 88−64543
protection continued
GTO thyristor protection cct., appl. of Siemens damping and gate capacitors *(German)* 86−1392
GTO thyristors, characts., data sheet specifications and short-cct. protection *(German)* 88−33190
GTO thyristors in self-commutated convertors, status identification for gate driving/protection 87−37002
GTO-based chopper circuits, thyristor protection methods 88−69533
GTT-80/KTT-80 radio relay system, protection switching equipment development 85−47425
hazardous area intrinsic safety using shunt-diode Zener barriers and isolating interfaces 88−6203
HCMOS logic IC protection in automotive environment 86−57003
HERA, quench protection system 88−54284
HERA proton ring, supercond. protection switch 88−68104
HF equipment protection from EMP effects *(German)* 86−119
high and medium voltage power stations, man and equipment protection *(Croatian)* 85−64946
high rupturing capacity fuse for converter simulation, math. model 88−69576
high tech insurance protection evaluation 86−26545
high-frequency driver, protection 85−26100
high-speed photography appl. to explosive rock breaking research 88−22503
high-tension voltage invertors protection using fuses 87−9658
hospital instrumentation, electrical shock protection, standards and problems *(Italian)* 85−20878
housing systems, protective functions *(German)* 87−65206
human body electric impedance meas. for shock protection *(French, English)* 86−38748
HV and VHV distribution systems, use of digital protective devices and optoelectronics *(Czech)* 88−61887
HV ASIC for half-bridge based power transistor 88−70540
HV device, back-up protection against body currents *(German)* 87−31256
HV distrib. substation, microprocessor control of meas. and protection systems 87−78724
HV overhead power lines, failure due to pollution obs. *(Czech)* 87−71707
HV solid-state power supply with current stabilisation, CO_2 CW lasers appl. 87−75185
HV transmission network current invertor protection, fault current meas. *(German)* 88−42826
hydroelectric power plants, reliability improvement, protection equipment and water head control devices *(Rumanian)* 87−57942
hydroelectric power stations, protection against large waves and optimal operation *(Croatian)* 85−9772
IC, electr. overstress protection 87−53719
IC deterioration due to ESD, failure mechanisms and protection techniques *(French)* 87−46096
IC device reliability and protection techniques for electrostatic discharge effects 85−1664
IC gate dielectric breakdown avoidance utilizing Zenerbreakdown of heavily-doped junctions 86−41949
IC manufacture, static control in industrial environment 86−46059
IC mask works, international protection measures 87−23253
IC power input protection cct. 85−44882
IC self-testing and error-correcting systems *(German)* 87−36459
ice-crust melting equipment, breakdown protection of semiconductor switches in rectifiers *(Russian)* 86−61588
ICs, universal chip bank/carrier device with ESD protection 86−41865
in-circuit testing, components damage avoidance 85−61552
in-circuit testing of logic ICs on cct. boards using backdriving technique, protection aspects 88−38428
induced voltage in turbogenerator shafts, effects on ground-fault protection of excitation circuits *(Polish)* 86−19218
induction cooking appliance, utilisation of high power transistors 86−61812
induction generator plant protection 86−70904
inductively loaded circuits, spark extinguishing *(German)* 88−33415
industrial environment safety measures for personnel protection *(German)* 85−39509
industrial equipment protection against nuclear EMP *(French)* 87−19215
industrial plant, single-channel protective system reliability, demand and repair rate influences 87−36551
industrial power distribution projects design, using computer *(Czech)* 88−23448
insect resistant telecommunication cable for Australian environment, development 86−17171
instrumentation amplifier, monolithic, FET input device, INA 110, characts. and protection features *(German)* 86−67044
intelligent power switches, struct., characts. and appl. *(Italian)* 88−56438
interconnection protection between photovoltaic generators and utility distribution lines 87−9442
interference suppression for damage prevention of semiconductor devices using isolation transformers *(German)* 88−8491
intrinsic safety, use of Zener diodes and isolating barrier interfaces 86−61901
intrinsically safe apparatus for potentially explosive atmospheres designed to DIN EN 50020 88−6201
invertor bridge circuits, snubber and transient limiting protection 88−69544
ion source protection in the OGRA-4 plant, against internal breakdown 85−15123
IR radiometers, mounting, protection and interfacing 88−4439
isolation techniques for protection of personnel and equipment from interf./faults *(French)* 87−43924
Italian electrical safety statistics, standards and protection developments *(Italian)* 86−52205
JET neutral injectors, power supply and protection system 87−72290
Ka-band high-power receiver, passive protection for high reliability 88−25428
keying multiple devices in future aircraft 88−3888
LANs, power problems and protection devices 88−59626
LCT coils, hot-spot meas., dump time depend., and coil protection appls. 88−65100
LED-based ccts. *(German)* 87−24374
lighting equipment selection for use in hazardous areas 85−39313
line commutated converters, commutation configuration for protection 88−75746
linear IC, performance characts. and appls. *(Italian)* 85−6994
live conductor contact accidents and protection *(Spanish)* 86−57164
LM12 150 W operational amplifier in TO-3 encapsulation, integral DSOA protective circuits *(Swedish)* 87−10691

protection continued

UV curable coating advantages and limitations 88−18768
UV curable coatings for optical fibres, stabilisation 87−7165
UV curable resin coated fibre with low-temp. and lateral props. 87−7166
UV curable resins for cabling optical fibres 87−8330
UV cure conformal coatings key to processing ease 88−50509
UV radiation paint curing process, for improved energy efficiency 85−49230
UV solder masks as insulators for PCBs 85−61574
varnish, motor coating appls., specification and use 88−33434
Vitreous coverings for the protection of surfaces inthe electronic sector *(Italian)* 85−60775
Ag, directional electrostatic energy analyser, charge accumulation suppression 88−10199
Ag plating on IC leadframes, bondability study 86−14766
Ag/SnO_2 substitution for Ag/CdO in LV switching equipment *(Hungarian)* 87−59949
Al coated optical fibres, mech. and optical props. 87−38813
Al protective coating for Si oxidation by microwave excited O_2 plasma 86−58403
AlN on $Fe_{80}B_{20}$-$Co_{80}B_{20}$ amorphous ultrafine particle film perp. mag. recording media 88−51209
Al_2O_3, ion beam sputtered protective coating for Kapton solar array blanket 87−4943
Au-Sn coating, effect on low cycle fatigue behaviour of Cu alloy wires 87−10523
BN dielectric coating for W/Re thermocouples 85−8818
C diamond-like films for metallic thin-film recording media 88−57943
C, diamondlike thin films, charactn., mag. thin film overcoat applications, review 88−20245
a-C:H, plasma deposited, optical props., IR component protective and antirefl. coating appl. 85−7200
a-C:H protective coatings for a-Si:H photoreceptors 87−54166
C:H,F, amorphous coatings prep. by RF plasma deposition from fluorinated benzenes 85−39785
CaO-ZrO_2 capped GaAs, pulsed laser annealing 85−12217
Cr electroplated coatings, physical, chem and mech. props. *(Russian)* 88−12109
Cu thick film systems, moisture protective coatings 85−28851
Cu/Ni coating for EMI shield, qualification using resistance-testing method 86−26938
GaAs, dielectric protective coatings during heat treatment 87−17864
GaAs power MOSFET surface degradation 86−15177
GaAs-GaAlAs HBTs, dielec. film charact. 88−19939
H_2 generation from optical fibre coatings UV curable acrylated resins 87−8332
Hf for electromigration lifetime enhancement in multi-levelmetallization 86−35614
I film giving temporary protection of Si surface 85−6793
InAs epitaxial layer, protection of interrupted MBE grown surface 85−40620
$In_{0.53}Ga_{0.47}As$/InP p-i-n planar diodes, vacuum-evaporated protective glass coating 87−33054
$KTiO_3$ whisker filled nylon 12 as optical fibre secondary jacketing material *(Japanese)* 87−60937
Nb-oxide-Nb Josephson junctions, sputter fabricated, incorporating post-oxidation noble metal layers 85−56187
NiCrSiB alloy, laser cladding *(Chinese)* 88−65919
P plasma deposited coating, passivation of InP 87−1423
Si films, diffusion mask and encapsulant for InP and GaAs 86−15044
Si photovoltaic modules, electrophysical charact., sealants effect 86−51901
Si wafer spacer sidewall process, photoresist deposition for substrate protection during ion etching 85−34851
a-Si:H films, protective coatings for high power CO_2 laser mirrors *(French)* 88−51875
a-Si:H thin films, photoconductive charact. and stabilisation with Si_3N_4 coating 88−13999
SiC layer for field grading on stator coil ends, local heating suppression using divided pots. 85−5051
SiC semiconductor coating for bushing corona suppression 86−70708
SiO_2 CVD dielectric cap for incoherent lamp annealing of InP, parametric study 85−12218
SiO_2 and SiO_2-polytetrafluoroethylene mixture, ion beam sputtered protective coating for Kapton solar array blanket 87−4943
SiO_2 fibres, step index, polyimide coated, ionizing radiation effects 88−72050
SiO_2:P sputter deposited dielectric cap for incoherent lamp annealing of InP 85−12218
SiO_2-Al_2O_3, codeposited covers for solar cells, plasma activated CVD appl. 88−37458
SiO_xN_y coatings to reduce H_2 ingress into fibres 86−2828
Sn alloy plated contacts for electronic connectors, design considerations and criteria 86−47137
SnO_2 anti-static film for CRT faceplate, formation process 85−31538
Tb-SiO_2 protective film for TbFeCo magneto-optical disks 87−68220
TiC preparation by low-temp. MOCVD 88−70356

protective relays *see relay protection*

CSMA/CD protocol with deterministic contention resolution, performance anal. *(Japanese)* 86−4084
CSMA/CD protocol with deterministic contention resolution, anal. 87−48256
CSMA/CD protocol with message-based priority function 88−21617
CSMA/CD protocols, bimodal collision resolution 88−35135
CSMA/CD protocols, effect of random message size on performance 86−54579
CSMA/CD ring network, integrated token passing 87−27725
CSMA/CD S-LAN performance optimisation 86−37557
CSMA/CD systems, slotted multichannel, throughput anal. 86−54608
CSMA/CD systems with prioritised-retransmission, performance comparison *(Japanese)* 88−73407
CSMA/CD type local data networks, simulation anal. *(German)* 88−59659
CSMA/CD with priority, performance anal. *(Japanese)* 85−13675
CSMA/CD with tree algorithms, performance and channel stability, bus topology LAN appl. *(Japanese)* 88−46334
CSMA/CD-based LAN, master/slave monitor meas. technique 87−69661
CSMA/CD-compatible protocols for real-time voice transmission 88−3315
CSMA/CD-token passing hybrid protocol, optical fibre LANs for mixed data traffic 88−28349
CSMA/CD-token ring local network architecture withCSMA/CD-DAMA protocol 86−54986
CSMA/CM-based protocol with dynamic segmentation 87−2665
CSMS and token LANs, data transfer engine design 85−52087
CSP as a formal description technique for OSI protocols 88−9232
CUENET LAN, enhancement for internetworking 88−15166
cunning power of cheating verifiers. Some observations about zero knowledge proofs 88−14600
customer equipment, network interface design 85−47063
cycle time properties of the FDDI token ring protocol 86−64667
cyclic redundancy check generation, protocols 86−29715
cyclic service systems with limited service disciplines, inequalities 88−46338
Czechoslovak development of LAN *(Czech)* 86−23488
D51 packet switching system, software design *(Japanese)* 86−64640
D channel user signalling and link-access protocol 85−47086
D channel user signalling and switching protocol 85−47087
D-channel protocol in ISDN project *(German)* 85−47226
D-channel protocols in ISDN and their meaning for communications *(German)* 87−48420
D-channels, statistical multiplexing 88−45832
DAMA communication systems, bursty traffic conditions, queuing performance 87−33845
DAMA protocol issues 86−30403
DAMA satellite system for rural communications 88−60111
DARPA experimental multimedia mail system, text, image and voice communication 86−16826
DARPA Internet protocol 86−17029
DARPA internet protocol suite 85−42256
DARPA net protocol, architecture 85−57597
DARPA packet radio network protocols 87−33832
DARPA protocol suite, Internetwork appls. 86−17030
DASS and DPNSS, implementation experience 88−67127
DASS ISDN protocol, introduction of abort function 86−49052
data acquisition system from sensor units *(Spanish)* 87−3517
data block length optimisation *(Slovak)* 87−28134

protocols continued
data bus, high speed fibre optic 86−11135
data bus system, dual channel, high speed multiplex, for aircraft 86−11140
data collection systems via meteor burst 85−36547
data comm protocol ICs 86−47645
data communication, computer, terminal and modem networking principles 86−59619
data communication, multiple-access schemes, performance 87−2666
data communication equipment testing 88−14963
data communication implementation strategy for telecommunications management network 88−52742
data communication networks, testing 85−25383
data communication protocol analysers and monitors 87−8059
data communication protocols, performance evaluation 86−37201
data communication software components *(Italian)* 85−30724
data communication standards, OSI lower layers anal. 86−59621
data communication via telephone network *(German)* 87−76190
data communications, 7-layer protocol standards *(German)* 86−69208
data communications, anal. 85−42276
data communications, basics 85−42278
data communications, conf., Whistler Mountain, BC, Canada (Sept. 1985) 86−19732
data communications, principles and definitions *(German, French)* 86−37196
data communications controller IC, SCN68562 85−25492
data communications product directory 86−30360
data communications protocols and protocols testing 85−42277
data compression, two-way generalisation of Shannon's problem 85−36298
data encryption protocols for electronic mail 85−47145
data error correction 88−15082
data exchange using the transport protocol 86−10756
data file transfer via satellite and terrestrial links, sensitivity anal. of optimal message sizes *(Japanese)* 88−14869
data link layer development and struct., decision tree for protocols, report 88−73628
data link protocol, performance meas. 87−28167
data network performance prediction by distributed discrete-event simulation 86−43372
data network protocol analyzers *(German)* 88−53574
data network security units 86−43186
data network signalling, components *(German)* 87−40358
data network standards for power plant distributed digital control 88−69083
data security and communications 87−69040
data security standards, state of the art 86−10627
data transmission, finite-state machine and abstract-program proofs 85−36478
data transmission, protocols *(German)* 87−55369
data transmission circuit diagnosis *(French)* 87−13527
data transmission errors, detection and correction 88−14577
data transmission protocols *(French)* 85−30500
data transmission protocols for satellite communication *(German)* 87−55370
data transmission via satellites 85−47479
database access techniques in networks *(German)* 87−62645
Datagram networks, packet impatience 86−17012
datagram transport protocol on LAN, reliable delivery 87−20213
Datex, Nordic X.21 circuit-switched service, implementations and benefits 85−25481
Datex P for data packet switching *(German)* 88−73578
DCNA file transfer method for data terminals *(Japanese)* 85−36732
deadlock and its minimisation 85−63144
deadlock detection in communicating finite state machines, report 85−13928
DEC and networking standards 88−9245
DEC networks, inter manufacturer protocols 88−15080
decentralised control for slotted and reservation ALOHA, and LANs 88−59361
decentralised random access channel, timeout distribution for reduced contention 88−8886
decentralized consensus protocols 86−54585
decentralized random access systems, timeout distributions 86−54577
DECnet, industry-standard networking protocol 88−15085
DECnet applications and protocol performance, case study 88−59671
DECNET internet protocols efficiency 88−52959
DECNET Network, 3270 remote access to IBM systems from VAX nodes using DECNET/IBM gateway 88−3508
DECnet networks, Phase V, management 88−52880
Defence Data Network connections 87−69638
Defense Data Network, overview 87−40440
Defense Data Network, X.25 standard, host interface considerations 85−30735
Defense Data Network access, internet gateway design 87−40442
Defense Data Network connection, DCA's network access component appl. 87−40443
delay behavior of reserved priority channels operatingon a CSMA/CD protocol 86−16616
delay characteristics for ARQ protocols in the case offluctuating error rates 86−54602
delay time analysis on distributed switching networkusing staged circuit switching technique *(Korean)* 85−63136
delay-throughput comparison for coded channels in mobile fading environment 88−2933
demand assigned protocol for integrated mobile satellite services 86−54617
demand assignment protocols with arbitrary workloads, eval. model 87−20188
demand assignment TDMA protocol for video teleconferencing-voice data optical networks 87−40424
description and verification based on temporal logic 87−69425
description and verification of protocol by temporal logic *(Japanese)* 86−54590
description/anal., state transition model with channel expressions 88−21427
design and generation using Archetype 88−9182
design and implementation of a protocol for remote procedure call 88−67076
design automation 88−21507
design of microcomputer-controlled products *(German)* 85−3142
design specification and formal description *(Spanish)* 88−52904
Design to Product Demonstrate and MAP 86−37585
desktop computer as a network participant 85−52049

protocols continued
desktop conference system based on integrated group communication architecture 88−59856
determined CSMA technique for broadcast channels 85−19892
Deutches Forschungsnetz (DFN): strategic issues for the development and the operation of an OSI-network 87−48641
Deutsche Bundespost ISDN pilot project *(German)* 88−46670

DGCNET LAN data-link layer design and implementation *(Chinese)* 86−64658
DGCNET LAN file transfer system *(Chinese)* 86−64661
DGCNET LAN network-layer software design and implementation *(Chinese)* 86−64659
DGCNET LAN system management functions *(Chinese)* 86−64660
dial-up communication systems using multi-carrier modulation technology 87−62758
dial-up modem transmission protocols 85−57848
dial-up modems microcom networking protocol 88−46777
Diamond Net integrated multimedia information system 87−48369
Digilog protocol analysers for data transmission network operation anal. and design *(Italian)* 88−4286
digital avionics using DATAC bus 87−50511
digital communication systems, tamed FM demodulator, error generation model 88−52326
digital communications, conf., Zurich, Switzerland (March 1988) 88−55828
digital image interface standard, ACR/NEMA illustrated protocol overview 86−32402
Digital Network Architecture and Open SystemsInterconnection 86−37561
digital PABX role in generalised network environment 86−43680
digital packet network performance test tools 87−48665
digital PBX, voice/data integration 85−42398
digital signatures exchange protocol 87−54943
digital telephone network, echo-canceller protocol 85−30613
digital telephone subscriber line signalling, datalink and network protocols *(Norwegian)* 85−36486
DIPS small scale communication control processor *(Japanese)* 87−69644
directed network protocols for solving control problems in computer networks 88−73665
directory internal exchange protocol−a generalizedprotocol mechanism for communication between directorycomponents 86−54573
directory scheme for resources in computer network 88−52973
directory service in the message handlingsystem of the German Research Network 86−69448
disclosure problems, information-theoretical reductions 87−33643
discrete event models, finitely recursive processes 88−73421
discrete logarithm possession without revealing it 88−40827
discrete-event process supervisory control with partial observation 88−34847
discrete-time cyclic-service systems, waiting times 88−34852
DISOSS-PROFS link using X.25 88−41385
dispatch control systems., OSI model and communication protocols *(Croatian)* 88−23319
distributed agreement in the presence of processor andcommunication faults 86−49278
distributed algorithm, complementary validation tools experience 86−30356
distributed algorithm for reorganization and communication scheduling in mobile multi-hop radio networks 87−56018
distributed binary tree protocol with advanced reservation (DBTP/AR) for local area networks 87−40052
distributed clinical information system, use of remote procedure calls 86−55022
distributed communications in collision channels, state-space approach to modelling and analysis techniques 86−16101
distributed communications in collision channels witherrors, anal. 86−59195
distributed communications in collision channels witherrors 86−64620
distributed computation termination detection model and complexity 87−75993
distributed computer system communication facility, broadcast protocols 87−2930
distributed computing and communications, book 87−16265
distributed computing systems, conf., San Francisco, CA, USA (May 1984) 85−22078
distributed conferencing systems: a practical, easily implemented architecture 88−46745
distributed consensus protocols, stopping times 87−55375
distributed control protocol network via satellite, performance eval. *(Japanese)* 87−40397
distributed databases, evaluation of reliability mechanisms 88−34871
distributed dynamic routing algorithms implementation, subtle design issues 87−48570
distributed election algorithms in unidirectional and complete networks 86−43373
distributed energy control centre data links, CCITT protocol description for communication system 88−10788
distributed FCFS access protocol in a CSMA/CD network for synchronous voice traffic 88−9181
distributed hybrid binary tree protocol with advanced reservation (DHBTP/AR) for integrated local area networks 87−69432
distributed industrial control, high performance communication system using exception transmission 85−3211
distributed interconnect scheme for high-throughput packet switch applications 85−13933
distributed interoffice mail system 86−16910
distributed interoffice mail system based on integrateddocument interchange protocols 85−63260
distributed microcontroller protocol proposal 86−30359
distributed mutual exclusion algorithm 86−54858
distributed network protocol with limited span 85−8217
distributed network protocols, perspective, building blocks use 87−40431
distributed networks and data communications 88−31353
distributed packet switched type LANs with wide area communication capability 86−30395
distributed packet voice communications protocol, initial design 87−55429
distributed protocol for maintaining central network control 85−19574
distributed protocol network using domestic communication satellites, expt. study *(Japanese)* 87−28485
distributed protocols for mobile radio networks 85−63149

protocols continued
distributed reservation protocol for integratedline-and packet-switched networks 86−49063
distributed scan channel multiple access model 86−54637
distributed spread spectrum packet radio networks, acknowledgements effect 87−34366
distributed spread-spectrum packet radio networks, spreading code protocols 88−41131
distributed switching interactive CATV network, fast switching protocol 86−60050
distributed switching interactive CATV network protocol 87−41225
distributed synchronization of multiple servers 86−17032
distributed system management, theory and implementation 86−55008
distributed systems, effects of message loss on protocol termination 88−46554
distributed systems, performance analysis of polling mechanisms with receiver blocking 87−48298
distributed systems, protocol for reliable process migration 87−62413
distributed systems modelling with abstract machines 85−19863
distributed testing, semi-automatic tools 87−34218
distributed transition systems, algebraic method for modeling communication 88−34870
distribution lists, use in MHS 88−59528
distribution system microprocessor-based telecontrol system protocol *(Chinese)* 87−9155
diversity receivers, random access protocols, performance eval. 87−62826
DLC/SDLC protocol implementation, VLSI module *(German)* 86−4272
DMS SuperNode, technology overview 88−67187
document interchange, generalised protocol boundary 87−8038
document interchange protocol for telematic services, CCITT Draft Recommendation S.a 85−8162
document interchange protocol for telematicservices *(Japanese)* 86−54827
document transfer protocols, re-editable 85−13812
document-oriented teleconferencing, multipoint communication control 88−59857
DoD protocol conformance test laboratory 88−52955
DOS 3.1 and NETBIOS, LAN application software interfaces 86−54961
double PLAYTHROUGH circuit switched rings, performance model 87−55801
DPBX-LAN internetworking 88−67033
DPN SNA Multihost, IBM SNA and X.25 networks marriage 88−67027
DPS1500 Packet Switching System, netgram protocol for intra-network communication 85−19860
DS-CDMA asynchronous system for VSAT satellite networks 88−53238
DS-CDMA spread spectrum, performance analysis 87−56103
DTX telematic access to corporate information systems 87−34108
dual channel-based LAN architecture, design and performance evaluation 87−27727
dual-channel LAN, performance analysis 88−3592
dual-channel LAN for integrated voice and data transmission 87−55773
DuCSI serial protocol for distributed microcontrollers 88−3600
DURESS project: extending databases into an open systems architecture 88−73640
dynamic address assignment in broadcast networks 86−30084
dynamic address assignment protocol implementation in a LAN 86−37560
dynamic address assignment protocols 85−8216
dynamic channel allocation for high capacity mobile radio 88−73414
dynamic control structures for cooperating 87−2682
dynamic deadlock resolution protocols 87−33852
dynamic flow control in a computer communication network 87−33858
dynamic flow control protocols for packet-switchingmultiplexers serving real-time multipacket messages 86−49049
dynamic networks, static protocols use 88−15157
dynamic protocol definitions 86−49312
dynamic window congestion control in heterogeneous environments 87−33859
EAN: an X.400 message system 86−69545
ECCS specifications of OSI protocols, automated verification tool 88−73422
ECMA distributed interactive processing standardisation 86−64774
ECMA model architectures, private-public network interworking 88−14959
Ed-Net−a multi-protocol educational local area network 88−9125
education in business economics, information networks *(German)* 88−3493
EENET, broadband LAN 85−19793
efficient distributed transaction commit protocols, presumed abort and presumed commit 85−47228
EGJUDGE: an expert system tool for protocol conformance testing 88−28438
EIA consumer electronic bus architecture 87−34203
election of leader in a ring, protocols 87−69725
election protocol for channel allocation 86−30073
election protocols for choosing by processors of a processor to perform control tasks 86−4320
electrical interfaces replacement 87−76308
electronic data interchange, overview 87−76404
electronic design interchange format 87−5607
electronic document transfer by digital Olympus satellite link 88−28807
electronic exchange of trading data, practical standards 87−40258
electronic mail, CCITT X.400 standard *(German)* 86−30290
electronic mail, distributed system for PC-based LAN 87−13308
electronic mail, internetworking between X400 and telex/teletex/fax 85−57724
electronic mail, Message Handling System/X.400 protocol compatibility link-up 87−2819
electronic mail, specification and implementation 87−48313
electronic mail, system structure, and mail service protocols *(Chinese)* 85−13805
electronic mail, X.400 protocols, recommendations 87−76246
electronic mail for LANs and integrated networks 85−13816
electronic mail gateway between MHS (X.400) and SMTP 88−46644
electronic message processing: aspects of filing and retrieving messages 88−59534
electronic messaging standards 87−20126
electronic metering devices, communications protocol for reading and programming 87−50900
electronic-mail protocol for users of open systems 85−25339
embedded systems, specification and design method using protocol synthesis 87−55625
emulation service protocols for a multimedia testbed emulation 88−3630
ENAPS programming language and graphics communication system for MAP 88−21367

protocols continued
encryption key management and ANSI X9.17 protocol 86−49252
encryption protocols analysis, use of machine-aided formal verification techniques 87−61601
encryption services implementation in OSI upper layers 88−67054
encryption-based secure communication protocols 86−16123
end-user networks, communications standards 88−21714
engineering, state of art 87−20185
enhanced message handling system for in-house use 86−54823
entity structure based design methodology: a LAN protocol example 88−41314
erasure, capture, and random power level selection in multiple-access systems 88−41130
error checking communications 87−55678
error control in high speed computer networks, performance comparison of end-to-end and link-by-link schemes 88−52937
error detection with multiple observers 86−69247
error recoverable protocols, two-party, synthesis 87−20205
error recovery protocol for satellite data link 86−69197
error recovery protocols for high-speech packet switched networks, eval. 88−46355
ESbus protocol for remote control of broadcast equipment 88−59644
ESER LAN gateway protocol *(German)* 88−59674
ESPRIT status reports of ongoing project, conf., Brussels, Belgium, (Sept. 1984) 86−7395

FDDI, fibre distributed data interface, ANSI standard for 100 MB/s token ring 86−59647
FDDI, fibre distributed data interface, optical data link 86−59900
FDDI ANSI standard high bandwidth token ring protocol 86−37558
FDDI protocol 88−41294
FDDI standard for fibre-based networks 88−3578
FDDI token ring, packetized voice investig. 88−60201
FDDI token ring protocol, cycle time properties 87−40016
FDDI token ring protocol, timing requirements 87−62638
FDDI-II hybrid operation for high speed fibre optic data networks 88−67432
FDDI-II standard for integrated services high-speed LANs 88−3379
FDIC administration and support software system 85−36665
FDIC-101 communication processing software system 85−36664
Ferry testing approaches 88−59617
FH-NET LAN for heterogeneous microcomputers *(Chinese)* 88−59589
fiber optic broadband networks for the Manufacturing Automation Protocol 88−73631
fiber optic CDMA network for real-time communication 88−53311
fiber optic industrial LAN 88−35548
fiber optic tactical voice/data network based on FDDI 88−52915
fibre distributed data interface (FDDI) media access control protocol, anal. and tuning 88−73918
fibre distributed data interface media-access control protocol 88−3642
fibre distributed data interface standard 88−46539
fibre distributed data interface standard, high performance LAN 86−64652
fibre optic bus network for voice and data transmission in ships 88−41673
fibre optic data bus for avionics *(Spanish)* 87−77760
fibre optic LAN for avionics appl., 100 Mbps 86−11138
fibre optic LAN gateways implementation 88−35156
fibre optic local area network for industrial measurement application 88−47176
fibre optic networks, random access strategies 88−73919
fibre optics data/voice/video LAN 86−55016
fibre-optic data network topologies and protocols 88−4014
fibre-optic LANs for process control *(Russian)* 85−47229
fibre-optic networks, random access strategies 87−56195
fibre-optic ring LAN based on HDLC procedure for token passing data link *(Japanese)* 88−35129
FICS facsimile data conversion and interface control equipment, enhanced, review 86−59554
FICS-2, facsimile communication protocol between computers and FDIC 85−36666
FiCS-2 facsimile data conversion and interface control software system (FDIC-101) 85−36663
field bus, alternative for time critical networks 88−73644
field bus systems, serial time-multiplexed, objectives and appls. *(German)* 88−21594
fieldbus, uniform communication-interfaces and protocols for digital field devices, industrial appl. *(German)* 87−13442
Fieldbus services under MAP 88−46642
FIFO and LIFO regimes evaluation, X148 and X149 simulation programs *(Czech)* 87−55709
file server for AppleTalk Personal Network 87−34100
file transfer, HyperProtocol for high-speed modems 88−41332
file transfer in LAN, performance study, connection oriented protocols 86−4342
file transfer protocol, formal specification 86−54983
file transfer protocol, implementation 86−30344
file transfer protocol error protection, configurations 86−43360
file transfer protocol using an asynchronous line and its implementation under the UNIX control 85−19882
File Transfer Protocol vs. File Transfer, Access and Management 87−40475
filtering of network addresses in real time by sequential decoding 88−21622
finite buffer token networks, queueing analysis 88−59373
finite state, modelling and analysis using SXL executable specification language 87−48312
finite state automata appl. for protocol's proof 87−69620

protocols continued
finite state machine specifications, distributed 85−30531
finite state machines and shared variables for modelling 87−34152
finite-user infinite-buffer slotted Aloha system, stability anal. of interacting queues 88−46371
finitely recursive process models for discrete event systems 88−66787
First/Last Access Protocol 86−54604
five-chip token-passing set operates LANs at 100 Mbits/s on optical fibers 88−9533
fixed TDMA with finite buffer capacity, blocking and delay 85−8215
flexible gateway interconnecting high speed LAN and public service 88−9202
flexible local area network gateway to public data networks 85−3191
flexible manufacturing system, control and data communication 87−20272
flexible networks of tightly and loosely coupled processors 87−40456
flow control in integrated voice and data local areanetworks 86−69440
flow control in local-area networks of interconnected token rings, book contrib. 87−20254
flow control protocol, GO-BACK-N, Markovian model 86−10606
FMS communications strategies, MAP implementation *(Japanese)* 87−69729
FOCON, fibre optical communication network for military environments 87−49128
FODA-TDMA demand assignment protocol 85−63628
formal description and testing *(Japanese)* 85−63343
formal description languages, survey 87−28023
formal description oriented performance evaluation of protocols 88−8903
formal description technique *(Japanese)* 87−62646
formal description techniques, evaluating 86−69246
formal description techniques evaluation applied to development 85−25564
formal description techniques for development 88−3321
formal description techniques proposed for international standardisation of OSI 86−43581
formal protocol conversion method 87−20187
formal protocol specification, overview 85−42258
formal protocol specifications translation to VLSI designs 88−20084
formal specification, informal overview 88−28414
formal specification and anal. of DMI, X.25 based protocol 88−59708
formal specification based conformance testing 87−20206
formal specification of ISO virtual terminal in Estelle 88−59706
formal specifications of communication protocols, hybrid model *(Chinese)* 88−66946
formal techniques for specification, verification and construction 86−16602
formalisms for specification of computer communication protocols, review 88−9223
formalization, analysis, and implementation of protocols 87−69618
FORMAP, formal protocol engineering 88−28447
Format and Protocol Language (FAPL) 88−41292
framed ALOHA protocols performance, capture effect, exact anal. 88−46342
Framed ALOHA scheme with capture effect, performance eval. and optimisation *(Japanese)* 88−34863
framed movable boundary protocol for integrated voice/data in LAN 87−20196
frequency-hop transmission for satellite packet switching and terrestrial packet radio networks 87−13182
frequency-hopped spread-spectrum packet radio networks, random access protocol, throughput anal. 88−21935
FTAM protocols in Unix environment, implementation 88−67048
FTAM vs. FTP protocol, meeting DOD's requirements 87−40448
functional characteristics of ISDN terminals 88−59803
fundamentals of data communications 87−8023
future factory, computer communication standards 85−57796
GAck Ethernet, local computer networking scheme with global acknowledgement mechanism *(Japanese)* 88−59688
GATENET: a voice/data internet transport system 86−54982
gateway between a broad site local wideband communication system and a wideband public service 88−35145
gateway between COM and X.400 88−59522
Gateway Congestion Control Policy Software for internetworking 86−43590
gateway dynamic congestion table algorithm forcomputer internetworks 86−17033
gateway routing protocol for enhanced internet survivability 88−3591
gateway system for NEC MS series 88−21484
gateway testing, report 85−36766
gateway-architectures between local area networks and wide area networks in project DFN 85−3192
gateway-to-gateway protocol issues in a tactical environment 87−76363
gatewaying between X.400 & other message protocols 87−20137
gateways: market trends and design considerations 86−54951
gateways, design and implementation for network interconnection *(Chinese)* 88−59587
gateways, interfaces from SNA to X.25 87−76327
gateways provide multiple protocol conversion for network links 85−36714
gateways to the ISDN 88−59811
GEC National One mobile radio network, signalling protocols 88−28734
GENEPX400−a test system for X.400 based message handling systems 88−21849
General Motors' MAP 86−10741
General Motors Manufacturing Automation Protocol 85−47202
General Motors MAP using IEEE 802.4 token bus, performance bound 88−35097
General Motors MAP using VLSI carrier band node 88−35095
generalised occam protocol 87−2680
generalized protocol boundary syntax for end user and application interfaces 87−8037
generation using AI, for open systems 88−21417
generic integrated maintenance interface for network elements 88−52858
generic protocol handler using C++ 87−34179
GEnet carrier band LAN interface for stored program control systems *(German)* 88−9121
geometrical analysis of stability for adaptive strategy of decentralized random multiple access 88−52631
German Research Network (DFN) for graphic communication, protocols and standards 86−16739
GIFT, high energy physics project for file transfer 87−13432
GILT, open interconnection of local message systems in Europe 86−37541
give-up-based protocol for token passing 87−39999
GKS metafiles transfer, presentation layer codings 85−3143
global authentication services in large scale distributed systems 86−55026
protocols continued
global networks, interfacing of LANs 85−36713
GM MAP *(German)* 86−16941
GM MAP developments *(Japanese)* 87−2884
GMs manufacturing automation protocol 85−42310
go-back-N ARQ with limited receiving buffer, performance analysis 88−45826
GOSIP, UK Government OSI Profile 88−73611
GPIB devices support using local network, for electronic components testing 86−11444
GPIB extension, work of Bus Protocols task force 88 −67046
GRANDiose network application manager 86−23335
graph theoretical validation method for channel boundedness of communication protocols *(Japanese)* 88−41143
graphical communication protocol formats 86−59648
group communication and related aspects in office automation 88−59530
group communication in message systems: the AMIGO project 87−48498
group testing protocol for random access communication 87−75980
group testing protocol with capture for random access communication 88−8908
H-network, CSMA/CD with adaptive and nonadaptive backoff protocols, throughput and packet delay anal. 88−15087
Hamming distance communication complexity of its evaluation 87−19989
handoff control process for microcellular systems 88−73823
handshake protocols 88−15139
handshakes in communication services and protocols, formal models and specification 86−69228
HDLC, error performance eval. method for digital data transmission *(Japanese)* 87−55390
HDLC, invalid loops in communication protocol 87−27721
HDLC, specification and validation using composite state diagram and logical expressions 88−52604
HDLC protocol, specification and validation method *(Japanese)* 87−7891
HDLC REJ protocol on satellite channel, transmission efficiency *(Japanese)* 87−28484
HDLC-ABM,2 protocol, performance anal. of given dependent-error channel *(Polish)* 88−15108
HDLC-ABM,2 protocol performance evaluation *(Polish)* 88−28159
HDLC-ABM protocol, traffic calcs. for error-dependent channel 87−48294
HDLC-level bit oriented protocol, software processing *(German)* 87−28095
HDTV, MUSE system concept and protocol 88−22291
helical window token ring LAN, access rule 88−41379
HERMES inter-railway data communication system, architecture and protocol aspects *(German)* 85−42084
heterogeneous database systems, integrated utilisation through data network 88−59725
heterogeneous LANs, interconnection of 85−19890
heterogeneous local network, token passing ADMA system 87−34180
Hewlett-Packard 4971S LAN protocol analyser 86−70066
Hewlett-Packard family of protocol analysers *(German)* 85−20457
Hewlett-Packard protocol analysers *(Italian)* 87−41433
Hewlett-Packard protocol analyzers, HP4953A, HP4955A, HP4951A *(Dutch)* 85−8165
HF channel, RTCE-assisted ARQ transmission scheme 88−46903
HF data, top and wait scheme, evaluation 86−54615
hidden-user packet radio systems, approx. output processes 86−69211
Hierarchical multi-network interconnection using public data networks 87−55787
hierarchical multilevel flow control of communications 88−46626
hierarchical ring networks, performance anal. 88−14873
hierarchical routing with bounded routing error 87−33864
high capacity asynchronous random access usingtime-of-arrival based collision resolution 86−54623
high level, for LANs, logical design 85−25549
high level protocol LAN system design *(Japanese)* 86−43565
high performance variable-length message interface 85−61557
high speed communication using frequency-time controlled networks 87−20202
high speed computer communications via satellite, developments 86−59871
high speed packet switching protocol 88−46359
high speed token ring network 88−73653
high throughput LAN-controller for high bit rate systems 88−73663
high-layer protocols use 88−35051
high-level entity management system (HEMS) 88−52881
high-level protocols for packet radio 86−69570
high-performance fault-tolerant local area network 85−19891
high-speed data modem with protocol convertor, LAN gateway, PMD9600 *(Japanese)* 85−25615
high-speed LAN protocol software, allocation 88−9221
high-speed slotted ring, improved traffic scheduling 87−62622
high-speed token-passing data bus; SAE AE-9B draft standard 87−50512
higher transmission protocols: data structures of the protocol units *(German)* 87−40393
highly available communication 87−34166
HighQ protocol, use of AI techniques for message transmission 88−9192
home bus communications, protocol and physical media criteria 87−34204
Home Bus System and expt. model, new revised proposal *(Japanese)* 87−2733
home bus system design for single house 88−21633
home bus system interface LSI and standard protocol 86−69409
hop-by-hop flow control on unreliable connections 88−8911
horizontal and vertical integration in office communication systems *(German)* 88−3553
host identification in reliable distributed kernels 88−66973
host-to-front-end protocol for interfacing to a LAN 87−48575
hostile environment reliable protocol 86−49164
HP4952A protocol analyser for monitoring and performance eval. of X.25 and SNA data networks *(Italian)* 88−60541
HP4953A protocol analyzer for EDP centers and fieldservice 85−64065
HP 4951A, low-cost, portable field service protocol analyzer 85−64067
HP 4953A, serial data acquisition and simulation for a high-speedprotocol analyzer 85−63975
HP 4953A protocol analyser for monitoring and simulating serial data 85−64066
HP 4953A protocol analysers, operation *(Italian)* 86−18006
HSLAN media access protocols, performance comparison 88−21730
HSLAN slotted ring protocol, performance modelling 88−59374
HSLANs slotted ring protocols, analytical models 88−21733
HUBNET high-performance LAN, reliability and protocol 86−43575
Hungarian OSI terminology *(Hungarian)* 88−28377

interlibrary loan (ILL) automation, microcomputer-based, electronic mail for ILL and ILL communications standardisation 88−59586
interlibrary loan protocol 88−59585
interlibrary loan protocols: an introduction and review of problem areas 88−52887
international business satellite communications network using demand assignment control, design aspects *(Japanese)* 87−28473
international internetwork protocol standard 85−25478
international MAP/TOP activities 87−40466
international standard transport protocol simulation 86−54941
international standards development relating to industrial automation 86−61891
internet Locus: extending transparency to an internet environment 87−20230
internet network meas. device management 88−52883
Internet protocol implementation experiences in PC-NFS 88−66952
internet protocols for star-connected optical backbone network 87−69433
internetworking, traffic control method using flow control by latency 86−64511
internetworking architectures 87−34191
internetworking standards need 88−28404
internodal protocol for packet switched datanetworks 86−23508
interoffice mail system, distributed, based on integrated document interchange protocols 85−36647
interoperable information systems, conf., Tokyo, Japan (Feb. 1987) 87−43796
interprocess communication (IPC) in UNIX using restricted Transmission Control Protocol/Internet Protocol (TCP/IP) 85−19864
Intersystem access control protocol description 86−30108
interworking between X.25, X.21, and ISDN devices 87−48443
interworking over heterogeneous networks 87−40470
interworking using the CCITT network service 86−37308
ion implanters, SEMI Semiconductor Equipment Communication Standard 85−34777
IP Locus and protocols for a transparent, internet, distributed operating system 88−52970
IP protocol, fragmentation disadvantages 88−59351
IRANET high-speed network software for RT-11 and VMS systems 88−35118
IRMA via X.25 on SNA host *(German)* 88−46565
IRVING: interfacing dissimilar systems at the local level 85−36744
ISDN, access protocols eval. 87−40071
ISDN, advantages and limitations *(German)* 88−46663
ISDN, business application possibilities 87−27752
ISDN, complex call signalling protocol 88−3297
ISDN, cost effective components, LAP D protocol and universal digital loop transceiver 86−49418
ISDN, D-channel signalling appls. 87−55383
ISDN, enhanced and new services for next decades 87−76174
ISDN, Europe preparation 86−69285
ISDN, fast packet switching for integrated network evolution 87−76141
ISDN, multi-media applications over a wide area network 88−67136
ISDN, packet service integration, distributed switching system 88−59844
ISDN, packet services handling 87−55493
ISDN, perspectives, implementation and standardisation, conf., London, England (June 1986) 87−33
ISDN, preparations in Italy 88−46691
ISDN, protocol architecture for end-to-end packet bearer service 87−20080
ISDN, review *(German)* 88−41428
ISDN, satellite packet communication processor, design and implementation 85−8280
ISDN, service integration in communication systems *(German)* 86−23629
ISDN, signalling system no.7, subscriber sector *(German)* 88−53005
ISDN, subscriber line access implementation 85−42399
ISDN, wideband, high-speed multimedia communication 88−46597
ISDN access, CCITT recommendations 86−43397
ISDN access, transport and appl. functions allocation, technical and economic issues 87−55522
ISDN access unit, design architecture 87−27868
ISDN analyser *(Italian)* 87−69848
ISDN architecture 86−49089
ISDN basic access, interface module implementation 87−34001
ISDN broadband subscriber access, protocol and prototype 87−76142
ISDN compatibility with OSI reference model *(German)* 88−53006
ISDN customer call control, D-channel layer 3 signalling 88−59794
ISDN D channel protocol simulator 87−40598
ISDN D-channel network layer, protocol testing 88−21524
ISDN D-channel protocol, simulation and testing *(German)* 88−53004
ISDN D-channel protocol, simulation study 87−48303
ISDN D-channel protocol evaluation *(German)* 88−59764
ISDN D-channel protocol specification and simulation 87−48292
ISDN D-channel protocol standardisation, international developments *(German)* 88−59765
ISDN exchange termination, VLSI approach, LAPD support 87−28336
ISDN for the United States 88−9292
ISDN German Post Office pilot project, operational results and demands *(German)* 88−53007
ISDN in packet switched network, software protocol 86−54725
ISDN in West Germany, protocol modifications *(German)* 88−67102
ISDN interface and terminals *(German)* 88−73718
ISDN interface standards and CCITT recommendations *(German)* 88−52995
ISDN LAPD protocol with link errors and propagation delay, performance 86−16724
ISDN line card and terminal interfaces 88−3780
ISDN measurement technology requirements *(German)* 88−53003
iSDN network interworking in NTT 88−46698
ISDN network network layer protocol, suitable for VLSI implementation 88−53033
ISDN nonvoice terminals, functional aspects and introduction 87−33958
ISDN packet services, present and future trends 88−28505
ISDN packet-mode bearer services, X.31 and LAPD 87−2761
ISDN planning 87−76129
ISDN preemptive access protocols 87−28171
ISDN protocol and service verification and performance testing 88−9294
ISDN protocol architecture, development 85−42072
ISDN protocols, conformance and performance testing *(Hungarian)* 87−76118
ISDN protocols and architecture models 86−23255

protocols continued
ISDN protocols and satellite communications 87−27864
ISDN services, packet switching architecture *(Hungarian)* 87−76121
ISDN signal delay calcs., queueing model 87−48302
ISDN signalling standards 86−43396
ISDN signalling system for digital users *(Hungarian)* 88−8983

microprocessor based packet-switching radio system for electric utility 88−53120
microprocessor-based LAN, ISO/OSI session layer 87−48606
microprocessor-based modular digital switch, distributed software 85−14057
microwave wireless office communications 88−46942
MIL-STD 1553 standard serial data communications protocol 86−16656
MIL-STD-1553 avionics bus, testing and simulation considerations 88−54701
MIL-STD-1553 interfaces, successful TPS strategy implementation 85−31357
MIL-STD-1777, Military standard-internet protocol 87−19998
Milner's calculus of communicating systems 88−59384
Min-MAP, RS-511 protocol *(Spanish)* 87−76304
mini-DGCNET, LAN, design and implementation *(Chinese)* 86−49286
mini-DGCNET physical layer architecture design and implementation *(Chinese)* 86−49287
minimal duplex connection capability for OSI Reference Model 85−8149
mixed mode teletex, protocol, terminal equipment and communication architecture aspects *(French)* 86−10704
mixed voice/data links, error correction protocols 87−48295
mixed-media communications architecture for enhanced interoperability 87−40445
mixed-mode teletex, presentation protocol and basic charact. *(French)* 85−47141
mobile computer communications packet radio network, protocol performance eval. 85−3155
mobile data communications, channel performance, modem and protocol considerations 86−55197
mobile multi-hop radio networks, distributed protocol for broadcasting 88−9464
mobile packet radio networks, concurrent slot assignment protocol 88−73833
mobile packet radio networks, state-of-the-art 85−42481

protocols continued
mobile radio, MPT 1327 standard signalling protocols for Band III trunked systems 86−69687
mobile radio, reservation TDMA protocol anal. 85−58023
mobile radio and wire channels, error-free high-speed data transmission protocol 88−73832
mobile radio communications, channel control and protocol *(Japanese)* 86−69647
mobile radio networks with noisy channel, link allocation protocol 86−59803
mobile radio trunking system, rapid access protocol 85−20089
mobile systems, local ALOHA radio communications with capture andpacket buffers 86−55225
mobile telephone system access channel, throughput-delay characts. and stability 85−14142
Modbus II LAN, MAP compatible interface 86−69473
Mode-S digital data link for secondary surveillance radar system, characts., capacity and protocols 87−40774
modeling and analyzing distributed algorithms andprotocols *(French)* 86−49045
modeling communication protocols using interaction graphs 87−33856
modelling, communicating finite state machines, closed cover theory 86−64396
modem cards: standards and performances *(French)* 87−20299
modem network, control message transmission method 86−37191
modem technology, importance of protocols 88−28566
modem-based communications, principles of duplex and protocols 85−25508
MODIAC LAN, communication resource management in ISO/OSI layers 87−55777
modular network control, process data communication using LANs *(German)* 88−59631
modulo masking, data embedding in pictures 88−41023
monitor system for data monitoring *(Japanese)* 88−9132
monochannel computer network with nonhomogeneous flows of short messages, multiple access control 88−8883
movable-slot TDM LANs, interconnection 87−69737
movable-slot TDM protocol, simulation studies 88−3632
moving-server random-access protocols, delay modelling, book contrib. 87−19993
MPS interface card for IBM PCs 88−3557
MSAP/CSMA-CD: A hybrid protocol for a local areanetwork 86−49315
MSAT-X mobile satellite expt., pipelining protocol for message service 86−59869
multi-access broadcast channel, access control scheme for integrated burst/stream traffic *(Japanese)* 87−40023
multi-access channel transmission control scheme, infinite source model and ternary feedback 88−8893
multi-access communication channel, packet delay under golden ratio weighted TDM policy 87−55374
multi-access LANs 86−16619
multi-access packet broadcast systems under limited buffer conditions, protocol performance study 86−59391
multi-access systems, cutoff points for roll-call protocols 85−57808
multi-access systems, group testing design and analysis 85−63147
multi-group random access system 87−55560
multi-hop radio networks, broadcasting, wave expansion approach 87−62825
multi-hop radio networks broadcast protocol 85−36927
multi-LAN Ethernet system, enhanced address resolution 88−73562
multi-layered, performance evaluation 87−48721
multi-leaving remote job entry network for computer nodes of Atmospheric Environment service 87−28150
multi-line multi-protocol serial communications, multi-microprocessor control 85−25613
multi-link packet transmission systems, allocation algorithms, performance evaluation *(Japanese)* 86−23205
multi-microcomputer multi-mainframe communications systemutilizing Ethernet and X.25 protocols 86−23522
multi-protocol dual universal serial communications controller, SCN68562, single chip MOS LSI device 88−852
multi-purpose optical fibre communication data link for distributed control systems 86−11130
multi-service network based on the Orwell protocol 87−76181
multi-service network connection control protocols 87−76021
multi-service networks 86−30162
multi-station packet-radio network, splitting-type algorithm 87−40706
multi-user data transmission, use of optical fibres and devices *(Russian)* 85−47527
multi-user portable transceiver system, fast signal quality voler 88−35403
multiaccess channel, maximisation of one-step throughput 87−75975
multiaccess protocol for multihop radio networks 86−10599
multiaccess protocols for optical fibre based LAN, priority implementation 87−20189
multibeam packet satellite networks, uplink ALOHA random-access/downlink TDMA techniques, performance study 85−13668
multibeam packet satellite systems with conflict free scheduling 87−20442
multibeam packet satellite systems with freq. reuse, optimal TDMA assignments, anal. 87−28498
multibeam satellite, combined random/reservation access for packet-switched transmission with onboard processing 85−14165
multibus radio LAN 88−21712
multibus train communication architecture using AMTRAC protocol for high speed fibre optic networks 88−73915
multicast computer communication, simulation 87−69692
multicast protocol for broadband broadcast networks 88−59348
multicast protocols for LANs 87−69711
multicast protocols for token-ring architecture 88−3647
multicast services on high-speed interconnected LANs 88−21736
multicast transport protocol design 88−67077
multicasting to multiple groups over broadcast channels 88−67052
multichain queueing network for window flow control, performance anal. 88−21410
multichannel computer network with local andglobal transceiving media 86−17035
multichannel cordless telephone systems, dynamic channel allocation schemes, traffic capacity study 85−47120
multichannel CSMA-CD protocols, acknowledgement traffic effect 86−10828
multichannel CSMA/CD, priority schemes for advanced multimedia networks 88−46350
multichannel CSMA/CD in bus-type LAN *(Japanese)* 85−13923
protocols continued
multichannel CSMA/CD method in bus-type local areanetworks 86−69421
multichannel LANs and MANs, connection-based media access 88−9119
multichannel multihop packet radio networks, architectures and performance 87−75970
multichannel multihop packet radio networks, performance 87−28380
multichannel protocols for real-time microcomputernetworks 87−2900
multidestination protocols, connection establishment procedure 87−13181
multidimensional LAN address resolution protocol, design and implementation *(Chinese)* 88−73609
multifunction communication protocols 86−37197
multihop dynamic radio network, collision free channel access algorithm 87−62850
multihop mobile packet radio network routing protocols 86−54606
multihop packet radio, transmitter-oriented code 88−21949
multihop packet radio network, 3D CSMA/BT-CD 86−10607
multihop packet radio network, use of multitone, multiaccess with collision detection 87−27724
multihop packet radio networks, channel access schemes, performance evaluation by simulation 87−28360
multihop packet radio networks, channel signalling and access protocols, performance anal. 87−34449
multihop packet radio networks, channel spatial reuse and access protocols 87−33833
multihop packet radio networks, iterative model 86−64750
multihop packet radio networks, local Markov models, CDMA appl. 87−28381
multihop packet radio networks, throughput anal. theory 85−13680
multilayered protocol, network availability 87−13389
multilevel secure LAN development for military C^3I systems 86−10819
multilink multi-protocol data link controller for experimental distrib. computer testbed 85−25553
multilink procedures,line scheduling methods, performance anal. *(Japanese)* 86−30387
multimedia communication terminal for broadband network 88−46434
multimedia message content protocols for computer mail 85−25352
multimedia packet switching network access protocol 86−16625
multimedia service control point 88−46593
multimicroprocessor system communication structure static mode characts., comparative anal. *(Bulgarian)* 88−21658
multimode controller for interfacing SM-3 and SM-4 minicomputers with CAMAC-COMPEX hardware 88−15938
multipacket Aloha, decentralized control algorithm 88−34878
multiphase communication protocols, design 85−8130
multiphase protocols, construction discipline 86−54857
multiple access algorithms via group testing for heterogeneous population of users 87−39574
multiple access broadcast communication channel, terminal-priority contentionless access (TPCA) protocol perform. anal. 85−42032
multiple access channel, hybrid access method 86−54622
multiple access channel selection protocols 86−54586
multiple access communications networks 87−62469
multiple access computer communication networks, GENESIS graphical environment for modelling and performance anal. 87−28162
multiple access network decomposition into number of interconnected subnetworks 88−35188
multiple access networks, channel capacity allocation scheduling 86−23191
multiple access networks, time constrained communication, controlling window protocols 88−28151
multiple access protocol, performance and stability of simple gated conflict resolution algorithm 87−62401

packet switched network access transport protocol entity scheduling and conditional waiting times 87−48253
packet switched networks, buffer blocking effect on operating characts. of data link 87−19978
packet switched systems, random access, with intelligent central node, performance comparison 87−48305
packet switching architecture for ISDN 88−59807
packet switching computer networks, conf., Riga, USSR (Oct. 1985) *(Russian)* 86−43378
packet switching D-channel access protocol for ISDN systems 88−28164
packet switching equipment *(Japanese)* 86−64639
packet switching network access protocols for multi-mediapacket communications 86−64657
packet switching networks, anal. of-resequencing methods *(German)* 87−69402
packet switching networks, optimal window size 86−30348
packet switching of data with the 3B 20D computer system 85−52095
packet switching program system, medium capacity *(Japanese)* 88−35284
packet switching techniques in integrated transmission networks, review *(German)* 88−9359
packet switching technology, trends *(Japanese)* 86−69413
packet switching terminal connection standards and protocol 86−49243
packet switching throughput increase method, anal. and implementation 88−28143
packet switching via satellite channels with ARQ protocol, optimal transmission study 86−30124
packet transmission over VHF radio, p-persistent CSMA protocol, simulation study 86−23182
packet voice network, re-assembly buffer requirements anal. 86−54634
packet voice on a local area network with round robin service 87−7883
packet-switched computer communication network, channel queue limit flow control method 86−30112
packet-switched networks, congestion control protocol anal. 85−19571
packet-switching concentrating networks, exact delay analysis 88−21373
packet-switching networks, automatic construction of protocols 85−46974
packet-voice performance evaluation of two multiple access protocols with the use of an 8086-based real-time simulator 85−19849
packet/circuit switch internetworking protocol 85−19785
packetised data communication system on mobile radio channels, perform. anal. 88−73412
PACMOD 2400 A, 2400 bit/s modem with inbuilt X25/X32 protocol 86−43622
PACS development, ACR-NEMA standard implementation and test facility development 88−36565
PACS development, ARC-NEMA standard simulation and design for fibre optics network image transfer 88−36567
PACS module for paediatric radiology, image communication 88−36534
PACS radiology workstation, evaluation, protocol development 88−36542
PACS system, ACR-NEMA protocol implementation on network 87−21705
Pana-Lan, 32 multipurpose optical loop network 86−54929
passive star all-optical ultra-fast networks 87−69684
passive star topology LAN, high-speed optical fibre based, protocols used 88−28380
passive-star-configured fibre optic LANs 88−47067
path-oriented routing strategy for packet switchingnetworks with end-to-end protocols 86−23518
PAXNET, public VAN in Denmark, protocols and services 87−55549
PBX, integrated office service with application processor 88−46799
PBX standards requirements 85−3269
PC based instrumentation systems 87−56511
PC based LANs, modified broadcast access method (MBRAM) priority protocol 88−67000
PC LAN generations, evolution 87−69626
PC-DOS to UNIX binary file transfer 87−48611
PC-mainframe communication protocols *(German)* 88−28390
PCM transceiver for T1 links, D3/D4 and Fe frame formatting support 88−41487
PCM transmission testing and protocol analysis *(French)* 86−50018
PDAMA satellite access protocol, performance evaluation 86−59870
PDL-system−an unified approach to thespecification, verification, and implementation ofprotocols 86−64728
PDS, protocol design system under C language 87−20266
peer to peer communications on serial data highway 85−63365
perfect zero-knowledge interactive protocol for SAT and beyond 87−33645
perfect-capture ALOHA for local radio communications 87−69924
performance, conf. Raleigh, NC, USA (May 1986) 86−61835
performance anal. using image protocols 88−21523
performance analysis of interconnected CSMA/CD networks with finite population 88−52948
performance analysis using image protocols 88−73404
performance evaluation from timed Petri net models 85−7950
performance evaluation of multiple-access networks: introduction and issue overview 87−75962
protocols continued

simulation tool, Ethernet Measurement System 87−8064
simulation tool Veda for protocol specification verification, implementing X.250 86−69459
simulator, PROPER, based on numerical Petri net 86−64647
simultaneous modular equations of low degree, soln. for cryptographic appl. 88−45917
SINEC communication system, Siemens development of Open Systems Interconnection for manufacturing environment 87−48406
single-channel communication modules, Nonwire and Wiredriver, for local area networking 87−13394
single-chip datacomm peripherals for the 68000 microprocessor 86−1168
SIPRA H1, software package for LAN data traffic recording and protocol anal . up to OSI level 4 *(German)* 88−52825
skew time slot switching and slotted-ring in a metropolitan area network 88−59703
SL-10 packet networks, integrated test centre 86−24342
SL-10 RAPID access concentrator, network integration 86−54733
sliding sub-window protocol in the systems network architecture 85−3156
sliding window protocol, verification in Xesar 88−21429
sliding-window protocol, stepwise specification by means of process algebra 88−59715
SLMD−terminal connection module for the digital switching system EWSD, ISDN access *(German)* 88−46835
slotted ALOHA for multihop packet radio networks withmultiple-directional-antenna stations 87−7878
slotted ALOHA line networks, performance anal. 88−8923
slotted ALOHA multi-access systems, thrashing cusp, catastrophe theory 86−23187
slotted ALOHA multihop packet radio networks, throughput-delay characts. 86−23190
slotted ALOHA packet radio networks, delay anal. 88−3831
slotted ALOHA performance in cellular radio environment with channel capture 88−46931
slotted ALOHA protocol, performance in a spread spectrum environment 85−8151
slotted Aloha protocol performance in Rician fading channels 88−53162
slotted ALOHA system, interacting queues, approx. model for delay anal. 87−40004
slotted ALOHA system, multiple access protocols, approx. performance evaluation 86−30117
slotted ALOHA systems, lightly loaded, optimal retry distrib. 85−63132
slotted ALOHA systems, optimal control by retransmission probability 85−52075
slotted ALOHA systems that achieve stability, control procedures 87−19980
slotted CSMA and CSMA/CD protocols, generalised performance evaluation 86−10826
slotted nonpersistent CSMD-CD systems, acknowledgment traffic anal. *(Japanese)* 86−23203
slotted persistent CSMA and CSMA/CD systems, output processes 88−28359
slotted protocols in multi-segment LAN environment, performance anal. method 86−30121
slotted ring LAN, modelling 87−48601
slotted ring protocols in high speed LANs, perform. anal. 88−73588
slotted ring with integrated services, dynamic bandwidth allocation 88−66790
slotted-ALOHA packed radio channels with shadowing, enhanced throughput 88−67251
SM 53/20 distributed multi-computer complex forpower system control *(Slovak)* 86−61058
smart sensors developments and networks 88−42086
smart switches, Inmac's SS8 and SS16 for linking computers and peripherals *(German)* 88−46780
SMART-PVS, data communication protocol testing equipment *(Japanese)* 88−67006
SMART-PVS data communication protocol test equipment *(Japanese)* 87−63235
SNA, mixed system networking 86−37570
SNA, token ring LAN connection, 86−37473
SNA and LAN gateway design 86−54949
SNA and OSI in the same hardware environment 86−59618
SNA and OSI reference model, surviving data communications architectures 88−3516
SNA and XNS networks interconnection 86−23520
SNA as the basis of a nonhierarchical network *(German)* 87−69640
SNA data, public packet networks and synchronous microcomputer communication 86−4270
SNA DEC gateway, fine tuning of 85−42299
SNA Logical Unit 6.2, implications for the future of corporate distributed processing 88−15126
SNA LU Type 6.2, IBM protocol and service for interworking dilemma 86−64773
SNA LU Type 6.2 protocol, IBM 87−13471
SNA networks, modeling considerations, capacity planning 88−59666
SNA networks, use 86−16926
SNA networks of small systems, LEN architecture 86−37571
SNA primer for DEC users 86−69398

protocols continued
SNA support on X.25 networks: architectural issues 88−46592
SNA to OSI, IBM and upper-layer gateways 87−62610
SNA-OSI gateways 85−30721
SNA/LEN, possible extension of SNA for small systems 85−52047
Sniffer, LAN protocol analyser 88−21655
socket layer protocol for LAN 86−30419
SOFTNET, high level packet communication 85−47200
software architecture for a high performance datacommunications network 86−43593
software architecture issues in implementation 86−54937
software architecture of a local area network 86−64710
software design method for protocol and communication software development 88−73564
software in computer networks, conf., London, UK (Jan. 1988) 88−24375
software protocol for handling ISDN in the packet-switched network 87−13176

time-dependent distributed systems: proving safety, livenessand real-time properties 86−43371
time-dependent protocols verification 86−49068
time-slot sequence integrity for (N×64) kb/s connection 88−52988
timed finite state graphs, reduction algorithms 88−66238
timed Petri nets, conference, Torino, Italy (July 1985) 86−7399
timed synchronous process communication protocols 87−33868
timed token scheme in manufacturing automation protocol, performance 88−46339
TMS380 token ring adapter with built-in network management 88−28429
token access controller, Western Digital WD2840 VLSI chip 85−19935
token bus broadband LAN, MAC sublayer and physical layer management 85−13757
token bus controller uses monolithic structure to chipaway MPA costs 86−23447
token bus interconnection network for tightly-coupled multiprocessor systems 87−55763
token bus LAN analytical performance model 86−37553
token bus media access control protocols, IEEE 802.4 LAN 85−63309
Token Bus performance in MAP and PROWAY 88−15144
token bus priority scheme, performance anal. 87−62681
token bus protocol, performability anal. 87−62682
token bus/MAP ULSI/UME support *(Spanish)* 87−18190
token LANs, star, bus, ring systems, operation anal. *(German)* 87−55729
token passing, give-up based protocol 87−62698
token passing, timer controlled, throughput analysis 88−52938
token passing access protocol with priority fns. for ring-shaped LANs, approx. anal. 86−43370
token passing bus LAN, performance and simulation study 87−28158
token passing bus protocols, comparison of two 87−20190
token passing in LANs 88−59578
token passing LAN (64 Mbits/sec) 88−21741
token passing LANs, bus config. and operation for distrib. control appls. *(German)* 87−55730
token passing network simulation, graphical methodology appl. 88−46551
token passing networks and starvation issues 86−23213

protocols continued
token passing optical fibre ring scheme, simulation model 88−9596
token ring adapter attaching product interface 85−52089
token ring backbone network, high speed, modelling and anal. for realistic scenario 88−59720
token ring communication system, priority preemption 85−42253
token ring fibre optic LANs, advantages 86−16900
token ring LAN, design and construction ideas 87−62613
token ring LAN, interconnected analysis of throughput and end-to-end delay 87−55818
token ring LAN, token holding time effect on performance, simulation study 87−55819
token ring LAN developed by IBM, outline *(Japanese)* 87−2908
token ring network, high level communications protocols 87−48679
token ring network with dual latency stations, perform. eval. 88−59698
token ring networks, dual latency station appls. 87−69740
token ring networks, IBM's data communications strategy 86−49304
token ring performances, graphical simulation software, GRASP 87−48678
token ring protocol, incremental verification 87−28218
token ring system with priority message classes, approximation 88−21635
token rings, simple approx. for waiting times 86−69212
token-based access method for a small local network 87−40332
token-based protocols for high-speed optical-fibernetworks 85−63655
token-bus networks, ship sets forge vital links 85−63287
token-passing bus LANs, modified architecture 85−46989
token-passing LAN protocols, ANSI FDDI and IEEE 802.5, comparison 85−52039
token-passing linear multiplex data bus, robust fibre optic active star coupler 88−67071
token-ring access LAN, simulation for performance analysis 87−48676
Token-Ring LAN, installation problems at Northwestern Bell 88−3515
token-ring LAN, techniques for overcoming jitter 87−47228
token-ring local area network management 88−15128
token-ring networks, connectivity enhancement 88−35175
token-ring systems with limited service, traffic anal. *(Japanese)* 87−55745
token-skipping channel access scheme for busnetworks 85−63297
token-skipping priority scheme for bus networks 86−4338
TOKEN/NET LAN chip set, architecture, logic CAD 86−67254
TOKENET high speed token reservation LAN, architecture 87−48654
tokenless protocols for fiber optic local area networks 86−23463
tokenless ring protocol for local area networks 86−49324
tools for research on communication network protocols and architecture 87−20044
TOP, general description *(German)* 87−76341
TOP, overview 87−55815
TOP, technical and office protocols, overview 87−62702
TOP 3.0, configurations and implementations 88−73568
TOP 3.0 protocol architecture 88−66980
topology dependent fair access to a shared resource 87−48300
Tornet LAN, bridge design 86−17039
TOSDIC AS in factory automation *(Japanese)* 87−2889
trace specification of communications protocols 86−30089
Transaction Capabilities for network services 86−54714
transaction oriented protocols for distributed applications 88−52958
transmission channel privacy amplification by public discussion 88−45818
transmission process, window mechanism with error control, analytic model 86−54996
transmission protocols, error detection and correction *(French)* 87−20236
transmission protocols for EPROM programmer based on Z8 85−28513
transmission scheduling policies and their implementation in integrated-services high-speed local area networks 88−3636
TRANSPAC, synchronous access to microcomputers *(French)* 87−13450
transparent interconnection of broadcast networks 87−20264
transport architecture, extended slotted ring architecture 86−69397
transport layer and lower, measurement of implementation over IEEE 802.3 LAN 88−67047
transport layer definition using Petri nets 85−19577
transport layer in a microcomputer network 87−69616
transport layer of OSI model, functions, standards and service 86−59623
transport layer protocol, security mechanisms 86−23435
transport layer protocol, service access procedure 88−52908
transport layer protocol modelling using first order logic 87−20194
transport level protocols, analysis and design to ISO standard 85−46980
transport protocol, NBS class 4, software development and implementation 87−28048
transport protocol for IPC 88−21704
transport protocol for LAN, design and tuning 88−59707
transport protocol mechanisms and ISO standards 85−13654
transport protocol performance prediction by simulation 87−20192
transport protocol selection, XNS/ITP or IP/TCP 85−63360
transport protocol software, Syros TP4 85−63355
transport protocols, conversion between TCP and ISO, for interoperability between data communication systems 86−49048
transport protocols, gaining efficiency by appropriate design and implementation 87−55675
transport protocols, special or general purpose end-to-end, for distributed systems 85−25548
transport protocols in local area networks *(German)* 88−21634
transport-level relays 88−9228

high counting rate detection system for meas. of charged particle spectra 85−26702
high efficiency proton polarimeter using a liquid helium target 88−68248
HYPERON spectrometer for high-energy particles meas. 86−60637
imaging with high energy particles, 3-D industrial radiography appl. 88−218
large solid angle detector for medium energy charged particles 88−22925
liquid argon calorimetry at HERA, the H1 calorimeter 88−22952
LR 115 track detector, neutron dosimetry and proton detection 87−21498
massive modular tracking calorimeters for nucleon decay search 85−9060
multichannel high-speed automated proton spectrometer 86−60638
multiple passage through thin internal target, diagnosis by differential probe 86−60596
multiwire secondary emission beam profile monitorwith 20 μm resolution 86−60502
NE104 and NE110 aged large vol. scintillators, response to fast n, p and e 87−3819
neutron dosimetry system based on the chemical etch of CR-39 87−29624
nuclear emulsion for charged-particle detection, controllable 86−25142

proton detection and measurement continued
photodosimeter of accelerated protons, using superfine-grain photographic films 85−20822
photoproton spectrometer, design, Monte Carlo calc. of transmission function 85−64503
plastic scintillator telescope, proton detection efficiency function 87−77569
proton beams angle and energy characts. determ., laser method 87−29406
recoil-particle detector for BIS-2 spectrometer, proton escape angle determ. 88−68264
relativistic proton dosimetry with SSNTDs *(Czech)* 87−35334
scintillation position sensitive TOF counter, for neutron and charged particle detection 85−64470
SSNTD, α-particle and proton discrimination *(Chinese)* 86−11874
thermonuclear fusion product diagnostics by nuclear track detectors 85−20838
thin chamber for meas. intense beams profile 86−50271
universal detector system design for proton beam intensity meas. 85−26706
ZEUS detector at HERA, charged particle tracking 88−48008
ZEUS expt., hadron test calorimeter performance 88−22955
Ar, liq., detector for solar neutrinos and proton decay 85−9059
BaF_2 scintillator signal reduction by proton nucl, interactions 85−43191
$Bi_4Ge_3O_{12}$ calorimeter with photodiode photomultiplier readouts, performance at energies up to 10 GeV 85−48166
$Bi_4Ge_3O_{12}$ scintillator signal reduction by proton nucl, interactions 85−43191
CaF_2 scintillator signal reduction by proton nucl, interactions 85−43191
CsI film, scintillation detectors for proton recording, 20 to 540 keV 85−9086
CsI:Tl, energy resolutions for p and α 87−8850
CsI(Tl) scintillator, charged particle identification, p,d,t, ^{3}He and α detection 86−18250
CsI(Tl) scintillator with photodiode readout, response to light particles and heavy ions 87−14730
Ge gamma-ray spectrometers, energy deposition spectra for radioactivity induced by space environments 85−20865
Ge particle spectrometer for 14 MeV recoil proton detection 88−68211
H, high press. TPC performance 85−9055
NaI(Tl) scintillation detector, proton registration efficiency calc. 87−63672
NaI(Tl) single element light particle detector 85−20809
Pb-Cu liquid Ar calorimeter 88−29874
Pb-glass hadron calorimeter for shower detection by Cherenkov radiation, particle characteristics 88−54407
Si, Schottky barrier and planar detectors for low-energy proton spectrometry 88−29889
Si detectors in EM and hadronic calorimetry 88−22954
Si, response to ^{1}H and ^{4}He ions 87−57033
Si surface barrier detector, nonlinear response for low-Z ions 86−65344
U liq. Ar calorimeter, hadron/electron response from 10 to 150 GeV 88−61122

proton effects
AlGaAs-GaAs heteroface solar cells response degradation after protonomnidirectional irradiation 86−33688
beam on cermet as an inorganic resist for ion lithography 87−38389
bipolar ICs, single event upset estimation, geometric considerations 86−35850
bipolar transistors, proton displacement damage factors, energy depend. 87−32490
charged plane-parallel dielectric, electric field potential determ., by heavy particles irradiation 86−70198
CMOS bulk invertors, proton damage, total dose and dose-rate dependence 85−18472
contaminated optical solar reflectors, simulated synchronous altitude environment effects 87−22739
CR-39 detectors, proton response 87−21496
CR-39 track detector, neutron, proton response, semi-empirical model 87−21499
DRAM, 64 K, comparison of soft errors induced by heavy ions and protons 87−31881
extrinsic IR detectors, cosmic ray events, amplitude distrib. 86−38383
GTO-thyristors and diodes, dynamic props. improvement 86−47561
IC, single event upset response to 590 MeV protons 85−22807
insulated gate transistors, localised lifetime control by proton implantation 87−38316
insulated-gate transistors, localised lifetime control by proton implantation 87−25283
integrated circuits, simulation of proton induced energy deposition 88−57736
ion beam lithography, ultimate resolution and contrast 88−26114
irradiated high speed static induction thyristors 88−64540
irradiation using low-loss high-power static induction thyristors 88−43278
microelectronic components, neutron generated single-event upsets in the atmosphere 85−18396
microelectronics, cosmic-ray-induced upset, laboratory simulation 88−57765
microprocessors, single event upset vulnerability 86−34845
MOS transistors, proton and heavy-ion radiation damage studies 86−35704
MOST, ionising radiation damage in appl. elec. field, ang. depend. 88−26284
multimode silica core fibres 88−33675
neutron dosimeter, proton build-up calc. 87−35451
NMOS/resistive load static RAM, single event upset dependence on temp. 87−31885
PIN photodiodes, 40-, 85-MeV proton irrad. effects 86−22244
PMMA films, irrad., ESR study 86−1978
PMMA resist, degradation due to ion and electron beam irrad., Charlesby's law modification 86−1979
polystyrene, nanosecond proton and He ion pulse radiolysis studies 87−11875
power MOSFETs, proton and neutron carrier removal rates 88−26280
quartz resonators, proton and γ-ray radiation testing, freq. shifts 85−24039
quartz resonators, results from gamma ray and proton beam radiation testing 85−62144
single-event upset rates for bipolar and NMOS circuits 86−35769
single-event upset-sensitive vol. dimens. estimation from charge collection simulations 88−26387
solar cells, microscopic defect structures and equivalent electron fluence concepts 87−16033
SOS, ion implanted, laser beam annealing, channelling and sheet resist. meas. 87−45770
spacecraft RAM, single event upsets in Earth's proton belts 85−22883

proton effects continued
SRAM, synergistic upset effects of pulsed proton beams 88−25197
static induction thyristor switch, very high speed, characteristics after 2 MeV proton irrad. 86−41775
static induction thyristors, low-loss high power devices for complementary ccts. 87−38233
static RAMs, single event upset sensitivity, total dose depend. 85−17389
thin film sputtering parameters meas. with 100 keV proton beam *(Italian)* 86−31658
thyristors, P-n-P-n struct., high-power, static and freq. characts. optimisation 88−71540
(Al,Ga)As-GaAs-(Al,Ga)As DH lasers, proton-bombarded, damage distribution, photoluminesc. studies 85−12716
$Al_xGa_{1-x}As$ p-n junction solar cell radiation-induced defects obs. using DLTS 87−9772
AlGaAs/GaAs solar cell, radiation damage evaluation 88−69685
AlGaAs/GaAs solar cells, proton irradiated, defect production 87−30937
AlGaAs/GaAs/Ge multijunction solar cell, model for calc. of displacement damage by radiation 87−9775
AlGaAs/GaAs/InGaAs multijunction solar cell, model for calc. of displacement damage by radiation 87−9775
AlGaAs-GaAs solar cells, electron and omnidirectional proton irradiations effect 86−7028
AlGaAs-GaAs solar cells, electron and proton irradiated, deep level defects and recomb. parameters 86−7027
(AlGa)As-GaAs solar cells, proton irradiated, computer simulations 88−37387
AlGaAs-GaAs solar cells, proton-irradiated, trapping centres 85−60427
$AlMg_3$, SNQ-target, materials irradiation expts. 86−56005
AlMgSi, SNQ-target, materials irradiation expts. 86−56005
Au-GaAs contacts, proton bombard., I-V characts. 87−1307
Cu/CuO_2 Schottky barrier solar cells, H^+ irrad., photovoltaic conversion efficiency enhancement 86−63108
GaAlAs concentrator solar cells, electron and proton irradiation effects on cascade structure perform. 88−37499
GaAlAs solar cells grown by metalorganic CVD, radiation damage 88−37500
GaAlAs-GaAs p-p-n photoconvertors, effect of protons on photoelec. characts. 85−45418
GaAs FET test struct., enhanced charge collection under proton irrad. 85−18340
GaAs JFET test structs., particle damage effects 87−32543
GaAs concentrator solar cells, electron and proton irradiation effects on cascade structure perform. 88−37499
GaAs concentrator solar cells, influence of 37 MeV proton irradiation 88−37488
n-GaAs, depth distribs. and damage characts. of implanted protons 85−40602
GaAs, irradiation by protons and alpha particles, transmutation doping 88−57421
GaAs monolithic integration, guided wave device design and fabrication 85−29732
GaAs, proton bombard., optoelectronic effects 87−11361
n^+-GaAs, proton implanted, damage distrib. studies 85−18087
GaAs, proton induced reactions, microdosimetric anal., Monte Carlo simulation 85−18055
GaAs, proton-implanted, high resolution TEM studies 86−8972
GaAs, proton-induced displacement damage, energy depend. 88−25882
GaAs, solar cell degradation model for low-energy proton impact 88−5901
GaAs solar cell proton damage energy-dependence and combined-radiation effects 87−78954
GaAs solar cells, model for proton damage 86−7126
GaAs solar cells, perform. and temp. dependencies of proton irradiated n-p and p-n cells 87−4940
GaAs solar cells prepared by LPE, radiation damage 88−37481
GaAs solar cells, proton damage coeffs., space appls. 85−65447
GaAs solar cells, proton damage model, minority carrier lifetime, elec. characts. 88−37497
GaAs solar cells, sequential irradiation effects of electrons and protons 87−9774
GaAs/Al(Au-Ti) Schottky-barrier diodes, proton-irradiated, thermal annealing behaviour study 87−32467
GaAs/GaAlAs, proton-bombarded multiple quantum struct., fast nonlinear optical response 85−41452
GaAs-GaAlAs fast MQW absorber for mode locking of semicond. lasers. 87−26543
$GaAs_{0.1}P_{0.9}$:N LED, proton irrad. induced defects, DLTS studies 85−41292
Ge p-n junction solar cell radiation-induced defects obs. using DLTS 87−9772
InGaAs concentrator solar cells, electron and proton irradiation effects on cascade structure perform. 88−37499
InGaAsP-InP bistable DH laser formed by proton bombardment *(Chinese)* 86−9822
InP solar cell radiation resistance after 10 MeV proton irrad. 87−78952
InP solar cells in space radiation environment, comparison with GaAs and Si cells 87−42130
InP solar cells, potential for use in space radiation environment 87−16035
InP:Fe, semi-insulating, elec. props. after proton bombard. and annealing 88−19666
InP-CdS heterophotovoltaic cells, damage caused by proton irradiation 87−51452
NaI spaceborne γ spectrometer shielding effects 88−29931
Si MOSFETs, ionising radiation damage due to γ-rays, protons and electrons 86−35703
Si P-type detector characts. improvement during supercurrent irradiation 85−31688
a-Si alloy thin film solar cells, proton radiation resistance 88−37482
Si bifacial solar cell modelling for degradation by space particle irradiation 87−78947
Si bipolar transistors, particle-induced displacement damage 88−26224
Si, carrier lifetime reduction by Ar proton implantation 85−18065
Si concentrator solar cells, electron and proton irradiation effects on cascade structure perform. 88−37499
Si concentrator solar cells, influence of 37 MeV proton irradiation 88−37488
Si crystals and device structs., radiation-induced modifications 88−33024
Si, defect states on the surface and in the bulk, H passivation 87−6579
Si detectors, large area, properties and radiation stability 87−29551
Si multistrip detectors, radiation damage test with 800 GeV proton beam 88−61142

proton effects continued
Si power diodes, voltage impulse overloads during first recovery 86−41735
Si, proton implantation, resistance changes 88−32753
Si, proton induced reactions, microdosimetric anal., Monte Carlo simulation 85−18055
Si, proton irrad., buried recomb. layer prod., DLTS and spreading resist. meas. 85−40703
Si, proton irrad. minority carrier diffusion length and recombination parameters 85−23414
Si, proton-induced displacement damage, energy depend. 87−32224
Si, pulsed ion beam annealing, sheet resist. studies 85−18207
Si small-geometry ICs, single proton interactions, permanent damage 87−32605
Si solar cells, front and rear proton irradiation effects 88−37498
Si solar cells, laser processed, passivation by proton irrad. 86−7088
Si solar cells, model for proton damage 86−7126
Si solar cells, perform. and temp. dependencies of proton irradiated n-p cells 87−4940
Si solar cells, proton damage coeffs., space appls. 85−65447
Si solar cells, radiation damage of lattice by protons and electrons 88−37486
Si solar cells, radiation resistance improvement by defect gettering zone 88−37495
Si solar cells, sequential irradiation effects of electrons and protons 87−9774
Si solar-cells, burst annealing of proton damage 86−7129
Si thin BSR cells. effects of electrons and protons on performance and reflectance 86−7128
Si thin membranes, channelling transmission of protons 87−38031
Si vertical junction and planar solar cells, proton radiation damage 87−9782
Si:Al, Mg transmutation doping by proton irrad. 87−17907
a-Si:H solar cells, radiation damage by 12 MeV protons and annealing 87−9791
a-Si:H,F solar cells, radiation hardness to 1 MeV protons 87−16034
a-Si:H,F/a-Si:Ge,H,F photovoltaic cells, proton radiation resistance, defect generation, passivation 88−49153
Si:Li counterdoped n^+p solar cells, proton-irradiated, DLTS studies 87−4882
Si:Li counterdoped solar cells, effect of 10 MeV protons 88−37485
$Si\text{-}Ir(Ir_xV_{100-x})$, silicide formation by pulsed proton-beam annealing 85−23555
Si-PIN-photodiode proton radiation damage analysis, suitability for HERA p-ring beam loss monitor 88−58358
a-SiGe:H,F films, minority carrier diffusion length after light or proton irrad. 87−74025
a-SiGe:H,F solar cells, radiation hardness to 1 MeV protons 87−16034
Sm-Co permanent magnets, proton beam effects on mag. props. 86−21999

proton excited X-ray emission *see ion microprobe analysis*

proton induced X-ray emission *see ion microprobe analysis; X-ray chemical analysis*

proton magnetic moment
ampere reproduction from proton gyromag. ratio and quantum magneto resonance phenomena 87−34896

proton magnetic resonance
head/disk assembly material, magnet cleanliness, determ. technique using NMR 88−57965
H_2O, proton gyromagnetic ratio determ., dimensional metrology, appl. 85−63938
Si:H, amorphous-crystalline mixed phase, H incorporation, PMR study 85−11952

proton magnetic resonance imaging (biomedical) *see biomedical NMR*

proton polarisation
AGS, polarised proton acceleration, hardware modifications 86−11792
AGS polarized proton production 85−48155
beam, energy modulations associated with polarisation reversal 87−50107
beam techniques and workshop report 85−48159
conference on polarised antiprotons, Bodega Bay, CA, USA (Apr. 1985) 86−70277
European Hadron Facility, equipment and expts. 87−56935
frozen spin proton target at TRIUMF 87−3868
internal polarimeters for the polarized proton beam atthe KEK 12 GeV PS 87−3816
KEK PS booster, proton beam depolarization 85−48156
polarised $\bar{p}$ beam, spin depolarisation by electron cooling 86−70278
polarised $\bar{p}$ beam prod. at Fermilab from Λ decay 86−70296
polarised $\bar{p}$ beam prod. using $\bar{H}$ formation and optical pumping 86−70279
polarized proton acceleration at the KEK boostersynchrotron 87−3843
pulsed high-intensity source of polarized protons 87−50106
Saturne, polarized particle beam acceleration 85−48154
self-polarisation of proton and heavy ion beams in storage rings 86−70280
self-polarization of proton and ion beams in storagerings 87−3846
self-polarization of protons in storage rings 87−50084
$\bar{p}$ polarisation through $\bar{H}$ formation 87−3847
$\bar{p}$ acceleration through multiple spin resonances using spin transfer matrix 87−3822

proton spectra
high counting rate detection system for meas. of charged particle spectra 85−26702
recoil spectrum unfolding technique, neutron cross sect. meas. in liquid scintillator 85−59186

proton-surface impact *see ion-surface impact*

proving, theorem *see theorem proving*

proximity effect
Discrete chip artwork model with interactions 88−24935
FET, gate-controlled semiconductor-coupled proximity effect weak link 88−13712
high conductivity materials, AC meas. of transport props., high resolution apparatus 85−37719
Josephson junctions, physical effects and applications, conf., Torino, Italy (Sept. 1985) 87−51732
magnetically coupled Josephson logic devices, threshold characteristics *(French)* 85−28491
microscopic theory and transistor appl., review *(Japanese)* 88−51395
photon, ion and electron beams, Int. Symposium, Tarrytown, NY, USA (May-June 1984) 85−27917
superconducting microcircuit quantum interferometer, nonlinear Ginzburg-Landau eqn. solns. 88−45009
transistor, microscopic theory 88−20282
transistors, superconducting, theory 88−26712
weak links, two-dimensional array, AC quantum interference 85−29506

proximity effect continued
n-InAs coupled Josephson junction with high electron mobility 85−24228
InAs, superconducting proximity effect in the native inversion layer *(Japanese)* 86−28065
Nb weakly coupled superconductor islands in Penrose-tile array, resistive transition and mag. field response 88−7828
Nb-InAs-Nb junction, inversion layer proximity effect, superconducting transistor appls. 88−33572
Nb-Sn, A15 system tunnel junctions, supercond. energy gap, transition temp., tunnelling density of states 85−1878
NbTi filaments, size, surface and proximity effects 86−47976
Pb-Sn proximity-coupled junctions, triangular arrays, supercond. transition, mag. field depend. studies 86−58716
Pb(AgAlMn) in situ supercond. wire, mag. impurity scatt. 85−50861
Si superconducting FET, critical current induced by proximity effect, carrier conc. depend. 87−53543
Ti-transition metal superconducting alloys, metallurgy and phys. props., book 87−58519
ZrN films and tunnel junctions, struct. and physical props. 87−67827

pseudobinary semiconductors *see II-VI semiconductors; III-V semiconductors; III-VI semiconductors; IV-VI semiconductors; semiconductor materials*

pseudoternary semiconductors *see ternary semiconductors*

PSK *see phase shift keying*

psychological optics *see vision*

psychology
auditory signals in attention research, use of Apple-Psych system for production and control 88−53502
cognitive dysfunction diagnosis, multimicroprocessor-based real-time EEG analyser 87−14899
colour, direction and speed of motion, perceived relations 87−29213
colour cues as location aids in lengthy texts on screen and paper 88−36404
colour perception, display technology implications 87−8548
colour psychophysics and display technology 88−67973
computer-aided music, impact on the arts and composers *(French)* 88−22384
continuing education programme development, motivation elements 87−23185
continuing engineering education, participation, motivation and outcomes 87−23189
CRT text, blinking for video image presentation, optimum design 88−29554
designer-manager conflict, behaviour/perception relationship model 86−256
discriminal process model and psychophysical functions, geometrisation *(Japanese)* 86−3736
DORF2R.BAS, BASIC program for analyzing signal detection theory rating data 88−14650
electric power supply system operating personnel psychophysiological provision for reliability improvement *(Russian)* 87−30030
electrical circuits, pupils' understanding, rel. to instruction 88−70062
electronic system for behavioural research 88−48086
employee motivation techniques for energy conservation 87−72
energy management attitudes, guidelines for plant engineers 87−5108
engineering communication, conf., Atlantic City, USA, (Oct. 1984) 85−39430
experimental psycholinguistics, book contrib. 86−29786
faster reading techniques for continuing education 87−23191
HDTV and 525-line viewing, sight-line displacements, eye movements eval. 87−34764
HDTV pictures, anal. using eye movement *(Japanese)* 86−55422
HDTV standard setting using psychophysical bases 87−49248
health care technology in third world countries: neuropsychiatric services in India 87−63810
human factors at Bell Laboratories 87−23445
human processing of machine speech, role of psychology 87−12934
information and communication, social psychological aspects of develop. *(German)* 88−31262
interactive video discs for psychological research 87−70275
IntroVoice I voice recognition board, use with Apple-Psych system 88−52361
IR touch detector for TV screen 88−4216
mental health assessment, speech technology eval. 87−63197
multidimensional information systems, visual display representation 87−29211
numerical data perception and display formats 87−29215

pulp industry *see paper industry*

pulsars
dispersion distortion removal from pulsar radio signals, wide-bandwidth signal processor design 87−49965
Hall effect in magnetised disk 86−63226
millisecond pulser PSR 1937+21 meas., time comparisons 88−22403
radioemission pulses, appl. as time scale reference clocks 86−31675
SETI, pulsar aided strategy for radio signal search for extra terrestrial intelligence *(French)* 88−60351
short-term intrinsic intensity vars., Ooty radio telescope obs. 85−42679
time scales 85−31600

pulse amplifiers
1 W amplifier for nuclear instrumentation, design and optimization 88−50045
binary peak power multiplier for pulse compression, klystron amplifiers config., linear accelerator appl. 87−10699
bipolar high-gain limiting amplifier IC for optical fibre receivers, design and characts. 87−65866
charge loop amplifiers for high resolution Ge spectrometer 85−43306
charge sensitive 16-channel amplifier-discriminator board for MWPC 85−20852
charge sensitive amplifiers, noise performance 85−43277
CMOS charge sensitive amplifier cable driver combination 86−34591
common emitter-common base cascode amplifier circuit, characts. calc. 85−6192
control-pulse shaper for thyristor converters 85−6241
conventional ECG machine, dynamic theory and design *(Chinese)* 86−44665
count rate tests, detector, multichannel analyser, staircase generator and oscilloscope 85−43283
current pulses amplification for semiconductor lasers supply 86−14020
drift chambers, resolution of right-left ambiguity using low-noise amplifier 85−11044
ECG amplifiers, triboelec. interference reduction 86−32334
emitter correction for stage design 88−6676
fast pulse amplifier for spectroscopy at very high count rates 85−15250
fast vertical flyback circuit for CRT display 87−23952
five-transistor pulse amplifier 85−28390
gigahertz-band high-gain low-noise AGC amplifiers in fine-line NMOS 87−65867
HF pulsed solid-state power amplifier, 1000 W output for NMR imaging appls. 85−54699
high-speed gate drive ccts. 86−783
high-speed MOSFET driver circuit s 86−20390
high-speed paraphase pulse amplifier 88−32025
high-speed with digital gain control 87−41891

pulse amplifiers continued
hysteresis/DC response amplifier design for translator cct. replacement 85−39938
integral nonlinearity determination, computer controlled stochastic meas. method *(German)* 85−54691
L-band radar module, 2 kW design using 550 W quad building blocks 86−11169
L-band solid-state pulse amplifiers for radar transmitters, transient response anal. 88−56982
linear pulse amplification, gating and adding unit, for multidetector spectrometers 85−9111
logarithmic amplifier, diode bridge and wideband op. amp. config. for narrow plate handling 86−778
logarithmic amplifiers, miniature hybrid components, SLMH series 88−63544
logarithmic radio pulse amplifier, with five stages 86−14022
measuring amplifier for EM flowmeter *(Polish)* 85−586
microcomputer controlled actuators, design possibilities *(Czech)* 85−60373
microwave resonant cavities, DENSEPACK array of Langmuir probes 87−11022
MOSFET pulse amplifier for modulating magnetron transmitters 85−61631
multi-detector spectrometer systems, cryostat and electronic development 85−43305
nanosecond amplifier-limiter for shaping photomultiplier signals 87−65961
nanosecond pulse amplifier with 600-V output 88−70565
nonlinear transistor amplifier for shaping nanosecondmagnetizing pulses 86−57734
normaliser for semiconductor commutator 88−53591
optical pulse amplification in picosecond range in single mode fibres 87−39216
opto-isolated HV driver, cct. 86−34554
optoelectronic pulse shaper with increased load capacity 88−32066
output current overshoots effect in output stages of amp. with emitter correction 86−34573
power amplifier with enhanced dynamic response 86−57681
power FETs, new generation, characts. and microwave appls. 85−1607
prepulse suppression in microwave pulse-compression cavities 87−11021
receiver circuit 86−14081
RF pulse amplifier-shaper 87−37093
RF pulse power amplifier, design *(Spanish)* 88−56491
S-band high-power pulse amplifiers, design options 86−53067
scanning operational amplifier with automatic data-channel allocation 87−59202
shaper amplifier with symmetric feedback for driftchambers 86−60621
shaper-amplifiers implemented by GaAs Schottky-barrierfield-effect power transistors 86−67490
thin film light amplifier, dynamic characts. 86−2975
TO-8 packaged amplifiers for pulse and HF appls., Hewlett-Packard devices *(German)* 86−67040
transformer-coupled amplifier-convertors 88−74317
transistor pulse power amplifier 85−6187
trigger pulse amplifier, with high output voltage 85−11119
UHF pulsed high-power push-pull amplifier, design considerations 87−16911
UHF push-pull amplifiers, high-power pulsed type, design considerations 88−578
US pulse-echo overlap equipment modification, for scopes with no intensity modulation 86−24465
vacuum tube based ccts. 87−60045
wideband low-noise preamplifier for ultrahigh-sensitivity fission counters 85−43285
Y853 vacuum tubes, new generation for modulator and switch appls. 87−11286
GaAs FET pulse amplifier, with subnanosecond settling time 86−67489
GaAs MESFET amplifier IC, high-gain wideband config. using 0.7 μm technology 88−18932
GaAs MESFET distributed broadband amplifiers, pulse response characts. study 87−73344
GaAs Schottky barrier microwave FET pulse amplifier , with subnanosecond settling time 88−70566

pulse amplitude analysers *see pulse height analysers*

pulse amplitude modulation
AC drives, pulse modulation techniques of voltage employing feedback *(Russian)* 85−65472
AC motor drives, PAM/PWM invertor using power MOSFETs 88−43425
ASK optical fibre communications, orthogonal modulation 86−37887
asynchronous motor supply, PWM and pulse amplitude modulation *(German)* 86−39756
D/A convertor, pulse filtering 86−8319
data transmission, pair cable pulse response meas. 86−30232
digital transmission system, block codes for linear timing recovery 85−57227
energy conservation using PAM motors 88−43159
FM/PAM, mobile radio channels, performance and burst error characteris. 87−62844
FM/PAM techniques for digital mobile radio 87−62843
frequency convertor with PAM invertor, LC-commutation circuit for thyristors 87−37489
frequency response of PAM systems, expt. 86−64243
induction motor acoustic noise reduction using optimum PWM waveforms of invertor 87−15737
induction motors, optimum invertor waveforms for decreasing acoustic noise 86−39801
inverter with pulse amplitude modulation, synthesis using multiple-value numeration system *(Russian)* 87−64713
joint carrier and bit synchronisers perform., fundamental lower bound 85−7774
land mobile radio systems, PAM/FM, Reed-Solomon error and erasure correction 88−73831
laser beam power modulation device, halftone images reproduction appl. 86−9910
linear electric circuits with PAM, transient and steady-state process investigation 88−18885
M-level PAM systems, error floors in digital transmission systems 88−45867
maximum likelihood detection of discrete time PAM innon-Gaussian noise 86−29706
mobile radio, digital, PAM/FM techniques 87−40768
multilevel PAM system, intersymbol interf. suppression using double and triple jump spectrums *(Japanese)* 85−2741

pulse amplitude modulation continued
narrowband n. dulation methods for land mobile radio 86−30662
nonlinear discrete systems, periodic modes, parameter determination *(Russian)* 88−59005
NRZ-PAM, matched filter and square synchronizer 86−16109
optical pulse amplification in picosecond range in single mode fibres 87−39216
PAM/FM forward error correction for mobile radio 87−39597
receiver, influence of four types of symbol synchronisers on error probability 85−14094
receiver error probability, influence of cycle slipping 88−8661
selective timing recovery, data-sequence 85−57209
self-excited modulation invertor transient condition investig. using difference eqns. *(Russian)* 88−55477
signal, impulse interference with unknown parameters and noise, time position estimation 87−55087
signal sampling subject to timing jitter, game theoretical approach 86−54405
sound transmission, digital, in video signals using PACM *(German)* 85−14435
spectral correlation, synchronisers design and performance anal. 87−12876
symbol timing recovery scheme, jitter performance 87−68952
synchronised multiplex systems, overload handling method *(Japanese)* 86−10236
three-phase convertors, synthesis design method for suppressed third harmonic supplied using modulation 87−72244
transceiving bit strings from electrical to fiber-opticmedia 86−59899
trellis coding for multilevel partial response PAM and QAM 87−54918
Viterbi algorithm, delayed decision feedback sequence estimation 86−64164

pulse analysers
see also pulse height analysers
adaptive pulse-duration meter 88−38427
AIR-85 analyser for pulse disturbances analysis in power plants *(Slovak)* 86−68789
bivariate intensity distrib. recording of optical radiation 86−60256
clock pulse direction logic probe 85−20547
deinterleaving, real-time, using digital delay line techniques 86−10250
detection of pulse signals, by charging two capacitors through nonlinear resistance 85−14714
electron attachment measurement in weakly attaching gas mixtures, computerised signal analysis 88−35902
IEEE-488 standard interface, pulse measurement systems 86−17901
integral pulse parameters determ. 88−35882
interface for AI-4096 pulse analyser to numeric printer 86−31302
interfacing AI-256-6 pulse analyzer withElektronika-60 microcomputer 86−44594
multichannel, for discrete-scanning data acquisition system 86−44200
multichannel pulse analyser based on SM-3 computer and CAMAC 86−60181
NMR pulse spectrometer analyser, using multistep exponential extrapolation 86−18260
oscilloscope, pulse wave obs. using vertical axis cct. 86−31457
partial discharges nature and meas. techniques 88−26576
performance evaluation 88−16247
phase fluctuation analyser of RF pulses 86−70076
picosecond luminous meas., using computerised multichannel optical analyser *(French)* 88−35894
picosecond pulse measurements at NBS 86−17900
pulse-width checker, programmable cct. 87−52465
randomly overlapping photon fluxes analysis, reference pulse selection 88−25068
repetition frequency or duration analyser 87−8875
RF pulse monitor facility 87−73375
rise-time discriminator for registration of ionising radiation 87−41890
RMS pulse amplitude to number convertor 86−20770
selector of pulse amplitude and duration 86−60620
shape discriminator design 87−37092
sinusoidal PWM inverters, with modulating signals of synchronous triangular carriers, waveform anal. *(Japanese)* 85−44949
statistical pulse analyzer 87−65960
stroboscopic conversion, signal distortions determ. 88−42019
subnanosecond single pulse television analyser, operational software *(Russian)* 87−77297
subnanosecond time discriminator system for particle detectors 86−5831
TV analyser of oscillograms of short single pulses 86−14088
ultrasound parameters meas. in clinical practice, electronic analogue digital pulse analyser 87−57132

pulse circuits

12-pulse convertor operating principles and performance *(German)* 86−39925
50 tesla pulsed magnets using a copper conductor externally reinforced with stainless steel 88−65979
AC thin film electroluminescent display, low-power drive scheme 86−31528
AC thin film electroluminescent display modelling, electronic drive system design 87−21171
accurately controllable pulse delay circuit for CRO trigger 86−20391
active pull-down for compensated current switch emitter follower 87−24005
adjustable phase delay cct. with 650° max. 86−14079
adjustable pulse delay circuit *(German)* 87−10745
annunciator for audible pulse count 86−57732
biofeedback, graphic monitor and interface circuit for Commodore 64 87−5731
bipolar stepper motor translator circuits using TCA 1560/61 ICs 88−56537
bit multiplex driver, cct. design, array selection and serve amplifier restoration appl. 85−665
bootstrap driver circuit having voltage-controlled breakdown protection 85−44945
CCD imager driver IC, μPD6146G *(Japanese)* 86−60154
charging circuit using HV RF bursts superimposed on 60 Hz modulating field 86−67115
clamping circuit for 100 mV to 1 V range 86−14087
clocked magnet driver cct. 85−6240
CMOS off-chip driver with improved performance 86−53801
commutator for RF high-power pulses 88−32067
compound-wound AC motor regulation characteristics with pulse control *(Russian)* 86−51564

pulse circuits continued
compression alternator and circuit producing pulses, power characts. and parameters *(Russian)* 85−60158
controllable electronic delay line for pulse signals 86−14084
converters, appl. of low freq. thyristors *(Russian)* 87−36013
convertor with damping capacitors *(Russian)* 85−54757
convertors, pulse width type using PWM, stability anal. *(Russian)* 86−20774
correlator of periodic exponential pulses, nonstationary spectroscopy of deep levels 87−65959
current stabiliser design and performance *(Russian)* 86−57733
current-sourcing power ICs 86−58510
DC signal stabilizer, oscillations study *(Russian)* 88−70611
delay cct. with dual-edge trigger 87−37090
delay circuit with glitch rejection 85−33734
delay line memory systems, history 87−5730
design *(German)* 85−54979
desired signal pulses selection, w.r.t. delay of amplitude variation 87−59271
detection of pulse signals, by charging two capacitors through nonlinear resistance 85−14714
direct and indirect pulse detector circuit *(German)* 85−17231
discharge quencher for Geiger counters 86−60624
discrete phasing of standard RF pulse trains 88−16029
double-boosted clock-driver, cct. design with low input capacitance 85−17233
DP8464B hard disk pulse detector chip 85−62191
drive ccts. for multiplex LCD displays *(German)* 87−10746
drive circuit for noncontinuous dither excitation of ink jet printer 85−6458
drive circuits for colour picture tubes, design *(German)* 88−22285
drive circuits for switching n-channel enhancement MOSFET *(German)* 87−59143
driver circuit design for chip voltage level interfacing 85−22739
dual-frequency addressing of liquid crystal matrixdisplays with three drive frequencies 86−11642
earthed driver circuits for short cct. protection in transistor- and GTO-bridge rectifiers *(German)* 85−49731
edge detection using delayed feedback on invertingamplifier, cct. design 87−5733
electro-optic shutters having different coupling circuits 88−58234
electromechanical counters, drive circuit *(German)* 86−67119
electrostatic levitation, application of prototype pulse charging circuit 85−27543
electrostatic precipitator pulse energisation evaluation guidelines 87−22142
electrostatic probes characts., excitation and meas. cct. 85−26437
exciter, thyristor/pulse transformer for magnetic pulse compressor circuits, gas laser appls. 87−46953
extensible pulse discriminator circuit *(German)* 88−6710
fast RAM as a pulse delay circuit *(German)* 86−52742
fast rise time current pulse measuring system 86−34633
first electrical engineering textbook by Millman and Taub 85−16602
flip-flops for pulse selection circuits *(German)* 86−8148
frequency discriminator design using *(German)* 88−63575
frequency networks synthesis using multilevel pulse trains 86−14031
GTO thyristors, optimised control ccts., anal. of 160 PFT device *(German)* 85−6237
high-speed device for locking onto pulse trailing edge 88−56533
high-speed isolating pulse circuit *(Slovak)* 88−624
HV CMOS drivers, plasma AC refresh panel plasma appl. 85−14928
HV IC driver for large-area AC plasma display panels 85−14929
HV modulator for electrostatic kicker for proton beam switching and control 87−22628
HV power transistor in pulse convertor cct., switching on *(Russian)* 86−2129
HV pulse divider with two-stage $CuSO_4$ solution tubes 88−74321
HVDC transmission system, digital simulation of pulse-phase control circuit 87−30157
IC interface for electronic displays, latest generation 86−49974
induction machine torque pulsation reduction by 12-pulse slip power recovery static convertor 87−22374
industrial electrostatic precipitators, pulsed energisation study 85−24764
integrated LCD drive circuits UL 7211D and UP7211D *(German)* 86−52748
IR LED array driver cct., 1 Mb/s, office wireless communication 87−571
LCD drive circuits, UL 7211D and UP 7211D *(German)* 86−52747
LED brightness controller, for mobile radio transceivers 88−56819
light barrier systems, design considerations *(German)* 85−34100
light pulser system for testingphotomultiplier-based counter systems 86−858
linear pulse circuit reliability determ. using weighted fns. *(Romanian)* 88−56531
linear tri-colour indicator driver 86−46641
linear type with cyclic variation of interrupt freq., composite switching fn. appl. *(Russian)* 86−34498
linear voltage-to-pulsewidth converter 85−61406
low power photomultiplier base circuit using HV FETs 85−43287
magnetic induction regulator 86−67117
magnetic switching ccts., for variable HV pulse delays and gas-laser synchronisation 86−29201
mark-space modulated semiconductor bridge cct. for driving electric motors *(German)* 85−22632
measurement channels, transient processes, investigation using partial pulse characts. *(Russian)* 85−31282
measuring mean pulse current by double integration method *(Russian)* 86−60309
micro-gap discharge circuit as simulated gap-type noise source 88−70579
monolithic analogue timing ccts., principles and operation *(Dutch)* 86−46636
motor driving cct., economical bridge design 85−11118

line equalizers for PCM transmission systems, CAD *(Hungarian)* 88−56816
log PCM via QAM over Gaussian and fading channels 88−2939
log-PCM speech, conditional entropy encoding 85−46715
log-PCM speech, packetization 86−64230
log-PCM transmission via QAM over Gaussian and Rayleigh fading channels 87−75429
logarithmic PCM weighted QAM transmission over Gaussian and Rayleigh fading channels 87−75430
logarithmic range differential pulse coded modulation 87−2424
logic error testing in multifacility digital transmission problems 87−31827
loss in PCM link systems, point-to-point loss calculation method 88−2942
low bit-rate image sequence coder combining a progressive DPCM in interleaved rasters with a hybrid DCT technique 88−3149
low-pass fifth order filter, switched-capacitor realisation 85−912
LSI-based PCM processor for high-quality soundtransmission 85−63793
magneto-optic disc video recording, high quality 88−22329
maximum-likelihood synchronisers, near optimum type for delay-modulated waveform, configs. and anal. 87−47488
medium-rate speech coding 88−66335
microwave PCM transistor power generator 88−56956
Miller-coded waveform, adaptive maximum-likelihood synchronisers 85−19308
mixed analogue/digital video transmission system, noise calcs. *(Japanese)* 87−75868
mobile calibration laboratory for French telecommunication network 86−24333
MODIVA modular digital exchange with distributed control, config. and operation *(German)* 85−52146
modulation codes for magneto-optical disc drive, comparison 88−65145
modulo PCM with multi-quantiser speech coder, config. and improvements *(Japanese)* 88−45991
modulo-PCM encoder, speech decoder design *(Japanese)* 87−19437
modulo-PCM speech encoder with imbedded vector quantizer 87−19621
modulo-PCM with multiquantiser, speech coding 87−61737
monochrome image, 3-bit DPCM coding system using adaptive prediction and adaptive quantization *(Japanese)* 85−25183
monolithic distributed RC networks in MOS technology, modelling and design 87−859
motion influence on masking of quantisation errors in 3-D DPCM-coding 85−20344
multi-frequency tone generator chip 88−67193
multi-mode PCM transceiver chip for 1.544 Mbit/sec digital telecommunications 87−59404
multichannel ADPCM processor, single chip, custom VLSI design 87−59561
multichannel TV and PCM, analogue transmission over optical fibre 85−58330
multifrequency communications channel decoder with the type TMS32010 signal processor circuit *(French)* 87−55853
Multifunctional Terminal equipment review *(Japanese)* 85−52133
multiplex equipment, development 86−17112
multiplex equipment, digital exchanges, loss and level definitions appl. *(German)* 86−10884
multiplex terminals for 10 and 30 channels with single channel codec (DTM-2) 86−23602
multipoint conference system using 64 kbit/s (7 kHz) speech coding, audio-bridging technique *(Japanese)* 88−21808
multiprocessor realisation of a PCM channel unit forSCPC systems 86−20624
multitrack PCM audio using 8 mm video system 86−11304
MUSE HDTV system, sound transmission coding 88−29075
music coding scheme for transmission of high quality signals 88−59010
narrow-band PCM transmission *(German)* 87−28065
NEC built-in BS tuner TV models C-29BS80 and C-26BS80, review *(Japanese)* 88−53409
NEC CMOS PCM COMBO for telecommunications *(Japanese)* 86−4139
NEC compact 60-channel ADPCM transcoder, review 88−9307
NEC PCM COMBO LSI housed in a PLCC package, development *(Japanese)* 88−21820
NEC single-chip PCM COMBO LSIs with digital gain setting 87−28235
neural net based nonstandard ADC 88−52340
noisy PCM systems, robust frame synchronisation 85−47020
nonlinear quantization and data communication in telephone networks 87−20104
NTSC composite signal, DPCM and transform coding, robustness, theoretical comparison 85−19516
Octopus 180i, Deutschen Bundespost ISDN telecommunication system *(German)* 88−46664
one-dimensional hybrid picture coding optimisation *(Slovak)* 88−8692
optical fibre communication systems, recent advances, review 87−34568
optical fibre links and equipment, development, configs. and performance *(German)* 87−20512
optical PCM transmitter design for multigigabit systems using relaxation oscillation technique 88−20655
optical transmission equipment for 800 Mbit/s 8-channel multiplexed PCM-TV signal *(Japanese)* 88−28860
optical transmission system using GaAs MESFET ICs 88−47154
optimality conditions 86−16141
oversampling DPCM-type ADC topology for high-resolution signal acquisition systems 87−31962
PABX conference calls management with single chip, M116 PCM 88−53086
PACS system, data compression scheme design, adaptive predictive coding and applic. to radiographs 87−21538
partial response band-conserving systems, repeater external clock generator configs. *(German)* 85−8287
PCM 30, implementation on German railways, fault location and disturbance elimination *(German)* 86−10659
PCM 30 equipment use by (East) German State Railway *(German)* 85−24873
PCM line card test task, flexibility *(German)* 86−13457

pulse-code modulation continued
PCM multiplex testing, inspection, ATE *(Italian)* 87−3379
PCM packet voice networks, waveform substitution effect on quality 88−34599
PDTS test equipment for Intelsat TDMA/DSI system *(German)* 85−47468
photodetector in optical fibre transmission system, noise variance calcs. using algorithmic method *(Polish)* 87−20561
PLZT thin film optical switch for 2-channel video-signal optical transmitter *(Japanese)* 88−28863
point-to-multipoint subscriber radio system in 1.5 GHz band based on PCM-TDM 86−23691
postfiltered DPCM scheme 86−3750
predictive TV signal coding, reconstruction noise shaping in DPCM system 85−13642
primary multiplexer, PCM 30 for synchronous and asynchronous transmission of data channels *(Slovenian)* 88−67171
primary PCM multiplex equipment, fourth generation 87−28290
programmable PCM-test equipment for K 1520 *(German)* 88−41976
public and private telephone exchanges for up to 1600 lines, Argentine technologies *(Spanish)* 87−40563
pulse code modulation techniques by fluidics 87−10748
pulse encoded line signals, error probability study *(German)* 85−52350
QAM radio relay channels, error distrib., effect of encoding and modulation methods *(German)* 86−23663
quantisation distortions accumulation in PCM channels 86−36872
quantiser-selective DPCM encoding of image signals *(Japanese)* 87−33802
quantization distortion and perceived quality of PCM tone signals 87−19380
quantization error in differential PCM of Laplacianincrement inputs *(Japanese)* 86−43182
R-DAT, Sanyo, development *(Japanese)* 87−77056
radio communication system, quantizer parameters determination 85−8306
radio links, digital, discrete system *(Polish)* 88−59981
radiograph compression using predictive coding schemes 85−57431
random noise suppression, modelling and simulation techniques 87−19382
Raytheon digital multiplexing systems 86−23592
remote model control with a microcomputer 85−40200
remote power supply system for PCM-480 line regenerators 86−34513
remote switching system, review 87−48776
repeaters, active equaliser design *(Czech)* 85−20001
repeaters for coaxial lines, LF distortion compensation using quantised feedback *(German)* 85−8289
residual-excited LPC equipment, design and performance *(Japanese)* 86−30449
robust and data compressed coding scheme using interpolation error 87−33640
SAW band-pass filter for PCM optical-fibre systems 87−53868
scalar quantisation, oversampled sigma delta modulation 87−54890
second-generation PCM 30-channel basic system with E and M-signals *(German)* 87−55887
semiconductor injection laser PCM at 2 Gbit/s using Si monolithic bipolar IC multiplexer 85−24572
semiconductor laser, gain-switched, pulse-code-modulated light generation with high bit rate 85−2328
semicustom circuits in telecom., past experience and future needs 88−3412
sequence generator for optical fibre links up to 160 MHz 87−31754
SGS M116 signal processor for digital exchanges *(German)* 88−35290
SGS-Thompson Microelectronics VLSI dedicated circuits for PBX appls. 88−67194
Siemens microprocessor-controlled meas. instruments for PCM transmission systems meas. 87−48405
signal modulation for transmission, PCM, TDM and delta modulation *(German)* 85−13456
signal transmission unit, PCM, for power transmission line fault location, prototype testing *(Japanese)* 86−4230
signal-processing codec filter for PCM appls. 87−5973
signalling tones on PCM channels 86−43137
single mode fibre ISDN, long distance and local *(German)* 88−21789
SITAN algorithm, data compression techniques 87−42194
SNR, time functions, probability densities and quantising curves *(German)* 86−64171
soft decision demodulation to reduce the effect of transmission errors in logarithmic PCM transmitted over Rayleigh fading channels 85−30160
soft-decision demodulation and bit erasure correction, log-PCM 88−14584
Sony Video 8 PCM adaptor for Hi-Fi sound *(German)* 87−13979
sound broadcasting, error control system using range transmission *(Japanese)* 88−35651
sound broadcasting system *(Japanese)* 85−47630
sound coding within 2×64 kbit/s using instantaneous dynamic bit allocation 88−73093
sound receiver for direct satellite broadcasting *(Japanese)* 85−31175
sound transmission, digital, in video signals using PACM *(German)* 85−14435
space division (modulation transparent) switching for wide band networks 85−47109
SPC-CCIS-telephone networks, dynamic channel allocation 85−63242
speech, digital coding techniques *(Norwegian)* 87−55012
speech, digital noise suppressors, comparative study 85−41870
speech, real time vector predictive coding 88−3001
speech, real-time ADPCM encoder using variable order prediction [speech] 87−19515
speech, rule synthesis technology 86−48804
speech ADPCM coding, effect of finite word-length arithmetic processing 86−64177
speech ADPCM with hybrid adaptive quantisation 86−22962
speech codecs, low bit rate and wideband *(Japanese)* 88−21818
speech coder for medium and high bit rate appls. using modulo-PCM principles 85−46725
speech coding, ADPCM coders, predictor mistracking prevention 85−19401
speech coding, ADPCM with backward-adaptive algorithms for noise feedback and postfiltering 87−61735
speech coding, ADPCM with multiquantizer 88−40862
speech coding, variable-rate systems, review 85−19404
speech coding algorithm based on ADPCM with multi-quantiser 87−27267
speech coding by interpolative DPCM *(Japanese)* 87−27251
speech compression for storage and transmission using silence deletion 87−33666
speech database exchange format using PCM/VCR technology 87−19461
speech decoder for modulo-PCM 88−52362
speech prediction algorithms based upon ARMA filters 86−69028
pulse-code modulation continued
speech processing, coding techniques and applications 85−19366
speech quality of conversational packetised voice communications 86−43205
speech signal subband encoding and transmission *(Japanese)* 86−29758
speech signals, noiseless encoding 87−75741
speech signals, pitch prediction and preprocessing, comparison of effect on DPCM systems 86−22963
speech synthesis techniques, ADPCM coding *(French)* 88−45972
speech synthesis using ADPCM method *(Italian)* 85−13504
speech synthesiser, multipulse LPC technique based, architecture design 85−46713
speech synthesizers state of art in 1980s *(Czech)* 85−14563
speech transmission using modified ADPCM 88−8669
speech waveform coders performance with noise spectral shaping 85−57295
statistical DPCM codec for transmission of TV signals at 30 Mbit/s 87−48737
still picture encoding technique, comparison using computer simulation *(Japanese)* 85−30359
still picture encoding with successive clustering and predictive vector quantisation *(Japanese)* 87−48002
sub-band ADPCM coding for high quality audio signals 88−73094
subband coding of color images using finite state vector quantization 88−73244
subband coding of digital images using symmetric short kernel filters and arithmetic coding techniques 88−73246
subband images, encoding using adaptive vector DPCM 88−59289
subscriber lines, TCKA terminal *(Polish)* 88−41455
subscriber loops, digital 1+1 carrier system 85−42332
Swiss PTT digital data network for 2400, 4800 and 9600 bit/s transmission, equipment aspects *(German)* 88−14942
Swiss public telecommunications networks, digitisation aspects *(German)* 87−13213
switched capacitor low-pass filter, design *(Spanish)* 85−61062
switched predictor adaptation of DPCM-AQB speech coder using an imbedded vector quantisation 85−41869
syllabic companding and 32 kb/s ADPCM performance 86−22964
symmetrical systems for subscriber network digitalization 88−15237
synchronisability of PCM formats incl. NRZ, Manchester and Miller coding 85−7812
synchronisation in PCM system 87−55854
synchronous tandem algorithm for 32-kbit/s ADPCM 86−29694
systems, idle channel noise determ. 86−36899
T1 basics, understanding for network changes 87−40266
T1 capacity doubling using ADPCM 87−33906
T1 digital communication carriers 87−55930
T1 for digital circuit multiplication for capacity increase 87−33905
tandem transcoding without distortion accumulation 86−43167
tandemable ADPCM/PCM transcoder, 32 kbit/s, microprocessor based 87−75707
tape recorders for home use, design *(Japanese)* 86−24212
TDMA subscriber system and direct digital interface to digital exchange 88−59938
technical transmission measurements and technical switching tests of KZV and PCMX with the PCM-measurement system K1151. I *(German)* 85−3286
techniques and appls. *(German)* 86−43126
techniques and appls. *(German)* 86−43127
teleconferencing, still-frame image transmission using DPCM/interpolative coding 88−73724
telephone environment, voice-excited predictive coder (VEPC) implementation on a high-performance signal processor 85−47277
telephone exchanges, digital multifrequency detector for PCM systems 86−4441
telephone junction cables for rural areas 86−30541
telephone junction network, WDM system 88−46479
telephone line quality parameter test set VF-PCM P2011, features 87−14377
telephone network in Italy with optical fibres, broadband communications for ISDN 87−48472
telephone signal transmission over network, quantisation distortion study *(German)* 85−2738
telephony, digital signal processing in American network 85−57212

Arkad'ev-Marks voltage-pulse generator with rectifier elements 85−22713
Arkad'ev-Marx generator with capacitive coupling 86−40963
Army Pulse Power Centre, multi-megawatt facility, data collection and reduction 87−43267
artificial shaping line with antiresonant tuned cats., design calcs. 88−44089
astable cct. with MAA 723 IC *(Czech)* 86−838
ATE appl., expanded capabilities 85−64166
AURORA, operating in electron injection mode, evaluation of electromagnetic environment produced 85−2598
automatic time measurement, IC commutation charcts. *(Italian)* 87−41617
avalanche pulse generator using transmission lines, development *(Japanese)* 87−14790
avalanche transistor circuit generating steep-sided variable-width pulses 86−52728
baud rate generator, six-frequency 85−33718
BBC micro based pulse generator system for NMR 88−4506
benchtop pulse generators, suitability for high-speed logic design 85−54735
biphase pulse generation using D-type flip-flops 85−44997
biphasic pulse burst generator for afferent nerve stimulation, myoelec. prosthesis sensory feedback appl. 87−35444
bipolar generator of voltage pulses, for three-gap streamer chamber 86−44586
bipolar pulse generator for vacuum insulator flashover studies 85−27527
bipolar pulse tester for semiconductor devices 87−29145
bipolar transistor cct. appl., with controllable negative resistance region *(Czech)* 88−70945
bipulse regenerators for optical communications systems 86−30812
bistable LED, self-excited oscillation and monostable operation *(Japanese)* 85−12739
BLACKJACK 3 generator for staged plasma-erosion opening-switch current rise time sharpening 87−22616
BLACKJACK 5 pulser, power flow enhancement 85−5250
Blumlein cable pulser with flashover switch 87−22630
bridge, stability increasing method 86−20373
bridge timing cct. design 87−44677
broad-band driving of echographic arrays using 10 ns-500 V efficient pulse generators 87−63999
broadband microwave bursts, kW/kV order, single ps photoconductive switch *(Japanese)* 87−73646
capacitive stores for pulse generators, parameter optimisation 86−19523
capacitor discharge pulser for powering single bunch kicker magnet 85−5234
capacitor energy storage devices, pulse convertor for stabilised charging *(Russian)* 87−58346
cascade MC-generator with flux trapping 88−49058
CERN Antiproton Collector, 400 kA pulse generator with pseudo-spark switches for plasma lens 87−21337
characterization of logic devices with photoconductively generated picosecond pulses, VLSI 88−38479
charging of capacitor storage devices 86−67098
CIRC circuit anal. simulation program for high explosive helical magnetic flux compression generator 88−49060
circuit for freq. variation without changing duty cycle 85−54713
clock generator for Micro-270 32-bit microprocessor 87−44926
clock pulse generator cct., LSSD, appl. to logic block testing 86−27418
clock pulse generator for tape storage control unit 86−27417
clock signal generator, high performance, description 87−5932
clock-chopper testability under chip pin-limited conditions 86−27213
CMOS charge sensitive amplifier cable driver combination 86−34591
CMOS-IC-based short-pulse generator 87−23991
coaxial pulse matching transformer for high-power current pulses generation 86−67543
code generator for controlling high-voltage pulsedevices 86−67093
cold-cathode gas-discharge modulator tube, high-power, for radio equipment 85−61658
Commodore 64 computer appl. 88−10042
compact modulator for generating flat 250 kV, 1 μsec pulses for high impedance thermionic diode 87−37080
control method for pulse voltage test generators *(German)* 86−62491
control unit for pulse generator using thyristors for electrochemical machining appls. *(German)* 86−67091
controlled-waveform pulse generator for laser pump gas-discharge lamps 86−40960
controller, multimicroprocessor based, for static frequency changer 87−4793
controller for pulse generator thyristors of betatron 87−73291
converter for HV source calc. of adjustment charcts. 85−10003
coplanar transmission lines, capacitance free generation and detect. of subpicosec. elec. pulses 88−40068
correction circuits, parameters calc. 86−20375
Crossatron switch for 7390 thyratron replacement in radar transmitters 87−43271
Crossatron switch for megawatt average-power command-charging system 87−43272
current (multi-megampere) interruption by explosive conductor deformation 87−22671
pulse generators continued

Double-EAGLE, pulse generator, asymmetry reduction 85−5249
Dragon low impedance megavolt modulator for performing relativistic electron beam experiments 85−23349
driving cct. for a variety of loads 86−65201
EAGLE and Double-EAGLE, high power, Marx generator driven, water dielectric, low impedance 85−5248
edge-triggered, accurate, using Schottky TTL exclusive-OR gate 86−52727
efficient two-mode fully testable LSSD clock generator circuit 87−31975
EHT generation by horizontal deflection circuits *(German)* 88−6655
EHT pulsed voltage production for electrostatic coalescence 86−14057
electric spark machine's electrodes distance controlsystem *(Bulgarian)* 86−26438
electric strength of insulation on transmissionlines under voltage impulses, 7 MV 560 kJ impulse generator *(Czech)* 86−25591
electro-optics appls. *(Spanish)* 86−55757
electroacoustic pulse source for high-resolution seismic explorations 87−71286
electrodynamic conductor accelerator; fed by pulse linear generator, energy relationships anal. during discharge *(Russian)* 85−31649
electroerosive dispersion of metals, anal. of processes in generator *(Russian)* 86−46624
electron optics appl. *(Spanish)* 88−25058
electron spin resonance spectroscopy, high resolution multipulse generator, computer-controlled 85−22717
electronic circuits for synchronising and blanking pulses *(German)* 87−49296
electrostimulator, Eliman 206 two-channel therapeutic 86−50613
EM gun, inductive modulator circuit for energy transfer and storage 87−47128
EMP simulation, small parallel plates system 88−14420
EMP test installation for scale modelling *(French)* 85−7658
EMP-induced surges simulation in power overhead lines 87−22631
energy storage transformer design concepts for magnetic flux compression generators 88−43252
EPR relaxometer, computer-controlled time-internal generator 86−67099
equidistant pulse PLL generator with large-range phase shift, design and operation 87−31753
ETIGO-I pulse power generator, plasma diagnosis of ion diode 88−62499
explosive driven magnetic flux compression generator with plasma compression opening switches in planar geometry 87−22610
explosive fuses for magnetic pulse generators, opening switch design 88−43309
explosive generator driven single step Meatgrinder circuit for 100 TW generation 88−43313
explosive magnetic generators, foil behaviour of explosive commutators 88−43308
explosive magneto-cumulative generator for low cost pulsed power 87−22608
explosive MHD generators, assessment 87−36161
explosive pulse power complex, fibre optic monitoring, pneumatic control links of capacitor bank 88−49169
explosive pulse-power generator diagnostic using optical fibre pins 85−37569
explosive pulsed power, computational problems 88−37317
explosive pulsed power, firing complex 88−49056
explosive-driven sweeping-wave coaxial generator, tests 87−22612
explosively driven pulse power system driving explosive opening switch and inductive load 85−5257
exponential time-function generator, using two sample-hold ccts. 86−44327
fail-safe clock generation by majority logic, cct. design 85−22969
fast comparator generates insensitive pulses 86−27148
fast current pulser for superconducting samples 87−65930

pulse generators continued
fast pulses, measurement applications 86−14061
fast pulses in coaxial cable 85−44933
fast solid state high voltage pulse generator 87−63682
fast square pulse generation by an optoelectronic opening switch and a current charged transmission line 87−16942
fast switching thyristors replace thyratrons in high-current pulse applications 88−64546
fast transient field generation and coupling to antennas 88−2454
fast-switching thyristors for high-current pulse appls. 88−6694
fault protection in high power pulse modulators 87−37081

HV semiconductor thyristor switch, digital modelling of processes during operation in pulse current generator *(Russian)* 85−18313
HV short-fall pulse generator 87−5718
HV square pulse generator 86−835
HV stabilised source of charging voltages 85−22655
HV systems frequency-domain modelling, application of Numerical Electromagnetics Code 85−13024
HV testing transformer for controlled voltage surges generation *(Spanish)* 85−44047
HV thyratron discharger, high-speed 87−6352
HV variable-duration generator 88−56510
ICF for pulsed power appls. using lasers, coronal fluid dynamics study 88−62495
ICF using ion beam propagation, microinstability study 88−62493
implosion based pulsed power generation, stability requirement simulation 88−62494
impulse generator design by spectral representation and approx. methods 88−25057
impulse voltage generation facility at University of Buffalo 88−63517
impulse voltage generators, pulse duration parameter calculation for Arkad'ev-Marx generator 85−647
impulsive voltage and current generators, high-speed controlled vacuum discharger 87−59142
inductive and capacitor energy storage, comparative anal. *(Russian)* 86−7176
inductive energy storage plasma focus device, num. simulation 87−43263
inductive energy storage system, pulsed power generation by fuses and plasma erosion 88−18102
inductive pulsed power generator, CHECMATE, design and anal. 87−22603
inductively generated high volt. pulse using electron beam controlled opening switch 86−14056
inductively insulated Marx generator 86−31876
injection and switchout scheme for multipass laser amplifiers 87−46944
instrument testing, remote-control pulse transmitter *(Hungarian)* 88−29269
insulation test facilities, dielectric meas. 87−16373
integrated cct. with independent control of pulse period and duration 85−22712
intensifier-pulse generator for cathode-ray storagetubes 86−58214
inverse electron beam diodes, magnetically swept electron beam, GW VHF power pulses generation 88−19604
invertor circuits for oscillatory charging of storage capacitors for magnetic pulse generators 85−39924
invertor-fed synchronous motor rotor position sensor *(Polish)* 86−12794
jitter-less pulse generator elements using amorphous bistable wires 85−24220
Josephson sampler, direct coupled, with vortex to vortex transition sampling pulse generator 85−54975
K-3 VLBI 26 m antenna system delay time calibration equipment *(Japanese)* 86−37970
kinetic storage in pulsed energy sources *(French)* 88−11405
laser power supply, pulse generator realisation using thyristors *(Dutch)* 88−27245
laser pulse generators, scaling 88−20707
laser pulser using ferrite magnetic switches 88−34077
lasers, pulse forming network of low inductance and large energy storage density 88−24056
LEP injection system, high tension burst pulse generator 87−43268
light modulator supply cct., for 40-70 V 85−6224
light pulse generator, 50 ps *(Russian)* 88−65696
light pulse generator, Berkeley Nucleonics model 6020 85−14826
light pulser system for scintillation detector timing 86−20367
light pulses of millisecond duration for solar cell volt-ampere charact. meas. 87−22744
light-pulse generator for recording electrical signals, using Kerr cells 87−68203
lightning generators for testing lightning protection equipment *(German)* 86−52730
lightning impulses generation, using modified Marx cct. 85−17212
linear accelerator power supply using unipolar rotary pulse generator 87−51362
linear induction accelerator high-efficiency bidirectional pulsers 85−64350
linear temperature to frequency convertor, using thermistor in pulse generator 88−56825
linear voltage-freq. convertor for pulse generation *(German)* 86−20767
low impedance with subnanosecond rise time 85−5242
low-inductance capacitive stores, for pulse generators connecting elements 86−46622
low-jitter trigger generator, command charging circuit 87−43275
LPX facility, 200 kj, 1 μs pulse duration 88−32009
LSSD clock generation circuit 85−28613
LSSD system clocks synchronization to asynchronous signals 85−49961
LUEK-20 linear induction electron-ion ring accelerator, modulator-generator of accelerating pulses 88−68117

metallic glasses in high-energy pulsed-power systems 85−62201
MGX, high-power pulsed microwave generator development project 85−5241
microcomputer clock-pulse generator linked to DCF 77off-air time-standard 87−829
microcomputer-controlled two-pulse generator, for use in NQR spectroscopy 87−8640
microprocessor based digital pulse programmer appl. 86−44125
microprocessor based pulse generator based on Intel 8085 88−36087
microprocessor-based GPIB compatible programmable pulse generator 87−77289
microprocessor-controlled programmable pulse generator 87−29146
microsecond Marx generator for intense electron beam accelerator *(Chinese)* 88−36334
microsecond square HV pulses generation for high-current electron accelerators 87−65932
microwave dual-gate MESFET, appl. in high-pass amplifier and fast pulse generator 88−56980
microwave oscillator, temperature compensated, using synthetic quartz crystal *(Japanese)* 87−66564
microwave PCM transistor power generator 88−56956
microwave pulse generation by relativistic high-current electron beams of microsecond duration 85−45210
microwave pulses generation or gating with picosecond speeds, technique 87−45289
MIGUS multiple impulse generator for EMP simulation 88−4509
Migus-EMP generator simulator for examining EMC *(German)* 87−68799
Mini Marx pulse generator as spark gap trigger, design, electrical characts. 87−22629
Modul'-A5-1 installation, gas jet compression 88−49163
modulator technology, conf., Seattle, WA, USA (June 1986) 87−36323
monostable multivibrators, appl. 88−32154
MOS clock driver for Zilog Z8002 microprocessor 85−45135
MOS device based ccts. for time bases and clocks *(Spanish)* 86−67100
MOS transistor output, laser excitation appl. 86−13993
MOSFET clock driver circuit with delay- and power-savingfeatures 85−61347
Mosmarx voltage multiplier, comparison with Cockroft-Walton sextupler 88−63490
motion and field sensors, pulse wires as magnetic pulse generators *(German)* 86−55635
MSK signal generator for demodulator study 87−52455
multi-paralleled thyratron, repetitively pulsed, power supply for high power gas lasers 87−43277
multichannel generators of shifted square pulses with RC integrating circuits 88−32053
multichannel high-voltage nanosecond pulse generator 86−67096
multichannel memory-scanning time-mark units 88−25110
multifunctional pulse sequence generator for pulse NMR 88−56514
multimicroprocessor-based controller for a staticfrequency changer 86−6958
multimode pulsewidth modulator, 8085A microprocessor based 87−37001
multiphase control-pulse generators DE 87−554
multiple pulsed homopolar generators, pulse shaping 88−43210
multistage wave generators for fast rise pulse applications 85−5239
multivibrators derived from monostable circuits *(Czech)* 85−54756
nanosecond, using avalanche transistors 88−25055
nanosecond and subnanosecond pulses generation, using fast shutters 86−29206
nanosecond current pulse generator for pumping semiconductor lasers 85−7474
nanosecond kV gradients generation by fast-recovery drift diodes 87−59249
nanosecond light-pulse generator for spark discharges diagnostics 86−68652
nanosecond microwave pulse generator diagnosis , using calorimeter and resonance wavemeter 88−71277
nanosecond pulse-train generator, high-power 88−32052
nanosecond pulses generator, for firing HV discharge gaps 86−13992
narrow pulse generator, design using Am687 comparator, high-speed circuit testing appl. *(French)* 85−39958
nerve stimulation system using Janus receiver 88−16750
NMR expts., modular pulse programmer use *(Spanish)* 88−44090
non-overlap clock generation circuit, cct. design using FETs 85−17211
non-overlapping clock generator, cct. design for level sensitive scan device latch appl. 87−5929
Nova laser for ICF, pulse power systems, status and operating experience 85−2277
nuclear electromagnetic pulse simulator design 87−41532
operating principles and appls. *(French)* 88−70595
optical, stable pulsations of semiconductor lasers by optoelectronic feedback with avalanche photodiodes 87−46870
optical clock signal generation by vibrating crystal resonator *(Japanese)* 88−57860
optical pulse compression in 1.5 μm wavelength region using large-positive-dispersion fibre and grating pair 88−59203
opto-electric axle mounted pulse generators, design for railways 85−21894
optoelectronically switched resonators for microwave pulse generation 86−42429
paired nanosecond current pulses generator for laser diodes 87−65933
PAL subcarrier and sync pulse generator 86−20771
parallel connection of high-voltage voltage-pulse andcurrent-pulse generators 86−67097
partial discharges in dielectrics, primary standard, a battery operated rectangular pulse generator *(Spanish)* 85−33722
Particle Beam Fusion Accelerator II, conceptual design 85−4178
Particle Beam Fusion Accelerator II (PBFA II) Marx generator engineering and assembly line technology 87−21330
Particle Beam Fusion Accelerator Marx generators 87−21329
PBFA II, light ion beam fusion research progress 87−43208
PDP 11/23 based pulse generating and data recording system 87−28984
performance evaluation 88−16247
periodic precision pulser with a Gaussian noisegenerator 86−46620
PG 5000A from Colby Instruments, design and characts. 87−56717
photoelectric meter of time intervals between spark-discharge flashes 88−36123
picosecond light pulses generation, for pulsed photocells transient characts. meas. 86−29001
picosecond optoelectronics for microwave applications 85−62464
picosecond pulse generator, using charge-storage and tunnel diodes 87−5716
picosecond pulses for GaAs IC testing *(Swedish)* 85−45747
picosecond pulses shaping methods 85−3935
piezoelectric transducer parameters checking, using DC amplifier and sawtooth voltage generator 85−26274
pixel clock sequence generation for resonant scanner linearization techniques [pixel clockgenerator] 86−20368
plasma compression switches, explosive driven for pulsed power generation, modelling results 88−43304
plasma compression switches for explosive-driven magnetic flux generators, characts. study 88−43305
plasma emitter power supply, with adjustable parameters 88−38386
plasma erosion opening switch, application to a nanosecond generator 88−24970
plasma erosion opening switch, application to inductive energy storage and neutron burst production 88−24971
plasma erosion opening switch, fluid simulation of the conduction phase 88−30797
plasma opening switches on the pulse power generators Pollux and KALIF 88−30795
plasma vacuum opening switch at ILE, pulsed power compression research 88−30796
PLL-based clock generation cct., design, performance and CMOS implementation 87−44994
Pockels cell driver for cavity dumped regenerative laser amplifier 86−42372
Poisson pulse-train generator 85−22711
Poisson type random pulse train generator *(Polish)* 85−33720
polyphase motors, programmable control *(German)* 85−54737
portable generator of subnanosecond fast-electron pulses 88−70512
power and voltage gain of pulse-forming lines with double-bounce switching 85−649
power generation using explosive current peaker wires, commutation tests 88−43307
power generation using plasma erosion switches 88−43303
power input to pulse generator inductor *(Russian)* 86−62492
power modulation, history 87−43265
power MOSFETs, drive cct. *(Bulgarian)* 85−49781
power pulse generation using magnetically stored energy 85−648
power pulse modulation applied to series resonant convertor 87−22561
power source for tacitron photomultiplier 86−40900
power sources with capacitance energy stores, three criterion optimisation 87−5714
power supplies, pulsed, capacitor and inductor linking and pulse generation 85−39105
power supplies, pulsed, for industrial electrostatic precipitators 86−40961
power supplies for injection lasers 87−65831
power supply energy characts. improvement for pulse loads at constant voltage *(Russian)* 87−36012
power supply for discharge excited excimer laser, techniques and development 86−58891
power supply for semiconductor laser, using MOS power switching transistors 86−57629

pulse generators continued
power supply system for HV electron gun with grid control 86−20285
power supply to CO_2 laser 87−2224
power system nanosecond test technique using pulse generator *(German)* 87−57520
precision flat pulse driver 85−61160
preionisation of gaseous mixtures for operation regime anal. 88−7272
prepulse suppression in microwave pulse-compression cavities 87−11021
product review *(Italian)* 88−22666
programmable, controllable by Elektronika-60 microcomputer 86−67094
programmable clock generator, high-speed design using free-running counter 85−22967
programmable clock-pulse generator for studying periodic signals 85−6223
programmable digital pulse generator for pulsed NMR spectroscopy 85−33721
programmable frequency divider, Fourier NMR spectrometer appl. *(Czech)* 87−66452
programmable generator of complex pulse trains 87−21108
programmable pulse generator for time control in digital systems, Am2971, DRAM/SRAM appls. *(German)* 87−10730
programmable pulse train generator for expts. in relaxation analysis 87−5720
programmable step generator for waveform recorder testing 88−16222
programmable step generator for waveform recorders testing 87−14356
programmable voltage step generator for automated test systems 88−29477
programmed TV synchronising generator, design *(Russian)* 85−26039
PROM programmer for Signetics 63XX series of PROMs, cct. 85−33717
pseudo-clock generator technique for data loss prevention in dynamic memory 87−10731
pseudo-random generator config. using AGA1K16 programmable gate array chip *(German)* 88−56507
pseudostochastic, struct. and appls. *(German)* 87−49775
PTC resistors as high power pulse switches 87−52893
pulse code sequence generator for optical fibre links up to 160 MHz 87−31754
pulse generating interface circuit for interfacing between Josephson logic and memory ccts. 86−52791
pulse power electronics, markets, device testing 88−70552
pulse power generation, ion beam focusing for ICF appls. 88−62487
pulse power generation, plasma channel stability for ICF appls. 88−62488
pulse power generation using laser driven implosions, dynamics study 88−62497
pulse REB generation system 87−52451
pulse synchroniser, computer controlled *(Russian)* 85−56751
pulse waveform standards for electro-optics 87−29270
pulsed power accelerator for fusion research, SF_6 reprocessing system 87−21331
pulsed power accelerators, low-jitter Marx generators for reliability 87−21328
pulsed power and target implosion, conf., Yokohama, Japan (Sept.-Oct. 1987) 88−55847
pulsed power generation, explosive flux compression using laser irradiation ignition 88−62491
pulsed power generation, ICF simulation codes for radiative energy transfer 88−62489
pulsed power generation, ion beam expansions in ICF 88−62496
pulsed power generation, numerical anal. of target implosion and ignition 88−62484
pulsed power generation using ion beam ICF, numerical anal. of target implosion 88−62490
pulsed power generation using laser diodes, EM field study 88−62485
pulsed power generation using rotating ion beams, kinetic theory anal. 88−62486
pulsed power generators, explosive flux compression modelling 88−62492
pulsed power generators, sub-ohm, coaxial, 0.2 to 1 TW, design and development 85−5247
pulsed power sources, flashover ion diodes with cryogenic anodes 88−62500
pulsed power supplies, IEEE conf., Arlington, VA, USA (1985) 87−16295
pulsed power technology, anode plasma behaviour in pulsed ion diodes 88−62498
pulsed-power applications, numerical simulations of MHD and plasma processes 88−37318
pulser for main ring beam extraction 86−25068
pump-lamp firing-pulse generator for solid-state lasers 86−42609
pumping generator for a semiconductor laser, with tuned transformers and switched ccts. 85−29829
push-pull off-chip drivers, implementation, characts. and open-loop gain limitations 87−44708
PWM waveform generation using microprocessor, three-phase invertor appl. 87−30752
quartz, stabilised, programmable, synchronous monoflop *(German)* 85−54966
quartz-stabilised ECL pulse generators *(German)* 88−56513
quasitrapezoidal shape current pulse generator, high-power 88−12253
quasitriangular current pulses supply for betatron magnet 86−18210
radar signal simulator, pulse generator design 85−58192
radial transmission line, matching problems 87−21935
radio noise meters checking below 30 MHz, use of G5-60 generator 85−64164
rail guns driven by helical flux compression generators 88−40511
railgun energy source, pulse forming network 87−47127
random pulse generator, fast, time non-variant and time variant design *(Chinese)* 88−50060
random pulse generator, uniform amplitude for testing MCA pulse rates 87−5715
random pulse generator with a uniformly distributed amplitude spectrum 88−44088
random pulse generator with time distrib. obeying Poisson's law 86−20369
random pulser based on photon counting 86−46619
RAVEN repetitive pulser, 5 kJ, 1.5 MV, for performance testing of transformer pulse-charging systems 85−5219
RC generators, low freq., thermistor limitation and amplitude stabilization *(Polish)* 87−552
RC-TTL level generator with variable mark-space ratio *(German)* 85−39959
rectangular pulse train generator, variable rate and width 85−11100
rectifier single channel control method *(Russian)* 87−78773
relativistic electron beams, long-pulse, high-voltage pulse generator 88−34242
relativistic multiwave Cherenkov generator 85−11848
pulse generators continued
remote fault localisation in MV networks, peak pulse generators utilisation *(Polish)* 88−5397
repetition rate power system evaluation facility 88−64828
repetitive pulse generation employing inductive energy storage and fast recovery vacuum switches 85−5223
repetitive pulse power component technology advances 87−43266
repetitive pulsed power components, with high average power 85−5240
repetitive spark gap operation−a review of the Tamarron workshop 85−5295
research trends of high powered pulse generators *(Korean)* 86−46623
resonance generation of high-voltage pulses, design and operating principles, application to construction of MV pulse generators *(Russian)* 85−60290
resonance-switching overvoltages in a magnetothyristorgenerator, laser pumping appl. 86−832
resonant megavolt pulse generator 88−25056
RF pulse modulation, correct timing of sample-and-hold system improves leveling performance 87−66446
ring wave pulser, freq. tunable 86−38400
ring wave pulser, frequency tunable 87−26864
rotating machinery pulsed power system design, water and water/ethylene glycol mixture dielectrics 87−15879
S-diode nanosecond pulse generators for modulationof semiconductor generators 86−40964
SAR system, direct digitally synthesised exciter 88−60261
sawtooth voltage generator for reference-pulse shaper, synchronous amplifier appl. 88−56534
sawtooth voltage generator with nonlinearity correction *(Czech)* 86−31454
seismic signal source using pulse generator and capacitive battery *(Russian)* 85−33719
self-adjustable pre-event pulse generator for shock wave experiments 87−77291
self-correcting clock recovery circuit with improved jitter performance 87−31973
self-matched high-voltage rectangular wave pulsegenerator 86−14060
self-optimizing computer clock-generation system 85−54972
semiconductor diode laser pulse driver, design for high repetition rate operation *(Polish)* 85−642
semiconductor HV pulse generator with capacitive load 87−5717
semiconductor lasers, mode-locked, using repetitive short pulse drive current, dynamics 88−14168
semiconductor light emitters supply 85−22709
semiconductor optoelectronic switch for picosecond pulse generation, photocond. meas. appl. 85−2145
sequencer for NMR and other applications 87−41531
sequential waveform generation by picosecond optoelectronic switching in Si 87−23993
shock wave-explosive energy generator of PZT ferroelectric ceramics 88−49057
short pulse grid pulser for positron generator gun *(Japanese)* 87−14681
short-circuited delay line magnet excitation using pulse generators 87−22632
short-pulse explosion-driven generator, conceptual design and cct. model 88−43296
short-time operation generator, effect of EM loads on weight 87−58006
simulation of the transient response in a pulse voltage generator 85−22715
single shot pulse generator, falling edge-triggered, using Josephson DC powered flip-flop 85−645
SIPMOS transistor operation with grounded loads, gate voltage generator 85−17214
slow wave line-type pulsers 87−37072
Snop-2 MA current-pulse generator, with parallel coaxial lines 86−57721
solar powered pulser, appls. to elephant control and communication lasers 85−644
spark chambers feeding with HV RF pulses 85−9099
spark gap switches, HV thyristor pulser 87−43330
spectrally efficient pulses, practical generation 86−16358
spectrum generation with current break-off and differentiating section 87−63430
spiral surge generator analysis *(Russian)* 85−32587
square pulse generator, optoelectronic switching in a current charged transmission line 87−37068
square pulse generator, using thyratron 88−25053
square pulse generator cct. for chronocoulometry 85−8863
square pulse signal generator for estimation of modulated transducers *(Russian)* 86−38405
square-pulse shaper for unmatched load 87−16961
square-wave, with subnanosecond rise and fall times 86−20371
stage switching techniques with combination of breakers and fuses, flux compression generator appls. 87−22672
standardisation for LV equipment, devices and protection components *(German)* 86−52729
standardized exponential representation of the control word for pulse generators *(German)* 85−44931
stepping motor drive pulse generation improvement *(German)* 88−62388
stochastic reference signals generator, for testing gamma spectrometer data acquisition system 88−29906
stroboscopic pulse generator for holographic interferometry 87−61250
stun gun for self defence, DIY 87−958
subnanosecond current-pulse generator with digital pedestal control, laser diodes testing appl. 85−8862
subnanosecond high-voltage pulse generator, 400 to 500 V 87−70669
subnanosecond pulse generator, microstrip cct. *(Czech)* 87−31756
subnanosecond pulse generators implemented by GaAs FET 87−59250
subnanosecond pulse shaper using theory of solitons *(Slovak)* 87−52468
subpicosecond electrical pulse photoconductive generation, meas. appls. 87−44680
subpicosecond electrical pulses, generation on coplanar transmission lines 86−42422
superconducting coils for pulse power generator energy storage appls., coupled wave model 87−18569
switch debouncing, solution 85−28417
switch for pulse generation and sampling, based on GaAs substrate 86−38317
switch generators, quasi-optimal control of active elements using state identifiers *(Russian)* 88−70583
switch indicator cct. 85−11101
switched timing generator 87−23992
switched-capacitor-based config., pulse height depend. on cct. parameters theoretical study 86−34621

pulse generators continued
switching problems, inductive storage plasma focus device, num. calc. 87−43486
synchronous supply of flash lamps, HV current-pulse generator 87−5675
synthesis of pulsed circuits with thermal interactions 85−22702
system bus controller μPD71613 for V60 microprocessor *(Japanese)* 87−37420
tariff pulse generator, review 87−69799
TEM mode fast transient pulse launching, distributed switch 88−2611
TEMPO machine, transformer-powered megavolt pulse generator 87−44679
testing of semiconductor structures, automatic formation of ohmic contact to probe 86−17889
Tevatron Quadrupole Extraction Regulator, design 86−25069
thyratrons as switches for high current pulse delivery 87−37849
thyristor HV nanosecond pulse shapers 85−22740
thyristor medium-power square-pulse generator 85−6222
thyristor pulse commutator, with dynamic balancing cct. 87−16866
thyristor pulse current generator with large output, characts. and operation *(Russian)* 86−67092
thyristor shaped rectangular voltage pulse generation, commutation processes 85−39960
time control peripheral for pulse train generation and interrupts, National Semicond. device DP8570 *(German)* 87−10946
time interval locked, US velocity meas. appl. 88−12254
timer with adjustable mark-to-space ratio, cct. design using triangular wave generator 85−49779
timing generator system with scanning delay facility 85−26258
timing/energy pulse generator, design 86−27149
train generator cct. 85−61161
train generator with equiprobable random-pulse distribution 86−8337
transformer inductive storage unit for generatinghigh-voltage pulses with flat tops 86−57723
transient disturbing voltage simulation to safeguard EMC *(German)* 86−62490
transients in a tuned circuit subject to a video pulse-code sequence 88−6695
transistor multiphase pulse generators with threesignal levels *(Russian)* 85−49780
transistor waveform generator and shaping circuits 86−57735
transmission line designs with a measured step response of 3 ps per centimeter 87−23994
transparent laser dischargers 88−25851
traveling wave anal. with combined E and H-field probe 87−22614
travelling pulse word generator, 8.8 Gbit/s operation, design using hybrid microstrip/GaAs MESFETs 87−52449
triangular voltage generator controlled by NTA-1024 multichannel analyser, for NMR spectrometer 87−5719
trigger pulse generator with don't care condition 85−49954
triphasic bipolar pulse generator, cct. 85−643
TTL clock and control pulses generator for CCD image sensor *(Slovak)* 85−28493
TV sync. pulse generator cct. 86−8055
TV sync. pulse generator unit *(Russian)* 87−34799
TV test pattern generator−test circle for the screen *(German)* 88−42174
two-channel pulse generator with linearized scale for pulse width setting *(Russian)* 88−32050
two-phase clock generation cct. configs., switched capacitor filter synchronisation appl. 86−52726
two-stage pulse generator for Cu vapour laser 87−7418
TWT, O type, nonstationary processes during video pulse excitation 87−17652
ultrafast photoconductor pulse generators and sampling gates for characterization of high-speed devices and transmission lines 88−40079
ultrashort HV pulses, generation 87−44681
ultrashort light pulses, laser generation 88−65923
ultrastable pulse generator for stabilisation of an ADC 87−17180
universal pulse generator *(German)* 87−31755
US wave velocity meas., ring cct. 87−553
US wideband transceiver using HV MOSFET pulse generator *(Spanish)* 87−57449
user friendly, cct. 85−11102
vacuum spark gaps for switching voltage and current pulse generators *(Russian)* 86−62489
Van de Graaff 3 MV accelerator, using laser photoelectron emission from cold Y_2O_3 cathode 87−8816
van mounted 36 kJ pulser, design, fabrication, eval., charging circuit, midplane spark gap switch 87−43270
variable delay digital-to-time convertor, for pulse generation and time domain meas. 87−70533
variable duty cycle pulse generator enhancements, ccts. 86−27147
variable freq. pulse generator for toy electric train speed controller *(Spanish)* 85−17213
variable frequency and duty cycle, pulse generator circuit 85−6220
variable pulsewidth generator using three ICs 86−52808
VCR special effects video, stable vertical sync pulse generation 86−11296
vicalloy compound mag. sensitive wire in disturbed mag. field, output characts. 88−71881
video traffic, clock pulse generator for CCD sensors *(German)* 85−43013
voltage driver, multi-output levels, cct. 86−57720
voltage generator for electron gun, parameter improvement using H tiratron *(Bulgarian)* 88−5782
voltage-pulse generator for electron gun 88−24980
voltage-pulse generator with resistance coupling for insulation testing 87−37069
water dielectric pulse power driver for inert-gas halide lasers 87−19021
waveform stimulus subsystem, advanced technology multifunction detection system 88−29478
wide-band square-pulse generator 86−14058
wide-gap spark chambers operating in storage regime, reliability improvement 86−44587
wideband, for NMR spectrometers 87−36989
width selecting system for e^+ beam transport line *(Japanese)* 87−14682
ZOPAN electronic test-measuring devices, design and features *(Polish)* 86−38398
CO_2 laser and pulse power generator synchronisation using triggered switch 85−5326
Co-V-Fe/Ni-Fe short composite wire, pulse generation, fast remagnetisation and domain stability studies 86−28602
$(Fe_{1-x}Co_x)_{75}$ $Si_{10}B_{15}$ amorphous mag. wires, switching characts. 88−33516

pulse generators continued

CCD imaging devices, fast serial readout system 85−42893
charge division position sensing, ratio-to-digital convertor 87−41886
charge integrating ADC, particle identification via pulse shape discrimination 88−29907
charged particle discriminating X-ray detector 86−5830
correlometer based on pulse analyzer 86−70359
counting losses, real-time correction in γ-ray spectroscopy 85−15249
data recording using unitary-to-binary convertor with asynchronous control 85−20528
data transfer from LP4840 multichannel analyser to Elektronika D3-28 computer 86−25147
dE/dx electronics for Mark II experiment atSLAC 86−50420
dead-time and pulse pile-up losses in γ-ray spectrometry, empirical correction 85−4208
drift chamber, maximum allowable O_2 contamination in xenon-methane gas, electron attachment coefficient measurement 88−54412
dual multiscaler based on a microcomputer 86−25146
efficiency calc., of systems with paralyzable and nonparalyzable elements 85−31757
electric field pulse amplitudes, digital meter with automatic sensitivity calibration 88−16246
exo-electrons energy meas., using gas flow proportional counter 85−37937
extraterrestrial intelligence seeking, use of multichannel spectrum analysers 86−17872
fast module for pulse shape analysis 88−22992
fast multichannel scaler, dwell time and dead time 87−41887
fast pulse-shaping amplifier 88−22993
gain monitor and calibrator for a single-channel pulse height analyser 88−54444
gain stabilized single channel analysers in gamma-ray spectrometer 85−59215
high speed differential peak detector for servo position error signal 85−11048
high-speed pulse count-rate meter with high dynamic range 85−9109
high-speed spectrometric analog-digital converter, using bit-by-bit balancing 85−26725
intelligent measurement in CAMAC system using ZX spectrum 87−3394
intelligent multichannel analyzer for stability supervision of pulse height spectra 87−71033
interface between an oscilloscope and a multichannel analyzer 87−29037
interpreter comprising multichannel analyser and CAMAC commands 85−26692
inverse function digital generation, energy distribution of electron emission calc. 85−15251
light measurement technology moves to the production line 85−31608
linear amplifiers and discriminators in single detector systems, dead time effects 86−52702
liquid scintillator, pulse-height distrib., temp. depend. 85−59210
medical microprogrammed nuclear counting channels and pulse-height analyser 85−48246
meter with anomalous-reading selection 85−14713
microchannel plate arrays, triple-layer, operating characts. in pulse-counting mode 85−59217
microcomputer interface for amplitude analyzer 87−49482
Mossbauer spectra area meas., use of internal standard 87−29682
multichannel 2-D autoregressive spectrum estimation 88−3100
multichannel analyser, microcomputer appl. 85−44947
multichannel analyser, multiprocessor synchronization with monochromator 85−22738
multichannel analyser data, PC assembly program with RS-232C data transfer *(Japanese)* 88−54445
multichannel analyser interfacing to Elektronika-1001 minicomputer 87−70386
multichannel analyser time resolution increase, using CCD analogue shift register 87−59266
multichannel analyser Violinist I, appl. in variety of monitoring instruments 85−43288
multichannel counter based on pulse analyzer 86−14085
multichannel photon counter, fast, for fluoresc. spectroscopy 86−11505

pulse height analysers continued
multichannel scaler with 250 ns channel advance 85−59211
multiplicity registration in hodoscope systems with a large number of registration channels 88−36390
neurons' pulsed activity, recording loss and relationship with correlations 88−27884
optical multichannel analyser system using a charge coupled device detector, thermoluminesc. meas. appl. 85−26723
panoramic eight-channel magnetic electron-energy analyzerwith circular poles 86−70357
PD meas., computer aided 88−29268
peak pileup effects correction using periodic and random pulse generators 87−50186
peak voltmeter design for nanosecond pulses, w.r.t. CAMAC standard 86−44596
plasma diagnostics with spectroscopic apparatus, multipoint optical multichannel analyser-based 87−35017
portable multichannel analyser appl. in nucl. safeguards 86−50429
pulse-height analyser, multi-channel, dead-time effect, Monte Carlo simulation 85−59209
pulsed n generator, energy converter, time-of-flight and pulse height anal. 86−50294
real-time multitasking multiuser nuclear system for clinical applics. 87−63742
scanning multichannel pulse-height analyser, appl. to short-lived radioactivities 85−20854
selector of pulse amplitude and duration 86−60620
SETI, ultranarrowband searches with dedicated signal processing hardware 87−13807
SILENA BS27, dead time determ. 87−8870
single channel pulse height analyser, simple cct. design for student construction 85−54754
stretcher for storage and logical processing of pulsed signals 85−6242
TFTR prototype X-ray pulse-height analyser diagnostic 85−52983
time analysis using multichannel analysers, ns meas. for nuclear spectroscopy 85−31758
timing control unit for enhancing vidicon linearity in spectroscopy with optical multichannel analyser 87−35016
triangular voltage generator controlled by NTA-1024 multichannel analyser, for NMR spectrometer 87−5719
vidicon optical multichannel analyser with detachable electrostatic image intensifier, sensitivity improvement 86−27808
wide-aperture transition radiation detector for separating electrons from hadrons 85−9108
workstation control of ND66L pulse height analyser 85−43296
HgI detectors, pulse filtering 87−41885
Pu isotopic abundance determination by gamma spectrometers, mass spectroscopy results comparison 88−68301
U K-edge densitometry via X-ray beam, spectral resolution pile up behavior, throughput rate 88−68300

digital signal processing, frequency modulation procedures *(German)* 85−51600
digital techniques and ccts. *(German)* 86−36901
discrete-phase stabiliser mathematical model *(Russian)* 86−54416
fibre optic loop sensing system using PM LED, operation and characts. 86−2682
fibre optics temperature sensor, pulse modulated, using quartz resonator 88−36035
fibres, single mode, picosec. stimulated Raman generation, pump pulse fragmentation and fragment compression 87−26513
four quadrant time division analogue multiplier, design using pulse-interval amplitude-modulation 86−8365
frequency multipliers, dynamic transfer props. 86−47033
generator with inductive energy accumulator, electrovacuum apparatus protection *(Russian)* 87−59251
HP 8642A/B audio modulation section 86−65209
impulse-length-modulated magnetic recording *(German)* 86−47958
induction machine, PWM invertor fed, numerical control 86−12828
induction motors, PWM invertors driven, stabilising methods for oscillations suppression 86−12827
integrated services fiber-optic subscriber equipment 86−49607
intersymbol interference and jitter free pulse shapes, power and bandwidth efficient signals 85−62805
invertor with sinusoidal output current, loading indices 88−55433
invertors, fixed frequency sinusoidal tracking type, pulse-ratio-modulation appl. 86−7979
IR packet transmission, time division pulse modulation 87−3181

pulse modulation continued
laser diode noise reduction by superimposed pulse modulation, theory 85−46413
MOS modulated-pulse amplifiers revived 87−44610
multi-level signalling and multi-valued logic rules in digital communications 86−3753
narrowband AM/PM signals, response of Tanh limiter, theoretical study and appls. 85−25133
NB-TDMA mobile radio link, performance of DPM, Viterbi equalisation and channel coding 88−15385
nonlinear satellite channels, minimum mean square error equaliser 87−34505
optical communication, ultimate speed anal. 87−20517
optical reconfiguration of electrical networks 86−68961
optimum digital modulation, selection 85−57218
optimum sequence, optimum symbol-by-symbol detection, comparison 88−14597
PDM, two-dimens., phys. model 85−57200
PDM, two-dimens., phys. model 85−57201
periodically time varying partial response signalling with max. likelihood, performance anal. 87−54844
PFM, noise performance and SNR threshold 85−62800
power converters with multi-zonal pulse modulation, characts. *(Russian)* 86−61591
power convertor for single-phase HF link voltage conversion to 3-phase LF voltage 87−51379
power pulse modulation applied to series resonant convertor 87−22561
PPM optical channel, optimum joint slot and symbol synchronisation 87−61541
pulse compression, BYSON research radar 88−15662
pulse encoded line signals, error probability study *(German)* 85−52350
pulsed arc welding current modulation by periodic electrode wire feed 86−26446
pulsed signal reception with nonsinusoidal carrier, noise immunity 86−37056
push-pull convertors, core saturation prevention 85−563
PWM inverters with GTOs, design 86−12933
PWM-controlled converter, design 86−12935
pyrodetector responsivity for harmonic and pulse modulation of IR radiation *(Slovak)* 87−8630
radio signals with intrapulse modulation generated in acousto-optical spectral analyser, spatial spectra *(Russian)* 85−51607
rare earth metal-Co permanent magnets, influence of impulse shape on magnetisation 86−42141
RC filter, retuneable, based on pulse-controlled resistors *(Russian)* 85−17602
resonant link invertors, optimal discrete pulse modulation waveforms 88−75765
sampling theory, basic problems *(Polish)* 85−51622
self-contained voltage invertors using phase-pulse modulation, output voltage spectra *(Russian)* 88−55480
semiconductor injection laser supply, high-current pulse modulator design *(Polish)* 86−737
series-resonant power converter, pulse integral central system, design and stability 85−5167
shortwave radio broadcasting, 500 kW tetrodes 88−64177
solid-state components for radar, conf., London, UK (Feb. 1988) 88−31321
stepping motor, PM type with PLL servo system, dynamic charact. and stability improvement *(Korean)* 87−51258
sweep generator and synthesizer SWP 86−31452
telemetry data decoding and display in real time, use of microcomputer interface 87−48515
terrestrial digital radio broadcasting by digital modulation *(German)* 86−43955
tight upper bound on the probability of error due to intersymbol interference and Gaussian noise for correlated digital signals 87−27420
transistor pulse modulator with magnetron load, transients study *(Russian)* 86−40976
trellis codes for M-ary partial response 88−45950
two-dimensional pulse-density modulation, binarization procedure, error-diffusion algorithm 88−2954
TWT amplifiers, frequency-dependent nonlinear quadrature model 85−600
ultrasound holographic imaging system using high speed scanning with pulses modulated by Walsh functions *(Japanese)* 88−54812
UPS filter design using pulse ratio modulation 88−69542
weighted averaging, pulse modulation transforms *(Russian)* 85−46681
GaAlAs injection laser, ultrafast, analog, digital and short pulse modulation 85−62607
InGaAsP carrier injection modulator integrated with DFB laser diode, struct. and characts. 87−38948
InGaAsP constricted mesa laser with 1.3 μm wavelength, high-speed large-signal modulation at 16 Gbit/s 86−3139
InGaAsP-InP metal-clad ridge-waveguide lasers for optical communications 88−65723
XeCl laser, long pulse, generation of 300 psec pulse by direct mode locking using acousto-optic modulator and saturable absorber 85−2225

pulse motors *see stepping motors*

pulse oscillators *see pulse generators*

pulse position modulation
8b microcomputer for implantable biomedicalapplications 86−14294
acquisition sequences 88−27734
APD receiver, digital PPM over optical fibres 87−8279
autonomous acoustic positioning system for divers 88−54757
binary-interleaved coding on the degraded *M*-ary PPM direct-detection optical channel 87−56186
coded optical PAM channels in presence of timing jitter, performance anal. 88−45946
deep-space optical communication 88−53288
degraded optical PPM channel, coding options 85−30212
digital PPM amplitude division multiplex system with bandwidth compression *(Japanese)* 88−21857
direct detection optical channel, error exponents 86−65009
direct detection optical communication with colour coded PPM signalling 85−42617
direct-detection optical channels using APD-based receivers 86−65010
direct-detection optical communication systems, symbol and frame synchronisation 87−40895
direct-detection optical communication with color coded pulse position modulation signaling 85−37071

pulse position modulation continued
direct-detection optical PPM channel, convolutional codes performance 87−40949
encoding for RPV and remote-controlled vehicles, microprocessor appl. 87−2835
gain-switched semicond. injection lasers, PPM, theoretical and expt. study 86−29153
information transmission with pulse-position modulation *(German)* 87−33588
intersatellite communication, error correction, interleaving and differential pulse position modulation 88−67300
intersatellite PPM communication links, spatial and temporal tracking errors, loss factors 87−40947
invertor drive, double-frequency and carrier-sawtooth schemes 87−43280
laser diode communication systems, performance charact. 86−63835
line code design for digital pulse-position modulation 86−3746
line-coded digital PPM, synch. in repeated transmission systems 87−61561
microprocessor inverter controller for PWM orPPM schemes 86−6905
noisy photon counting channel with soft decision, cutoff rate 87−33747
optical channels, stretched pulse, pulse spreading estimation and decoding 85−62953
optical communication, detection alternatives 87−19378
optical communication, direct detect., with AlGaAs laser transmitters, APD detectors and colour-coded PPM signalling 88−22094
optical communication, laser diode performance impact on data rate capability 86−30841
optical communication, simultaneous slot and symbol synchronisation 87−40946
optical communication, turbulence effects 87−70085
optical communication with APD-based receivers, OOK and low order PPM modulations performance 85−14275
optical communications link, performance meas. 87−68525
optical digital link using SSMA technique, in-house data transmission, theoretical study *(Japanese)* 86−43844
optical fibre communications, orthogonal modulation 86−37887
optical fibre digital PPM system, expt. 88−22077
optical fibre links, signal transmission reliability evaluation, with differential pulse position keying 86−30816
optical fibre PPM communications, receiver bandwidth anal. 87−13709
optical PPM channel, multiplex operation and BER study *(Japanese)* 88−41705
optical PPM communication with diode combining, system design 88−35490
optical PPM communications, slot synchronization 87−19374
optical signal synchronisation technique 87−39607
photon counting channel charact. 86−54534
photon-counting channel, PPM weak noisy, efficient capacity 86−49000
PLL synchronised optical PPM communication systems, performance 87−20499
PPM and on-off keying in photon communication, performance anal. 88−45855
PPM Poisson channel, capacity and cut-off rate *(French)* 88−66240
pulse encoded line signals, error probability study *(German)* 85−52350
pulse-interval modulation, freq. spectrum anal. 86−16111
PWM power train superposition using pulse position modulation, three regulated output levels 85−33646
repeatered optical fiber communication based online-coded digital PPM transmission 86−55316
RF digital transmission links *(Polish)* 87−76536
sequence design using difference sets 88−8670
signal positioning with pulse-position keying SNR effect 86−54417
signals reception using trapezoidally shaped pulses, noise immunity 86−48947
stretched optical pulses employing encoded PPM, error performance of soft decision decoding *(Japanese)* 87−54880
three level complementary slope elementary PPM scheme with invertor drive appl. 87−64848
three level double freq. PPM invertor drive scheme, anal. 88−18908
TV signal, pulse analog transmission on optical fibres 87−76956
TWT, coupled-cavity, for radar transmitter, design 86−53304
TWT, high-power MM-wave coupled-cavity 88−19622
TWTs, PPM focussed, control of emittance growth, theoretical study 87−45536
word and frame synchronization with verification for PPM optical communications 87−39608
GaAlAs laser at 0.85 μm wavelength and direct detection PPM for bidirectional optical ISL 88−67292

pulse repetition rate modulation *see pulse frequency modulation*

pulse shaping circuits
7× electrical pulse compression on an inhomogeneous nonlinear transmission line 88−32059
39 MW peak power klystron modulator, operation and CAD program for PFN 85−27590
adaptive high-speed threshold-voltage shaper 86−859
amplifier with symmetric feedback for drift chambers 86−60621
amplitude compensated time locking, scintillation hodoscope appls. 88−29920
artificial line with mutual inductances, transients 86−46642
artificial shaping line with antiresonant tuned cats., design calcs. 88−44089
asymmetric reference wave-forms with fixed spectral envelopes, use in realization of pulse-shaping networks 87−10744
betatron injection system employing current pulse shape correcting cct. 86−25078
coaxial capacitor type, for high-current electron accelerator appls. 86−32199
coaxial electrical pulse shaper for picosecond electronics 85−64088
coaxial pulse shaping lines, max. rate of voltage increase 85−51471
complex pulse forming networks tuning using freq. anal. 87−37096
control-pulse shaper for thyristor converters 85−6241
CR-$(RC)^n$ prefilter into gated integrator system with 1/f noise source, equivalent noise charge 85−37966
CRO, sweep signal shaper for comparator with photoelectric sighting 85−26394
cyclotron beam, repetition frequency reduction of particle bunches 86−5677
damping of returning pulses between charging supply and shaping line 88−63512
design program for IBM PC 87−37094
DFB ridge waveguide lasers, 1.5 μm, dynamic linewidth red. by modulation pulse shaping 85−24631

pulse shaping circuits continued
differential channel pulse slimmer cct. for hard discs, file channels 87−24006
digital envelope shaper using home computer 86−31097
digital Nyquist channel filters for intersymbol interf. minimisation, design technique 86−47003
digital programmable clock pulse shaper, cct. design, computer system appl. 85−22970
digital pulse compression for radar systems 88−35591
drift peakers with nanosecond recovery time 86−862
efficient realization of pulse shaping network byemploying asymmetric reference waveform with constantspectral envelope 87−572
electrical circuits, with heat dependent components and energy storages, transients anal. *(Russian)* 85−49791
feedback pulse-lengthener cct, employing bootstrap *(Japanese)* 87−24008
FET power transistor cct. with GaAs Schottky-barrier diodes 86−67490
filters having small intersymbol interf., design method 88−6958
filters with small intersymbol interf., closed form formulae for design 88−63771
frequency marker using reference-pulse shapers 85−8926
gas-discharge nanosecond-pulse shaper 86−865
HF pulse shaper with ECL-gates, design *(German)* 88−56535
HF pulse shaping using length of artificial line 86−62500
high-power nanosecond pulse generator with a vacuum line and a plasma interrupter 87−10729
high-power precision pulse modulator with variometerartificial line 86−40972
high-speed commutation system for Arkad'ev-Marks voltage-pulse generator 88−12252
high-speed programmable multifunction synchronizer 86−5182
HV lumped circuit ferrite pulse sharpener 85−669
HV modulating pulses shaper for laser control 87−61210
HV nanosecond pulse shaper 88−32064
HV nanosecond voltage drops shaping, using serial semiconductor diodes 86−860
HV pulse modulator, small size 86−5834
HV pulse shaping with subnanosecond resolution for driving laser pulse generator 87−37097
HV pulse supply, compact design 85−22657
HV pulse swings chipping using semiconductor diodes with ohmic relaxation 87−73377
HV square pulse generator 86−835
instrument transducer of frequency to unified signals of constant voltage and current 85−47947
level translator provides ECL output 85−6263
local digital lines, pretransmission signal shaping and coding 86−52750
magnetothyristor shaper of nanosecond pulses of >100 MW 87−59159
microcomputer analogue-data input, using one-shot multivibrators 87−29032
microwave high-power short-pulse forming ccts. 87−73378
modulator of linear induction accelerator, compression sections and nonlinear shaping ccts. appl. 86−5832
modulators with artificial line, output pulse energy charact. 85−6236
MSW passive pulse compression loop 85−18590
multichannel drift chambers, test system for electronic instrumentation checking 86−5804
multichannel ring commutator for high-currentaccelerators 86−5680
multichannel synchronous coincidence circuit 86−5833
nanosecond amplifier-limiter for shaping photomultiplier signals 87−65961
nanosecond high-power pulse shaper, using bipolar and VMOS transistors 86−67116
nanosecond microwave pulses generation by Gunn diodes 88−603
nanosecond pulse shaper-discriminator for scintillation detectors, CAMAC compatible 86−60618
nanosecond pulse shapers, using high-power MOS transistors with vertical channel 86−863
nanosecond pulse shapers with power summing ofthyristor switches 86−864
nanosecond-pulse shaping using microwave powertransistors and Lewis transformer 86−41340
noise-immune current pulse shaper *(Russian)* 87−44709
nonlinear high-power amplifier for shaping magnetising current pulses 86−861
nonlinear transistor amplifier for shaping nanosecondmagnetizing pulses 86−57734
Nyquist 3 phase shaping in continuous phase modulation 87−33597
optical pulse compression in 1.5 μm wavelength region using large-positive-dispersion fibre and grating pair 88−59203
optimum linear phase pulse shaping filter Mueller's design 88−32060
optoelectronic pulse shaper with increased load capacity 88−32066
particle detector, shortening of pulses by zero pole compensation 86−5808
picosecond pulses shaping methods 85−3935
picosecond-pulse shaper 86−24458
positron life meas., using shaper with precision time locking 88−36387
programmable signal shaper 85−17290
programmable synchronization unit for timing system of Stanford Linear Collider 85−43291
pulse forming network for 100 kWe magnetoplasmadynamic thruster system design 85−59400
pulse stretcher cct. details 85−61175
railgun drive compulsator design trends 87−26702
reference signals shaping in laser gas analysers, with mechanical switching of optical channels 85−47911
reference-pulse shaper for synchronous amplifier 88−56534
RF pulse amplifier-shaper 87−37093
SAW Nyquist filters for digital radio 88−51123
semiconductor diodes with avalanche breakdown delay, shaper for HV sub-ns voltage jumps 86−20392
short-pulse, 564 series IC implementation 87−59269
sine wave signal shaper, noise-immune 88−32065
square pulses shaper, using electron tubes and transistors 87−59268
square-pulse shaper for light-emitting diode 88−32062
square-pulse shaper for unmatched load 87−16961
stability increase in single time intervals shapers 86−11519
stretcher for storage and logical processing of pulsed signals, pulse-height spectrometer channels appl. 85−6242
stretchers, highly stable, NMR spectroscopy appl. 88−50067
subnanosecond pulse shaper using theory of solitons *(Slovak)* 87−52468
supply circuits for electrostatic precipitators, anal. *(Russian)* 87−10653
switching voltage pulse shaper for capacitive load 88−70613
sync pulse separator and processing circuits, design *(German)* 87−59265

pulse shaping circuits continued
synchronising pulse shaper, digital type for multiphase static power source thyristor control systems *(Russian)* 86−20393
synchronization circuit for shaping picosecondaccelerated-electron pulses 86−70360
synthesis and anal. for force-commutated power convertors *(Polish)* 86−57731
threshold signal shaper for detector operating under increased loads 87−8871
threshold voltage shaping 86−5183
thyristor HV nanosecond pulse shapers 85−22740
thyristor modulator of square megawatt current pulses 85−11002
thyristor power convertor using pulse shapes *(Russian)* 86−856
thyristor pulse shapers with diode peaking and a drift mechanism of voltage recovery 87−59267
thyristor trigger circuits, long pulses former with an optimal form for power thyristor control *(Bulgarian)* 85−6238
time mark shaper with tracking threshold *(Russian)* 87−65958
transformer inductive storage unit for generatinghigh-voltage pulses with flat tops 86−57723
transistor switch with a shaping circuit 87−52952
TTL-compatible pulse frequency doubler 86−857
Vernier delay unit for Stanford Linear Collider 85−43293
video pulses shaper, center of gravity based 88−70614
VMOS transistors, high-power, heavy-current pulse shapers design 87−44711
wing-suppressed IR sampling, technique 87−46990
ZX81 cassette pulse cleaner 85−17568
^{14}C gas-proportional-counting method, appl. of pulse-shape discrimination 87−77826
GaAs monolithic nonlinear transmission line, 3.5 fall-time shock-wave generation 88−56917
GaAs programmable pulse driver formatter 88−50228

multiposition pulse-time modulated signals reception under intersymbol noise conditions, noise immunity 86−30818
PTM power convertors, quantisation errors *(Russian)* 85−65315
pulse voltage regulator, fast response, with pulse duration modulation, synthesis of control *(Russian)* 87−36994
self-excited modulation invertor transient condition investig. using difference eqns. *(Russian)* 88−55477
signals with nonsinusoidal carrier, synchronisation accuracy requirements 86−22880

pulse transformers
air-cored, equivalent ccts. 87−59927
amorphous soft magnetic alloys, practical appls. 87−46327
anisotropic laminated core transformer equivalent scheme *(Russian)* 86−6848
barrel-type distribution transformers, impulse voltage distrib. and transfer 86−20868
bidirectional direct convertor Petri nets and functional blocks *(French)* 85−61488
broadband and non-inverting, with fully isolated low impedance signal 85−1094
charging of capacitor storage devices 86−67098
coaxial, high current for railgun appls. 87−17417
coaxial pulse matching transformer for high-power current pulses generation 86−67543
comparator-type calibrator for instrument transformers 88−22719
core specific energy loss calc. 87−52918
cryogenic power transformer design 88−69461
DC traction motor characteristics rel. to pulse transformer switching shape *(Russian)* 87−5021
electrotechnical operating means, simulation model *(German)* 86−19330
EM devices CAD, using ANSYS finite element programs 88−20866
energy storage/pulse transformer concept for pulsed power supply 87−22622
equivalent circuits for pulse transformer with single-layer coaxial windings *(Russian)* 87−11089
fly-back convertor, pulse transformer leakage flux influence on performance *(Polish)* 85−1088
forced commutation thyristor bridge using pulse transformer 87−9640
high power electron-beam pumped lasers 88−24055
high-power electrical impulse production with increased voltages 87−9620
high-power pulse transformer for charging water-insulated shaping lines 87−66606
high-speed MOSFET driver circuit s 86−20390
HV pulse generator, use of transformer instead of charging inductor 88−56511
HV pulse supply, compact design 85−22657
HV pulse transformers, anisotropic laminated cores, magnetisation windings periodic distrib., transient parameters *(Russian)* 88−37273
HV pulsed power system design, component evaluation 85−5251
HV resonance multiplication, theory, appl. *(Russian)* 88−62407
hybrid pulsed power transformer, magnet design and verification 88−69462
instrument transformer errors determ., under operating conditions 85−48044
large capacitance detectors, dependence of transformer ratio on the shaper weighting function in transformer-coupled low noise preamplifiers 87−77581
magnetic flux compression generators, explosive driven, HV pulse transformers for generator coupling 88−43311
magnetic strip-wound core with square hysteresis loops, magnetic pulse reversal characts. *(Russian)* 87−24504
Marx generator, magnetic switch driven for electron-beam-pumped KrF laser 87−22625
nanosecond current recording appl., up to 100 A 88−25593
position transformers with axial airgap *(Slovak)* 88−32508
precision transformer-coupled amplifier-convertors 88−74317
principal parameters selection of pulse transformer magnetising devices 85−40271
pulse shape calc. in transformer without ferromagnetic core 87−45327

3-phase AC-DC SPM convertor-fed DC series motor drive 88−24209
3-phase induction machine with 2-phase PWM voltage fed invertor, harmonic anal. 87−22342
3-phase induction motor driven by sinusoidal PWM convertor, magnetic force eval. 88−69388
3-phase invertor using digital PWM control circuit and EPROM 88−30907
3-phase invertor/convertor, new PWM technique, for electric motor drives 85−39083
3-phase PWM frequency changer, rectifier-invertor type, optimum system design 85−32621
3-phase PWM inverter for UPS, HF deadbeat control 88−75773
3-phase PWM invertor, hardware and performance-effective microcomputer control 85−21696
3-phase PWM invertor, increase of output voltage by using harmonic distortion 85−21714
3-phase PWM invertors, mag. coupled, microprocessor control 85−10022
3-phase PWM invertors using GTO thyristors, elec. traction appl., EMI control *(French)* 88−30788
3-phase PWM sinusoidal voltage inverter with L-C filter, digital control 88−75772
3-phase sinusoidal PWM waveform generator, theory, operation and performance 85−27492
3-phase squirrel cage induction motor drive, invertor-fed, mathematical model *(Czech)* 85−53869
3-phase squirrel-cage induction machine, frequency converter fed, pulsation torques *(Czech)* 85−10135
3-phase synchronous solid-state VAr compensator using PWM voltage source invertor 88−30902
4 MVA GTO-invertor with PWM control, regenerative snubber ccts. 88−75786
5 kVA transistorized PWM invertor with 8031 microcontroller 88−69605
20 kW MOSFET PWM invertors for AC drive appls. 88−75998
30 kVA PWM invertor using static induction thyristors, test results and appls. 88−75756
50 W, 1.5 MHz power supply cct., current mode IC controlled, development 87−31717
50 W integrated drive using brushless DC motor and current fed PWM invertor 88−69797
50 W PWM Cuk converter using integrated magnetics 88−75822
60 kVA PWM thyristor invertor with high switching frequency 86−61666
250 kVA PWM invertor using single power transistors 86−6896
300 W 300 kHz current-mode convertor *(French)* 88−6646
AC brushless permanent magnet motor PWM commutation scheme using reluctance resolver 87−51165
AC chopper, PWM, control method *(Korean)* 88−32008
AC chopper, PWM control method 87−72271
AC controllers for drives, variable speed package using PWM 88−37633
AC drive, development of a low cost, lightweight traction inverter 87−51382
AC drive system for electric vehicles 87−43600
AC drive with three-phase squirrel cage motor fed through invertor, steady-state anal. 87−36183
AC drives, adjustable speed with nonconstant voltage source, PWM inverter algorithm 87−4980
AC drives, constant flux control technique 88−69768
AC drives, digital current control, PWM gate array 88−69788
AC drives, induction motor efficiency via PWM invertors and power factor controllers 88−62664
AC drives, software PWM for microprocessor control 86−40223
AC drives, star-modulated variable-freq. types 87−78974
AC drives drive control and regulation, pulse width modulation principles *(Czech)* 86−26337
AC drives using controlled-current PWM rectifier/inverter link 87−22822
AC harmonic elimination by active power filter, PWM current injection method 86−46984
AC invertor drive system control strategy for elec. vehicles 88−11447
AC invertor drives, PWM switching strategy develops. 88−75999
AC motor control IC (MOTOCONIC) for variable speed drives 87−15685
AC motor drive, digital current control synthesis 85−10131
AC motor drive dynamics, PWM inverters 86−51785
AC motor drive employing ultrasonic carrier 86−7206
AC motor drives, current control scheme using PWM switching 88−30670
AC motor drives, digital control using microcomputer based controller 86−26340
AC motor drives, flux-controlled PWM strategy 87−36182
AC motor drives, PAM/PWM invertor using power MOSFETs 88−43425
AC motor drives, PWM invertor digital control system using GTO thyristors 88−76001

pulse width modulation continued
AC motor drives, PWM methods in harmonic currents and torque pulsations investigation 88−69770
AC motor drives, PWM speed control system 88−30671
AC motor drives using high power PWM GTO inverter, control method 87−51500
AC motor drives with PWM invertor control, optimal switching patterns 86−7187
AC motor drives with PWM invertors, optimal control 86−7188
AC motor PWM invertor drives, dynamically-optimal switching patterns for torque and speed ripples minimisation 85−27701
AC motors with microprocessor based PWM invertor control 85−27388
AC position control servo system with PWM invertor-fed squirrel-cage motor 87−43134
AC power circuit of induction motor control using combined PWM and phase lead scheme 87−51190
AC railway traction drives, near optimal PWM waveform generation 86−40242
AC spindle drive system FRENIC 5000M for small machine tools 86−61768
AC to AC drives control strategy using microprocessor based pulse width modulator 88−62674
AC to DC conversion with high frequency sinewave PWM 86−26136
AC to DC convertor using GTO thyristors 86−45548
AC traction drive, independent voltage invertors using PWM control, operating features *(Russian)* 85−65246
AC traction drives, fed by power transistor-thyristor invertors, dynamic performances 85−44245
AC traction drives using GTO PWM invertors, control strategy 88−76029
AC variable speed drive systems, state-of-the-art, PWM and vector control 87−58370
AC variable-frequency convertor, parameter selection of Δ PWM *(Chinese)* 87−15647
AC voltage regulator using PWM technique 87−52352
AC-DC 3-phase PWM convertor motor system, digital simulation using state space model 87−43243
AC-DC converter, PWM controlled, GTO thyristors for input-output improvement 88−75747
AC-DC convertor, forced commutated techniques 86−66181
AC-DC convertors, versatile digital firing scheme 85−10027
AC-DC convertors for minimizing induced harmonics for power systems 88−17033
AC-DC PWM voltage convertor, voltage control 88−5755
AC-excited brushless synchronous motor control and torque characteristics 87−51185
AC/AC PWM power convertors, optimal control design 88−75787
AC/DC 3-phase SCR power convertor, PWM control scheme presentation 88−69499
AC/DC converter for robotics, digital simulation 88−49065
AC/DC convertor, 3-phase, control technique 87−43200
AC/DC GTO thyristor convertors, current source optimisation, microprocessor based firing scheme 88−11300
active AC power filter harmonic compensation current injection method *(Korean)* 86−34985
active current injection filter, optimised injection current model *(Korean)* 87−15948
active harmonic power filters using PWM convertors 88−50238
active power filter using multiseries voltage source PWM convertors, compensation characts. 87−45024
active power filter with optimised PWM compensating current injection, anal. and control 87−17230
active power filters using multiple voltage-source PWM convertors, control strategy 86−67011
actuator design microcomputer controllers, interfacing with A/D and D/A convertors *(Czech)* 85−49948
advanced AC propulsion system for electric vehicles 87−79033
AF power amplifiers classification *(Czech)* 88−56493
AF power amplifiers using pulse-duration modulation 87−37043
air conditioning, microcomputer control chip for invertor appl. 88−43501
amplifiers for LF and DC, high power *(German)* 86−40919
analog fibre optic communications appl. 87−34571
analogue synthesizers, modulation appl. 85−62952
approximate evaluation of stationary error in pulse-width systems *(Russian)* 87−27143
asynchronous frequency-controlled traction drive, invertor regulation by single-channel methods 87−58362
asynchronous machines, numerical control at variable speed *(French)* 88−55356
asynchronous motor, harmonics losses computer aided determ. by freq. converter feeding *(German)* 88−11213
asynchronous motor fed by PWM invertor, drive system anal. *(Polish)* 87−15844
asynchronous motor supply, PWM and pulse amplitude modulation *(German)* 86−39756
auto-adjusting PWM waveform generation technique for high speed drives 88−69767
auto-sequentially commutated current source invertors, new current PWM control method 87−43234
automated pulse-width determination system 85−48109
B 555 D IC timer appl. *(German)* 86−48745
BiCMOS thermal head intelligent driver with density controllers for full-tone rendition printers 88−50932
bilateral power conversion scheme for variable frequency static power supplies 85−5262
binary coding techniques with emphasis on pulse density modulation 87−47479
bipolar, high-voltage, high-speed IGBT transistor module 87−18107
Birmingham airport Maglev propulsion system, technical features 85−44277
bistable LED, self-excited oscillation and monostable operation *(Japanese)* 85−12739
brushless DC drive, sine coded PWM inverter fed motor, perform characts. 88−24200
brushless DC drives with PWM excitation, modelling 88−55654
brushless DC miniature motors, torque ripple reduction using PWM chopping and overlapping methods 88−23966
brushless DC motor control made easy with a new linear IC 88−5708
brushless DC motor drive, torque and stability 86−66385
brushless DC motor drive, variable speed control using PWM techniques *(German)* 88−24186

pulse width modulation continued
brushless DC motor drives, adaptive current controller for PWM inverters 87−22826
brushless DC motors for robotic appl., PWM control 85−65274
brushless self-excited commutatorless motor drive with microcomputer controlled PWM invertor 88−23870
buck-SMART power cell, bi-directional current flow, feedback and maximum current conduction control 87−22589
buck/boost PWM power convertors, control selection for max. perform. 88−75764
cage induction motor drive system, with PWM invertor, high performance speed control, tests 85−27680
cage induction motor with PWM invertor, additional loss calc. 88−17614
chopper bridge cct., config. and operational, large capacity switching power supply appls. *(Japanese)* 88−38390
chopper power supplies, compact designs using PWM and feed-forward techniques *(French)* 87−44556
chopper-driven, hybrid stepping motors, average torque optimisation 87−30645
chopping convertor control using natural sampling and instantaneous feedback 88−75835
clamped PWM invertor, neutral point, microprocessor based area sampling technique 86−12944
class D thyristor amplifier, two-clock design 86−46589
class-D AF amplifier using PWM and power MOSFETs, 1 kW, design and specifications *(Spanish)* 87−10704
closed loop control system with PWM rectifier converter, stability *(Russian)* 86−6864
CMOS DAC for digital audio applications 88−12453
CMOS DC-DC convertor cct., 60 V PWM remote power controller for ISDN appls. 88−56440
CMOS pulse-width modulation design approach and path-programmable logic for artificial neural networks 88−44160
compact thruster drive for offshore tethered submersibles 86−45427
conductance control of switching regulators 88−71729
constant voltage constant frequency (clean wave CVCF) uninterruptible power supply *(Japanese)* 87−43213
control cct. for class E resonant DC/DC convertor 87−78803
control for line commutated converters, mains harmonics minimisation 86−19394
controlled current PWM rectifier-invertor link for synchronous motor drive 87−43245
controlled GTO current source invertor-fed induction motor drive 87−30583
controller chip, 1-MHz, for switching supplies, UC3825 85−54636
converter, reactively loaded, reactive power source, simulation and experimental study 86−45565
converter fed asynchronous machine, position control 86−66084
converters, standard model for increasing the operating speed *(Russian)* 88−69496
converters with type two PWM, stability anal. *(Russian)* 86−20774
convertor reactor, continuous current conditions, design principles, DC voltage stabiliser appls. *(Russian)* 87−36015
convertors, controlled drives with asynchronous motors *(Dutch)* 85−53764
convertors, DC to DC switched-mode, generation, classification and anal. using convertor cells 87−30812
convertors, low frequency charactn. using describing state-space equations 87−30784
Cuk-type PWM shunt regulator, small signal model 88−5882
current controlled convertor, transient testing 87−78768
current controlled PWM inverter of high current response speed and low harmonic content 87−9639
current controlled PWM invertor 87−4788
current fed convertor system as active three phase power filter 87−78789
current fed invertor drives, μp-controlled harmonic minimisation 87−22521
current impulse commutated invertor with least trapped energy, anal. and optimisation 87−15852
current regulators, naturally sampled PWM, with synchronous reference frame 87−73280
current source GTO inverter with sinusoidal inputsand outputs, PWM control 86−45557
current source GTO inverter with sinusoidal inputs and outputs, for induction motor drive 87−51498
current source GTO inverter-fed induction motor with PWM controlled thyristor convertor 88−31082
current source GTO invertor with sinusoidal output voltage and current and PWM control 85−27538
current source inverter drive, speed and flux control 88−69769
current source inverter fed asynchronous machine, torque pulsation, commutation control 86−66090
current source inverters, optimal PWM 87−30776
current source inverters with sinusoidal inputs and outputs to drive motors, PWM and vector control 87−58372
current source invertor for induction motor drive, PWM control method 86−61506
current source invertor for three-phase induction motors with flexible PWM capability 86−45561
current source invertor using gate-turn-off thyristors, PWM control *(Japanese)* 86−70973
current source invertor-fed AC machines, variable topology model for digital simulation 87−30512
current source invertors, optimal pulsewidth modulation for harmonics reduction 87−4797
current source invertors, PWM, off-line optimisation and subharmonic modulation, performance criteria 86−45563
current source invertors, PWM pulse patterns, harmonics elimination 88−69604
current source PWM GTO convertor-invertor system for induction motors 88−30877
current source rectifier with sinusoidal line current, microprocessor based 88−30891
current-controlled PWM invertors for permanent magnet synchronous motor servomechanisms 86−39963
current-controlled voltage-source PWM invertor drive harmonic losses and torque ripples 87−22600
current-mode controlled power supply unit, PWM operation and protection features *(German)* 87−36967
current-mode power amplifier, design for DC motor energisation appl. 85−61122
current-mode-controlled PWM power convertors, secondary LC filter design 88−30931

electric drive system efficiency, PWM switching strategies, comparison 85−27679
electric drive with ultrasonic MOSFET PWM inverter and single-chip microprocessor control 88−24190
electric drives, computer-aided choice of digital PWM strategies 87−22819
electric drives, variable-speed, large speed range, anal. of PWM techniques using uniform sampling 85−27703
electric drives with squirrel cage motor and freq. converter, switching multi-pulsewidth control *(Czech)* 86−61763
electric motor control technology, conf., Munich, West Germany (June 1988) 88−70025
electric vehicle induction motor power control by PWM invertor with gate turn-off thyristors 85−65572
electric vehicles, PWM invertor drive system control strategy 86−45785
electric wheelchair propulsion systems using PWM speed controller, efficiency study 86−7270
electrical equipment for sand blasting operation, automation *(Japanese)* 85−16172
electronic power modulation, conf., Montreal, Que., Canada (Nov. 1987) 88−55840
electronic switching power invertor, PWM strategy for control signal generation 85−547
elevator, high speed, controlled by current source invertor system with 1-chip microprocessor 88−24241
ELF switching-mode signal delayer *(Japanese)* 85−28672
energy meas. using binary multiplier and stochastic time-division multiplier circuits *(German)* 88−6737
equivalent cct. models for PWM switches 87−65784
error reduction in one-dimens., appl. to computer-generated transparencies 88−2921
extensometry, telemetry appl. *(Spanish)* 87−49588
fan drive induction motor audio noise, influence of PWM waveform 86−6763
fast converters with PWM of second kind, synthesis 86−33483
feed circuit-rectifier-pulse-width convertor system, electromagnetic processes calc. *(Russian)* 85−21731
feedback controlled PWM invertors, with adaptive hysteresis 85−9995
fibre optics, analog communication by PWM 87−40921
field orientation controlled PWM AC drives, control law 88−43431
field-oriented AC motor control, implementation using PWM technique 86−51590
field-oriented controlled PWM drive with voltage-source fed asynchronous motor 88−69823
fin actuator controller for advanced missiles, architecture and VHSIC implementation *(Spanish)* 87−73436
fixed-frequency sinusoidal tracking invertors, pulse ratio modulation 88−17728
fluorescent lamp ballast, based on current-boost chopper circuit *(Japanese)* 85−5488
fluorescent lamps, pulse-width semiconductor ballast *(Russian)* 85−32786
flyback AC-AC convertor, PWM switching techniques 87−43224
flyback converter-power supply unit for monitor and TV applications *(German)* 87−43192
forced commutated cycloconvertors, optimised PWM method 88−30920
forced commuted cycloconverters for variable speed AC drives, PWM technique 87−43233
four-level PWM optical fibre system, error mechanisms 88−22064
four-quadrant analogue multiplier based on PWM format 86−14431
four-quadrant PWM choppers, nonlinear current control characts. 88−69586
frequency changers with PWM, principles, features and control circuits 86−51751
frequency controlled induction motor drive with PWM inverter and DC chopper 88−69801
frequency convertors, transistor and thyristor types, characts. anal. and Elin products *(Dutch)* 88−32367
frequency convertors for fan and pump speed control 88−62448
frequency spectrum method for voltage mode PWM converters, modelling, digital simulation and anal. 86−45574
frequency-to-voltage convertor/demodulator, high sensitivity 86−62797
GTO AC-DC converter with input displacement factor and output voltage control 88−30892
GTO convertor, PWM current output type, theoretical anal. 88−69486
GTO convertor, sinusoidal PWM AC currents 87−64709
GTO convertor-invertor induction motor drive system 88−49200
GTO current source inverter with PWM control for 2.2 kW induction motor drive 86−39958
GTO current source inverter with PWM control for induction motor drives 87−4786

pulse width modulation continued
GTO current source inverter-fed induction motor drive system 87−43519
GTO current source inverter-induction motor system, small width pulses for PWM *(Japanese)* 88−30700
GTO inverters with energy recovery by passive network, snubber configuration 88−69555
GTO invertors, optimal PWM waveform using switching angle determ. 88−30878
GTO PWM inverter for AC motor drives, control method and protection system 86−39962
GTO PWM inverters, parallel running and power balancing control 88−5759
GTO PWM invertors using centre-tapped reactors for parallel running 85−49010
GTO PWM power convertors, resonant snubber cct. study 88−69543
GTO three-phase converter, operating principles 86−19388
GTO three-phase converter, PWM-controlled, characts. 86−61649
GTO thyristor invertors, PWM, harmonic sensitivity 85−27534
GTO thyristors, test-and-drive cct. 86−727
GTOs in inverter design for induction motors 85−48963
harmonic elimination calc. using symmetrical polynomials *(Polish)* 86−64175
HEXFETS improve switch-mode power supplyreliability 85−54653
HF AC link PWM invertor 85−10025
HF avionic flyback power supplies, practical design considerations 87−78809
HF high power converter module, 3 kW, 1 MHz, circuit features 88−75745
HF magnetic amplifier regulator using amorphous saturable core, design, anal. 87−19158
HF power convertors, zero voltage switching using PWM 88−55497
HF PWM servo amplifier design using power MOSFETs, for DC servomotor control 86−14019
HF resonant invertor using static induction transistors and thyristors, config., control strategy, appls. 88−49050
HF resonant invertors using static induction transistors and thyristors, phase difference angle control mode strategy 87−73321
HF resonant PWM invertor linked DC-DC convertor using IGFETs 88−75828
HF switched mode PWM power convertors for supply appls., state-of-the-art review 88−69593
HF switching power supplies, transformer computer design aid 85−571
HF switching regulator controlled by mag. amplifier *(Japanese)* 87−58210
high efficiency uninterruptible power supplies with reduced interference coupling to the mains *(German)* 87−72240
high performance servo drives for machine tools, selection guides 85−39048
high power invertors, optimum PWM waveform synthesis filtering approach 86−7948
high-power transistor PWM invertor with complete switching energy recovery 87−22599
high-speed drives with 3-phase invertor-fed induction motors 87−22391
high-speed induction motor starting and braking by pulse width control with variable multiplicity factor 88−18135
high-speed PWM control IC design for miniaturised switching power supplies *(Japanese)* 87−36987
hovercraft, two-engine model radio control system using PWM speed control techniques *(Spanish)* 85−40205
HV bipolar transistor PWM convertor with transformer coupled direct base drive 88−30912
HV power MOSFET invertor for 380 V AC line 87−22596
HV supply for backward-wave tube, using semiconductor convertor 86−67022
HVIC for power supply appls. 87−44579
hybrid control system for PWM invertors *(Polish)* 86−61611
hysteresis current-controlled PWM rectifier, computer anal. of operation 88−30887
IGT power transistors for motor control appls., second generation devices 86−35731
indirect field oriented drive automated rotor time constant meas. system 88−43410
indirect field oriented drives, automated rotor time constant measurement system 87−43522
induction generators with pulse width controlled three switch exciter 86−39802
induction machine fed from voltage inverter, PWM effects on harmonic props. *(German)* 85−48953
induction machine fed from voltage inverter, PWM effects on harmonic props. *(German)* 85−48954
induction machines, circular PWM *(Czech)* 86−45405
induction motor, PWM invertor driven, current sensor presentation 88−23914
induction motor, three phase, PWM-fed, simulation under transient conditions 88−62361
induction motor acoustic noise reduction using optimum PWM waveforms of invertor 87−15737
induction motor drive, fully digitally controlled decoupled control system 86−6772
induction motor drive, high performance waveform generator for largeinverters 86−51636
induction motor drive, parameter, adaptive control 86−66081
induction motor drive, thyristor PWM invertor fed, power loss minimisation *(Polish)* 86−61778
induction motor drive PWM waveform control using INMOS transputer 88−55664
induction motor driven by PWM invertor with 20 kHz switching freq. using Bi-MOS power transistors, acoustic noise 87−43327
induction motor driven by PWM invertors, simulation 87−58083
induction motor drives, digital PWM control of invertor using BOXES theory 88−43424
induction motor drives, harmonic anal. 88−55652
induction motor drives, high power PWM inverter 86−66394
induction motor drives, microprocessor control using BOXES theory 88−31080
induction motor drives, pulse width modulated and CSI fed, harmonics anal. 85−39241
induction motor drives, PWM GTO current source inverter-fed, anal. 87−51499
induction motor drives, PWM inverter fed, digital simulation 86−45745
induction motor drives, PWM invertor waveform control for minimum loss operation 85−27702

pulse width modulation continued
induction motor drives, PWM invertor-fed, instability problem, anal. 87−43523
induction motor drives, rotor time constant meas. using Kalman filter 88−30721
induction motor drives, slip power recovery scheme with improved supply power factor 86−13129
induction motor drives microprocessor-based implementation of regular sampledPWM switching strategy 86−66384
induction motor drives using PWM convertor-invertors, operating characts. 88−75984
induction motor electric drive, minimum loss operation by computer-based control of PWM inverter waveform 85−53875
induction motor electric drives, vector-controlled, rotor parameter identification scheme 85−53879
induction motor feed forward field orientation control using invertor and computer 88−37215
induction motor noise reduction using 3-phase PWM chopper with IGBT 88−69389
induction motor PWM control using 87−64593
induction motor PWM inverter fed, speed regulation using model reference adaptive control 87−30562
induction motor PWM invertor drives, stability problems and control measures 86−51953
induction motor servo drive with fully digital control 86−66113
induction motor speed control using microprocessor based PWM inverter 88−48987
induction motor speed controller output characteristics 87−9536
induction motor speed range improvement convertor design 86−56764
induction motor torque and flux limit cycle control 86−39795
induction motor torque control using PWM invertor strategies 88−75619
induction motor vector-controlled drives, rotor parameter identification 85−27700
induction motor voltage source invertors, PWM waveform generation 88−75618
induction motors, optimum invertor waveforms for decreasing acoustic noise 86−39801
induction motors, PWM of voltage, and transistor invertor appls. *(Czech)* 87−22324
induction motors slip frequency control system using limit-cycle control of flux and torque 87−15736
induction motors speed control technology *(Korean)* 85−60191
induction motors with PWM supplies, time domain response 85−43976
integer programming based technique 86−29696
integrated AC drive system using a controlled-current PWM rectifier/inverter link 88−30803
integrated controlled-current PWM rectifier chopper link for sliding mode position control 87−43252
integrated PWM control strategy for inverters and induction motor drives 88−48986
INTEL 8748 based PWM system for synchronous motor PV tracking system 88−43174
intelligent PWM inverter for induction motor control 88−69378
inverter, neutral-point clamped, μP-based sinusoidally sampled PWM technique 88−75739
inverter, PWM 3-phase MOSFET, output characteristics improvement, software approach 87−4813
inverter, source and load non-linearities compensation *(French)* 88−75708
inverter, three-phase with closed loop control, output voltage spectral content anal. *(Russian)* 87−51348
inverter algorithm for adjustable AC drives using nonconstant voltage source 86−39960
inverter and chopper using GTOs in dual thyristor operation 88−69573
inverter as PWM system with two position control and sine output voltage *(Slovak)* 86−45502
inverter drive system switching sequence optimisation 86−66387
inverter fed induction motor drive, PWM switching strategy, acoustic noise and harmonics reduction *(Korean)* 88−18120
inverter fed induction motor drives, self-commissioning 88−69759
inverter fed induction motor drives, transient torque effect simulation 88−69815
inverter fed induction motors with switching lags, waveform distortion and correction circuit 88−11291
inverter motor drives, μP controlled, hybrid test system 88−48897
inverter using HV and high frequency BI-MOS switches 86−61656
inverter using transformer-isolated power MOSFETs 88−69560
inverter waveforms anal. and meas., FFT 88−69602
inverter with modified pulse patterns for UPS, deadbeat control, algorithm 88−55446
inverter with sinusoidal output current, PWM control technique 88−75737
inverter with specified output voltage waveform using static induction thyristor 88−69551
inverter with unique pattern of switching angles, microcomputer implementation 87−43202
inverter-driven induction motor, direct-speed control method 88−30725
inverter-fed fine-phase induction motor drive 88−55653
inverter-fed induction drive, flux control for optimum position control 88−69760
inverter-fed induction motor system, waveform distortion and correction circuit 86−39957
inverters, behaviour, switching times influence *(German)* 88−62441
inverters, dead beat microprocessor control for sinusoidal output waveform synthesis 88−11294
inverters, losses minimisation 88−69550
inverters, power losses minimisation 88−69561
inverters, PWM, deadbeat control with parameter estimation using voltage sensor 87−22588
inverters, sinusoidal, optimum digital pulse patterns *(Japanese)* 86−6884
invertor, multifunctional general-purpose, with one-chip microcomputer and V/F pattern set *(Japanese)* 87−52367
invertor, PWM type, as supply and for power factor compensation *(German)* 86−45525
invertor, PWM type, using high-gain pulse triggered power transistors and PWM control method 86−70975
invertor, PWM type, with power MOSFET transistors for speed drive of electric machines 86−61662
invertor, synchronised delta modulated type, spectral anal. 87−73284
invertor, three phase, dead beat control 87−78788
invertor, three-phase, for motor drives, trapezoidal modulating signal 86−70976

pulse width modulation continued
invertor, transistorised, design for variable-speed induction motor drive 85−60463
invertor, using triangular carrier wave of saturable amplitude 85−5190
invertor control, PWM waveform anal. for selected harmonic elimination 87−43235
invertor current control scheme for variable-speed AC drives 87−43221
invertor design, PWM optimisation using microcomputer 86−6895
invertor drives, microprocessor controlled, new PWM switching strategy 86−61602
invertor drives using GTO thyristors 85−45674
invertor fed induction motor, instability phenomena 86−39760
invertor fed induction motor drive, μP-based feedback control 88−48982
invertor fed microcomputer controlled permanent magnet synchronous machines, torque variation reduction *(German)* 88−43164
invertor in single phase uninterruptible power supply, high performance control system 86−45591
invertor modulation strategies, harmonic anal. 88−43280
invertor output voltage modulation by modified triangulation methods for fluctuating inverter input voltage 87−65825
invertor output waveforms, harmonic distortion 87−64693
invertor pulsating torque harmonics and load depend. 87−22601
invertor systems, self-oscillating, optimal PWM patterns 88−43321
invertor two-position current tracking with DC motor *(Russian)* 87−78771
invertor using high gain pulse-triggered power transistors and new PWM control method 86−6904
invertor using high perform. static induction thyristors 88−75788
invertor using phase-locked loops, PWM technique 85−49011
invertor waveform synthesis technique for harmonic control in DM process 87−16883
invertor with controllable harmonic 86−6906
invertor with parallel-connected transistors by using current sharing reactors 86−45554
invertor-driven induction motor, optimal PWM control 88−48989
invertor-excited induction generator output voltage control *(Korean)* 86−26060
invertor-fed AC drive harmonic elimination problems 87−43009
invertor-fed fast response reversible brushless DC drive with regenerative braking 85−27691
invertor-fed induction machine parameter identification 87−22368
invertor-fed induction motor line current waveform prediction and meas. 87−43005
invertor-fed linear network, math. modelling and simulation 85−28322
invertor-fed synchronous machine current control systems 86−66059
invertor-induction motor traction drive system, losses minimisation 85−44243
invertor-induction motor traction drive system, selection and design 85−44244
invertor/rectifier convertors, three-phase, generalised functional model 86−45550
invertors, carrier signal policies 88−43284
invertors, carrier signal policies effect on performance 86−39971
invertors, comparative study of delta and sine pulse width modulation 86−61663
invertors, current control method 88−5760
invertors, current control scheme 88−62444
invertors, forced commutation, cct. topology anal., implementation and comparison 86−46571
invertors, harmonic elimination by solving nonlinear eqns. 87−78757
invertors, high current, eval. of reverse bipolar transistor cond. problems 87−22582
invertors, linear method of optimum harmonic control 86−6902
invertors, optimal strategy *(Slovenian)* 87−15860
invertors, PWM, current regulated, naturally sampled, fundamental component model 87−43220
invertors, PWM, for AC drives, online adaptive control of line current harmonics 87−15918
invertors, PWM, for induction motor drives, distortion minimisation 86−66172
invertors, PWM, for variable speed drives, wordlength effects 87−15917
invertors, PWM, harmonic elimination conditions *(Polish)* 86−56841
invertors, PWM signals, microprocessor determination using second-order difference equations 88−11301
invertors, PWM type, DC link current calc. 86−61601
invertors, PWM type, with fluctuating input voltage, adaptive harmonic control and voltage regulation 86−45531
invertors, switching strategies *(Spanish)* 87−36991
invertors, three phase magnetically coupled, microprocessor control 86−70977
invertors, transistorised, lossless snubber networks and ccts. for blocking voltage limitation 85−10014
invertors, voltage-controlled, random PWM technique 88−30906
invertors for AC motor speed control 88−75850
invertors using bipolar transistors, anal. of conventional snubber circuits 88−62445
invertors with PWM for variable speed drives, new microcomputer controlled modulator 86−51752
invertors with two level control and constant frequency, LC filter optimisation 86−57654
IR linked headphone, transmitter cct. 85−14516
isolated flyback convertor, cct. config. using PWM and error amplifier 85−11491
IXMS150 IC precise position-control system, design tradeoffs using microstepping motor drives 87−72350
jittering effects 86−45592
LED array with PWM drive 86−50183
linear reluctance motor, PWM current control 88−69813
LM1580 and LM1584: high performance switchingregulator control ICs 86−34546
LM621/622 commutation and PWM ICs for motion controlapplications 86−34544
logarithmic convertor appl. 86−1331
low-frequency characterization of PWM convertors using differential equations 86−12921
low-harmonic GTO converter for power factor compensation 88−75059
low-loss three-phase frequency conversion using a TDM-PWM technique 87−32033
low-speed drive of PWM-VSI fed brushless self-excited synchronous motor 87−16081

pulse width modulation continued

power electronics devices, conf., Vancouver, BC, Canada (June 1986) 87−16278
power FET audio amplifier with switch mode operation, design and charact. *(German)* 87−37016
power filter for AC harmonic elimination, injection method 88−32318
power invertors, harmonic analysis *(Slovenian)* 86−66151
power MOSFET PWM inverter, voltage clamp circuits 88−11295
power MOSFET PWM invertor, voltage clamp ccts., design equations 85−27537
power MOSFETs in radar transmitters power supplies 85−61107
power PWM full-bridge convertor switching regulator, snubber cct. 85−9991
power PWM regulators, analogue control using magnetic transistorised switches *(Russian)* 87−36965
power supply control ICs, PWM type, products developments *(German)* 87−23899
power systems stabilisation by SMES using current-fed PWM power conditioner 88−75060
power train superposition using pulse position modulation, three regulated output levels 85−33646
power transistor base drive circuit for PWM invertors 87−72260
power transistors, multi-functional, modular devices, appls. 85−32571
programmable counters *(German)* 85−11366
programmable power unit for PWM invertor fed AC motor speed control 86−39716
proportional drive for discontinuous modeDC-to-DC convertors 85−61113
pulse constant-voltage regulators with PWM, periodic modes existence conditions *(Russian)* 87−73298
pulse motor drive unit *(Japanese)* 87−43516
pulse-controlled current-source inverters with turn-off semiconductor devices 88−69572
pulse-fed power electronic ccts., anal. using Walsh fns. 87−31701
push-pull amps. with PWM, low freq., distortion calcs. 88−44071
push-pull full-bridge convertor switching regulator, base driven technique 85−562
PWM A/D and D/A convertors *(German)* 87−37409
PWM bridge invertor using single high freq. thyristor switch 85−10016
PWM drive, SLE 4520 PWM modulator IC for digital sinewave synthesis 86−66218
PWM frequency convertors, practical uses *(Dutch)* 88−43288
PWM integrated circuit for inverters *(German)* 87−27137
PWM inverter for HV power system harmonics generation 88−37316
PWM inverter induction motor drive, steady-state performance 86−66393
PWM inverters, harmonic anal. of pulsating torque and DC current 87−30848
PWM invertor drives, microprocessor-controlled, suboptimal switching strategies 85−44224
PWM invertors, power transistor drive cct. 87−44599
PWM MOSFET DC feed drive for NC machine tools, current loop effects on static and dynamic stiffness 86−51957
PWM motor control from CMOS logic signals 86−46530
PWM motor controller cct. using two ICs 87−15945
PWM power MOSFET-based servo amplifier 86−51869
PWM servo amplifier, Copley Controls 241 87−44612
PWM switching power supply for video appls. 86−7923
PWM three-phase invertor, incremental method 88−55464
PWM voltage invertors for crane drives *(Hungarian)* 88−30812
PWM-controlled GTO convertor 88−17730
pWM-FM 140 watt 100 kilohertz multiple output offline switching power supply 87−78812
quarter bridge DC motor drive, PWM technique with HIMOS transistor switch 88−69774
quasiresonant convertors with resonant switches, unified anal. 87−72269
radio control for a toy torpedo boat, PWM transmitter and receiver design *(Spanish)* 87−17280
radio transmitters energy/bandwidth-saving transmitting methods *(German)* 85−14404
railcar AC traction drives, control system 87−51536
pulse width modulation continued
railway traction invertor drive, step response prediction 88−76030
railway traction invertor fed induction motor drives, online implementation of optimised PWM schemes 87−79110
reactive current compensator for single phase modular PWM invertors 86−61661
reactively loaded PWM converter, simulation and expt. study 87−30778
reception of PWM and FM spread-spectrum signals, noise immunity anal. 85−8307
rectifier controlled DC-power supplies, unified modelling 85−5258
rectifier filter minimisation for static power compensators, PWM control 86−7949
rectifier inverter power drives, solid state switches, control *(German)* 88−69732
rectifier system transient processes calcs., spectral anal. method *(Russian)* 86−26159
regenerative controller for voltage source invertor drive 86−45749
relaxed harmonic elimination for asynchronous variable speed drives 88−75986
reluctance generators with PWM voltage source invertors, microcomputer voltage control system 88−30691
resonant converter for high-output voltage power supply, design 88−24038
resonant converter for HV power supply, design 86−45568
resonant convertors, transfer linearity improvement 85−11492
resonant PWM DC-DC power converters, constant freq. digital control, zero-voltage switching 88−55513
resonant-mode controller runs switching supplies at 1.5 MHz 88−56432
RL circuit subjected to PWM voltage waveforms, time domain anal. 86−40815
robot manipulator digital signal processor based variable structure control 88−43354
rolling mill, DC drive speed control system 85−39351
S424 chip 0.9 V input switching regulator IC requires just one alkaline or NiCd cell 88−6638
SCR-SIT hybrid voltage-clamped resonant invertor development and operating characteristics 86−6898
second-order PWM converters, stabilisation coeff. calc. *(Russian)* 88−30806
self commutated PWM inverters for speed controlled AC drive, predictive control strategy 88−69787
self-contained invertor for induction motor, harmonic content of output voltage *(Russian)* 87−44540
self-controlled permanent-magnet synchronous motor control circuit 88−17564
self-synchronous motor drives, cycloconvertor fed, torque pulsations reduction, PWM strategy 88−24182
sensorless brushless motor microcomputer control 85−53677
separately excited DC motor drive with PWM convertor control, open and closed-loop performance 86−39826
separately-excited DC motor speed control by PWM chopper 86−70938
series current source inverter fed induction motor drive with new current PWM waveforms 87−43538
series resonant convertor, PWM or current controlled for low switching loss, anal. 87−78792
series resonant convertor, PWM or current controlled for low switching loss 88−30802
series resonant inverter PWM controlled computer aided circuit anal. 88−75776
series-resonant energy conversion with multi-segment current waveforms for bipolar energy flow 88−75769
servo amplifier design using power MOSFETs 86−51870
servo-amplifier, PWM, ultra-high efficiency, using Power MOSFET devices 85−49022
signal processors for PWM inverter control 85−28334
SIMOVERT P transistor PWM converters for standard induction motors 85−16128
single phase invertor with cyclic fluctuating loads, voltage compensation technique 87−43251
single phase transistor invertors, PWM techniques survey 86−66170
single-chip PWM integrated switching regulator *(Italian)* 87−52344
single-phase AC locomotive power factor improvement filters 86−71113
single-phase PWM invertor control, fluctuating voltage source and nonlinear load 88−75836
single-phase variable-speed electric drive supplied by a D-modulation PWM inverter 88−62665
sinusoidal mains current blocking convertor structures *(German)* 85−53766
sinusoidal pWM inverter controlled by a small saturable core 88−50013
sinusoidal PWM inverters, with modulating signals of synchronous triangular carriers, waveform anal. *(Japanese)* 85−44949
sinusoidal PWM invertor, three-phase, principles, anal. and induction motor drive appls. 86−45584
sinusoidal PWM invertor feeding variable-speed induction motor drive, control strategy 87−64847
sinusoidal PWM invertor for AC motor drives 85−65333
sinusoidal PWM invertor for wide band harmonic elimination, double buffer microcomputer control 86−40911
sinusoidal PWM invertor with min. filter requirement 88−55465
sinusoidal PWM invertors, control strategy 86−45558
sinusoidal PWM three-phase converter-fed DCV motor drive 86−33745
SIPMOS transistor-based stabilised voltage source *(German)* 85−6144
SIT switched-mode power supply with reson. energy transfer links 85−39915
small-signal modeling of pulse-width modulated switched-mode power converters 88−56452
smart motor control IC featuring: motor speedcontrol, stall sense, interval timer 86−67973
smartpower for small telecomms systems 87−72256
SMES AC coil application with PWM control 88−69719
SMPS, direction for ICs 87−10650
SMPS, PFM/PWM variable-pulse modulator improves power-supply regulation, CA1523 IC appl. 87−65802
snubber circuits, lossless, for transistorized PWM invertors 86−52661
solar AC power optimisation and stabilisation 87−42734
solar array/utility grid interface inverter 86−33510
solar power conversion system using PWM invertor, microcomputer controlled 86−6912
solenoid actuators, transient finite element modelling, coupled power electronics, mechanical and magnetic field problem 88−52147
solid laser pulse compression, self-phase modulation in graded-index fibres 85−35882

pulse width modulation continued
solid-state relay based AC power controller adapted to D/A converter *(Japanese)* 88−19234
spacecraft, high power, invertor topology eval., control strategy 87−43217
spectral analysis using double Fourier series 87−47476
speed control system, periodic state occurrence and analysis *(Russian)* 86−45624
split-zero vector method for PWM digitised invertors, magnetic flux and torque ripple 88−11292
squirrel cage induction motor, sensorless speed control using PWM methods 86−66085
squirrel cage motor PWM three-phase variable speed drive using power MOSFETs *(German)* 85−49137
squirrel cage motors, high dynamic feed using 3-phase impulse commutated voltage source PWM invertor 88−69384
stabilised PWM power amplifiers, correction synthesis for transient quality improvement *(Russian)* 86−67050
stabilisers, STSI and SIRT types, modelling and meas. of freq. characts. *(Polish)* 88−12195
staircase modulator, digital implementation 87−65951
staircase PWM for modulation of AC motor drone 87−22824
stand-alone wound rotor induction generator, PWM inverter excitation, steady state anal. 88−30727
static convertors, improved voltage and harmonic control PWM techniques 87−22581
static electrical converters, switching, large signal command *(French)* 86−39969
static frequency converters with GTO thyristors forfeeding AC motors *(German)* 85−65329
static frequency convertors, 560 kVA, Holec PMO type *(Dutch)* 87−78765
static frequency convertors, using GTO, pulse width modulated, and microprocessor controlled *(Rumanian)* 85−44076
static induction thyristor type sinusoidal PWM inverter, high freq., high efficiency 88−75843
static power conversion, PWM techniques for power device switching 88−55440
static power converters, PWM techniques 87−78802
static power supplies, variable frequency, novel bilateral power conversion scheme 86−7950
steady state network response to periodic PWM signals, investig. using Z^{-} transformations *(Russian)* 88−18839
step/PWM UPS, high power system for data communication equipment 85−64876
stepping motors with chopper drives, EM damping 87−4745
strapdown inertial guidance systems, performance in space 85−15385
submarine optical repeater fault location systems, remote control signal *(Japanese)* 86−11094
suboptimal switching strategies, for PWM invertor drives with microprocessor control, comments and reply 86−13111
switch mode convertors, switching angle phase shift effects on PWM techniques 88−6658
switch mode PSU design 87−59158
switch-mode PWM single-phase and three-phase invertors 86−34539
switched power units using power transistors, design, PWM and losses *(German)* 86−27049
switched reluctance brushless drives 87−4984
switched-mode converter topologies 88−70527
switched-mode ULF signal delay cct. and appl. 87−52774
switched-reluctance stepping motor, sensorless torque control using PWM 87−58125
switches for systems connected to european medium power networks *(Spanish)* 86−61177
switching invertors controlled by PWM, strategies anal. *(Spanish)* 87−52363
switching power supplies, appl. of PWM control ICs *(German)* 88−12188
switching power supplies, PWM, CAD for power transformer 87−30728
switching power supply, 1 MHz control by PWM IC 86−34523
switching power supply, active power factor correction, simplified control algorithm 86−34532
switching power supply improvement by integrated pulse width modulators *(German)* 88−56434
switching regulator soft start cct. 87−5669
switching-regulator DC-DC power converter with wideband feedback control, subharmonics and chaos, anal. 88−70507
symmetric oscillations in pulse-width systems *(Russian)* 87−27144
synchronised PDM/number convertor *(Slovak)* 88−70947
synchronous current regulator and current regulated PWM invertors 87−4787
synchronous current regulator and current regulated PWM inverters anal. 86−39964
synchronous generator exciter control system, dynamic model 88−11203
synchronous machine transistorised switch design and operation *(Russian)* 88−5670
synchronous motor, invertor-fed, torque pulsation and efficiency model 87−30548
synchronous motor drive, permanent magnet inverter-fed type, high perform. control scheme 88−30689
synchronous variable speed drives, adaptive control of PWM invertors 88−76000
system periodic state analysis with harmonic linearisation *(Russian)* 86−45625
TDM system for analogue data recording on audio tack of videotape 86−60719
TEA 2170/2162 and 2164 PWM ICs, operation and switched-mode power supplies appl. *(German)* 88−12192
telecommunication equipment, 15 kVA UPS using static modular HF PWM invertors 85−64878
three phase current source inverter with PWM capability 88−11296
three phase GTO converter with PWM, asymmetrical pulse pattern 88−69578
three phase invertors, high speed microprocessor based pulse width modulator 88−43320
three phase pulsewidth modulator for overmodulation 85−22734
three phase stair case wave PWM inverter of transistor bridge circuit 87−65841
three-phase 15 kVA PWM invertor for hybrid electric-hydraulic road vehicle *(Afrikaans)* 87−79063
three-phase AC induction motor invertor drive, microprocessor-based, sinusoidal PWM with multimode control 88−24195
pulse width modulation continued
three-phase asynchronous motor pulse width modulator designed for frequency converters *(French)* 87−36964
three-phase controlled-current PWM convertor with leading power factor 86−45553
three-phase convertors, synthesis design method for suppressed third harmonic supplied using modulation 87−72244
three-phase current source invertor, harmonic reduction by PWM 87−15843
three-phase induction motor drive, optimal PWM strategy *(Korean)* 86−39787
three-phase invertors, incremental method of PWM 87−43232
three-phase invertors, nonsinusoidal PWM fns. for improved perform. 88−75757
three-phase motor, PWM control system using 8051 microcontroller and ASIC *(German)* 88−11174
three-phase neutral point clamped PWM invertor for motor control 87−15909
three-phase power frequency conversion with high efficiency and high spectral purity 85−10965
three-phase PWM controlled AC/DC convertor, control techniques 86−45578
three-phase PWM inverter/rectifier/converters, functional anal. method 87−51346
three-phase PWM invertor, microcomputer based, real time operation 86−45583
three-phase PWM invertor-fed induction motor drives, waveform distortion anal. 88−69822
three-phase rectifiers, power transistor protection *(German)* 88−31984
threshold follower circuit as solution to pulse width modulation in fibre-optic links 85−61173
THYFREC-VT83U microprocessor-controlled AC machine speed control equipment, PWM 86−12775
thyristor chopper invertor feeding asynchronous machine, minimising harmonics of output voltage PWM method 86−56821
thyristor gating ICs for control solutions of construction tools, office machines and home appliances 87−78778
thyristor invertors using GTOs and AC filters for power factor improvement 88−70531
thyristor phase modifier with compound PWM circuit 85−49012
thyristor rectifiers with diode bridge and series chopper 88−75837
thyristor three-phase forced commutated AC/DC convertors, PWM patterns 87−15865
time division active power converter with natural sampling PWM, errors 88−24041
time-domain anal. of RL ccts. 87−23877
traction drive, high speed, PWM invertor optimisation 86−7208
traction motor drives for rail vehicles, invertor fed with PWM, EM processes 86−39777
transistor inverter FRENIC 5000T for synthetic fiber industry 86−61828
transistor inverters, microprocessor based PWM modulator *(French)* 86−66171
transistor invertor, base drive cct. 86−45555
transistor invertor, software for microprocessor control 86−66168
transistor PWM converters with high output frequency and communications capability 88−69492
transistor/GTO PWM invertors, snubber configs. 85−10015
transistorised pulse-width convertor HF noise generation forecasting and reduction *(Russian)* 86−6862
transistorised PWM inverter, high power, using bipolar transistors 87−22557
TV camera, solid-state, PWM auto-light control 87−56371
TV signal, pulse analog transmission on optical fibres 87−76956
TV transmission systems, differential phase error 88−4169
two-switched-network converter system, small-signal freq. response 87−22566
UC3825 PWM chip controls 1 MHz SMPS 86−34545
UC 1846 integrated circuit for the current mode control of voltage regulators *(German)* 85−10987
ultrahigh efficiency servo amplifier, power MOSFET device appls. 85−33698
underground railway rolling stock, induction motor with PWM invertor *(Russian)* 87−5026
uninterruptable power supplies using microprocessors and power transistors 86−6897
uninterruptible power supplies *(French)* 88−17731
uninterruptible power supply, design using 2 kHz bidirectional convertor and PWM *(French)* 87−23923
unipolar inverter-squirrel cage induction motor drive with shoot-through protection 87−16105
universal power distortion compensator using energy storage device rotating machine secondary excitation 88−18098
universal variable-speed drive availability in Australia 86−19534
UPS, large parallel systems utilising PWM technology 85−64875
UPS, static induction transistor type sinusoidal PWM invertor appls. 87−43237
UPS, transistorised fifth generation systems 86−45567
UPS application for microprocessor controlled PWM invertors 88−69540
UPS appls., high performance PWM invertor 85−64880
UPS for telecommunication equipment using PWM technology 85−64879
UPS improvement using PWM, transformer and filter co-ordination 86−45536
UPS PWM control system using hysteresis comparator, double regulation loop based 88−30898
UPS systems using HF PWM voltage source inverters, deadbeat control 88−30864
UPS with 0.5 to 5 kW modular inverter with MOSFET transistors 86−61624
UPS with PWM inverter and microprocessor controlled measuring equipment 86−61617
US PWN sinusoidal invertor using Bi-MOS 86−6903
VAr compensation using three-phase current source for commutated PWM rectifier 87−78787
variable frequency drive invertors with programmable PWM control *(Italian)* 86−45541
variable speed asynchronous machine numerical control using PWM invertors *(French)* 88−11229
variable speed drive of 3-phase induction motor, optimal pulse amplitude-width modulation strategy *(Korean)* 88−18119
variable speed drives, invertor fed, oscillation simulation 88−43409

pulse width modulation continued
variable speed drives, power semiconductor appls. conf., London, UK (July 1988) 88−64583
variable speed electric drives, anal. of PWM techniques using uniform sampling 86−7186
variable speed induction motor with integral ultrasonic PWM inverter 88−55362
variable speed induction motors using ultrasonic PWM invertors 88−55360
variable speed inverter fed induction motor drive, optimal PWM strategy, oscillation and noise improvement 87−72481
variable speed invertor-fed induction motor PWM strategies 87−43007
variable speed PWM inverter asynchronous drive, microprocessor control 88−69795
variable speed single-phase induction motor drives, constant torque operation 88−69808
variable speed synchronous motor drives, controlled-current PWM rectifier-inverter link 88−24191
variable-speed invertor-fed induction motor with modified field-oriented control 87−22369
variable-speed squirrel-cage drive control by microprocessors and transistors 86−19254
vehicular two-phase invertor-induction motor drive design and simulation 86−45773
very Hi-Fi PWM class D audio amps., optimisation design parameters, comments 86−17695
VMOS field-effect transistor drive for current-mode interstage transformers 85−6239
voltage fed invertor drive with minimisation of signalling interference 87−79111
voltage invertors, microprocessor led PWM type, commutation sequence for harmonics elimination 87−4790
voltage invertors, pulse width control implementation, switching algorithms for power-circuit thyristors 86−45506
voltage pulse, stabiliser using integral pulse width modulation, anal. *(Russian)* 85−61074
voltage regulator in discontinuous conduction mode, open-loop transfer function, closed form expression 87−503
voltage regulators, small-signal continuous exact model 85−33623
voltage source inverter drive with direct torque control and flux control 87−16104
voltage source inverter for PM brushless DC motor drive, dynamic characts. 88−49196
voltage source inverters, sinusoidal PWM schemes open-loop self-regulating property 88−55445
voltage source invertor, voltage space vectors 88−43279
voltage source invertor fed induction motor drives, DC link filter design 87−43540
voltage source invertor fed PWM variable speed induction motor drives, unstable oscillations simulation 87−43539
voltage source PWM inverter fed induction motor drive, stability anal. 87−72469
voltage space vector concept, for PWM voltage-source invertors 87−43222
voltage stabiliser stability with pulse width modulation, comments *(Russian)* 86−729
voltage type PWM converter, power factor and DC voltage control 88−75751
voltage-fed inverter, power losses in bipolar transistors, MOSFETs and antiparallel diodes 88−75748
voltage-fed MOSFET power supply with PWM power control and protection, HF induction heating appls. 87−78770
voltage-mode resonant push-pull convertor with mag. amplifiers, static and dynamic characts. *(Japanese)* 88−18926
voltage-source-invertor-fed brushless self-excited synchronous motor, low-speed drive 86−45384
VSI PWM invertors, current-controlled, hysteresis control method 88−30904
VSI-PWM invertors, current control 85−53761
waveform generation using microprocessor, three-phase invertor appl. 87−30752
waveform generator using microcontrollers for AC drives 88−55666
waveform generators, microprocessor-based, word length effect on harmonic content 85−43011
waves simulation for harmonic anal. and synthesis 86−59201
wheelchair electric drive, energy storage DC-DC converter 88−62718
wind energy conversion system, low power, control and modelling 87−72069
Hg high intensity discharge lamps, operation and dimming control using PWM choppers 88−69912

hydroelectric generator, pump-in-a-motor, combining prime mover and pump section in generators 86−25976
hydroelectric power station hydraulic storage pumps development *(Rumanian)* 86−25945
hydrostatic and central venous pressure measurement bythe IVAC 560 infusion pump 86−32234
hydrostatic positive displacement pumps, pressure pulsation determination *(German)* 86−31650
induction EHD pump in vertical configuration, expt. 86−45727
induction EHD pump in vertical configuration, model 86−45726
induction for submersible pump drives, lightning and surge protection 86−39789
induction MHD pump, winding parameters anal. *(Russian)* 87−64594
induction MHD pumps, 3-phase, currents and voltages 87−30625
induction MHD pumps, self-excited oscills. 88−37224
induction motor pump modelling for energy savings under variable flow conditions 88−17623
induction motor pump system, solar array powered, perform. optimisation 88−23916
induction motor-driven pump, drive methods *(Japanese)* 87−31007
induction motors, multi-speed, for pump and fan drives in petroleum and chemical industries 86−40339
induction motors, with single phase supply system, performance evaluation, effect of voltage fluctuations 85−21626
induction motors with high starting torque and slip for oil well mechanical pumps 87−9532
induction pump, cylindrical, local charact. 88−37223
induction pumps planar, transverse edge effects, MHD problems *(Russian)* 85−10123
induction-type MHD machines nonuniform turbulent flow study 86−66359
inductive MHD pump, ID turbulent flow model 87−78962
infusion control instrument evaluation, DHSS programme 85−20945
insulin treatment for diabetics, continuous infusion instrumentation 87−21622
intravenous infusion pump design *(Japanese)* 88−16752
inverter-fed induction motor with wound rotor driving water pump 88−23946
irrigation system pumping loads scheduling for load management 87−78026
jet fuel pump test stand, inverter fed induction motor drive 87−43536
kite-powered pump, performance charact. 87−4644
large-capacity multistage inverter for Nippon SteelCorporation for energy saving operation of fans andpumps 86−12899
linear induction pump, helically wound, for molten nonferrous metals 85−51384
liquid metal induction pump, work anal. 86−42800
liquid-metal MHD machines for power and industry 88−31049
load-commutated invertor drives, voltage-offsets to ground 87−30884
low-head hydropower, turbine-pump system 86−19149
LWR main coolant pump, secondary shaft seals, significance of eccentric mountings and elastomer resistance, laboratory study 85−15796
LWR power plants, emergency pump surveillance testing, related failures 86−25830
magnetodynamic pumps, inductor-turns of liquid metal, inductive resistance calc. *(Russian)* 88−62416
medical portable infusion devices, development and appl. 87−21623
medical ventilator control appl. *(Italian)* 87−63295
metallurgical EM immersion pump characteristics *(Japanese)* 86−52071
MHD cylindrical inductive pumps for transport of liquid metals. I. Electromagnetic fields *(Polish)* 88−37620
MHD generator pump apparatus testing *(Russian)* 85−10121
MHD induction pumps, liq. viscosity, higher order space harmonics 86−7160
MHD induction pumps, spontaneous swinging 86−7158
MHD pumps, powerful cylindrical, hydrodynamic instability study 85−21828
microcomputer controlled direct adaptive coupling of photovoltaic generators to pumping systems 86−33702
microhydroelectric power plants, rotary pumps in turbine regime *(Rumanian)* 85−21506
mixed flow-pump for hydroelectric power station, parameter control 88−43093
modular induction pump, high temp. plane linear 87−78960
multichannel induction machine, mag. field calc. 86−66360
nuclear plant dual speed induction motors for cooling system pumps 86−56535
nuclear power plant pumps, pulse end seal testing *(Russian)* 86−61221
nuclear power plants, on-line vibration monitoring of turbines, pumps and fans, recent research 85−9601
nuclear power plants, primary and secondary valves and feedwater pumps, reliability charact. anal. 85−9633
nuclear power station coolant pumps decontamination *(German)* 86−65855
nuclear power stations primary heat transport pump seals, reliability and perform. 88−10999
nuclear reactor coolant pump motor flywheels, acoustic emission testing 85−15768
nuclear reactor coolant pump reliability improvement through mechanical shaft seal retrofit 88−43006
oil and gas exploration, submerged electrical system reliability *(Russian)* 87−4387
oil field supervisory control system for beam pumps using power-line carrier system for communication 87−31108
oil rig submersible pumps, dielectric properties of power supply cable insulation, life testing 87−35639
one wing rotor wind turbine for desalination pumping unit *(German)* 88−55760
online nuclear plant machinery diagnostics, expert system for monitoring 85−15787
overspeeding processes in reversible pump-turbine units of pumped storage power stations 87−15591
Paks nuclear power plant, semi-axial water cooling pumps starting, partial immersion of running wheels *(Hungarian)* 87−64246
permanent magnet DC motor powered by solar cells, perform. charact. 87−15784
petrochemical industry, rotating process equipment, energy savings by using adjustable speed 85−27895
Philippsburg-II NPP, experience with RHR 300-830 decay-heat coolant pump *(German)* 88−69118
photovoltaic array/inverter/induction motor/pump set control *(French)* 86−39967
photovoltaic power system using brushless DC motors for groundwater pumping and desalination 85−53614
photovoltaic powered, DC motor driven, water pumping system, CAD and simulation 87−15613
photovoltaic powered irrigation well pumping systems, survey results 87−42727
photovoltaic powered pumping system for water supplies in tropical countries 87−51103
photovoltaic powered water-circulating pump using DC motor 88−23799
photovoltaic pump powered by asynchronous machine, optimal control *(French)* 87−36122
photovoltaic pumping system based on induction motor driven pump, optimisation 87−42732
photovoltaic pumping system using commutated synchronous machine, optimal functioning, anal. *(French)* 88−69225
photovoltaic pumps, evaluation methodology, development and appl. 86−45294
photovoltaic solar water pump, submersible type, induction motor driven, description 85−10244
photovoltaic water pumping at remote location *(French)* 85−48893
photovoltaic water pumping system, Arizona State Univ. Program 88−37790
photovoltaic water pumping system eval. facility with computerised data acquisition 88−37791
photovoltaic water pumping system test facility, monitoring by data acquisition system 87−51104
photovoltaic water pumps, performance, reliability and maintainability 87−9423
pneumatically powered, electronically controlled infusion pump 85−20939
positive displacement piston pump, connection to PV array 88−17955
power industry pump, drivers, valve actuators and valve reliability data, IEEE standard 87−22053
power plant, 500 MW 86−61348
power plant boiler feed pump mechanical seals 86−56589
power plant output improvement by selective heat-rejection system operation 87−71982
power plants, centrifugal pumps for flue gas desulphurisation *(German)* 85−59844
power plants auxiliary machines, vibration diagnostics *(Polish)* 86−25673
power pump using thyristor induction drive, torsional vibration of shaft *(Russian)* 87−43500

pumps continued
power station pump motors, group rundown calc., resistance torque formula *(Russian)* 86−45328
power station steam plants, testing of membrane modules in feed pump collectors *(Russian)* 86−65795
power stations, thyristor control of auxiliary equipment *(Polish)* 86−45043
power transformer oil-circulation pump premature failure prevention 88−37256
pressurised fluid valves and pumps, packing and seals 85−10525
pulsatile pump system, computer-controlled, for physiological flow simulation 88−10298
pulsatory pump discharge and freq. meas., digital meter 88−68454
pump-turbine development for R.B. Russell Dam power plant (USA) 87−72039
pumped storage microhydroelectric power station using induction motor and submersible pump 85−15933
pumping stations, pump motors, vibrations reduction, solution *(Russian)* 85−15932
PV water pumping, performance and economic viability 88−17436
PV water pumping system, optimum design for developing countries 88−17450
PWR coolant pump flywheel radial crack testing, caustic curve method 87−9319
PWR power plant, noise diagnostics development into process meas. method 85−38735
PWR power stations, main coolant pump behaviour under fault conditions *(German)* 85−43677
radial flow pump impellers, shrouded and unshrouded, laser velocimeter meas. 87−57713
reactor coolant pump motor failure rates, prediction using probabilistic techniques 87−71889
reactor coolant pumps for French PWR programme 85−15763
refrigerators, ion-convection pump with corona fed by pulsating voltage, investigation *(Russian)* 85−16453
regulated pump/turbine for 1500 m ultrahigh head pumped hydropower 88−37092
renewable energy resources in Syria, research and development status 85−9569
reversible pumps as turbines 88−69184
Sasol oil-from-coal plants, equipment and technology, report 85−4734
screw induction pumps, transverse edge effects, MHD calcs. *(Russian)* 85−10122
secondary pumps and straight-tube steam generators forfuture LMFBR power stations 86−65895
Shinko Electric submersible induction motors for ladder pump drives *(Japanese)* 86−19280
single phase induction motor pump combination, operation at extremes of voltage and freq. 88−23939
Skoda high-speed steam turbines for chemical industry 85−44359
slurry and feedwater pumps for power plants, design, maintenance and reliability 85−21282
small gas turbine engine electronic fuel control development from diesel injection pump 88−48799
solar cell supplied permanent magnet, brushless DC motor pump drive *(Hungarian)* 86−13104
solar energy technology advances, heating, agricultural and photovoltaic appls., book 87−36313
solar gas turbine for pump and electric generator drive 87−15596
solar power efficiency, solar cell max. power output using impedance matching 'Maximiser' 88−11148
solar power plants, stand-alone, for remote areas in Libya 85−9804
solar powered slow sand water filtration system for rural Indonesian communities 88−43389
solar powered water pumps, DC motor-pump system with photovoltaic generator 87−42723
solar powered water pumps in Botswana, long and short-term testing 88−23804
solar pump system with asynchronous motor and microcomputer control 88−17454
solar water pumping, photovoltaic, thermal and other systems 88−69682
speed controlled DC motor pump drives for district heating station *(German)* 87−43503
squirrel cage vertical-shaft motors for circulating pumps of nuclear power station reactors *(Russian)* 86−39765
steam plant turbogenerator sets, cooling water delivery control to condensers using circulating pump adjustments *(Russian)* 88−17374
stirrers and induction pumps, liquid metal velocity distrib. effects on electrodynamic forces *(Polish)* 87−36272
subcritical once-through boiler bypass modification for variable-pressure cycling 86−61378
submerged pump bearing induction motor eccentricity assessment from supply current fluctuations 87−43040
submergible oil well pumps, starting characts. 86−45881
submergible oilwell pump, lightning protection 86−40363
submergible oilwell pumps, lightning protection 87−30250
submersible motor insulation reliability assessment *(Russian)* 85−21548
submersible oil-pump electric motors, magnet wire with film insulation as winding 87−72086
submersible pump induction motors, transient voltage protection 87−51206
submersible well pumps, electric drive control systems 87−78979
superconducting magnet, TOPAZ, liquid He centrifugal pump 88−33576
superconducting magnet DC pump system, magnetohydrodynamic aspects 87−60870
superconducting magnets for DC EM pumps 86−29325
Superphenix FBR, primary and secondary pump tests *(French)* 86−25749
Superphenix reactor heat exchanger and pump development *(French)* 87−4526
supply pumps, gliding parameters operation, effects on installation economics *(Romanian)* 88−5415
synchronous motor drive start-up torsional vibrations with variable and fixed supply frequencies 87−22289
syringe pump design 87−21620
syringe pump tester 87−14827
thermal power station equipment selection and construction *(Polish)* 88−11045
thermal power stations, recuperative control of feedpumps 85−15840
thermoelectromagnetic pumps for space nuclear power systems 88−61576
thermomechanical pump laboratory testing, for superfluid He on-orbit transfer flight expt. 88−42610

pumps continued
THYFREC-VT85E transistor inverter for energy conservation in pumps, blowers and HV motors 87−58200
thyristor frequency convertors for pump and textile machine drives 87−30793
turbine performance characteristics, numerical representation 88−5599
turbines, inlet/outlet works design in shaft 88−11123
turbogenerator feed pumps, hydraulic couplings bearings, cause of wear *(Russian)* 87−42765
turbomolecular pumps, operating props., effects of different driving systems *(German)* 88−69434
two-motor electric drive for pumps, fans, and compressors 87−58361
Uglegorsk power plant, turbo drive control systems, feed pumps and air blast units *(Russian)* 86−25860
underwater centrifugal pump driven by photovoltaic generator and current 87−22185
variable high-speed synchronous motor design for large boiler feed pumps 87−78518
variable pitch, fixed blade circulating pumps in Soviet power stations *(Russian)* 86−39515
variable speed drives for cheap pump and fan operation, speed and throttling effects 87−78971
variable speed drives for fan and pump control 87−22828
variable speed elec. drives for pumps and fans *(Romanian)* 88−69733
variable speed pump drives, economical design 86−66375
vertical induction machines for nuclear plant cooling water pumps *(Czech)* 87−64297
vibration velocity limits of nuclear power plant pumps, ASME standards 86−66220
vibrations in motor pumps *(Spanish)* 87−51135
vibroacoustic evaluation method of the technical state of feed pumps in power units *(Polish)* 88−5512
Voitsberg 3 coal-fired power station, water feed pumps for boiler *(German)* 85−9716
voltage quality effects on efficiency of pumps and blowers *(Russian)* 88−75981
VVER 1000 water cooled reactors, boiler feed systems. automatic power control *(Russian)* 88−10966
VVER-440 fission reactor, transient conditions when all circulating pumps are tripped *(Russian)* 86−39407
water pumping and desalination systems, coupling of a volumetric pump to a photovoltaic array 85−38936
water pumping windmills, long term-efficiency maximisation 88−37133
water pumping windmills with electrical transmission 85−27360
water pumps, wind turbine driven, with adaptive load characts. 85−53657
water pumps using 3-phase induction motors and improved starters 88−5695
water supply in desert areas, wind turbines for pumping units *(German)* 88−55252
water wellfield borehole pumps power supply 87−22592
wearable infusion pumps, development *(Dutch)* 85−48316
wind energy convertor with electrical transmission for centrifugal pump *(German)* 86−70747
wind powered water pumping, power transmission between turbine and pump 87−22019
wind pumping scheme with isolated induction motor plus capacitor excited induction generator 87−15630
windmills driving piston pumps, computer aided wind speed meas. field tests 87−21256
windmills driving water pumps, IEA recommendations for hysteresis region 87−78573
windpump systems for water supply, pump/turbine matching and borehole characts. 87−51134
windpumps, system assessment 87−64497
Zabrze thermal power station, cascade control system for 1 MW motor rotational speed. *(Polish)* 87−64344
Al melt stirring by EM pump *(Japanese)* 86−54276
CO_2 pipelines for tertiary recovery injection of oil, elec. and instrumentation features 88−24300
^4He, superfluid, transfer in space, mechanical pumps 88−36583
N_2O_4, liq. pumping in nucl. reactor loop, ejector efficiency and suction head 86−32978
SO_2 flue gas removal for coal-fired power stations, pump and fan appls. *(German)* 88−62158
SO_2 removal from coal-fired power stations using centrifugal pumps and fans *(German)* 88−62155

detectors, adaptive noise cancellation appl. 87−60781
detectors, audio-frequency noise *(Chinese)* 88−42091
detectors for broad optical band testing, Navy laser systems appl. 85−29973
detectors for laser appls., material charact. *(German)* 88−60739
dosimeter using a pyroelectric detector 85−20976
extreme environment thermal sensors *(French)* 85−64093
ferroelectric applications, conf., Bethlehem, PA, USA (June 1986) 87−43773
ferroelectric ceramics, polarisation control using induced phase transition, energy conversion appls. 86−68072
ferroelectric IR detection and imaging 87−56708
flame detectors with pyroelec. sensors 85−43001
high-speed pyroelectric detector for laser pulse shape study 88−14265
infra-red light switch 86−33821
infrared detectors 85−14804
infrared imager, digital processor for signal processing 88−22515
integrated chemical-reaction sensor 86−55744
IR, wideband detector of low-power radiation, 10 to 20 μm range 86−31441
IR detector, modulation type 87−70648
IR detector, passive, PID11, for human body detection 87−3618
IR detector array, single-chip, heat anal. *(Chinese)* 88−74401
IR detector arrays, low microphony 87−21096
IR detector arrays for IR imaging 87−29138
IR detector on thick substrate, performance anal. *(Chinese)* 88−42095
IR detectors, reticulated arrays with heat-collector fins 87−21095
IR detectors, single element, props. and appls. *(German)* 87−49742
IR detectors and systems, conf., London, England (June 1986) 87−38
IR gas sensor using pyroelectric IR detector 88−29329
IR heat sensors based on pyroelectric polymer polyvinylidene fluoride 86−55742
IR linear pyroelectric detector arrays, improved design 88−29401
IR movement detector using pyroelectric sensor 85−64149
IR pyroelectric detectors, principles and properties *(Chinese)* 88−22608
IR staring/scanning imagers, technological advancements 87−14205
IR technology, conf., San Diego, CA, USA (Aug. 1984) 85−44367
IR technology, remote sensing appl. *(Japanese)* 85−37480
IR television progress using pyroelectric vidicons 85−47848
IR thermal imaging systems suitable for developing countries 86−38270
IR thermometer for medical use based on pyroelec. polymer film 87−63766
Langmuir-Blodgett film IR detectors, dynamic pyroelec. response 86−70144
Langmuir-Blodgett film pyroelectric devices, optimisation of thermal performance 87−32826
Langmuir-Blodgett films, piezoelec. and pyroelec. props., device appls., review 88−7777
laser beam diagnostic systems 88−27272
laser beam energy centre, power and diameter determ. with quadrant pyroelectric radiation detector 86−29029
laser energy absorpt. meas. using differential joulemeter and optoacoustic cell calibration appl. 87−29324
laser power meters, microprocessor domination 85−24620
laser power monitor for 1 mW to 50 W range, pulsing PVDF detector 88−20718
laser radiation pyroelectric detect. 87−35096
lateral heat conduction effect on suspended pyroelec. detectors *(Chinese)* 85−31479
linear arrays, low signal multiplexing system 87−3518
linear pyroelectric array IR sensor 87−21101
low resolution thermal imagers, pyroelectric linear arrays, data acquisition system noise process 87−34990
material and detectors, IR science and technology, conf., Wuxi, Jiangsu, China (Nov. 1986) *(Chinese)* 87−51693
materials, device designs, review 87−32745
matrix detector arrays for laser beam imaging, fabrication and performance 85−52780
microwave field detectors, polyvinylidene fluoride 86−31426
microwave pulse power meas., pyroelectric receiver appl. *(Russian)* 85−64261
microwave pyroreceivers, piezoelectric noise neutralisation 87−32825
microwave transducer, thermal conditions *(Russian)* 88−74371
modified detector elements for surface resist. meas. of unstable metal films 85−43064
MOSFET arrays for pyroelectric array readout, low-noise design 88−29400
multilayer electrothermal convertors, frequency charact. calc. 87−49686
multipurpose integrated-sensor chip for simultaneous meas. of phys. and chem. variables 86−50050
NMOS fully-integrated ZnO on silicon pyroelectric infrareddetector array 85−52685
noncontact low temp. meas. with hybrid pyroelectric detectors, precision improvement 88−22819
optical absorption detection in non-transparent materials 85−8974
optothermal detectors, energy transfer mechanisms to pyroelement 87−49749
passive IR detector 86−24539
photopyroelectric thin film instrumentation and impulse-response detection, performance and signal recovery techniques 88−22606
photopyroelectric thin-film instrumentation and impulse-response detection, theoretical model 88−22604
photopyroelectric thin-film instrumentation and impulse-response detection, methodology 88−22605
piezo film sensing devices 87−56674
poly(vinylidene) pyroelectric tube, meas. of optical fibre absorpt. loss 86−2745
polyvinylidene fluoride, passive IR detector 87−70641
polyvinylidene fluoride films, transducer applications 86−53848
polyvinylidene fluoride pyroelectric electret calorimeters, highly time resolved, high sensitivity 86−55881
polyvinylidene fluoride pyroelectric focal plane array , technology and props. 88−74476
polyvinylidene fluoride thin film IR sensor 88−36008
polyvinylidene fluoride-trifluoroethylene copolymers, pyroelectric conversion materials 87−43476
portable pyroelectric TV camera for nondestructive thermal analysis 87−14187
power conversion system protection in microseconds by PYROBREAKER devices 85−38579
preamplifier design for pyroelec. detectors 86−20327

pyroelectric devices continued
principles and appls. *(German)* 86−11592
pulse energy meas., high-sensitivity pyroelectric and optoacoustic receivers 88−36002
pulse ionizing-radiation detector 85−64451
pulse-modulated radiation energy and time parameters determ., using thermo- and pyroelectric detector 88−67800
PVDF detector extension to linear array, used as image sensor 88−4441
pyroceramic holder for dilatometer 85−8819
pyroelectric radiometer for intermediate IR radiation 85−47983
pyrooptic converter, device sensitivity estimations 87−70640
radiation detectors and piezoelec. stress gauges, unified operation theory 85−43000
radiation receiver, amplification of thermal signals, anal. 87−46300
radiation receivers, linear pyroelectric, performance 85−58713
radiation receivers, linearity meas. of output charact. 88−4433
radiation-induced thermal wave phenomena, pyroelec. detection 87−29980
receiver for pulsed VUV radiation recording 86−5320
robots, application of piezoelectric and pyroelectric transducers *(Italian)* 85−31448
rotated-followed type infrared TV system 86−17829
sensor integration with signal-processing systems, challenges for Si IC technology 85−52751
sensors and applications *(Japanese)* 86−38389
sensors for surveillance *(German)* 87−56692
shutter, electro-optical, sub-microsec. 85−29648
smectic liquid crystals, pyroelectric IR detectors 87−14334
SOLEF PVDF biaxially oriented film appl. to piezo- and pyroelectric transducers 88−4386
submillimeter laser interferometer withinterference-field visualization 86−31615
submillimeter laser interferometry with pyroelectric image recording 85−8736
technological advances and appls. 85−7132
temperature meas. using infrared detectors *(Russian)* 87−8626
TGS crystals grown by cooled sting technique, elec. props. 86−13731
thermal imager using hybrid pyroelectric detector array with MOSFET readout 88−74481
thermal imaging, pyroelectric/CCD hybrid array 87−21097
thermal imaging system, microcomputer-aided, development and applic. to pain management 86−50532
thermal imaging with uncooled pyroelectric infrared detectors 88−29451
thermal IR detector review *(Chinese)* 86−70138
thick film technology for new sensors *(German)* 86−17927
thin film pyroelectric microphones for recording sound waves in a gaseous medium 85−26920
thin-film infrared absorber structures for advanced thermal detectors, struct. and props. 88−67793
transverse heat diffusion error in electrically calibrated pyroelectric detectors *(Chinese)* 88−26646
type II detectors 87−38643
uncooled ground-based thermal imager, Plessy development 87−3484
vidicon, high performance, development *(Chinese)* 85−61644
vidicon, pyroelectric with CCD sensors and photoelements *(German)* 86−14819
vidicon camera, compact pyroelec., stable picture using orbiting optical element *(Chinese)* 86−67637
vidicon camera development for real-time thermography *(Japanese)* 87−34971
vidicon for submillimeter range radiation *(Czech)* 86−41493
vidicon imaging system, digitised IR image data processing *(Chinese)* 87−28944
vidicon operational and noise charact. *(Slovak)* 86−60161
vidicon technology developments, review 88−25845
vidicons for use in IR TV cameras 85−6667
visualization of submillimeter laser radiation with a pyroelectrictelevision camera 86−17831
Au film, reflectivity determ. using pyroelectric detector element 85−43113
β-BaB_2O_4 pyroelectric material for IR detector appl. *(Chinese)* 85−40944
$Ba_xSr_{1-x}Nb_2O_6$ pyroelectric detector, sensitivity estimation in range 0.24 to 10.6 microns 86−31439
CO_2 laser parameter meas. with pyroelectric detector 87−61220
Fe-I boracites, polymer and glass bonded composites, props. for pyroelectric applications 86−53879
$LiTaO_3$ modulation-type pyroelec. IR sensor 86−50099
$LiTaO_3$ pyroelectric IR detector, PEC struct. and M-type 86−55734
$LiTaO_3$ pyroelectric IR detectors, influence of piezoelectric-resonance *(Chinese)* 88−42093
$LiTaO_3$, pyroelectric X-ray detectors and X-ray pyrometers 87−8857
$LiTaO_3$ pyroelectric enthalpimetric detection, H-O reaction appl. 85−41012
$LiTaO_3$ pyroelectric line scanner for remote IR imaging of vehicles 88−47523
$NaNO_2$ layer on Si FET, ferroelec. field effect 87−1507
PZT, pyroelec. ceramics and devices, additives influence on props. and IR detector use 86−42008
$(Pb,Ca)(Co_{1/2}W_{1/2})TiO_3$ ceramics, pyroelectric IR sensor 86−55735
(Pb, Ca)[$(Co_{1/2}W_{1/2})$, Ti]O_3-based pyroelec. IR sensor 86−50098
Pb germanates, ceramics, dielectric props. for pyroelectric applications 86−53880
$Pb_{4.95}Ba_{0.05}Ge_3O_{11}$ ceramic films by printing technique, appl. as pyroelec. elements in IR detectors 86−47947
$Pb_{0.7}Ca_{0.3}TiO_3$-polyamidimid composite film, pyroelectric heat sensor 86−55737
$Pb_{1-x}La_xTi_{1-x/4}O_3$ thin film pyroelectric infrared sensors 87−35084
$Pb_{1-x}La_xTi_{1-x/4}O_3$, thin films, pyroelectric linear array IR sensors 88−67789
$PbTiO_3$ ceramics with increased Ca concentration for pyroelectric infrared sensors *(Japanese)* 85−26337
$PbTiO_3$ ferroelectric thin films, prep., basic props. and device appls. 86−2462
$PbTiO_3$ thin film IR sensor, monolithic integrated pyroelectric 85−43003
$PbTiO_3$ thin film, dielectric and pyroelectric props., application as IR sensors 86−55738
$PbZrO_3$:Sn^{4+}(Ti^{4+}), conversion cycles and output electrical work 86−33715
Si IC-pyroelectric image sensor fabrication using flip-chip solder bonding 88−25752
ZnO multifunctional integrated sensors 88−29407
ZnO sputtered thin film, pyroelectric props. and applications 86−68151

RF class-C amplifier design, Q-factor eval. of microstrip matching network 87−16913
ring resonator in free space, finite permittivity correction 85−6493
sapphire dielec. resonator oscillators, cryogenically cooled, measurements and anal. 88−19347
sapphire loaded superconducting cavities, high Q, appl. to ultrastable clocks 85−55110

Q-factor continued
sapphire resonator, thermal excitation 86−28570
sapphire-loaded superconducting cavity resonator with Q of 4.2×10^9, expt. 87−73601
SAW oscillators for UHF frequency sources in systems environment 85−44924
SC biquads, fully differential configs., systematic design procedure and props. 88−56752
SC systems, single-path freq.-translated type, design and filter appls. 88−56746
screened dielectric resonator, expt. investigation 88−38696
second-order digital bandpass filters, bilinear transform. *(Japanese)* 86−8386
second-order transfer fn. realisations, synthesis method 88−18889
seismic waves, plane-wave Q deconvolution theory 86−18511
self-excited oscillators with low-Q oscillator systems 86−27129
shear mode transducers for high *Q* bulk microwave resonators, fabrication and noise performance 88−20217
shear-surface-wave resonator 86−2513
shielded cylindrical quasi-TE_{0mn}-mode dielec. resonators, props. study 88−38690
spherical dielec. resonators, free and shielded types for MM-wave appls., EM anal. 86−58034
spherical three-layer resonator with anisotropic dielec. material, generalised theory 87−73626
split ring resonator, 1 GHz, design and manufacture *(Chinese)* 87−45188
stability of 1/f frequency fluctuations and Q-value, anal. *(Japanese)* 86−20348
stepped impedance-resonators for microwave bandpass filters, unloaded Q-factor study 87−17303
stereo parametric equaliser, Para-Q, Q-factor freq./gain control facilities, design and construction 85−14524
strongly coupled resonators, stored energy, loss capacity and Q-factor calc. *(Russian)* 85−28691
superconducting cavity resonator, high-Q sapphire loaded 88−19333
superconducting dielectric-resonator loaded with $YBa_2Cu_3O_7$ plates, EM props. at W-band 88−63873
superconducting microwave resonators with liq. He filling medium 85−41098
surface transverse wave resonator design *(Japanese)* 87−60774
tapered gyrotron resonator, eigenmode calc. 86−35067
TE_0 dielectric resonator, Q-factor rel. to conductor shields 86−8432
TE_0 dielectric rod resonator, influence of conductor shields on NQ-factors, anal. 86−27544
TE_0 dielectric rod resonators placed between parallel conductor plates, numerical anal. 86−67478
thick film inductors, circular spiral, effect of geometry and processing parameters 88−57183
thick-film capacitor dielectrics with permitt. up to 100 85−11607
three-port ferrite resonator cct. using slot line, design and characts. study *(Japanese)* 85−28727
transconductance-capacitance integrator, independ. tuning of Q-factor and unity-gain freq. 87−5952
transconductance-capacitance integrator with independent tuning of Q-factor and unity-gain freq., modifications 88−866
two-dimensional open resonators with cylindricalmirrors 86−3623
two-port resonant ccts., Q-factor meas. using network analyser 86−13910
unilateral fin line, current, conduction losses and Q-factors, calc. 88−27564
varactor, effect on tuning sensitivity of microwave oscillators 86−35085
wide-gap re-entrant cavity resonators for 900-1500 MHz, Q-factor and temp. stability 85−13187
wire inductor, struct. and characts. 87−1016
X-band wheel-type channel-dropping filter 87−52807
AlN piezoelec. film Q-factor reduction by radiation into bulk GaAs 87−1857
$AlPO_4$ crystals with high Q-factor, growth and props., bulk wave device appl. 87−58913
$Ba(Mg,Co)_{1/3}Nb_{2/3}O_3$-$Ba(Co_{1/3}Ta_{2/3})O_3$ ceramic dielec. resonator, microwave props. 86−58038
$Ba_3MgTa_2O_9$ ceramic dielec. rod resonators with high values of unloaded Q 86−67475
$Ba(Mg_{1/3}Ta_{2/3})O_3$ ceramics with ultra-low loss at microwave frequencies 87−53752
BaO-Sm_2O_3-CeO_2-La_2O_3-TiO_2 high permitt. ceramics applied to microwave resonators 88−24814
CO_2 TEA laser with etalon tuning, pumping of FIR laser emissions 88−14090
$Fe(CO)_5$ power cores for high Q-factor inductors, development, mag. props. and performance 87−18534
InGaAsP-InP bistable DH laser formed by proton bombardment *(Chinese)* 86−9822
KD_2PO_4 crystal modulator with coaxial resonator, Q-factor and losses, expt. study *(Russian)* 86−42022
$Li_2B_4O_7$ strip type resonators 86−42040
$LiNbO_3$ miniaturised chip resonators using strip structure 86−47925
$LiTaO_3$ and $LiNbO_3$ chip-type resonators, fabrication and appls. 86−15312
Nb, sputtered coating on Cu, superconducting RF cavity fabrication 88−26739
Nb supercond. resonator, fabrication and characteris. 85−12526
Nb, superconducting acoustic resonators, quality factor below 1K 86−58729
NbN-NbO_x-Pb Josephson junctions, AC props. 87−67848
Si_3N_4 dielectric for UHF chip capacitors *(French)* 88−57016
SiO_2/ZnO/SiO_2 diaphragm air-gap type piezoelectric composite thin film resonator 86−42041
YAG, microwave acoustic resonators, cryogenic expts. 87−67684
$YBa_2Cu_3O_{6+x}$, bulk high-temp. superconductor, microwave characts. determ. using disc resonator meas. technique 88−65008

Q-factor measurement
algorithm for *Q*-factor measurements using a network analyzer 87−56831
automatic system for coils meas. *(Romanian)* 87−56828
automatic system for microwave resonators resonant frequency and Q factor meas. 85−15006
ceramic capacitors, high Q, characts. 87−66597
crystal oscillator, high *Q* measurement by using light wave 86−28577
dielectric resonator coupled to microstrip line, automatic charactn. technique 87−6015
dielectric waveguide, coupled nonradiative 88−7006
electric motors, ultimate Q-factor *(Russian)* 86−26020
fitting circles and ellipses, sliding termination meas. appl. 86−44075

Q-factor measurement continued
gyrotron cold cavity Q-factor meas., nondestructive technique 87−37816
HF parameters of resonance line, measurement system realisation *(French)* 85−48078
high-Tc superconductors RF props. 88−68020
high-temperature superconductors, disc resonator meas. technique for microwave characts. determ. 88−65008
LF resonance circuit, digital quality meas. *(German)* 88−10116
linear complete-aperiodic parallel circuit resonance indication, rel to Q-factor meas. 88−31958
low-loss dielectric waveguides atten. meas. by cavity resonator 88−63832
mechanical Q-factor meas. of bare insulating materials 88−53946
mechanical Q-factor meas. of bare insulating materials 88−53946
microwave cavity oscillators, Q-factor meas. technique 86−24726
microwave cavity resonators, Q-factor and resonant freq. meas. using multipoint method *(Polish)* 85−14994
microwave cavity resonators, Q-factor meas. using integration method 85−40223
microwave dielec. resonators, dual-mode Q-factors determ., meas. procedure 87−77388
microwave resonator, automatic method for freq. response and Q meas. *(French)* 85−11510
microwave resonators, automatic meas. of passband 86−27556
noise study, models, oscillator noise relationship and meas. techniques 88−20219
PCBs, electrical measurements 85−55239
piezoelectric material, low-Q, k_t and Q_m determ. methods 87−1807
quartz, crystal resonators, motional capacitance and Q-factor meas., method using T-transmission two-ports *(Polish)* 86−53860
quartz crystal meas. system, computer controlled for ageing meas. in batch mode 87−34949
quartz resonator, LF, Q-factor meas. method and cct. development 87−35180
receiver noise figure and Q-factor meas. *(Czech)* 86−44414
shield dielectric cavity resonators, unloaded Q-factor, precision meas. 85−64263
spectral analyser appl., development trends 86−31319
spiral microstripline inductors, characterization 86−1418
whispering-gallery modes of dielectric structures: applications to millimeter-wave bandstop filters 88−25384
X-cut bar, Q-value meas. using RF monitor *(Japanese)* 87−67649
H maser, quality parameters meas. and interpretation 86−36362

Q-meters
component inductance meas., correlating *Q*-meter and LCR-meter inductor measurements 87−77369
design 87−8648
digital, for supercond. microwave systems 87−35127
inductance meas. techniques and appl., use of coils and transformers *(Czech)* 85−37722
LF meters, checking equipment based on Maxwell bridge 85−8901
MIS structure RF capacitance stabilisation, using Q-meter 87−53300
quartz resonator Q-factor meas. cct. development 87−35180

Q power factor *see Q-factor*

Q-switching
see also lasers
acousto-optic modulators, deflectors and Q-switches, basics 87−26110
acousto-optic Q-switches, characts. and appls. 87−61207
alexandrite lasers, CW, arc-lamp pumped 88−65792
bifurcation in saturable absorber laser 88−51850
colour centre room temp. tunable lasers, colour centre crysts. as filters and Q-switches 88−65634
crystalline modulator and Q-switch specification tables 86−9907
differential absorption lidar, using Q-switched CO_2 laser 85−24469
diode laser, continuous-inversion mode, 14 GHz operation 86−36498
dithiene bleachable filter for I laser, Q-switching and decoupling of amplifiers 85−2381
double-contacted injection lasers, Q-switched, sync. bandwidth eval. using large-signal model 86−29152
dye DFB laser, picosec. pulse lasing due to Q self-modulation 86−15654
dye laser, tunable with electro-optic Q-switching of coupled laser, characts. 87−2214
dye laser picosecond pulse generation with self-modulated Q-switching 86−36441
dye laser synchronously pumped, picosecond pulse formation 87−12416
dye lasers, Q-switching, output characts. *(Japanese)* 87−7283
dye lasers, retunable, with superregenerative single active medium amplifier, electrooptical Q-switching *(Russian)* 86−22341
dye lasers, synchronously pumped by Q-switched mode-locked Nd:YAG laser, high-power picosecond blue pulses 86−63769
dye lasers energy transfer synchronously pumped, subpicosecond pulse generation 86−36433
dye-cell Q-switch, characts. and appls. 87−61209
electro-optic Q-switches, characts. and appls. 87−61208
electro-optical switches with ferrite lines *(Chinese)* 87−7177
Fabry-Perot resonator, confocal 4.5 m long for storage of megawatt laser pulses 87−2217
FTIR-Q switch resonator, fundamental theory *(Chinese)* 86−63840
gamma laser, Mossbauer emission kinetics under thermal dynamic conditions in active medium 86−48378
heterogeneous nonlinear scattering media, self-transparency effects and their use in lasers 86−54210
inhomogeneous media, nonlinear light scatt., appl. in lasers 86−15768
injection heterostructure laser, Q-switched, picosecond pulses 87−61164
injection laser Q-switching with ultrashort absorber recovery time 88−20661
instabilities in lasers with an injected signal, self-Q-switching process 85−24432
laser compound resonator with electro-optic switch, laser parameter control 85−56738
laser electro-optic shutter control, w.r.t. luminance level of active medium 87−75194
laser modulator controller based on resonator Q-control 86−68597
laser Q-switches, passive, made from LiF crystals with colour centres 85−41436
laser Q-switching by self-focusing, threshold condition 87−26517
laser resonator, phase-conjugated sidearm stimulated scattering, Q-switched 85−56820
laser resonator Q-factor modulation using methods of adaptive nonlinear optics *(Russian)* 87−26461

Q-switching continued
laser with saturable absorber, optically bistable, stationary, harmonic and pulsed operations 85−7341
laser with saturable absorbers, optically bistable, time depend. of bifurcation diagram 85−7342
linear triatomic molecule lasers operating at cascade vibr.-rot. transitions, book contrib. 88−51759
master oscillator, aligning, mode-locking and Q-switching for laser fusion system 86−36534
metal-cladded ridge waveguide laser diodes, double-contacted type, synchronized optical pulsations 86−29151
modulation-free pulse generation using active Fabry-Perot etalon 86−29192
modulator, vacuum-tube, for Q-switching in solid-state lasers 87−38863
molecular gases, laser optoacoustical spectrosc. rel. to sub-mm. laser radiation and Q-switching 85−7374
monomode fibre lasers, Nd^{3+}-doped, mode locking 86−29097
nanosecond to femtosecond pulse generation by passive Q-switching and mode-locking 88−51878
Nd^{3+}:YAG laser, pulse delay stabilisation 86−42517
NdP_5O_{14} laser, miniature, nanosecond, high efficiency 86−15662
passive *Q* switch with an activated absorber, CO_2 laser pulse control 87−54375
passive switching of 2 μm laser using alkali halide cryst. 88−58616
phase conjugation of laser beams, single mode Q-switched ruby laser development 87−12594
phosphate glass laser, actively mode-locked and Q-switched, picosecond pulse generation by self-phase modulation 86−3112
phosphate glass oscillators, actively mode-locked and Q-switched *(Japanese)* 85−18893
picosecond laser pulses, generation using Q self-switching 87−61059
polymer passive *Q* switch used in Nd^{3+}:YAG lasers 87−54374
pulse generation, high power CW tunable, using intracavity self-injection and ferrite transmission lines *(Chinese)* 85−56760
pulsed transmission mode, in Q-switched laser, ns pulse generation 88−34069
pump-lamp firing-pulse generator for solid-state lasers 86−42609
ruby, laser, with passively switched electrooptical shutter, ultrashort pulse form. dynamics 87−61123
ruby, Q-switched, mode-locked and cavity dumped laser for plasma diagnostics 85−51147
ruby laser, cryptocyanine dye, output characts. *(Korean)* 87−18943
ruby laser, pulsed, long duration Q-switching technique 88−27124
ruby laser, Q-switched, pulse stretching for bubble chamber holography 87−26486
ruby laser, single mode Q-switched, phase conjugation of laser beam 87−12595
ruby laser for fixed Q pulsed holographic interferometry 85−35901
ruby laser for hologram recording and analysis for cavitation nuclei size spectra determ. 85−35917
ruby laser oscillator, novel design 87−12422
ruby laser pulses, 1.6 ns, generation by passive Q-switching 87−12443
ruby laser Q-switching with passive leucosapphire Q-switch 88−27239
ruby laser radar system for atmospheric studies at Syowa Station, Antarctica 85−37113
ruby laser resonator, passive Q-switching by alkali halide Z centres 85−2366
ruby lasers, electro-optically tuned, spectral characts. anal. *(Chinese)* 86−9774
self-focusing technique of Q switching 85−56826
semiconductor single heterostructure lasers, picosec. light pulse source 85−24526
solid laser, influence of pumping cavities *(Rumanian)* 85−35728
solid laser, RF self-modulation 86−68513
solid lasers, high power monopulses, increase in rotational speeds *(Rumanian)* 85−35727
solid lasers made from activated ionic crystals, review 87−18953
solid state lasers, diode laser pumped, Q-switched and mode locked operation 88−45393
solid state lasers, short pulse generation by novel passive Q-switching technique 87−68427
solid-state ring and linear lasers with electro-optic Q-switching, numerical modelling 87−19008
spark gap driven cct. for electro-optical Q-switches 85−2376
ultrafast laser system for subpicosecond pulse generation in mode-locked and Q-switched configs. 85−62535
CO, Q-switched electron-beam-controlled laser, efficiency enhancement by laser pulse series generation 86−29051
CO laser, mutual enhancement obs. of stimulated emission lines 88−65572
CO lasers, Q-switched, selection of vibrational-rotational lines 86−54095
CO sealed laser, spectrum and power depend. on Q-switching rate 86−63763
CO_2 TEA laser, Q-switching effect 87−12402
CO_2 laser, CW, low power, high frequency modulation using semiconductor laser 87−75012
CO_2 laser containing saturable absorbers, dynamic behaviour 86−22502
CO_2 laser passive Q-switching pulsation, deterministic chaos 88−65805
CO_2 laser passive Q-switching pulse, superposed undamped undulation 86−29210
CO_2 laser, piezoelectric Q switching 87−26324
CO_2 laser, pulse shape and phase diagram in passive Q-switching 85−24451
CO_2 laser radar, imaging, Q-switched 87−3244
CO_2 laser, synchronisable, injection locked, Q-switched, mode-locked, cavity dumped 10 atmosphere 87−33085
CO_2 laser, ultrashort pulse generation by square-wave mode locking and cavity dumping 87−26471
CO_2 laser with CH_3I saturable absorber, optical instabilities and chaos, Shilnikov dynamics 88−58421
CO_2 laser with intracavity absorber, Q-switching and bistability 87−54229
CO_2 laser with intracavity saturable absorber, laser instability and chaotic pulsation 88−51852
CO_2 laser with saturable absorber, Q-switch anal. 85−41306
CO_2 laser with saturable absorber, bistability and passive Q-switching 85−2200
CO_2 laser with vibration proof Q-switch 86−3045
CO_2 two-frequency laser, delay control between pulses by passive Q-switch 87−54243
Co:MgF_2 laser, Q-switched, frequency tuning characts. 85−41365
Co:MgF_2 laser, mode locking and Q-switching by loss-modulation freq detuning 87−33131
Co:MgF_2 laser system, Q-switched mode 86−22350

Q-switching continued

Nd:YAG laser pulses, optically compressed, appl. to dye laser pumping 86−48361
Nd:YAG laser, self injected for subnanosecond pulse generation, electrooptical switch driver 85−2259
Nd:YAG laser spark for use in ophthalmology 88−30037
Nd:YAG laser synchronously pumping dye laser, Q-switched, mode-locked 85−56573
Nd:YAG laser with passive Q-switch 88−65647
Nd:YAG laser with pulsed Q-switch transmission, nanosecond pulse generation 85−51219
Nd:YAG laser with wavefront-reversing mirror and Q switching by stimulated Brillouin backscattering 85−56741
Nd:YAG lasers, injection-seeded, fast resonance-detection technique for single-frequency operation 87−18949
Nd:YAG loaded cavity, unstable resonator config. with self-filtering aperture 85−24599
Nd:YAG mode-locked laser, intracavity self-phase modulation pulse compression 85−41362
Nd:YAG modified SFUR oscillator charactn. in pulsed regimes, nonconfocal config. 88−8255
Nd:YAG oscillator in Q-switched TEM_{00} mode, birefringence compensation in polarization coupled lasers 87−61115
Nd:YAG, passive Q-switched, single longit. mode oscillator, transverse mode control 85−35724
Nd:YAG self-injected unstable cavity laser, design 86−29093
Nd:YAG single mode Q-switched oscillator stabilisation, simple numerical control loop 86−68505
Nd:YAP laser with BDN II absorber, Q-switching and mode-locking study 88−27104
Nd:$YAlO_3$ perovskite picosec. laser, temporal charact. study 87−54275
Nd:YLF single mode Q-switched oscillator stabilisation, simple numerical control loop 86−68505
Nd: glass laser, Q-switch using saturable absorber C.N.101 *(Rumanian)* 86−63794
Nd:glass laser emitting light pulse ordered sequence, supersonic resonator Q-factor modulator 86−42506
Nd:glass, laser, microsecond pulse generation 86−68514
Nd:glass laser, passively Q-switched, output-parameter control 87−2104
Nd:glass laser with electronic control of emission kinetics and spectrum 86−9806
Nd:glass laser with plasma mirror 86−22347
Nd:glass lasers, comparative tests in free-running, Q-switched and pulse periodic regimes 85−62543
Nd:glass monomode fibre laser, Q-switched operation 86−22348
Nd:glass pulsed laser study of nonlinear optical phenomena in Hg vapour 85−24657
Nd:phosphate glass laser oscillator, actively mode locked/Q-switched 85−51146
Nd^{3+}:SiO_2 single-mode fibre laser, diode pumped, CW and Q-switched operation study 86−29096
Nd^{3+}:YAG CW laser, passive Q-switching with $LiF:F_2^-$ crystals 88−27115
Nd^{3+}:YAG Q-switched laser with three-mirror resonator, stochasticity and regular fluctuations 85−56739
Nd^{3+}:YAG laser, Q-switched short light pulses generation 87−61122
Nd^{3+}:YAG laser, low-freq. stability, acoustooptic Q-switching 86−22359
Nd^{3+}:YAG laser, miniature, optically pumped, mode-locking and Q-switching 86−63788
Nd^{3+}:YAG laser, operating regimes with CW pumping and Q-modulation 86−22356
Nd^{3+}:YAG laser, picosec. pulse effective shortening under active mode locking and Q-switching conditions 85−19006
Nd^{3+}:YAG laser pulse generation stability, mode locking influence 88−14258
Nd^{3+}:YAG laser radiation, periodic Q-switched regime with pulsed pumping, generation kinetics 85−18905
Nd^{3+}:YAG laser second harmonic pump for $LiNbO_3$ quasi-CW picosecond optical parametric oscillator 86−48494
Nd^{3+}:YAG laser, subnanosecond pulse generation, dynamic Q control 86−15677
Nd^{3+}:YAG laser with unstable resonator, short giant radiation pulse form., bleachable dye Q-switch 87−54281
Nd^{3+}:YAG lasers, industrial appls. *(French)* 86−10048
Nd^{3+}:YAG repetitive pulse laser with unstable cavity and passive $LiF:F_2^-$ colour centre shutter 86−36451
Nd^{3+}: glass active mode-locked Q-switched laser 86−3109
Nd^{3+}:phosphate glass laser oscillator, Q-switched using F_2^- centres in LiF *(Chinese)* 86−68492
Nd-doped monomode fibre laser, mode-locking and Q-switching 88−8170
Nd-glass laser, Q-switched, broad-band SHG 88−72404
Nd-glass laser, slow mechanical Q-switching, σ parameter effects *(Rumanian)* 87−7324
Nd^{3+}-doped fibre laser, single-mode, 1.088 μm, diode pumped 86−54124
$NdAl_3(BO_3)_4$ crystals, pulsed lasing at 1.063 μm *(Chinese)* 88−40171
Ng:glass lasers, submicrosec. single pulse generation using $LiF:F_2^-$ crysts. as passive shutters 85−51227
Sm^{3+}:SiO_2-GeO_2 glass fibre laser with Fabry-Perot type cavity, 651 nm emission, charact. 88−51773
Ti:Al_2O_3 self-injection locked Q-switched line-narrowed laser 88−65629
Ti^{3+}:Al_2O_3 coherently pumped laser, output charact. 87−18939
XeCl lasers, subnanosecond pulse generation using saturable absorber 85−56744
YAG laser, cavity dumped Q-switched mode-locked, efficient operation 87−54284
Q-switching continued
YAG, multi-compound doped, as Q-switch for active-passive mode-locked laser *(Chinese)* 88−65611

QAM *see amplitude modulation*

QC *see quality control*

quadratic programming
0-1 quadratic programming, solvable case 86−34180
6-10 kV supply networks, reliability improvement, optimum resource distribution, math. model *(Russian)* 85−4546
L_1-norm and other methods for sample allocation in multivariate stratified surveys 87−72955
acceleration data anal., discrete-time LQP problem 87−63528
analogues, equiv. cct. 87−195
antenna phased array optimisation with digital phase shifters by biquadratic programming 87−47414
asymptotic equivalence of two finite penalty methods of first order 87−58817
bayesian control in mixture models 88−38008
BFGS and DFP optimisation algorithms, quadratic function minimisation 86−19955
closed form solution to problems in complex variables 85−54324
complementary pivoting algorithms involving extremerays 85−54303
conducting fibers in insulating polymers, resistance as quadratic min-cost network flow problem 88−38320
constrained minimisation algorithm REQP behavior 86−26745
constrained optimisation methods that use the projected Hessian, irregular convergence 85−44625
continuous variable smooth nonconvex nonlinear programming 88−11889
controlled perturbations for quadratically constrained quadratic programs 87−16518
convex hull of points defined 88−63187
convex quadratic programming with one constraint and bounded variables 87−10282
convex spline interpolants with minimal curvature 86−7671
convexity preserving interpolation with exponentialsplines 86−46235
coupled algorithmic-heuristic approach for design optimization 87−58812
CT image reconstruction from view projections, mathematical programming *(Japanese)* 86−38779
cubic splines, class obtained through minimum conditions 86−34197
decoupled optimal load flow using linear or quadraticprogramming 86−56293
decoupled optimal power flow approach usingFletcher's quadratic programming method *(Chinese)* 86−50858
discrete L_1 approximation using vanishing Jacobians method 87−72949
distribution system planning using quadratic mixed integer programming 88−23404
dual gauge programs, with applications to quadratic programming and the minimum-norm problem 87−72959
duality concept for solving quadratic optimization problems with continuous and Boolean variables *(German)* 87−58821
electric power system, reactive power generation optimisation, Han-Powell algorithm appl. 85−26998
FIR linear phase digital filters, optimal design via convex quadratic programming method 88−63804
French national TV channels, simulation and evaluation of programs grid *(French)* 85−31155
general equality, existence and uniqueness of solutions 85−44621
geometric programming, machining economics application 85−28151
global minimization of indefinite quadratic problems 88−18593
global/local overlinear convergent regularisation of Wilson method *(German)* 87−44177
Hessian type, parameterised, active set algorithm 86−62064
HV network voltage and power factor optimisation *(German)* 86−32720
hydro-thermal power system long-term planning 87−64109
image restoration, quadratic programming approach 87−75951
incremental approach 87−36616
integer quadratic programming problems-models and methods 88−38094
interconnected power systems, robust algorithm for economic dispatching 85−38432
L_1 estimation of covariance matrix 87−72952
large hydrothermal power system decomposition and co-ordination for optimal scheduling *(Chinese)* 87−77999
linear and quadratic integer programming problems 87−23525
linear circuits, time domain approximation methods appl. 86−62386
linear complementarity problems solution set bounds 87−51994
linear programs least-norm solution computation 88−6379
linearisation method appl. to problems of large dimension 85−60869
magnetic isotope separation large solenoid optimisation by sequential quadratic programming 88−66012
minimal polynomials with nonnegative coefficients, charact. and appl. 87−44178
minimising sum of convex function and continuously differentiable function 86−40639
mixed integer, algorithm and study 85−44622
monotonicity of quadrature formulae of Gauss type and comparison theorems for monosplines 85−320
multihour alternate routing communications network, nonlinear programming heuristic for optimal link capacity calc. 88−27723
network switching, optimisation using sequential quadratic programming 87−71504
Newton's method extension under convex constraints *(French)* 87−23521
nonlinear quadratic problem computation using inverse Riccati transformation 87−23532
nonsmooth convex minimisation with errors 86−7664
one parametric general, unified approach 86−19952
optimal power flow soln. by Newton's method *(Dutch)* 87−9083
oriented matroids, linear and quadratic programming 86−13662
parabolic ramping stepping motor controller for max. torque utilisation 86−39850
parallel substraction, operation of deconvolution for convex quadratic forms *(French)* 88−18601
parameter-free multiplier method for constrained minimization problems 88−70239
polyhedral functions minimisation, regularised decomposition method 86−66746
power factor correction, reactive power source location calc. based on quadratic programming *(Russian)* 86−32680
power flow control by decoupled approach using Fletcher's quadratic programming 86−12308

quadratic programming continued
power flow problem, soln. using sequential reduced quadratic programming technique 88−48420
power station network analysis, component and system techniques *(German)* 86−32718
power system constrained load flow using recursive quadratic programming 87−42295
power system dispensed energy storage systems, optimal allocation for power flow optimisation 87−78012
power system load curtailment minimisation using quadratic programming 86−61044
power system minimum frequency constrained generation margin allocation using quadratic programming 87−50662
power system probabilistic operation considering environmental constraints, fast scheduling method 88−10743
power system real-time optimal voltage control assessment 86−56333
primal algorithm for quadratic programming problems with simple upper bounds 88−18606
probabilistic design, computational algorithm for reliability bounds 86−46127
quasidifferentiable function minimisation, quadratic approx. method 85−22377
radial distribution primary feeders, reactive power optimisation, quadratic programming 85−48583
radiotherapy, intracavitary, optimum irrad. condition calc. using quadratic programming 88−61421
ratio games and quadratic fractional programs 85−10585
reactive power optimization in power system quadratic programming method *(Chinese)* 87−21838
recursive quadratic programming algorithm that usesdifferentiable exact penalty functions 86−66743
regression models with linear constraints andnonnegative regression coefficients *(Chinese)* 86−7676
remotely sensed image data anal. by means of category decomp. *(Japanese)* 87−55311
REQP algorithm, global convergent version 88−49711
second order sensitivity analysis and asymptotictheory of parametrized nonlinear programs 86−19950
stochastic, Lagrangian finite generation technique for solving linear-quadratic problems 87−5348
successive QP method for constrained optimisation, quasi Newton updates *(Japanese)* 88−11896
successive quadratic programming algorithm withglobal and superlinear convergence properties 86−66742
successive quadratic programming algorithms, expts. 88−31658
successive quadratic programming methods, globally convergent, for semi-infinite nonlinear optimisation 88−70238
three-phase networks, reactive power compensation on electrified railways *(Russian)* 86−13139
time-domain synthesis *(Japanese)* 86−607
transmission networks, economic dispatch of active power by quadratic programming 85−27019
two-state Markov sequences, optimal smoothing using integer programming approach 87−27426
two-variables programming problems 87−23524
weighted Gramm-Schmidt method for convex quadratic programming 85−308
wind power plants, MW range, optimisation using recursive quadratic programming 86−33243

quadrature (numerical) *see integration*

quadrature amplitude modulation *see amplitude modulation*

quadrupole lenses *see electron lenses; electrostatic lenses; magnetic lenses*

quadrupole mass analysers and filters *see mass spectrometer components and accessories*

high-precision monolithic quartz crystal filter design *(Japanese)* 87−73520
high-quality quartz crystals, production developmental results 87−32788
hydrothermal crystal growth, growth flawing and strain 86−20023
hydrothermal growth and elec. sweeping for resonators 87−18454
hyperthermic temp. sensing system using quartz resonator 87−3975
impact response of the shorted quartz gauge to 40 kbar 88−74600
inhomogeneous, based on thermoelastic effect in crystalline quartz *(Russian)* 88−16633
ion implanted, buried double waveguide 88−65290
ion implanted optical waveguides, refractive index profiles 87−12199
irradiation effect on defects 85−56047
irradiation effects study using low-temp. dielec. relax. 87−32791
leaky surface wave propag. charact. and new cut with small temp. coeff. 87−6980
LSI/SOI wafer fabrication using device layer transfer technique 86−47780
manufacturing methods and technology for tacticalminiature crystal oscillator 85−56053
maskless Ce ion implantation, focussed ion beam method 88−68191
measurements for the determination of electricparameters of quartz crystals *(Hungarian)* 86−53869
membrane bulk-acoustic-wave resonators, developments 86−42082
micromechanical devices appl. of quartz crystal, fabrication and props. 86−55657
miniature resonator thermal detector 87−3620
miniature ZT-cut resonator 86−42043
mirrors, with Ag coating, radiation props. meas. methods *(German)* 85−31609
mobile telecom. systems, crystal products, trends and prospects 87−48939
monocrystal, application in semiconductor bolometer for use as particle detector *(French)* 88−29892
monolithic quartz filters, generalised design procedure 88−864
Motorola multipole VHF monolithic crystal filter project 86−42059
multichannel demultiplexer for optical communication lines 85−8435
multicore quartz optical fibre image guide for hazardous environments 86−9581
multifrequency SAW waveguide resonators, amplitude-freq. charact. anal. 87−12030
multimode fibres, stimulated Raman scattering components, influence of stimulated Brillouin scattering 87−68112
natural single phase unidirectional low-loss SAW transducer 87−1841
NEC monolithic crystal filters *(Japanese)* 88−38607
new cut for SAW devices with extremely small temp. coeff. by leaky surface wave 87−53848
new cut of quartz for SAW devices with extremely small temp. coeff. 85−35271

quartz continued
NMOS logic circuits in laser-crystallized silicon on quartz 85−12434
nonlinear elastic constant for trapped energy and contoured resonators 86−42035
nonlinear resonance coeff. of SC-cut quartz resonators, eval. 86−42036
optical conductor applications *(German)* 88−9540
optical dielectric microresonators, physical props. 88−33713
optical fiber preform collapse process, identification 87−53998
optical fibre core for welding laser beam manipulation with fibre optic 86−63674
optical fibre technology for transmission systems, props., research and developments, review *(Czech)* 87−76798
optical fibre waveguide, quartz-polymer, backscattered signal, temp. influence 85−24326
optical fibre with four-photon parametric process, stimulated Raman scatt., Stokes band broadening 86−9958
optical fibres, drawing, laser surface processing of blanks 86−22165
optical fibres, hollow-core fused-quartz, soft X-ray transmission charact. 86−22068
optical fibres, thermochromism in luminous and solar radiation transmission 87−60885
optical fibres drawing, blanks nonuniform laser heating study 88−7942
optical fibres drawing, formation zone model 88−51490
optical waveguides, ion implanted, SAW diffr. of light 86−48181
oscillating quartz crystals, passive components with active role *(German)* 87−53833
oscillator, 1/f freq. fluctuations and temp. fluctuations 85−35262
oscillator, bending and stretching mode, as friction vacuum gauge 85−1812
oscillator, digital temperature compensated *(French)* 87−32786
oscillator, freq. dependence on gas press., vacuum gauge appl. 86−24828
oscillator, friction vacuum gauge, elec. impedance, press. depend., size effect study 85−64330
oscillator friction vacuum gauge and controller, design and performance 85−64331
oscillator modes Q-factors as a probe of submonolayer film dynamics 86−68138
oscillators, characteristics, evolution and future trends *(French)* 87−6956
oscillators with TTL and HCMOS ccts., design and construction aspects *(German)* 87−10713
oven controlled quartz crystal oscillator, low-power integrated design for SARSAT buoys 87−31752
piezo-quartz suitability as sensor for freq. adapting pacemaker system *(German)* 86−50631
piezoelectric, leaky SAW with small temp. coeff. 86−15322
piezoelectric crystal plates, 2D theory for HF vibrations 87−67661
piezoelectric crystal plates, coupled and energy trapped thickness vibrations 88−51069
piezoelectric devices, specification 85−56054
piezoelectric meas. system with digital storage, transient meas. signals analysis 85−37614
piezoelectric resonators, electron and gamma radiation dosimetry appls. 87−6952
plate piezoelectric resonators, surface roughness parameters *(Polish)* 88−1837
plate simple thickness modes, acoustic viscosities and time constants 87−1822
point defects computer modelling 87−32760
precision crystals with high stability, manufacturing process 87−18444
precision quartz resonators production, total process control techniques 86−42057
pressure pick-up for thermo-shock investig. in internal combustion engine *(German)* 87−41477
pressure piezoelectric sensors, temp.-pressure dependence 86−31365
pressure transducers based on fused quartz Bourdon tube, design 88−10165
pressure transducers with reduced hysteresis, extended range and active temp. compensation 88−22581
quality indications from infrared absorption measurements on cultured quartz 88−490
α-quartz:$Li^+(Na^+)$, dielectric loss and irradiation effect 85−23984
quartz, stabilised, programmable, synchronous monoflop *(German)* 85−54966
quartz crystal units conforming to surface mountingtechnique 86−63512
quartz-Al-Cr, SAW resonator performance, chrome film bonding layer influence 87−6984
radiation effects at low doses and defect production mechanisms 86−42027
radiation effects in the acoustic loss spectra ofAT-cut quartz crystals 86−42028
Rayleigh-mode SAW filters for timing recovery at frequencies above 1 GHz *(Japanese)* 87−60760
reactor problems in MCVD for optical fibre preform prep., quartz glass tube collapse 85−54495
receiver based on thermoelastic effect in crystalline quartz *(Russian)* 88−9981
rectangular GT-cut quartz crystal resonators, temperature charact. 86−68131
reflector material, induced absorpt. influence on solid-state laser efficiency 85−24525
relaxation quartz crystal oscillators, design and anal. 85−62167
relaxation quartz oscillators with crystal in feedback loop, anal. and design 87−73358
resonance freq.-temp. charact., thermometry appls. 85−41007
resonant monitor disc for wafer lapping direct thickness meas. 85−40570
resonator, system configs. with low acceleration sensitivity, expt. study *(French)* 85−50817
resonator, thickness modes, perturbation theory anal. *(French)* 85−1809
resonator bars, electrode stress effects for length-extensional and flexural resonant vibrations 85−62153
resonator chem. milling for monolithic filters 87−1855
resonator crystals, growth defects 85−29411
resonator flexural, anharmonic and thickness-shear modes, study using SEM 86−42064
resonator for wrist watches *(Japanese)* 86−21929
resonator measurements, traceability to US standards,NBS workshop report 87−34906
resonator sensors, review 85−26306
resonator temperature transducer with no activity dips 87−35070
resonators, amplitude-sensitive structural changes, X-ray diffr. study 88−26644
resonators, circular convex AT-cut bevelled design, Tiersten eqn. approx. soln. 86−58642

quartz continued
resonators, commercial equipment appls. 85−12459
resonators, eigenmodes of piezoelectric lenses 87−32780
resonators, equiv. network for plate resonators, dynamic permitt. and resist. 87−32798
resonators, flexural, anharmonic and thickness-shear vibration mode shapes, SEM observations 86−21940
resonators, force-freq. characts of circular SC-cut plates with three-point support 86−42053
resonators, freq.-temp. behaviour of rectangular rotated Y-cut quartz plates 86−42049
resonators, freq.-temp. behaviour of Y-cut and NT-cut bars, 3D FEM 87−32802
resonators, frequency jumps in freq.-temp. curves of contoured resonators 86−42048
resonators, material selection 87−74478
resonators, oscillating action 87−12010
resonators, parameters meas. technique 87−60726
resonators, parameters meas. using T-transmission three-port method 87−60724
resonators, simple thickness plate modes driven by lateral fields 86−42055
resonators, stress compensated, for temperature sensing 87−29056
resonators, suppression of anharmonic spurious modes by modified electrode design using charge cancellation 87−32803
resonators, temp. induced freq. shifts 86−2494
resonators, thermal transient response, dynamic models 86−21939
resonators, trapped energy, thermal gradient distrib. 85−29418
resonators, two-node excitation, current-flow characts. 87−18438
resonators, X-ray irradiation system for total dose testing 85−62143
resonators study by stroboscopic X-ray topography 88−20208
resonators with lens piezoelectric elements, capacitance ratio calcs. 88−71868
rotated Y-cut, bulk acoustic wave reflection theory and expt. 87−1858
SAW applications, cut for extremely small temp. coeff. using leaky surface wave *(Japanese)* 86−9373
SAW cantilever beam accelerometer sensitivity to compression and bending forces 86−70131
SAW devices, materials, processes and products 88−44939
SAW devices on quartz, low-loss stability types, performance study 87−32822
SAW filters, phase noise, delay depend. 87−6985
SAW miniature hybrid oscillator in all-quartz package 87−1851
SAW properties *(Polish)* 85−1819
SAW quartz cryst. cuts with low stress and temp. sensitivity, theoretical study 87−53853
SAW quartz resonators, ST- and SST-cut, in-plane acceleration sensitivity comparison 88−51120
SAW reflective array compressor delay lines, weighting technique 87−60758
SAW resonators, ST-cut quartz config. supported along edges, acceleration sensitivity anal. 87−32821
SAW resonators, transient thermal response 85−62180
SAW resonators on quartz, design, fabrication and testing *(Japanese)* 87−60773
SAW resonators on quartz, design and manufacture *(Japanese)* 87−60772
SAW resonators on quartz, narrow bandpass filter design 85−61366
SAW resonators on quartz plate, accel. induced freq. shifts *(Japanese)* 87−60770
SAW transducers, 3D electrostatic field anal. with closed-form formulae 87−60741
SAW transversal narrowband filters, SAW diffraction anal. by waveguide approx. 87−1839
SAW UHF-range stable resonator for CATV local oscillator 87−67675
SAW/MIC integrated downconvertor 87−67677
SBAW versus SAW oscillator aging 85−62178
SC-cut, lateral field resonators, stability under stress 86−42056
SC-cut quartz resonator, zero-temperature contoured, orientation change with radius 85−62159
SC-cut resonator, temp. behaviour using 1-D finite elements 88−54780
SC-cut resonators, amplitude-frequency effect 86−42034
SC-cut resonators, radiation effects 88−20206
Seiko analogue wristwatch with Caliber 8T23 electric generating system *(Japanese)* 88−5717
sensor for automatic dew-point hygrometry 87−35060
sensor of film thickness, sensitivity 87−56638
shear mode quartz crystal resonator, design *(Japanese)* 87−60713
shell on fibre-optical waveguide, removal by HF, effect on props. *(Russian)* 87−60909
single cryst., transmission X-ray topography using white beam synchrotron radiation 88−20207
single crystal, multiple pulse laser-induced bulk damage 85−7489
single mode fibre, polarisation anisotropy, optical activity and birefringence, fibre length depend. 86−2712
single-mode fibre, modal field transforming type, fabrication technique and characts. 88−45073
single-mode fibres, elliptically polarised light waves 87−60921
single-mode three-layer ring optical fibre, intrinsic birefringence and polarisation dispersion props. 87−26018
small substrate lenses for coupling to antennas, focusing props. 87−19344
SMT crystal units and oscillators 86−63513
space qualified high performance digitally tuned quartzcrystal oscillators 85−56052
spurious crystal resonances, group delay meas. as sensitive detection method 87−32807
SSNTD, etching critical angle meas. in quartz and mica 85−20840
stress-compensated quartz resonators having ultra-linearfrequency-temperature responses 85−62165
subminiature/thin-membrane resonator configurations and characteristics 87−1854
substrate, Si-coated, Si dot deposition, micro Raman scattering investig. 88−18743
substrate for Cr mask manufacture without etching step 85−45765
substrate for Cr photomasks for VLSI 88−44721
substrate for metallic thin films, stress temp. depend. 86−28452
substrate with $LiNbO_3$ layer, SAW excitation technique 85−12473
subsurface defect acoustic imaging in composites and roughened samples 87−368
Superflex, vibrating beam and quartz flexure accelerometer technology 88−42298
quartz continued
surface wave propag. characts. and influence on device performance 87−6979
surface wave reflection by arrays of reflecting grooves, variational anal. *(Japanese)* 87−60742
surface wave slowness curve meas. using acoustic microscope 87−71414
surface-mount quartz crystal units and oscillator chips 87−53828
sweeping and irradiation studies 85−62142
swept cultured quartz, influence of temp. and elect. field on etch-channel density 86−42025
synthetic, basic elastic and dielec. constants, new meas. 87−53846
synthetic, mounting assemblies using sapphire and synthetic quartz for Ge detector 88−36372
synthetic quartz growth, Brazilian lascas charact. for synthetic quartz growth, props. correlation 87−32763
tactical Rb oscillator, vibration compensation scheme 85−62147
Technics double quartz Hi-Fi tuner, review *(German)* 87−3282
telecommunications demands high-precision clock oscillators 88−44933
temperature compensated quartz oscillator, transistor temperature-dependent circuit, frequency time stability 86−21932
temperature sensing device, output nonlinearity correction 87−29332
temperature sensor using quartz oscillator resonant freq. temp. dependence *(German)* 87−41466
temperature sensor using quartz tuning fork resonator, design, fabrication and characts. 87−35183
temperature sensors with ultralinear freq.-temp. responses 86−21938
temperature-compensated quartz oscillators, parametric synthesis 86−21927
thermostat with LED display *(German)* 86−71029
time switch, quartz controlled, design *(German)* 86−62892
tuning fork resonator for low cost oscillator production 85−35263
tuning fork resonator transducers 87−21063
tuning fork type quartz crystal resonator, frequency temperature characteristics *(Japanese)* 88−1840
TV appls., memory features using digital signal processing 87−20750
UHF and VHF AT-cut quartz resonators, chem. milling 86−42033
UHF low loss SAW filters for front end applications 87−67679
USA material defense stockpile 86−42029
vacuum sweeping and γ-irrad., defect distrib., IR spectra studies 85−24027
VCXO, voltage controlled quartz crystal oscillators, ultra compact range from Philips 87−65910
VHF five-resonator crystal filter, processing 86−42042
VHF monolithic crystal filters fabricated by chemicalmilling 86−42058
VHF monolithic crystal filters having improved intermodulationand power capability 86−42060
VHF monolithic filters using ion etched fundamental moderesonators between 60 and 100 MHz 86−42061
VHF oscillator spectral degradation due to quartz resonator short-term instability 87−1861
VHF quartz crystal resonator, vibration sensitivity for missile appls. 85−62145
VHF quartz crystal units, parameters determ. using Fr meter fixture *(Japanese)* 88−26630
VHF quartz feedback oscillators, high stability, phase fitter-noise model for design appl. *(German)* 85−49771
vibrating piezoelectric sensors made of quartz crystal *(Japanese)* 87−8621
video recorders, quartz control *(German)* 86−31036
VLSI space-saving arrangement of via holes in two-level metallisation 86−35747
voltage-controlled crystal oscillators, practical considerations for freq. pulling 87−18449
voltage-controlled SAW oscillator ontemperature-stable quartz substrate 85−61147
wafer-carrier fabrication, design and fabrication for automatic wafer loading 88−1493
watches and clocks, accuracy indication method *(Japanese)* 86−24792
wrist watch, CMOS quartz crystal oscillation cct., oscillation freq. by output resistance *(Japanese)* 88−13631
x-ray machine for generally rotated blanks 87−18453
Al-quartz gratings, surface transverse wave propag. *(Japanese)* 87−60775
Au/quartz/Au planar diodes, influence of organic molecules on current-voltage characts. 86−2185
CuAl-quartz, SAW resonators, annealing behaviour and phase noise performance 87−6983
Fe-B-Tb-quartz, tunable SAW devices using magnetostrictive thin films, design methodology *(Japanese)* 87−60771
OH loss increase due to jacketing glass material in optical fibres 87−1969
Se-quartz multilayer structure acoustic resonators 85−56074
Si SOI structure on fused quartz, laser recrystn., ⟨100⟩ texture 85−22499
Si-quartz, solid-state diffusion bonding technology 88−50688
SiO_2 glasses, interaction of low energy radiation 88−58349
SiO_2 quartz, ion implanted optical waveguides, surface processing 88−7946
SiO_2:Ge optical fibre loss increase due to H_2 and long-term loss stability 87−53966
SiO_2:Na^+ quartz crystal resonators, 1/f noise, acoustic losses, freq. dispersion 87−38637
SiO_2/SiO_2:B_2O_3 glass fibre waveguides, induced absorpt. spectra, laser light influence 85−46190
$ZnSnP_2$-quartz, thin films vacuum growth 88−449
optoelectronic material, ion beam effects 88−7943
substrate for ZnS:Mn thin films, electrolum. characts. and struct. of films 87−74922

quasi-stellar sources *see quasars*

quench hardening
steel components, surface hardening quality inspection, resist. of mag. states of two-layer ferromag. to mag. fields 87−36837
superconducting coils, quench occurrence prediction study 88−65093

quenching (thermal)
see also melt spinning; quench hardening
Co-Al-Mn, athermally cooled, tempering, coercive force rel-to Mn content 85−24062
composite superconductor, critical delay time between consecutive heat pulses 88−51378

quenching (thermal) continued
epoxy-impregnated superconducting solenoids, quenching effects model predictions and verification 87−67942
heavy metal fluoride glasses, intrinsic instabilities 85−18627
hot fuel rods, quenching by top rewetting, core-cladding model 86−25824
laser processing, spatial distrib. of radiation intensity 85−12930
metallic glasses, rapidly solidified power magnetics alloys, review 87−46390
multilayer-solenoid superconducting magnets, graded current density, quenching dynamic process and protection by shunt resistors 88−65055
petrochemical plants, economic use of circulating direct quench heat 87−43708
poly(2,2,2-trifluoroethyl-x-chloroacrylate), electron beam resist, sensitivity enhancement using quenching 88−13250
potted magnets, quench energies 85−62262
railgun conductor surface response to pulsed Joule heating 87−26698
rare earth-Fe ribbons, mag. props. rel. to quench rate, appls. *(Polish)* 85−1828
rare earth-iron-boron permanent magnet materials, prep. and props., book contrib. 87−12034
steel, Cr-Mn-Si, heat treatment quality of components, EM structure inspection device appl. 85−6055
steel, Cr-Ni-Mo type, complex mag. permeability after various heat treatments, EM inspection procedure 87−348
steel, structural, in various remanent magnetization conditions, inspection of component heat treatment quality 87−349
superconducting coil with high-resistivity matrix wire, quench propag. 87−46427
superconducting coils, quench characts., time depend. 86−28764
superconducting HERA test dipole, heater-induced quenches 88−68171
superconducting magnet coil, quench propag., current decay and temp. meas. 86−42179
superconducting magnet coupled adiabatic coils, quenching effects 85−62263
superconducting magnet systems, multi-minimum propagating zone quench 88−51399
superconducting magnetic coils, electrical and thermal anal. of quenching performance *(German)* 86−36107
superconducting magnets, quench energy investig. using electron beam heating 87−46426
superconducting multisectioned adiabatic solenoids, quench characts. 88−65094
superconducting solenoidal magnets, quench propag. anal. 88−65053
superconducting super collider dipole magnet, heater induced quench studies 87−67945
superconducting super collider dipole magnets, adiabatically stable, quench press. anal. computer code 87−67944
superconducting super collider dipole magnets, quench propag. across Cu wedge 87−67946
Superconducting Supercollider dipole magnets, source location of quenches 88−68170
TOPAZ superconducting thin solenoid, stability and quench characteristics 86−63599
TOPAZ Thin Superconducting Solenoid performance analysis and tests *(Japanese)* 86−32153
TORE SUPRA toroidal field coil, quench and safety tests 88−65095
Al alloys, nonequilibrium processing, applications 86−40793
Co-Fe-Nd(Pr)(Sm) alloy sheets prod. by rapid quenching technique, mag. props. *(Japanese)* 86−47953
Fe-B-Si soft magnetic thick amorphous ribbons, melt quenched, sp. ht. behaviour 88−64904
Fe-C-Al alloy system, magnetic props. 85−18584
Fe-Pt (36 at.%), cryst. struct., permanent mag. props. *(Japanese)* 87−25772
Fe-Pt, permanent magnet props. rel. to heat treatment and alloying additions 85−46015
Fe-Si (6.5 wt.%), rapidly solidified power magnetics alloys, review 87−46390
Fe-Si ribbons, low core loss, annealing and cold rolling 88−57909
Fe-Si-Al, heat treated, effective permeability, temp. depend. 86−2578
FeAlC permanent magnet alloy system, microstructure and mag. props. 85−18585
$(Fe_{40}Co_{40}Mn_{20})_{98.6-x}C_xSi_{1.4}$, hard mag. alloy, mag. props. 85−56088
$Fe_{77}Nd_{15}B_8$ permanent magnets, sintered, grain boundaries, HREM studies 85−56091
GaAs, carrier mobility change after quenching and fast electron irradiation 87−37886
Ge, shallow acceptors, annealing behaviour, elec. studies 85−23409
Ge:Ba, second-phase inclusions, gettering of quenching centres 86−28087
H_2 thyratron discharges quenching, gas heating effects 87−37852
$Hg_{0.8}Cd_{0.2}Te$, grown by solid-state recrystn. technique, quartz ampoule effects on quench rate 85−49536
$Hg_{1-x}Cd_xTe$, large diameter cryst. growth by incremental quenching, Hall effect meas. 85−33386
In_2Se_3, elec. transport props., struct. and polymorphism 85−40474
Li_2SO_4-$LiNbO_3$, binary system for solid state battery appls. 88−55577
NaI(Tl), scintillation, thermoluminesc. props. during thermal treatment 86−28975
$Nb_3(Al,Ge)$ prepared by continuous rapid quenching, high-field superconducting props. 87−38682
$Nb_3(Al,Si)$ prepared by continuous rapid quenching, high-field superconducting props. 87−38682
Nb_3Al prepared by continuous rapid quenching, high-field superconducting props. 87−38682
Nb_3Sn superconducting windings, epoxy-impregnated, quench propag. vels. 88−65054
NbTi multifilamentary superconductors, Cu-stabilised, stability during cooling 85−12509
Nd-(Fe, Co)-B permanent magnet materials formed by rapid quenching and sintering 88−64913
Nd-Fe-B magnet production from rapidly-quenched ribbons by hot pressing 85−41039
Nd-Fe-B permanent magnet, microhardness, coercivity rel. to ageing and quenching 85−29465
Nd-Fe-B permanent magnets, coercivity and Curie temp., heat treatment effects 86−28606
$PbTe_{1-x}S_x$, free carrier scatt. near a phase transition 87−17745
Si, defect electronic states after transient isothermal annealing 85−12110
n-Si, electron irradiation, effect of quenching 85−1274
a-Si:H CVD films, DC cond., metastable effects 88−1388
a-Si:H, P(B), conductivity and quenched-in defects 88−19674
a-Si:H films, photocond., temp. quenching 86−63715
quenching (thermal) continued
a-Si:H films, photocond., thermal and optical quenching studies 88−2106
Si:P, quenching thermodefect prod. Hall effect, EPR meas. 87−11336
Si:P, shallow donors, influence of quenching 87−37867
SiO_2-GeO_2 fibres, defect centre form. and disappearance with heat treatments 86−42273
$SmCo_5$ sintered magnets from alloy powder, quenching in mag. field effect on struct. and props. 86−9390
ZnO ceramics, varistor-capacitor characts., grain boundary segregation 86−27645

query languages
project independent virtual database, common language for expressing exchange information 88−41375
SQL standard, ISO relational DBMS language, use for message storage and retrieval 88−59536
vIDEOREL: friendly querying of video pages via arelational database 86−43514
videotex languages, from tree structuring to natural language *(French)* 87−13337

queueing theory
2D queueing system BVPs and communications network appls. 88−52720
GI/M/c queue with bounded waiting times 87−51923
acyclic fork-join queueing networks 88−6354
adaptive algorithms for load sharing between processorswith applications to routing schemes 86−43595
adaptive load balancing for parallel queues with traffic constraints 85−19556
adaptive multiple access strategy for a channel with power capture 87−27134
adaptive reservation multiple access technique for data transmission 86−69213
adaptive token passing protocol modelling 86−54619
admission delay model for two-link virtual route with window flow control 87−75985
admission to queueing system, optimal control 85−60839
aggregation of separable partial networks with flow-equivalent stations *(German)* 88−49630
aircraft availability and spares management 85−22303
ALOHA protocols, evaluation of queueing phenomena *(French)* 88−8906
ALOHA-type systems, asymmetric buffered, stability, bounds and approx. 87−55418
alternate routing networks, individual traffic characts. anal. *(Japanese)* 85−25203
American Internal Revenue Service telephone taxpayer information 88−52761
analytic queueing models for computing systems, convexity and concavity props. 86−26710
approximate analysis of tandem queues with dependent service times *(Japanese)* 87−72900
approximated disaggregation and performance boundsfor queueing networks with multiple-server stations 86−64668
approximated multicriterion prioritizing in computer systems 87−51918
approximation algorithm anal. for queueing networks 85−16855
ARQ protocol, selective repeat, with n channels 85−47236
ARQ protocols, performance in ring topology networks 87−48296
ARQ protocols, selective repeat, response time in communication links 85−63145
ARQ protocols evaluation, in ring networks 86−64735
ARQ with sequential decoding of packetized data: queueing analysis 85−13481
arrivals control for two queues in series 85−60838
assembly lockout probability determ. using simulation 86−7595
asymmetric token passing and polling networks, approx. delay anal. and results 87−13381
asymptotic analysis of large heterogeneous queueing systems 88−59375
asymptotic expansions for a closed multiple access system 87−58777
asymptotic marginal independence in large networks of loss systems 87−48250
asymptotics of covariances of semi-Markov pointprocesses 85−54243
asynchronous-address data transmission systems, noise immunity anal. 85−25273
ATE CAD, using CONFIDANTE optimisation-based model 85−31373
availability theory, two-state system, alternating renewal process 86−13576
avionics maintenance queueing anal., B-1B bomber/automatic test station support simulation 85−64664
backbone data communication networks, route selection 88−59355
balance equations of queueing system with Erlangian arrival, customer thinking and seven walking processes 86−69200
batch delays and customer delays, stationary distribution relationships 85−33272
Bayesian teletraffic meas. appl., systems with queueing or repeated attempts 86−64150
BEST/1 SNA, queueing network package for IBM SNA network modelling 86−30238
bibliography of books and survey papers on queueing systems 88−31598
bit dropping in packet voice multiplexer, during congestion, traffic smoothing effects 88−52647
blocking networks, performance *(German)* 86−26698
blocking/starvation minimisation, modelling and dynamic scheduling 88−31613
broadband networks, asynchronous TDM and switching, analytic tools 87−34008
broadcast channel random access protocol, packet delay distrib. of tree conflict resolution algorithms 87−55408
broadcast communication systems, random multiple access, buffer anal. 86−24008
broadcast polling scheme for teletext-like information delivery 87−40323
buffer behaviour of voice-data communication systems, network simulation approach 87−69538
buffered CSMA/CD protocols, queueing anal. 87−7882
buffered packet-switching banyan networks, distribution of delays 85−30510
buffered random multiple access schemes, anal. 87−2673
buffered slotted multiple access protocols, queueing anal. 85−25474
buffers with dial-up servers 86−59396
buffers with periodic input traffic 85−62935
burst-switching for integrated voice/data service, voice delay scheme, performance anal. 87−62514

queueing theory continued
bus networks, FCFS-like group random access protocol, performance eval. 87−62411
bus scheduling, quasi-assignment algorithm 87−65295
call gapping control, input regulation, periodical monitoring based 87−48254
call gapping control switch influence in input control based on sampling monitoring *(Japanese)* 87−61536
call gapping control using sampling monitoring mixed input queueing model and anal. *(Japanese)* 86−16606
call loss probability when call is congesting, approx. soln. *(Japanese)* 87−55384
calls sorting, dynamic, in systems with limited sojourn time 86−52334
Cambridge Ring LAN, network service performance comparison 88−8922
capacity assignment algorithm for centralized computer network 85−42307
carried traffic estimate errors for delay systems, M/D/S and M/M/S queues 85−46978
carrier-sensed multi-access protocols, queueing anal. 87−55412
CCITT Common Channel Signalling System No.7, level 2 simulation 85−19546
CDMA packet radio network, multi-hop, throughput performance anal. 88−41516
cellular mobile radio telephone systems with handoff, traffic model and perform. anal. 87−20418
cellular radio, paging channel design, theoretical aspects *(Japanese)* 86−30101
central processor in distributed system with star topology, adaptive load control 87−55417
central-limit theorem version of queueing formula L=λW 87−65298
centralized routing method of packet switching network *(Japanese)* 88−52626
channel access protocols with preemptive priority in integrated networks 88−3306
channel occupation time distributions with channel failures in M/M/s/∞-queueing systems *(German)* 85−19559
channel switching networks, invariance of probability characts. 88−34867
circuit switched networks, asymptotic analysis 87−34174
circuit-switched communication network, distributed routing control 87−55409
circuit-switched networks, capacity region 87−27689
circuit-switched networks, congestion states, hysteresis-type behaviour with extensive overflow 88−8944
clock-driven message transfer in distrib. processing systems, delay anal. 86−4068
closed computer user group analysis, BNETD program system *(German)* 86−30388
closed homogeneous queueing networks, Busen's algorithm improvements 86−7594
closed hyper-Erlang queueing networks, analysis by fictitious stages method 86−305
closed Jackson network, settling time 88−31614
closed loop queueing systems with absolute priorities, operating characteristics calc. 86−52335
closed Markovian networks with state dependent service rates, asymptotic expansions 86−26711
closed nonproduct form network, algebraic approach 86−30069
closed queueing network computational algorithms, system evaluation application 85−269
closed queueing network of counting processes 88−38058
closed queueing networks, node loading, approx. calc. 88−28144
closed queueing networks, throughput coupling *(German)* 88−49631
closed queueing networks, two classes of performance bounds 87−44109
closed queueing networks anal. 88−63148
closed queueing networks with heavy traffic, anal., asymptotic methods 86−7593
closed queuing networks, performance bounds, classes 86−34115
coalescing stream, flow through processor, modelling 86−64393
collision resolution algorithms, throughput of degenerate intersection and first-come first-served algorithms 85−51521
combined source queueing model, recursive approx. technique 87−12871
communication channels, message segregation to buffer series 85−46979
communication network modelling, deadlocks/dynamics anal. 85−63151
communication networks, perturbation analysis for network design and optimisation 88−34844
communication networks, stochastic damage models and dependence effects in survivability anal. 86−49125
communication switching processor, queueing model and anal. 86−43365
communication system, optimal SRPT queueing strategy with overhead 86−48718
communication systems, qualitative methods of analysis of systems with repeat calls 88−28157
communications, approximation method for a class of queueing systems 85−36466
communications networks with channel blocking, analysis 87−20012
composite priority queue with restriction on interruption of nonpriority call service *(Japanese)* 88−52622
computer communication network simulation techniques, efficiency 88−3627
computer communication networks, fairness issues 86−23501
computer communication networks, parallel queues, adaptive load balancing 85−19568
computer communication networks, stability conditions in multiqueue system 88−35192
computer communication protocol under unsymmetric traffic, performance evaluation by simulation 85−30506
computer communications networks, simulation techniques 88−35091
computer network, double loop architectures class, anal. and simulation 85−8205
computer network, dynamic window congestion control in heterogeneous environments 87−33859
computer network, packet switched node modelling and performance analysis 86−54925
computer network, tree network with collision avoidance switches 85−8214
computer network for hierarchical control system, topological synthesis 86−23179
computer network queue anal., direct method 86−23180
computer network queueing model, with modified isarithmic flow control 85−25204
computer network with many transmitters, optimal hop-by-hop message flow control 88−46618

queueing theory continued
computer network with window control, delay anal. for wait model 85−42015
computer networking, conf., Washington, DC, USA (April 1988) 88−62893
computer networks, 2-level input buffer limit congestion control 85−42027
computer networks, capacity and flow assignment 86−54998
computer networks, closed Markov models, Gaussian diffusion approx. 87−28114
computer networks, dynamic flow control 87−33858
computer networks, exponential, with limited queues and lockouts, multiplicative form of soln. 85−25195
computer networks, file transfers, delay approximations 86−59686
computer networks, flow control protocol, GO-BACK-N, Markovian model 86−10606
computer networks, limited service polling models, numerical soln. 86−69387
computer networks, modelling of data processing and transfer *(Russian)* 86−4073
computer networks, queueing systems transient behaviour 85−3183
computer networks, traffic models and perform. evaluation tools 85−19867
computer networks with backup devices 88−28148
computer networks with circuit switching access schemes 86−30083
computer queueing networks, dynamic routing 88−59368
computer system performance models, conf., Paris, France (Dec. 1984) 86−26497
computer system utilisation optimisation under response time constraints 86−7597
conditional steady state distribution bounds 87−36576
conditional steady state probabilities in Markov chains and queueing models, computable bounds 87−13385
conformal mapping solution of Laplace's equation on apolygon with oblique derivative boundary conditions 86−19993
congested network, flow control parameters eval. 87−48309
congestion control in interconnected local areanetworks 86−69435
congestion control modelling, transient anal. of Markovian queueing systems 87−13173
conservation law for queueing systems with batch arrivals 87−58776
constant service queueing system analysis 85−42019
constant-service tandem queueing system, modified two-moment approach 85−42007
construction for systems represented by Markovian processes 86−26703
consumption of power, calcs. employing queuing theory *(Russian)* 87−64048
contention packet broadcast system, queue lengths bounds 87−13179
continuous Markov processes, distrib. of functional 88−38052
continuous polling system with constant servicetimes 87−2676
contour processing method for fast binary neighbourhood operations 88−28050
CSMA-CD LANs with heterogeneous population of buffered users, queueing anal. 88−67035
CSMA/CD and movable-slot TDM protocols, performance analysis 88−3301
CSMA/CD buffered system, approx. anal. 88−73395
CSMA/CD LAN simulation, Queueing Network Analyzer, comparison study 87−55767
CSMA/CD local computer networks, load balancing effects on response time 86−16991
CSMA/CD medium access protocol implementation for low speed/cost LAN 86−30120
CSMA/CD protocol with message-based priority function 88−21617
CSMA/CD system, buffered two-user, mean packet queueing delay 86−10600
customer allocation in two server queue with resequencing 88−52963
customer routing to parallel servers with differentrates 86−19894
cycle-time distribution in central server network with state-dependent branching 86−7601
cyclic queues, capacity estimation 85−36475
cyclic service strategies, performance evaluation 86−26714
cyclic service systems with limited service disciplines, inequalities 88−46338
cyclic time of multiqueues with priorityservice rule *(Japanese)* 86−40613
cyclic time of multiqueues with step controlled andcyclic service *(Japanese)* 86−46160
D-SSQ: a queueing network simulator with parallelexecution control *(Japanese)* 86−54905
D/M/1 queue with deterministic customer impatience 85−54240
DAMA communication systems, bursty traffic conditions, queuing performance 87−33845
DAMA satellite communication systems, strategies for optimal capacity allocations 86−37807
data communication networks, routing optimisation and congestion control *(Polish)* 85−2912
data communications packet switching system with 2 message priorities, optimal low-priority queue quantum 88−46369
data performance in burst switching when the voice silence periods have a hyperexponential distribution 87−27717
data traffic, queueing and framing disciplines 85−2915
data transfers in networks with transceivers 88−66795
data transmission systems with discrete time, investig. 85−30492
database concurrency control algorithm 87−62683
Databridge, hub node evaluation in star network 86−31058
decentralized algorithms for optimal flow control 88−35189
decentralized control of perturbated flows incomputer communication network 85−63379
decentralized dynamic routing as a Markov chain optimization problem 88−43765
delay dependent priority discipline in multi-class traffic packet switching node 88−52650
delay-loss switching system for overload protection, waiting time and traffic study 86−4067
delay-loss system with cut-off priority and state-dependent server reservation 86−16593
departure process from queue with many busy servers 85−22304
deterministic cyclical subscriber servicing with ordinary requests, model 86−7596
deterministic signal pulses, high resolution time delay estimation 87−61959
developments and techniques *(German)* 86−40609
diffusion approx., modified methods *(Japanese)* 87−51924
diffusion approximation and other heuristic formulas 85−270
diffusion approximation for a tandem queue with blocking 85−39617

queueing theory continued
diffusion approximation for the single server systemwith Batch arrivals of multi-class calls *(Japanese)* 86−52339
diffusion model for queues in randomly varyingenvironment 86−40614
digital networks, analytic modelling, terminal-to-computer communications example 85−19579
digital voice communication under polling 87−27718
discrete buffered system with correlated input and output interruptions 85−7773
discrete buffers in a two-state environment 87−33573
discrete event systems, performance measures, derivatives estimation using simulation 85−49428
discrete modified $M/GI/c/\infty$ queue 87−72895
discrete systems, properties of output flows 86−4069
discrete time $G^{[X]}/D/1$-S queueing system analysis, appl. in packet switching 88−52649
discrete time queues for modelling an HDLC coupler 86−62009
discrete-time analysis for the interdeparture distribution of GI/G/1 queues 87−40453
discrete-time buffer system with nonstationary message arrival stream and output interruption 85−51880
discrete-time buffers with one randomly interrupted output line, general treatment 86−69207
discrete-time cyclic-service systems, waiting times 88−34852
discrete-time domain, semidynamic scheduling strategies, performance anal. 87−62419
discrete-time many-server systems modelling 88−45841
discrete-time multiqueue-multiserver system with time-division multiplexed services and nonzero walktime 88−31589
discrete-time priority queues with partial interference 87−75973
discrete-time queueing system with stochastic number of servers, anal. 86−26700
discrete-time single-server system with requests of several types 85−19561
distributed computer systems, algorithm for optimum static load ballooning 86−55009
distributed file system resource access modelling using queueing networks 86−62010
distributed loop computer networks, performance evolution using SLAM 87−62699
distributed scan channel multiple access model 86−54637
double channel Markovian queue with limited waiting space, transient behaviour 88−38056
double loop network architectures, comparative study 85−13931
double PLAYTHROUGH circuit switched rings, performance model 87−55801
double queue with Poisson arrival pattern, controlling rates 87−65294
dynamic flow control protocols for packet-switchingmultiplexers serving real-time multipacket messages 86−49049
dynamic scheduling of three queues in tandem with single server 87−44114
Egypt, higher education system, simulation queueing model 87−51776
electronic fund transfer on-line system, response time prediction model 86−69215
electronic system reliability estimation *(Russian)* 88−11795
equivalence and decomposition in queueing systems−aunified approach 86−306
equivalent network, load dependent servers, and perturbation analysis: an experimental study 87−31388
Erlangian arrival, customer thinking and server walking processes queueing system, balance eqns. *(Japanese)* 85−22305
ESS, common memory access contention anal. with nonpreemptive priority discipline 87−2999
estimation of mean interarrival time in M/GI/1/0 system 87−10240
Ethernet performance simulation, single-server single-queue model 88−15167
exact product form solution for queuing networks with blocking 87−23454
exponential queueing systems with nonstationaryparameters 86−54571
expressions for virtual waiting times 86−52340
facsimile, multi-server system with batch arrivals of queueing andnon-queueing customers 86−23396
failure-free systems and queueing system with random renewal time 88−31564
fast packet switching, channel performance eval. 88−52603
fault-tolerant VLSI and wafer scale integrated systems, implementation 85−29311
FCFS-like group random access protocol for bus-type LANs, performance eval. *(Japanese)* 87−33834
FIFO GI/G/1 queueing systems waiting time approx. 88−31594
file server for bulk file transfer, analytic model 86−23486
finite and infinite source interactions 86−26709
finite buffer, computation using Levinson's method 85−30494
finite buffer token networks, queueing analysis 88−59373
finite capacity communication and queueing systems perform. 88−59459
finite capacity queues with mixed batch renewal inputs 88−14853
finite Markovian queue, overflow process 85−16853
finite message storage buffer, overload control 88−59389
finite queue behavior, idle server first random routing effect 87−48263
finite queue behaviour with batch Poisson inputs and synchronous servers, routing and buffer sharing effect 87−55382
finite queue performance evaluation with random routeing 88−24624
finite source PH/G/1 queue, anal. *(Japanese)* 87−58779
finite system with unequal-rate servers, routing effects 87−40033
finite-capacity M/G/1 queue anal. with resume level 86−308
finite-dimensional distributions of queue lengths in priority systems 88−31610
finite-user infinite-buffer slotted Aloha system, stability anal. of interacting queues 88−46371
first arrival time of a random process at a boundary 86−36880
first-order perturbation analysis of a simple multi-class finite source queue 87−44110
fitting algorithm for Markov-modulated Poisson processes having two arrival rates 87−54774
flexible manufacturing systems, concurrent lots scheduling, modelling by closed queueing network anal. 85−16747
flow control schemes in communication network nodes, analytic model 85−7959
flow controlled networks, window selection 86−23514
flow of lost orders in systems with finite queue 88−31601
flow-controlled communications systems under bursty traffic, performance 87−40188
FMS computer network performance modeling 88−9111
queueing theory continued
Fork-Join queues, simple computable bounds 86−7604
fork/join synchronisation in parallel queues, approximate anal. 88−63152
fully connected message-switching network with a largenumber of nodes, bypass routes, and a limitednumber of waiting places at nodes 86−37193
functional concept for the analysis of queueing networks and optimisation of performance 88−49629
functional limit theorem versions of $L=\lambda W$, sufficient conditions 87−65299
G1/G/1 waiting times, mixed exponential approximations using adapted nonlinear optimisation algorithm 85−49419
G/G/1 (LCFS/P) single-server queueing system, Little's result appl. 88−31591
G/G/1 queue max. entropy anal. at equilibrium 88−31590
G/G/1 systems, probability distributions of maximum entropy for wait times *(German)* 88−49628
G/G/S/S, M/G/S/K system, fluid approx. for blocking probabilities calc. *(Japanese)* 88−31608
$G/M/1/\infty$ discrete queueing system, optimal priority assignment with constraints 87−44113
G/M/*s*/*r* queues stationary queue length distributions 88−31593
G/M/K/O queueing loss system with heterogeneous servers and retrials, analysis 87−51920
gating service type multi-packet transmission, charact. anal. *(Japanese)* 87−40025
general distributions, phase-type approximations 85−54237
General Motors MAP using IEEE 802.4 token bus, performance bound 88−35097
generalised discrete queueing system with infinitely many servers 88−24626

message switching system design 85−63280
message transfer time in a circuit switching system 87−48260
message-switched network with local and global window flow control, perform. anal. 88−52932
message-switched networks, flow control mechanisms, unified anal. 85−19555
meteor scatter communications, intermittently served discrete time queue appl. 88−41605
meteor scatter communications, intermittently served discrete time queue 88−22062
Metropolitan Area Network performance analysis 86−69434
metropolitan area networks, IEEE 802.6, performance using simple isochronous management protocol 87−62680
mixed delay and loss systems with renewal and Poisson inputs, eval. 88−66792
mixed input queueing model, input control anal. based on discrete monitoring 86−69205
mixed input queueing model, input control with discrete monitoring, anal. *(Japanese)* 85−28105
mixed loss and delay systems; queueing anal. methods, exact and diffusion approx. 88−34866
mixed priority queues, non-preemptive and preemptive priority disciplines 85−274
mixed renewal and Poisson input queueing model, anal. 87−7890
mixed renewal and Poisson inputs queueing modelwith a finite waiting room *(Japanese)* 85−54236
mobile digital communication system performance 88−73842
mobile radio trunking and interworking 86−10605
model, explicit probabilities calc. 86−13616
model, generalized hypergeometric function 86−13617
model for a queueing system with priorities and two different arrival processes 87−23459
moments of stationary distribution of Markov chain by trial function method 86−52341
monochannel computer network with nonhomogeneous flows of short messages, multiple access control 88−8883
Mosely-Humblet contention resolution algorithm, efficiency 86−64382
moving-server random-access protocols, delay modelling, book contrib. 87−19993
multi-access communication channel, packet delay under golden ratio weighted TDM policy 87−55374
multi-administration telephone networks, equitable transit charges 87−69577
multi-channel queueing systems with fluctuatingparameters 86−59395
multi-channel system, performance under bursty traffic conditions and state dependent service rates 88−28139
multi-class queueing networks with decentralised information, optimal flow control 87−55571

queueing theory continued
multi-destination networks, congestion clearing problem, VAROPTFLO algorithms 86−30125
multi-level input control method, queueing model anal. 85−25207
multi-link packet transmission system with random allocation, resequencing charact. anal. using queue model *(Japanese)* 85−19563
multi-link packet transmission systems, allocation algorithms, performance evaluation *(Japanese)* 86−23205
multi-link packet transmission systems with heterogeneous servers, performance eval. *(Japanese)* 87−33837
multi-media packet switching system with packet burst generation, traffic charact. *(Japanese)* 87−55387
multi-node queueing system, delay charact. anal. *(Japanese)* 88−73406
multi-packet transmission, continuous-service type, charact. anal. *(Japanese)* 88−8900
multi-priority traffic of explicit token-passing bus, delay anal. 87−55769
multi-server non-preemptive priority queue with batch Poisson inputs, diffusion approx. *(Japanese)* 88−46332
multi-station packet-radio network, splitting-type algorithm 87−40706
multibeam packet satellite networks, uplink ALOHA random-access/downlink TDMA techniques, performance study 85−13668
multibeam satellite system with onboard storage and processing, performance study 85−47486
MULTIBUS algorithm for product-form networks 88−41136
multichain queueing network for window flow control, performance anal. 88−21410
multichain queueing networks with state-dependent service rates, approx. soln. 85−33270
multichannel cutoff priority system, queueing-blocking system 88−34851
multichannel queueing systems with repeated calls under high intensity of repetition 87−51921
multichannel queues connected in tandem, regeneration and stationarity criterion 87−62407
multichannel system with priority servicing of long demands, investigation using statistical tests 85−39611
multichannel systems service time distribution functions nonparametric estimation 88−31604
multiclass ./M/1/FIFO queue imbedded in closed queueing network approx. 86−62007
multiclass preemptive priority queues, approx. numerical soln. 86−7603
multiclass queueing networks with population constrainedsubnetworks 86−7602
multiclass queueing networks with state-dependent routing 87−76359
multihop packet radio communication network with transmission error, statistical analysis 86−43732
multihop packet radio networks, iterative model 86−64750
multilinear queueing systems with repeated calls, ergodicity 87−75990
multilink packet transmission system with random allocation, anal. 86−69202
multimicrocomputer networks, model for performance anal. 87−55431
multiphase system with identical service 87−5317
multiple access broadcast communication channel, terminal-priority contentionless access (TPCA) protocol perform. anal. 85−42032
multiple access channel, golden ratio control policy 85−2705
multiple access networks, time constrained communication, controlling window protocols 88−28151
multiple access system with stack algorithm, packet delays 85−51833
multiple bus multiprocessor systems, approximate models 86−43361
multiple chain closed queueing networks, polynomial complexity mean value anal. 87−55401
multiple chain queueing networks, numerical soln. 85−33275
multiple channel queueing system with fixed priorities, waiting time distribution calculation 85−39612
multiple-class queueing network models containing server with FCFS scheduling disciplines, analysis *(Japanese)* 85−22306
multiple-class queueing networks, bound hierarchies 86−52337
multiple-ring LANs, performance anal. 87−34183
multiplexers with randomly changing input characteristics, stochastic model 87−7873
multiprocess protocols, performance modeling 88−52654
multiprocessor computer systems, performance evaluation in case of collisions in block-structured common memory 87−27673
multiprocessor controlled switching systems, common memory access contention with nonpreemptive priority discipline, anal. *(Japanese)* 85−30502
multiprocessor switching system, access contention model anal. 86−30517
multiprocessor switching system, queueing models 87−55430
multiprocessor switching system simulation using model aggregation 85−36846
multiqueue cyclic service system with feedback, anal. and appls. 87−40364
multiqueue system with non-exhaustive cyclic service modelled as linear programming problem 88−11829
multiqueue with non-preemptive priority and cyclic service, approx. anal. *(Japanese)* 88−11831
multiqueue with probabilistic service discipline, approx. anal. *(Japanese)* 88−52623
multiqueues system with controlled and cyclic service *(Japanese)* 86−40612
multisection switching fields with waiting andlosses with limited queue length 86−49046
multiserver fully-available systems with repeat callsunder conditions of heavy traffic 85−57567
multiserver queue, optimisation problem 86−62079
multiserver queue with narrow- and wide-band customers and wide-band restricted access 88−59362
multiserver queueing system with unequal service rates 86−10608
multiserver queueing systems, diffusion approx. of first passage time *(Japanese)* 87−27692
multiserver queues with *m*-phase synchronous fluctuation of traffic intensity 88−34865
multiserver queues with locking 87−36574
multiserver queues with synchronous fluctuation of traffic intensity 88−21398
multistage queueing mechanism with quantum service, anal. 85−39614
multistage queuing system with losses and arriving flow of phase type 87−55379
mutual exclusion distributed algorithms properties, quantitative evaluation 86−69242
MVS systems and SNA network performance 87−34162
network, overtaking 85−2977
network access congestion control mechanisms, dynamic behaviour 86−54627

queueing theory continued

repeated call model with finite number of sources 86−69198
repeated calls model with finite source number, anal. and appl. *(Japanese)* 85−13452
repeated calls problem for heavily loaded multiline systems with nonpersistent callers 87−48277
resequencing delay for M/M/m systems 88−59370
resequencing delay for queuing system with heterogeneous servers 88−59364
resequencing in distributed systems with multiple classes 88−52324
reservation protocol for fibre-optic network, anal. 87−13187
resource sharing queuing systems 86−62006
resource sharing systems, performance 87−34172
response time distribution in a multiprogrammed computer with terminal traffic 88−41138
response times anal. and optimal resources allocation in message and packet switched networks 87−75956
retarding signals detection with unknown arrival time, single-channel algorithm 88−8773
retrial queues, survey 88−18558
ring LAN, traffic meas. model using packet trains 87−13388
round robin scheduling for fair flow control in data communication networks 87−27707
round-robin scheduling of services, exact anal. 88−18554
routing in network with unreliable links 88−52671
rubber industry manufacturing process, maintenance policy for broken machine repair, queueing theory 87−51675
rude-CSMA analysis, extension 87−75979
Satellite Business System's TDMA-demand assignment system with voice and data activity compression 85−14182
satellite channels for distributed data systems 85−14150
satellite communication systems, 87−49006
satellite mobile radio, average waiting time for accessing batch-processing dispatcher 88−67250
selective repeat ARQ protocol, performance analysis 86−43352
selective repeat ARQ receiver, queueing analysis 87−55443
selective retransmission protocol, modelling delay by FIFO queue 85−13874
self synchronizing finite state protocols, construction technique 87−33841
semiregenerating process, two-dimensional stationary distribution 85−39613
semiregenerative processes, continuity of distribs. 86−46161
sensitivity analyses of parameters of a $M(t)/G/\infty$ stochastic service system 88−63146
series of servers, blocking, reordering and throughput 85−7963
server's walking process/customer's thinking process type queueing system *(Japanese)* 86−13618
server loss variable trunk system 86−54809
service demand time, for queueing networks including FIFO nodes *(Japanese)* 86−40610
service time on playthrough ring, model 88−66804
service-time variability, influence in closed queueing network 87−10244
servicing flow of orders with simple after effect with several groups of devices 85−49424
servicing with mixed priority and orientation 85−54242
shared resources modelling using queueing networks 86−64666
shared-response systems, performance anal., book contrib. 87−20166
$\Sigma GI^{[X(i)]}/M/S/K$ queues with mixed batch renewalinputs *(Japanese)* 86−66670
signal at separated reception points, estimates of arrival times and their differences 86−29883
signalling networks, congestion control policy 86−37310
simple telephone exchanges, queueing anal. 87−34298
simulation, digital, conf., Washington, DC, USA (Mar. 1987) 87−43782
simulation of queueing network 88−9174
simultaneous service model with finite capacity in a data-flow control scheme *(Japanese)* 88−21392
single channel GI|GI|1, ∞ system, investig. by method of regenerating processes 85−28097

queueing theory continued
single channel queueing system, overall message length distribution 85−42003
single channel queueing system with feedback, relationships between stationary characteristics 85−49422
single channel system with waiting time constraint, nonstationary charactS. 87−44112
single server preemptive priority queues with renewal process, anal. 85−42002
single server queue in hard real-time environment 86−19895
single server queueing system of limited capacity with phase type state dependent distributions 86−52333
single server queueing systems, variable service rate, finite switching time, hysteresis control 85−54244
single server system, limit theorems for joint distributions 85−49423
single server with finite waiting room and phase type distribs., length and output flow anal. 88−18557
single-channel queueing problem with intermittently available server, time dependent solution 87−23455
single-line priority systems with finite and infinite sources and losses due to switching, practical analysis 85−28098
single-line queueing system with relative priority and exponentially bounded waiting time 85−28099
single-line repeated orders queueing systems, results 87−16459
single-line system with queue-length dependent service time, characts. 87−72899
single-queue system with priorities and feedback, anal. method 87−55381
single-server model with two queues having different service disciplines, anal. *(Japanese)* 88−59379
single-server priority queueing system, monotonicity of initial busy system 88−8884
single-server priority queueing-location model 88−52616
single-server queue, boundary location for diffusion eqn. 87−10243
single-server queue with multiple transaction 85−39616
single-server queueing models with two classes of customers 86−13619
single-server queueing system, asymptotic distribution of queue length 87−10239
single-server queueing system with group arrival, total message flow distribution 86−57305
single-server queueing system with Poisson input flow 88−31607
single-server queueing systems with two independent input streams, conservation law appl. 86−69225
single-server queues with relative and cyclic priorities 85−272
single-server queues with warming-up times, steady state existence and uniqueness 85−273
slotted ALOHA channel interconnection, throughput and queueing analyses 88−28379
slotted ALOHA packet radio networks, delay anal. 88−3831
slotted ALOHA system, interacting queues, approx. model for delay anal. 87−40004
SNA networks, modeling considerations, capacity planning 88−59666
sojourn time sensitivity estimation in queueing networks using perturbation anal. 87−51922
sojourn-time distribs. in queuing networks, numerical computation 85−33274
solar water heating system, optimum design 85−39218
space division packet switch, input vs. output queueing 87−40029
space division packet switching 88−52641
space-division packet switch, input and output queueing 88−21377
spatial stochastic networks at regeneration points 86−57306
SPC ESS, delay-loss system for overload protection, performance study 85−57548
SPC telephone exchanges, overload control, optimal stochastic control approach 85−52226
stability estimates of queueing processes 88−31605
stable slotted ALOHA systems, delay anal. 86−54626
standby redundant queueing system with waiting. I 85−60841
star-structured computer networks, characts. calc. 88−28145
state-dependent M/M/1 queues, busy period distribution 88−18561
state-dependent queues, unifying diffusion model 87−55378
static optimization algorithm for a closed treelikequeuing network 86−37176
static priority queues with application to a computer network 88−49627
stationary non-aftereffect stream definitions and characteristics *(Chinese)* 87−31383
stationary waiting times and limiting behaviour of queues with many servers 85−33271
stationary waiting times and limiting behaviour of queues with many servers 85−44585
statistical multiplexing for packet video sources, perform. anal. 88−46363
statistical multiplexing in packet video communications, performance models 88−66791
steady state analysis of the $M^X/G/1/N$ queue with vacation time 86−30094
steady-state probability for a queue with two thresholds 88−280
steady-state system availability, upper and lower bounds 86−43364
stochastic inequalities for queueing networks 87−40458
stochastic models, conference, Siebenlehn, Germany (June 1983) 85−263
stochastic Petri nets, necessary and sufficient saturation conditions for queueing networks 88−303
stochastic recirculation system with random access 85−60837
stop-and-wait ARQ, throughput optimisation 86−43355
stop-and-wait ARQ schemes with memory, throughput performance 88−46324
store-and-forward communication networks design, models and algorithms 86−23322
store-and-forward packet switch, use for circuit-switched traffic 88−8910
store-and-forward packet-switched networks, equilibrium analysis 87−27679
structured buffer pod scheme for packet node 88−8909
subcarrier audio channel (SCA) data broadcast systems, queueing strategies anal. 88−41128
summarized messages volume determination 87−75982
super-processing packet satellite system, queueing model 86−4604
superposition arrival processes characterisation in packet multiplexers for voice and data 87−13171
switching system processors, heavy traffic performance anal. *(German)* 85−41812
switching systems, high load throughput as described by Erlang and Pollaczek-Khintchine formulas 85−42000
switching systems, service time dependency on waiting time 86−49050

queueing theory continued
symmetric queues with alternating service and switching times 86−26713
synchronous packet networks with priority queueing disciplines 87−55402
synthesis of queueing networks with block andstate-dependent routing 86−34114
system of parallel queues with insufficient worktables *(Japanese)* 87−36573
system with bounded queue and waiting demand dependent service time 87−36572
system with server's walking time and serial service 88−14851
tandem packet-radio queueing networks 86−30115
tandem packet-radio queueing systems 87−40647
tandem queue with finite intermediate waiting room and blocking in heavy traffic 88−52617
tandem queues approx. via isomorphs 86−7598
tandem queues with blocking in heavy traffic 86−26716
task-oriented queueing, anal. tool for software design of communication processing systems 86−43357
TDM system, voice/data integration performance 86−30080
TDMA networks with bursts of traffic, nodes calc. *(German)* 86−54396
TDMA scheme operating under preemptive priority discipline, message delay anal. 88−46366
TDMA technique, fixed allocation with finite buffer capacity, anal. 87−69410
TELECOM 1 ISDN, teletraffic models *(French)* 86−16591
telecommunication load distribution and ordered traffic 86−16069
telecommunication M(t)/M(t)/1 loss system, blocking probability determ. 85−19612
telecommunication network design and dynamic routing under queueing demand 86−23208
telecommunication network performance evaluation 86−30239
telecommunication network traffic engineering techniques, with waiting facilities 85−19657
telecommunication systems control, user-behaviour modelling, expanded concept 88−21399
telecommunication traffic, heterogeneous, with no queueing, optimal service allocation 88−46367
telecommunications appls., theory *(Dutch)* 87−7879
telecommunications congestion control, queueing model for input regulation method 86−22854
telecommunications network developments 87−2715
telecommunications systems, congestion control, queueing models 85−30512
telemetry networks, communication management *(Spanish)* 88−59562
telephone company office with standby service staff, transient service queueing model 87−34027
telephone network, performance analysis and optimal control of an M/M/1/k queueing system with impatient customers 88−41242
telephone network management, real-time, traffic fluctuations Kalman filtering 88−21553
telephone networks, decentralised closed-loop call routing 87−55626
telephone networks, discrete time stochastic models and prediction of traffic fluctuations 88−9035
telephone repeated calls, model of full-available group and waiting positions with extreme load 85−36616
telephone systems with repeated calls, influence of subscribers composition 85−30491
telephone traffic, heterogeneous call types, loss system approx. 85−63137
telephone traffic, time to system blockage, Erlang formula generalisation 88−73501
telephone trunk network, dynamic flow assignment problem 85−25327
telephony, subscriber trunk group design, based on repeated calls and waiting 85−8267
teletraffic analysis, three moments method, Cox functions, nonPoissonian traffic *(French)* 86−16592
TELNET/rlogin server implementation 86−55023
terminal buffer memory analysis in resource sharing localcomputer networks 87−2664
three-phase multichannel mass service systems with blocking, approximation 85−39610
threshold type scheduling, resequencing delay anal. for queueing system with two heterogeneous servers 87−55570
time critical sensor communications, preemptive buffering disciplines 87−27730
time delay distribution, pair-wise analysis of servers 86−26699
time dependent queueing system with two parallel channels, theoretical study 88−18555
time dependent queueing systems, diffusion approx. 87−12870
time warp optimisation using semantics of abstract data types 87−40060
time-dependent queueing problem with departures having random memory 85−44586
time-dependent queueing systems with statistically dependent arrivals 86−7600
timed and stochastic Petri nets, performance of synchronisation schemes 86−7633
timed Petri net models of queueing systems 88−49626
token bus priority scheme, performance anal. 87−62681
token passing network, stability 86−23215
token passing networks and starvation issues 86−23213
token passing rings, integrated packet voice/data, performance 87−13217
token ring backbone network, high speed, modelling and anal. for realistic scenario 88−59720
token ring LAN, performance anal. 85−63296
token ring LANs, appl. of decomposition principle in M/G/1 vacation model to two continuum cyclic queueing models 85−52024
token ring LANs, performance anal. 85−46988
token ring system with exhaustive or gated service, traffic anal., renewal batch inputs model *(Japanese)* 88−46333
token ring system with priority message classes, approximation 88−21635
token ring systems, nonsymmetric, exact results 85−36752
token ring with limited service conservation-type law 86−43348
token rings, simple approx. for waiting times 86−69212
token rings, variance and waiting time computation 87−13380
topology dependent fair access to a shared resource 87−48300
traffic activity mode changes, queue size and delay analysis 86−54584
traffic anal. of combined loss and delay system *(Japanese)* 86−59445
traffic analysis of a large integrated services network 88−8912
traffic analysis of a local area network with a star topology 88−59365
traffic characterization for integrated services 88−53030
traffic intensity control in Markovian queues, sequential techniques 87−44108
traffic processes of server system, simulation method *(German)* 87−58781

queueing theory continued
transient behavior analysis of an M/M/r/K queue 86−26705
transient M/M/1 queue cdf, pdf and mean computation, generalized Q-function appl. 87−2674
transient M/M/1 queue variance computation using generalized *Q* functions 88−59367
tree mean value analysis algorithm 86−307
trunk reservation models in telecommunications systems 87−34046
trunked mobile dispatch system, shared service algorithm 87−20419
trunked mobile system, key states approach in anal. of traffic control strategies 87−69954
trunked radio systems, loading considerations for public safety dispatch 87−69952
two queues and one server with threshold switching 87−36575
two-moment approximation for a buffer designproblem requiring a small rejection probability 85−51526
two-phase MG/M/1→M/1 queueing system with nonordinary flow, joint distribution 88−31602
two-phase queueing system with identical servicing under conditions of heavy load 85−28100
two-phase queueing system with multiplicative distribution of the stationary probabilities 88−31606
two-phase system with identical service in case of different service disciplines and heavy load 87−62406
two-priority packet queue, performance anal. and appl. 88−3290
two-queue, one-server model with priority for the longer queue 88−18560
two-queue models 87−31384
two-stage cyclic queues, cycle time distribution 87−31385
two-stage service system 88−73398
two-way traffic, priority polling system anal. 86−4079
uniformly monotone Markov processes and applications 87−65306
unintrusive communication of status in a packet network in heavy traffic 85−42265
UNIX STREAMS communication buffer allocation algorithm based on Erlang traffic model 88−52964
Unix-based network file systems, performance analysis 87−40003
unreliable dynamic networks, performance optimisation 88−52321
unreliable queueing systems 85−49420
vacation models of queueing systems 87−65297
variable operation mode queuing system 86−37175
variable rate speech coding and network delay analysis for universal transport network 88−52395
vehicle scheduling models, bipartite matching problems 87−65296
video-on-demand, Palm traffic model and GOS technique 87−40030
videotex system, broadcast delivery anal. 86−4239
queueing theory continued
videotex systems, response time performance 87−13327
viewdata systems, broadcast delivery analysis 85−42029
virtual circuit type packet switched network, traffic control 88−41365
virtual circuits using sliding window flow control, end-to-end delays approx. 85−25213
virtual time CSMA, new algorithm 86−4076
virtual waiting time in queuing systems with absolute priority 87−23458
VLSI test strategy development, using network of queues 88−18466
voice transmission, burst and packet switching, new meas. 87−55575
voice-data token ring LANs, with random priorities, performance evaluation 86−17045
voice/data integrated system with controlled arrival rate of data packet, traffic anal. *(Japanese)* 87−19992
voice/data integrated TDM network, computer simulation 88−28152
voice/data multiplexing technique with correlated sources, performance analysis 88−53027
waiting system with two stages 88−63147
waiting time distribution for the $M^x/G/1$ queue underlast-come first-served service 86−309
waiting time evaluation of packet switches for centrally controlled PBX in LAN 88−14863
waiting time for token ring with station dependent overheads 86−69432
waiting time in a multi-phase queueing system 85−54241
waiting-time approximations for cyclic-service systemswith switch-over times 86−64670
waiting-time approximations for cyclic-service systems with switchover times 88−14862
waiting-time approximations in multi-queue systems with cyclic service 87−44111
weak convergence of sample path derivatives for the waiting time in a single server queue 88−31612
weekly dependent events flow approx. estimates, Poisson flows 88−31568
wideband ISDN, bandwidth allocation strategies 87−13218
window controlled packet network with finite input queue and optimal window allocation, approx. anal. *(Japanese)* 88−21389
window flow control on a trunked byte-stream virtual circuit 88−66242
window-controlled packet networks, wait system model delay anal. *(Japanese)* 85−46981
workload arrival patterns, characterisation of variation in time 85−28104
X.25 computer network delivered traffic throughput assessment 88−15046
X.25/X.75 packet network, edge-to-edge protocol performance 88−34845
queuing theory *see queueing theory*

analogue beamforming in radar 85−47570
angular superresolution with phased array radar: a review of algorithms and operational constraints 87−28639
antenna radar cross section, anal. 85−14339
antenna reflectors, dihedral corners, backscattering 88−14554
antennas, propagation, and radar systems 87−28690
array antenna near field, coherent radar targets resolution 87−27444
array processing, eigenanalysis methods, sensitivity 87−19835
array radar systems, review of developments 87−41001
array synthesis using nonlinear optimisation techniques 88−58974
arrays, signal processing, multiple beam formation and pattern adaptivity 86−10217
arrays, whitening of sidelobe powers by pattern switching 85−57158
atmospheric radar (for upper- and middle-atmos.) satellite method for radiation pattern 86−6103
automatic control for the position and speed of an antenna *(Spanish)* 87−75646
beamforming, digital processing role 85−47571
bimodal optical computer, jam resistance 88−72191
broadband meanderline twistreflector for the inverse Cassegrain antenna, design and performance 88−14556
C-band phased array for space 86−59162
Cassegrain radar antennas with broadband andmultiband performance 86−54345
Chilbolton dual-polarised radar, new developments 87−56259
circular array, adaptive nulling, multipath effect 87−19335
CLEAN technique for reduction of sidelobe and speckle artifacts in microwave imaging 88−67446
CODAR ocean surface meas., distorted antenna patterns correction 86−64049
coherent multiposition systems, antennas directivity at receiving points, statistical optimisation 88−15572
collinear-coaxial antenna, eight-element config., design, performance and directivity calculator program *(Russian)* 86−43063
computer communication through a surveillance radar 86−17506
conformal array design and radiation props 87−33555
consumer education in radar 88−15610
correlated signal environment, targets and antenna elements positions estimation 87−19338
cross-section compact range, new approach 87−3227
development trends (1987-2000) 88−28939
developments in radar and antenna technology 88−40667
digital beamforming antennas, configs., operation and hardware requirements 87−33547
digital manifold phased arrays, nonlinearities 87−12837
dihedral corner reflections, backscatter anal. 88−14497
dihedral corner reflector backscatter using higher order reflections and diffractions 88−28926
direction-finding antenna, compact, for HF remote sensing 85−24959
displaced phase centre antenna clutter suppression in space-based radar applications 88−15550
distributed beamsteering control of phased array radars 87−8354
dual frequency antenna integration using invisible grating structures 85−41728
dual mode airborne radar array 86−43068
dual polarisation radar design for clutter analysis 85−58187
dual polarized ice surveillance radar antenna, design and performance 87−27056
dual-pencil-beam scatterometers for remote sensing, performance, effects of pointing errors and range 86−25399
dynamic behaviour of an adaptive array algorithm 87−47396
electronically scanned antenna radar, situation-driven sensor management using expert systems approach 88−9655

radar antennas continued
electrooptic system components for phased array radar applications 88−72689
EM subsurface radar using transient field radiated by wire antenna 87−15032
ERS-1 SAR antenna R&D model and test results 86−3708
ESM, spiral antennas design 85−57124
ESM land-mobile appls., antenna systems design 85−57138
fire-control system integration pitfalls 88−41740
four waveguide monopulse feed, radiation charcts. 86−22846
generic gimbaled antenna structure, design 87−28694
Grahamstown all-sky meteor radar, system and obs. of meteors and thermospheric wind 88−60248
HF four-element CODAR beam forming 86−65024
HF ground-wave radar, receiver design 88−47217
HF surface waves launching 88−45680
high resolution by eigenvector rotation 86−49723
high-power steerable short-wave antennas for radio broadcasting 88−66196
horn-type radar antennas, test stand 86−54384
IF transmit/receive modules for low-sidelobes phase array 88−60263
imaging array radar, adaptive image processing to suppress noise and clutter 85−47605
imaging based on rotating antenna 88−67455
inclined planar A-sandwich radomes on radar corner, reflectors for spaceborne SAR calibration, design criterion 85−46655
iterative noncoherent angular superresolution 88−60220
Jindalee−Australia's all-purpose early warner radar system 88−41732
JRC phased array antennas, development *(Japanese)* 87−61516
K_a-band microstrip patch monopulse antenna, low-cost design 87−68870
L band multibeam array, cylindrical near-field testing, scope and results 85−24989
linear antenna array, bandwidths for point source and dipole arrays 85−36128
Luneburg reflector for linear and circularpolarization 85−51501
measurement of moving target azimuth, accuracy 88−41722
MESAR, phased array radar 88−15617
meteorological radar method, antenna sidelobe effects on multiple-parameter measurements 87−71300
microstrip antennas for radar appls., array design using grid and patch configs. 85−62925
microwave array systems techniques phased array radar demonstrator, optoelectronic elements 86−28949
microwave bistatic intrusion detection sensors, spread spectrum technology appl. 86−4743
microwave reference link for phased arrays using optical fibres 86−29649
microwaves, system appl. to radars, modern trends 88−53334
MM-wave antenna reflector for scanner appls. *(German)* 87−54764
MM-wave homogeneous ferrite phase scan antenna, design and charcts., military appls. 87−54702
MM-wave miniature monopulse comparator, design for antenna assembly of tracking radar 86−4725
mMIC T/R modules for the next generation airborne surveillance platforms (U) 87−13786
modules, semiconductor technologies, cooling and reliability problems 87−13785
monolithic beamforming components for radar 87−11062
monopulse antennas, digital computer simulation 85−24938
monopulse arrays with sum and difference sidelobes constraints, performance indices optimisation 86−68929
monopulse phased array radar in the presence of strong jammers 88−41749
monopulse secondary surveillance radar, effects of obstacle on antenna performance *(Japanese)* 88−15580
MU radar for middle and upper atmosphere remote sensing 86−69819
MU radar with active phased array system, antenna and power amps. 86−23968
multiple shaped beam forming with modified Blass matrix 88−34498
multistatic vector inverse scattering methods for three-dimens. radar image construction 85−58184
mutual coupling and far field radiation from waveguide antenna elements on conformal surfaces 88−15668
MV radar with active phased array system, inhouse equipment 86−23969
naval radar, 1935-45 development 85−58227
naval radar design, modular approach 88−15616
near field radar cross section meas. extrapolation to far zone 88−73995
near field test system for very large antennas 87−47424
nonperiodic frequency jumped burst waveforms 88−14547
optical adaptive beamforming using residue number systems (RNSs) and Gauss elimination 88−73217
optical processing of covariance matrices for adaptive processors 88−73220
optical threshold logic devices and design for agile phased-array beamsteering 88−72691
optimal polarisation concept extension to asymmetric matrix case 85−58185
over-the-horizon backscatter radar antenna above lossy earth, 2 D model anal. 88−14505
parabolic reflector antenna design, off focused and offset, ground probing radar appl. 85−36117
partially adaptive antennas, specific performance limitation 87−2376
passive sonar, high resolution antenna processing *(French)* 88−41757
phase-scanned commutated array network 88−15620
phased array antennas for airborne ECM, configs, and operation 87−33545
phased array antennas for radars andtelecommunications *(French)* 85−51502
phased array microwave antenna, fibre optics fed 87−54731
phased array radar, centroid estimation, automatic aircraft landing appl. 86−30878
phased array radar, developments in optical control and signal distrib. techniques 88−74034
phased array radar, optical processor reduced sensitivity algorithm using constraints and ridge regression 88−51618
phased array radar, transmit/receive modules 88−15618
phased array radar antennas, principles, technology and multifunction possibilities *(German)* 87−2378
phased array radar system, beamforming options 87−49171
phased array radars with correlated phase errors, pointing accuracy 88−15619
phased array systems, addressing and control using optical fibre and waveguide technology 88−67476
phased arrays, book contrib. 87−76859
phased-array radars 85−42653
planar array 3D radar from Thomson CSF 87−49169
radar antennas continued
planar phased arrays, computer program 88−34503
polarimetric *X/L/C*-band SAR 88−60259
polarisation dependence in angle tracking systems 85−63741
polarisation information utilisation in primary radar 85−58183
pulse radar antenna noise power calcs. 87−63023
radiation pattern meas., aircraft components effects determ. 85−8480
radome design considerations for airborne radar systems 85−46657
radome design for airborne radar 86−3705
radome-enclosed environment, system performance in rain 86−29566
radomes, reactively loaded, effect of composite materials 87−39467
RAT 31-SL, multiple beam radar for 3D long range detection 87−49167
RDF and early IFF, development 85−58230
reflectivity of fabric type radar reflectors *(German)* 87−19348
reflector with bidirectional communication capability 87−49156
refractivity changes in the lower atmosphere, computer simulations 88−9634
RELEDOP: a full-scale antenna pattern measurement system for high-powered HF transmitting antennas 88−67714
remote gain meas. technique using solar energy as calibrated RF source 88−66169
RFI sources, directions of arrival, search method 87−20638
rotary motion, simplified anal. *(Polish)* 87−47314
rotating antenna beam radars, signal primary processing *(Czech)* 87−8338
S-band phase array antenna, front-end module design 86−23963
sampled-aperture radar, angle-of-arrival estimation, high resolution techniques 87−41008
SAR, sensitivity problem 87−76837
SAR antenna panel of ERS-1 satellite, radiation charcts. from planar near field meas. 88−34413
SAR antenna technology, developments *(Japanese)* 88−8597
SAR applications, slot arrays design 87−75612
SAR azimuth depolarization ambiguities 88−60244
SAR concept, rotating antennas (Rosar) based design *(German)* 87−34657
SAR for Magellan mission to Venus, antenna charcts. 87−28713
SAR ground mapping, ECCM effectiveness of low sidelobe antenna 87−20618
SAR image quality, effects of damped phase and amplitude errors 88−60213
SAR instrument studies, summary 87−49185
SAR motion compensation systems with strapdown inertial measurement units 88−60215
SAR spaceborne and Shuttle Imaging Radar-B (SIR-B) antennas, development 86−16059
scattering coefficient meas., model for prediction of precision and accuracies 88−60221
scattering props. of dihedral reflectors, nonorthogonality 88−14555
search and track antenna, 94 GHz 88−21024
secondary surveillance, new developments 85−52419
secondary surveillance radar, book contrib. 87−76862
secondary surveillance radar antenna, in situ near-field meas. 88−34426
self-cohering airborne distributed arrays on land clutter using the robust minimum variance algorithm 87−28670
self-steering array for nonsinusoidal waves 86−59159
shaped beam planar array antenna for an airborneradar system 86−43069
shipborne radar, trends 88−60241
sidelobe adaptive interference canceller, field tests 85−47604
sidelobe narrowband interference cancellation 85−47603
Siemens radar search antenna, development *(German)* 87−56241
simulation of clutter return for an airborne pulse Doppler radar 88−15600
single step technique for adaptive array processing 87−13050
SIR-B antenna, vertical pattern determ. 88−74013
SIR-B expts. in Japan, sensor calibration at Akita Airport 88−53357
SIR-B expts. in Japan, sensor calibration at Kashima test site 88−53360
SIR-B expts. in Japan, sensor calibration at Sarobetsu wild-land test site 88−53358
SIR-B expts. in Japan, sensor calibration at Yamagawa test site 88−53359
SIR-B image calibration by a corner reflector array 88−74014
SIR-B sensor calib. expt. in Japan 88−53364
slotted array antennas, mechanically scanned, system appls. 88−66219
slotted waveguide antenna arrays, design and anal. 88−66220
slotted waveguide arrays using carbon fibre materials 87−39518
solid-state phased array radar transmitter with adaptive beamforming 86−30881
space based radar, detection performance improvement, displaced phase center antenna appl. 88−4104
space-based radar, main-beam clutter spectrum narrowing using high-aspect-ratio antenna 88−28923
space-based surveillance radar, architecture and design criteria 88−35588
space-fed lens phased array antenna performance calcs. 86−68857
space-time signal processing of radar set with 2D antenna array 86−69078
Spaceborne Imaging Radar-C, hardware, subsystem and interfaces 88−10518
spaceborne microwave active phased array SAR, design considerations for C-band operation 87−28692
spaceborne SAR, vertical pattern from uniform surface meas. 87−56252
spaceborne SAR performance optimization, antenna pattern synthesis technique 88−9653
spaceborne synthetic aperture radar design and trade-off analysis for switchable dual incidence angle operation 88−9652
spacecraft SAR antennas for the future 86−55376
spherical arrays of directive elements, pattern synthesis *(German)* 87−20609
spherical conformal array, element arrangements comparison 88−2835
spherical triangular array antenna, radiation charcts., radar appls. 85−41773
ST and MST radars, antenna-induced range smearing 86−22787
submillimetre heterodyne receiver for KAO, detect. of CO 372 μm line in OMC-1 and W3 88−35625
subsurface radar, introduction 88−67467
superresolution and synthetic-aperture antenna techniques for low-lead propagation studies 88−2761
surveillance radar aerial systems with flexible masts, attitude control 88−15583
switched pattern concept for sidelobe suppression inradar antennas 86−42950
switched pattern radar antenna array 88−14526
synthetic and real aperture antenna systems, target backscatter, conditional equivalence 87−26968
synthetic aperture for arbitrary aircraft motion, basic charcts. 86−23983

radar antennas continued
synthetic aperture radar antenna, research and development 86−69822
synthetic aperture radar antennas, theory *(Italian)* 88−2673
tactically deployable tethered aerostat multi-mode radar platform, adaptation for multimission capability 85−8482
target forward scattering meas., by planar near field scanning 87−13782
target handling in clutter, polarisation-glint considerations 85−58188
targets polarisation scattering matrices, antenna characts. control 88−40671
techniques, book 87−72688
technological development 87−33544
technological developments, review *(French)* 88−47212
thin wire elliptical loop, natural frequency determination 88−27623
unequal scale models of radar-carrying craft 88−8579
USW active receiving radar antenna for salt deposit location *(German)* 87−61464
V-band space-based phased arrays, development using MM-wave monolithic technology 87−33546
vertical radar coverage, nonuniform reflecting terrain, simulation 87−56258
vHE radar to make terrain elevation models through tropical jungle 88−60264
X-band, using suspended substrate stripline corporate feed 87−47432
X-band monolithic phased-array-radar T/R module, manufacturing cost anal. 88−9644
X-band SAR, antenna ambiguity investigation 87−61504
X-band synthetic aperture radar, Shuttle borne appls. 88−28953
GaAs MM-wave monolithic dipole antenna, MMIC compatible design 85−19262
GaAs TX/RX module for S-band phased array radars, 2 W 88−15584

radar applications
2-frequency microwave resonance study of ocean wave modulation effects 85−32012
3D air motions over Baiu front, VHF Doppler radar obs. 88−74028
3D cartography using radar and graphics 88−22195
3D scanning Doppler radar for cloud and snow obs. *(Japanese)* 88−10546
4.3 MHz ocean wave-radar modulation transfer function meas. 86−37926
10 GHz radar detector for automatic train control 88−22202
10 GHz scatterometer for remote sensing 87−63933
12 GHz site and orbital diversity, meas. and predictions 87−62882
14 GHz FM-CW/pulse compression radar for obs. of satellite-Earth path precipitation *(Japanese)* 86−37945
35 GHz radar for cloud obs. 87−71303
35-GHz-Doppler radar for law enforcement agencies in Europe , operation and expt. eval. 88−74036
50 MHz auroral Doppler spectra dynamics during Harang discontinuity 85−62771
50 MHz radar wind profilers 87−63940
1986 International Geoscience and Remote Sensing Symposium, conf., Zurich, Switzerland (1986 September) 87−51727
acoustic radar technique, development 86−59955
acousto-optic spectrum analyser for laser radar applications 87−41038
active-passive radar, convective clouds integral characts. determ. 87−70133
aeolian sediment transport studies, use of radar backscatter obs. of aerodynamic roughness 88−67466
aerosol mass concentration meas. by optical radar 86−12198
agricultural fields, backscatter coeff. extraction from airborne SAR image 87−63990
agricultural scenes, probabilistic modelling of radar images 85−62742
agricultural scenes, probabilistic modelling of radar images 85−63085
air navigation, electronic, development history 88−67439
air navigation, electronic, new developments 88−74059
air pollution monitoring by remote sounding, Elektronika-02 lidar appl. 86−44797
air surveillance/defense, satellite radar architecture 86−59935
air traffic control and secondary surveillance radar improvement *(Japanese)* 85−20267
air traffic control and surveillance radar *(Japanese)* 88−15577
air-to-surface airborne radar for surveillance, threat warning interception and combat appls. 86−59934
airborne APG-66 radar and its derivative applications 86−17479
Airborne Doppler lidar for wind meas., error evaluation 87−71331
airborne early warning radar, fundamental parameters and systems 85−47578
airborne lidar for pollutant transport and conc. distrib. determ. 88−16936
airborne microwave observations use for differential bare field drainage props. determ. 87−15077
airborne microwave rain scatterometer, influence of rain rate profile and path-integrated rain rate 85−59484
airborne microwave rain scatterometer/radiometer, DP software system *(Japanese)* 87−15066
airborne microwave rain scatterometer/radiometer system, microwave backscatter expt. of ocean surface *(Japanese)* 87−15068
airborne microwave rain scatterometer/radiometer system, rain meas. and data anal. *(Japanese)* 87−15067
airborne moving target indicator techniques 88−15649
Airborne Oceanographic Lidar for ocean waves meas. capabilities, comparison with Surface Contour Radar 87−71388
airborne radar appl. to surface vessels detection, historical account 86−11157
airborne SAR image geometric distortion meas. 86−6085
airborne SAR images calibration using active radar calibrators and ground-based scatterometers 88−5140
airborne surveillance radar, design, construction and early trials 86−17512
airborne weather radar, digital RF technology, REACT system 85−4409
aircraft height information errors telemetered by secondary surveillance radar systems, anal. 88−16876
airport radar microwave link with air traffic controllers 87−29903
airport surface detection equipment, ASDE-3 high-resolution radar, design and characts. 85−47576
airport surveillance radar, ASR-9 design and operating characts. 85−47575
Alaska 398 MHz phased array radar, radar auroral echo heights investigation 85−63733
Alaska SAR facility features and operations 88−9649
altimeter techniques for high spatial resolution meas. 87−57360
altimetry, appl. of surface elevation and slopes joint distrib. for nonlinear random sea 86−38967
anisotropic random medium layer, active microwave remote sensing 86−25400
Antarctica, cloudiness radar meas., implications for solar radiation reaching ground *(Russian)* 88−15571

radar applications continued
antenna troubleshooting test facilities with a high resolution instrumentation radar 87−68861
ARCHER expert system for meteorological phenomena identification in radar signatures 88−53356
areal precipitation estimation, over Oklahoma 87−4137
areal rainfall estimation using raingage and radar meas. 88−54737
array signal processing, wave propagation, theory and appls., book 85−22072
ATC, Mode S data link, interference problems *(German)* 87−57308
ATC, monopulse secondary radar appls. 87−21742
ATC, multi-radar tracking systems and sensor netting, developments 86−55359
ATC, radar with moving target database signal processing, velocity meas. reliability determ. 85−59408
ATC, space based radar appl. 86−18490
ATC air/ground digital communications architecture for Mode-S surveillance beacon system, protocols 87−40775
ATC surveillance and communication system, SSR Mode S *(Japanese)* 85−26874
ATC using netted radar systems 86−23956
North Atlantic anomalous microwave propagation, long-range expt. 87−26765
atmosphere, clear air scatter, aspect sensitivity for troposphere and stratosphere 88−10556
atmosphere, folded radial vel. rectification to Cartesian space 87−71337
atmosphere, microbursts nowcasting using Doppler radar 88−15587
atmosphere, radar appl. for frontal zone diagnosis prior to thunderstorms 88−36669
atmosphere, refr. index gradient determ. from turbulence characts. 88−4111
atmosphere, temp. and vel. var., implications for radar sounding 88−35581
atmosphere boundary layer pollution, acoustic sounding meas. 88−60284
atmosphere eddy dissipation rates determ. from Doppler vel. spatial spectra and Doppler spectrum widths 87−63944
atmosphere precipitation characts. determ. from multiple parameter radar polarisation meas. 86−32535
atmosphere temperature and moisture, short-term changes determ. from single Doppler radar data anal. 88−15591
atmosphere use of alternating horizontal and vertical co-polarisation meas. 87−70115
atmosphere vertical velocities determ. from VHF radar obs. and ECMWF operational anal. 88−74027
atmosphere vertical velocity power spectra meas. with Sousy VHF Radar system 88−42652
atmosphere-searching laser radar, appls. *(Japanese)* 87−56271
atmospheric aerosol distrib. measurement by laser radar with photomultiplier noise, accuracy improvement *(Japanese)* 87−42236
atmospheric precipitation, radar study on VHF and C/Ku bands 85−58213
atmospheric radar (for upper- and middle-atmos.) satellite method for radiation pattern 86−6103
atmospheric turbulence meas., contamination by insects 87−71304
atmospheric velocity fluctuations spectrum using MST/ST radar 86−23979
atmospheric winds, waves and turbulence, VHF radar appl. 86−25427
auroral arcs folding devel., origin and radar meas. 88−53343
auroral backscatter, multi-radar obs. 88−53344
auroral E-region, 1 m wavelength plasma irregularities and convection statistics 85−62772
automatic detection of real-life ship encounters 87−76849
automatic radar plotting aids, working test *(Japanese)* 85−58203
automatic single-Doppler wind field anal. real time system 88−15590
avionics for helicopter navigation and combat 86−44747
B-1B bomber, computer-controlled avionics system featuring navigation, radar and ECM 86−18424
backscatter from rain disturbed sea surface, experimental study 85−47556
Baldwin County, Alabama, USA, forest scene obs. by SIR-A and Landsat 4 Thematic Mapper 86−18607
bathymetry, meas. by Seasat SAR and Skylab photographs, comparison 87−57358
bird identification for avoiding aircraft collision, use of DEC MicroVAX II 87−56225
bridge lights effects on ship's track, Naruto Kaikyo bridge *(Japanese)* 88−43484
burglar alarm technology, passive and active *(German)* 88−49466
buried objects probing by underground radar *(Japanese)* 85−8447
buried plant detection 88−67469
canted hydrometeors, radar polarisation parameters 88−58851
Carpathian Basin, meso-scale convective complex situation obs., orographic effects 88−15595
cartographic feature extraction using SIR-B data integrated with Landsat TM data 88−74016
CFAR radar, adaptive design, sea clutter anal. 85−47583
Chilbolton dual-polarised radar, new developments 87−56259
clean air turbulent plumes meas. with FM-CW Doppler radar 88−4112
clear-air Doppler radars, bistatic and monostatic 86−69820
cloud and precipitation remote sensing, 94 GHz Doppler radar method 88−61636
cloud entrainment meas. using dual-polarization radar and chaff 87−63951
cloud extinction profile measurements by lidar usingKlett's inversion method 87−4125
cloud observations using 94 GHz Doppler radar 87−63950
cloud physics, VHF/UHF radar combination appl. 87−63037
cloud-to-ground Lightning Position and Tracking System for electric utility weather problems 87−9005
clouds, ice content, radar reflectivity meas. 88−36666
clouds, velocity field estimation 85−52396
clutter, sea ice and ships detection 85−47584
clutter, sea surface pollution effect 85−47557
CNET backscatter HF radar, antenna arrays 88−47222
coastal waters, X-band airborne SAR imagery 85−53187
CODAR directional biases with a four-elementantenna array 86−56253
CODAR HF radar obs., status report 86−65535
CODAR HF radars, tidal and storm-surge meas. 86−65533
CODAR ocean surface meas., distorted antenna patterns correction 86−64049
CODAR surface-current appls., least-squares and closed-form dual-angle methods 86−65018
coherent polarisation-diversity C-band radar for cloud microphysics and radiowave propagation 86−4734
collision avoidance, radar simulator appl. *(Japanese)* 86−65025

radar applications continued
Colorado wind profilers at 50, 405 and 915 GHz, altitude coverage 87−77857
communications techniques in radio physics and astronomy 87−20642
conical scannings with two Doppler radars for dynamics assoc. with stratiform precipitation meas. 87−77858
contactless radio-wave level meter 87−63367
continuous wave Doppler lidar meas. of wind magnitude and direction 87−71301
contour mapping for robotic object recognition, high resolution pulsed laser radar 86−59953
convective rain volume estimation using area-time-integral radar technique 87−71348
convective rain volumes and area-time-integrals relation, radar data anal. 88−74024
convective storms, Doppler radar sampling limitations 87−71320
COST-72 project for precipitation meas. by radar 86−18580
COST-73 and its application in very short range forecasting 88−15585
countermeasures historical development, role of Telecommunications Research Establishment 86−11161
crane power line proximity warning system, based on baseband-pulse radar 85−25955
crop identification, airborne SLAR-data 86−18610
cross-polarised SAR data, method for SNR improvement 88−4109
crossed-orbit interferometry remote sensing with SIR-B 88−74015
D-region, auroral, EISCAT UHF radar meas. 88−53342
data transmission by radar 86−16768
deep convective storms, vertical vels., multiple-Doppler radar meas. accuracy 87−63038
DIAL technique for atm. pollutant Cl_2 meas. 88−5203
differential reflectivity technique for rainfall meas. 87−15049
digital frequency synthesizer for radar and communications appls., development 87−41534
digital rain maps from radar, knowledge acquisition for automatic interpretation 87−77874
digital SAR imaging techniques 85−64695
direction-finding antenna, compact, for HF remote sensing 85−24959
Doppler imaging radars, response charact. determ. using speckle 86−65548
Doppler radar, reflectivity of motor vehicles 88−28954
Doppler radar based procedure for counting moving objects as they stop 87−14237
Doppler radar obs. of atm. phenomena 87−63965
Doppler radar security alarm. I 85−16726
Doppler weather radar, spectral moments recovery from overlaid echoes 87−4128
Doppler wind fields meas. with fast scanning radars, signal processing techniques 88−61643
Doppler wind velocity measurements with use of discrete spectral peak freq. estimator 87−4130
dry snowpack, water equivalent estimation using FM-CW microwave sensor 86−69827
dual frequency radars, azimuthal resolution improvement for ocean surface currents 86−25438
dual polarisation S-band radar for rainfall obs. 87−57385
dual-channel precipitation radar, correlation meas. at linear polarisation 86−10093
dual-Doppler lidar measurement of winds in the JAWS experiment 87−71307
dual-Doppler radar obs. of midlatitude squall line struct. and dynamics 88−15575
dual-Doppler radar use in atm. science 87−71321
dual-frequency scattering from ocean, clutter background limitations removal 85−64758
dual-pencil-beam scatterometers for remote sensing, performance, effects of pointing errors and range 86−25399
dual-polarisation radar use for hail detect. 86−44798
dyke lineaments mapping using SIR-B and Large Format Camera, comparison 88−74020
E-region, auroral type 1-4 VHF echoes, ion cyclotron harmonic struct. 88−67464
E-region plasma waves and electron heating, EISCAT obs. 88−53346
Earth Observation System SAR program 88−10522
Earth Observing System, SAR evolution and development 87−63909
Earth resource exploration, R&D work on satellites *(Japanese)* 85−21022
Earth Resources Satellite-1, design and instrumentation charact. 86−25343
earth-space link attenuation prediction using radar meas. of the physical structure of rainfall 86−59818
EDIA and EISCAT obs. of sub-auroral region 88−60247
EISCAT, high-latitude E-region collision frequency meas. 85−63764
EISCAT incoherent scatter radar for high-latitude F-region irregularities obs. 86−59942
EISCAT ionospheric radar, system and early results 86−25423
EISCAT obs. of auroral ionosphere *(French)* 86−59943
EISCAT Polar experiment and high-latitude ionosphere flow 88−53351
EISCAT recent scientific works, review 86−59941
EISCAT science, conf., Bad Lauterberg, W Germany (1987 March) 88−49330
EISCAT studies of F region irregularities using beamscanning 85−63762
electric wave and IR apparatus for weather observations *(Japanese)* 86−38952
electronics in mining, conf., Randburg, S Africa (Sept. 1984) 85−39434
electrotechnology in World War II, enemy targeting 87−76843
EM noise source location using SAR technique *(Japanese)* 86−23987
EM subsurface radar using transient field radiated by wire antenna 87−15032
ERA Technology ground-probing radar, early developments 88−67472
ERASME airborne side-looking C-band radar, data processing and calibration 87−4111
ERS-1 active microwave instrumentation, operational control 87−29907
ERS-1 nonSAR instruments, processing 87−77852
ERS-1 synthetic aperture radar and scatterometer 85−64751
extended version of the tomographic transform convolution for the wavefront curvature *(Chinese)* 88−28920
extrasolar planetary exploration, mapping bistatic radar system design 85−47619
F-15E dual-role fighter aircraft, avionics system with head-up display, radar and EW facilities 86−18425
F-region, auroral ionosphere, plasma density structuring 85−63763
radar applications continued
F-region, ion velocity field kinematic props. determ. using multiple freq. incoherent scatt. technique 87−50551
F-region, non-Maxwellian ion vel. distrib., EISCAT meas. 88−53352
F-region, non-thermal plasma, scatt. power observed by EISCAT, coherent echoes 88−53353
finite wordlength optimization of finite impulse response moving target indicator filters for radar applications 88−63812
flare echo in meteorological appl., refl. and vel. signature 88−60246
flow rate meas. of rice sugar and salt, humidity and bulk density effect 85−26505
FM-CW bistatic radar imaging system for shallow stratum profiles, surface clutter rejection methods 85−52434
FM-CW microwave system for snow stratigraphy 87−57384
FM-CW weather surveillance radar expts. on ESA Olympus satellite 88−15626
FM/CW radar applications in instrumentation 86−24669
FM/CW radar for collision avoidance for off-highway vehicles 88−4115
FMCW radar, BOF slag level meas., unwanted signal rejection 85−48146
FMCW radar, distinguishing between types of hidden objects 85−3502
FMCW radar for hidden object detection 88−67471
FMICW ground-wave radar for remote sensing of ocean waves and currents 88−15678
forest signatures in imaging and non-imaging microwavescatterometer data 86−55820
forestry, calibrated X-band and L-band scatt. coeffs. from southern US forest 87−57442
French airborne SAR VARAN-S campaigns 88−5139
FRONTIERS interactive display system for precipitation nowcasting 88−16918
GEC Total Terrain Avionics 88−36614
geodetic methods and positional changes 88−5202
geologic and geomorphologic problems, radar imagery models interpretation and construction using digital terrain model *(French)* 88−36652
geological remote sensing of surface rocks, radar method 88−61626
geological surfaces radar imaging, effect of look angle and wavelength 88−74018
geological surveying, seismic and ground probing radar methods comparison 88−67474
geophysical radar design 88−67473
Geosat, radar altimeter charact. and results 87−57403
glaciers and ice shelves of N Ellesmere Island, Arctic Canada, airborne UHF radar sounding 88−54747
glaciology, developments in use of inverse methods 85−64730
glaciology, ice sheet topography and height determ. by satellite radar 88−61625
glaciology, radar for ice probing, antenna radiation pattern 88−30140
global digital topography mapping using a scanning radar altimeter 88−10521
global winds mapping with satellite-borne Doppler lidar 88−4120
goniometry, narrow-band array source direction finding in multiple paths, Toeplitz approx. method *(French)* 88−22239
Grahamstown all-sky meteor radar, system and obs. of meteors and thermospheric wind 88−60248
Gram-Schmidt orthogonalization, algorithm and systolic architecture 86−23940
Gram-Schmidt Orthogonalization systems, algorithm and systolic architecture 86−55350
gravity wave spectra model observed by Doppler sounding systems 86−25444
ground probing radars, migration appl. 88−67457
ground speed sensor accuracy limits 86−43904
ground speed sensors, design and performance, agricultural equipment and vehicular appls. 86−5304
ground vehicle position and heading measurement using laser/optical beam system 85−3516
ground-based air defense sensors for the 1990s 88−30217
ground-penetrating radar use for coal elec. props. in-situ meas. 86−25395
ground-probing radar for the detection of buried plastic discs and pipes 87−41018
Guangdong Province, China, severe local storms forecasting and anal. 88−15596
gust front characteristics as detected by Doppler radar 87−77866
gust fronts, automatic detect-by radar 87−71332
hail detection, appl. of differential reflectivity radar technique 85−21017
hail remote sensing with S-band dual linear polarization radar 87−35487
handicapped people, microwave transmit/receive unit based switch 86−53061
harbour surveillance radar echoes, image processing, vessel gross tonnage estimation *(Japanese)* 87−56234
hard-limited radar channels, design and implementation of filter matched to polyphase code 85−31079
height finding radar, systematic errors study for navigation accuracy meas. *(Japanese)* 87−34677
helicopter obstacle warning radar, high-resolution MM-wave system development *(German)* 86−49731
heterodyne radar, radial velocity meas., atmospheric turbulence, error estimation 88−22185
HF Doppler radars for ocean wind-driven currents anal. 86−50752
HF Earth/satellite telecommunication signals degradation 85−30962
HF expt. skywave radar, localisation technique 88−47218
HF four-element CODAR beam forming 86−65024
HF ground-wave Doppler radar, icebergs remote sensing 86−65538
HF ground-wave radar, receiver design 88−47217
HF ground-wave radar remote meas. of Celtic Sea ocean wave and current, NURWEC 2 project 87−56263
HF multifrequency radar obs. of currents and current shears 86−65536
HF radar, ionospheric probing 88−47220
HF radar, Rijkswaterstaat interest, North Sea obs. 86−65532
HF radar, wave and current sensing 87−56262
HF radar appl., wind direction temporal and spatial changes obs. 86−65530
HF radar meas. interpretation, linear gravity-wave dispersion relation 86−65539
HF radar meas. of sea surface, gravity-wave dispersion relation role 86−65540
HF radar measurements of ocean wave parameters duringNURWEC 86−65531
HF radar obs., for Canadian east coast 86−65534
HF radar obs. of sporadic-E layer struct. 86−60940
HF radar observations of Arctic pack-ice breakup 86−65537

radar applications continued
HF radar sea echo interpretation, role of second-order shallow water hydrodynamic coupling coeff. 87−57405
HF radar sea echo interpretation, second-order shallow-water hydrodynamic coupling coefficient 86−65542
HF radar section of rocket exhaust *(Chinese)* 88−42718
HF skywave radar, real-time ocean wave-height mapping, tests 86−65527
HF skywave radar, remote sensing enhancement by FM signal correction 88−47219
HF skywave radar, remote sensing of ocean surface conditions 88−15680
HF skywave radar for ship detection 86−65529
HF skywave radar remote sensing of ocean surface conditions 88−16932
hidden objects, microwave detection 85−6479
High Plains convective clouds, USA, charact. of radar first echoes 87−50555
high pulse rate lidar boundary layer dynamics meas. via aerosol and smoke obs. 87−71302
high resolution millimeter wave radar signatures of vehicles 88−15647
high-latitude main ionospheric trough, assoc. plasma convection and precipitation, EISCAT meas. 88−53350
historical developments and applications, 1935-85, review 85−47548
Hohi geothermal area, SAR image lineament analysis rel. to soil gas surveys 86−6062
holographic imaging radar under-snow imaging, 3D display technique appl. 88−4110
horizontal wind, variability in Doppler slant-beam meas. 86−23974
Hurricane Alicia (1983), inner core vel. and precipitation struct., airborne Dopper radar meas 87−76847
Hurricane Diana (1984), eyewall struct., radar and visual charact. comparison 88−47204
Hurricane Josephine 1984, ocean swell age and source 87−71391
hybrid multicellular-supercellular storm as a hail producer, radar charact. 88−15573
hybrid multicellular-supercellular storm charact. and hail growth 88−15574
hydrology, radar reflectivity-rain rate relationships in Brazil 87−71380
hydrometeor charact. meas. using FM-CW radar remote sensing 88−54746
hydrometeors characterisation, use of differential propag. phase shift const. 88−5179
ICBM physical security system, detection and assessment requirements definition 86−4744
ice and terrain surveillance, STAR-1 SAR system 85−64701
ice sheet borehole geometry determ. 85−43483
iceberg detection by radar, performance anal. 86−60955
iceberg detection by radar, radar cross-section model 86−17454
iceberg detection system using ground wave Doppler radar, software model and expt. study 87−28655
iceberg detection using surface-based radar, dual-polarisation eval. 87−28682
icebergs, marine radar detection, polarisation effect 86−17453
IL-18 airborne lab. radar system for investigating the reflecting properties of the Earth's surface from an aircraft 85−8474
Illinois, United States, radar echo studies for weather modification expts. 87−71351
image nowcasting systems interaction with mesoscale numerical models 88−15593
image rectification using interferometry 87−57349
imaging, iterative algorithm for data extrapolation in multiple restricted regions 87−63033
imaging radar polarimetry 88−4108
imaging radar polarimetry from wave synthesis in remote sensing 87−63930
impulse radar with automated signal processing system for bridge deck fault detection 86−70065
incoherent radar ship identification procedures 88−15644
incoherent scatter meas., modulation principle 87−68753
incoherent scatter radar, appl. to thermosphere modelling 86−12164
incoherent scatter radar, theory, applications and instrumentation for atm. meas. 86−12168
incoherent scatter radar probing of GP-100 km atm. and ionosphere 87−4129
incoherent scatter radar use for ion-neutral collision freq. meas. 87−50557
INDI experiment for ion-neutral dynamics in high-latitude ionosphere 88−53348
injection locked magnetron, phase noise meas., Doppler weather radar system appl. 87−17621
instrumentation and meas. technology, conf., Boulder, CO, USA (March 1986) 86−57103
interferometer angle accuracy, variance estimator use 88−60270
internal solitons in Andaman Sea, radar signatures 86−32574
International Geoscience and Remote Sensing Symposium, Ann Arbor, MI, USA, (May 1987) 88−47
International Geoscience and Remote Sensing Symposium, Strasbourg, France (Aug. 1984) 85−60657
international weather-radar networking in Western Europe 88−53335
ionosphere, auroral radar spectra obtained with SABRE, statistical study 87−29933
ionosphere, electric field meas. with EISCAT 88−54734
ionosphere, temperature measurements with Chatanika and Millstone Hill radars, comparison with model predictions 88−36668
ionosphere Barker-coded multipulse expts. with incoherent scatt. radars 88−53340
ionosphere non-Maxwellian plasmas, model predictions and effect on EISCAT data 88−53354
ionosphere plasma density meas. by EISCAT and dynasonde, comparison 88−54735
ionospheric HF phased-array radar for high latitude work 85−38349
ionospheric HF probing at high latitudes 85−51430
ionospheric meas. of small scale plasma irregularities and flow, radiowave scintillation and EISCAT obs. 88−58855
ionospheric satellite orbit determ. 88−67309
IR signatures utilisation, considerations 87−13784
Italian summer hailstorm radar data, Bayesian discriminant analysis 86−6125
Jet Propulsion Laboratory multipolarisation SAR data workstation, hardware, software and data anal. 88−10524
Jindalee over-the-horizon backscatter HF radar, freq. management system 87−56244
Jindalee sky wave radar for synoptic scale meas. of ionospheric motions 88−66078

radar applications continued
JINDALEE skywave radar, remote sea-state sensing, frequency management support 86−65526
JINDALEE skywave radar for remote sensing 86−65525
Joint STARS, US military joint surveillance target attack radar system 88−35585
JPL aircraft SAR simultaneous L and C band imaging 88−5141
JRC subsurface radar, design *(Japanese)* 87−63040
Kaweah River basin, California, winter orographic cloud seeding radar charact. 87−71350
Kern River basin, California, cloud seeding and radar obs. 87−71349
Kotel'nikov's theorem, inverse problem of refraction, regularisation conditions determ. 88−66083
Ku-band FM-CW/pulse-compression radar for rain obs. on slant-path, development 88−15576
L-band 20 kW solid-state transmitter for ATC primary surveillance radar, config. and performance 88−41738
lake ice, microwave remote sensing 88−35580
land altimetry systems evaluation 87−57359
land surface cover remote sensing by radar, topographic effects 88−42632
Landsat cloud images and precipitation radar echoes *(Japanese)* 87−57366
large field-aligned vel., EISCAT obs. 88−53349
large-scale travelling ionosphere disturbances, meas. with HF backscattering sounder *(Chinese)* 88−74009
laser cloud mapper and its applications 87−41039
laser radar technology, conf., Quebec City, Que., Canada (June 1986) 87−36304
LIDAR, fluorescence, land and sea remote sensing appls. 87−41043
lidar atmospheric appls., ang. scatt. meas., aerosol backscatter to extinction coeffs. 88−4119
lidar in-space technology expt. from space shuttle 87−41041
lidar obs., upper stratospheric, of ozone vertical distrib. 87−4133
lightning, radar diagnostics, linearly and circularly polarised waves 88−10542
lightning flash forecasting from radar observations 86−55340
lightning storms intensity determ. using centimetre and metre-wave radar *(Russian)* 87−28675
line broadening on HF ocean surface radar 86−32556
lineaments detectability in radar images, effects of image scale and look-direction 85−43470
Loran-C time difference meas. correction *(Japanese)* 86−65035
low grazing angle sea scatter, Doppler peak spectral shift model 86−32553
lower thermosphere (92-50 km), wind structure and irregularities meas., foil clouds appl. 85−64745
lowland flooding, detect. with active microwave remote sensing 85−48488
M- and S-matrix weather-radar meas., anal. and appl. 87−56260
Magellan mission to Venus, radar-carrying spacecraft design 87−29876
Magellan SAR, system test and calibration 87−28714
Magellan SAR processor design 87−28716
Magellan SAR system, data rate, image quality and sensor subsystem charact. 87−28715
mapping of Earth topography, synthetic aperture radar method 86−69823
marginal ice zone, ice conc. estimates, comparison of active-passive microwave sensors 87−57387
marine, traffic survey system *(Japanese)* 88−28940
marine collision avoidance communications, cognitive processes 87−41011
marine pollution detection, discrimination between crude oil spills and monomolecular sea slicks by airborne remote sensors 87−63974
marine radar, sea wave observation 85−47589
marine radar for sea wave observation *(Japanese)* 85−53191
marine surface layer wind meas. with satellite radar scatterometer 86−50741
marine surface wind determ. from SAR and scatterometer data 86−32538
Markov-chain methods for radio meas. system analysis 88−35571
material refl. charact. meas., in-phase SAR method using UHF TV broadcasting waves *(Japanese)* 86−70211
mesocyclones and tornadic vortex signatures real-time automated detect. 87−71334
mesocyclonic shear automatic detection using Doppler radar 87−71325
mesopause, summer, background winds and waves struct., bistatic radar obs. 87−76855
mesopause region, high Schmidt numbers meas., 224 MHz incoherent backscatter obs. anal. 88−67465
mesopause region dynamics, MF/HF radar meas. 85−31989
mesopause region gravity waves over Adelaide, Australia, MF radar meas. 87−70134
mesosphere, obs. of solar-flare ionisation using coherent-scatter radar 85−31987
mesosphere (85-50 km) irregularities meas. at 69°N (Andenes, Norway) 86−59081
mesosphere during solar flare, simultaneous VHF and UHF radar obs. over Arecibo 88−53372
Mesosphere-Stratosphere-Troposphere radar obs., complementary code sidelobe props. 85−24928
mesospheric radar operating at 2.66 MHz 86−38951
mesospheric turbulent energy dissipation rate meas. by radar, review 86−25424
meteor and auroral drifts, simultaneous CW radio meas. 86−49701
meteor mass distribution index, determ. from radar obs. 85−3547
meteoroid head radar echo, role of mol. cluster ions 88−60252
meteorological and oceanographical measurements *(French)* 86−4726
meteorological appls. 87−29929
meteorological radar and rain forecasting with FRONTIERS radar system 86−32547
meteorological radar clutter suppressor, pluviometric meas. appl. *(French)* 86−50745
meteorological radar method, antenna sidelobe effects on multiple-parameter measurements 87−71300
meteorological radar methods using linear-circular polarisation *(Chinese)* 85−38336
meteorological radar system at space station 86−32532
meteorological radar theory, theory of excess bias measurement 87−71342
meteorological systems obs. with airborne and ground-based Doppler radars, uncertainties 88−60245
meteorology, history of radar techniques 86−43889
meteorology digital image processing and visual communications technology, conf., Cambridge, MA, USA (October 1987) 88−43561
meteorology for satellite communications and Earth sensing *(German)* 85−20134
meteors, radar obs. and detect. rates at different freq. 87−63098

radar applications continued
MF radar and rocket meas. of middle atm. wind field, comparison 88−41736
MF scattering in mesospheric and thermospheric turbulence at 2 MHz 88−40558
microburst producing storm in structural features, JAWS dual Doppler radars obs. Colorado 88−41735
microcomputer-based signal processor for short range FMradar 86−43894
microwave backscatter from ocean, uncertainty effect on satellite radar altimetry accuracy 86−32558
microwave backscattered signal from wet snow and moist soil, contrib. of vol. scatt. 88−15511
microwave bistatic intrusion detection sensors, spread spectrum technology appl. 86−4743
microwave echoes from sea surface, decorrelation time 85−64757
microwave obs. of sea ice and iceberg 87−49176
microwave pulse Doppler radar for wind meas. *(Japanese)* 87−56233
microwave radar sensing, modelling interactions between ocean and environment 87−35496
microwave remote sensing, cross-polarisation characts. 88−5145
microwave remote sensing images, digital processing techniques and multispectral classification 87−77899
microwave remote sensing of snow-covered sea ice 87−57389
microwave remote sensing techniques 88−61629
microwave sensors, satellite borne, Earth Observation appls. *(German)* 87−21777
middle atmosphere, winds and waves meas. by ground-based radars 85−31986
middle atmosphere dynamics measurements, first results from middle and upper atmosphere radar 87−29932
middle atmosphere wind meas., comparison between radar and rocket meas. 85−48474
military multitarget tracking system, intelligent 88−15691
military radar, develop. and use in World War II 87−76841
military radar for detecting the enemy in World War II 87−76842
military systems, tracking, guidance and control, conf., London, UK (Oct. 1986) 88−11610
Millimeter-Wave Polarimeter for remote sensing 88−5143
millimetre wave radar systems, technology and applications 86−69815
Mineral County area, Nevada, USA, structural geology and regional tectonics SIR-B and aeromagnetic anal. 88−74019
mining industry, bunker contents meas. 85−31099
mm radar waveband, aperture-synthesis, remote sensing of natural resources 88−10514
MM wave low range radar altimeter for helicopter appls. 88−36610
mm wave propagation in rain, fog, snow and humid atmos. 88−58844
MM wave radar reflectivity, correlation of measured snowpack physical parameters 88−15635
MM waves multiscattering effects, bistatic radar for rain meas., Monte Carlo simulation 88−52229
MM-wave imaging in remote sensing, active radar and passive radiometer techniques 88−68618
mm-wave imaging of moving targets 87−41014
mm-wave network analyser-based scatterometer for remote sensing 87−63932
MM-wave radar acquisition of battlefield targets, systems technology development 87−40993
MM-wave radar system trade-offs 88−60257
MM-wave sensor development, polarimetric background meas. 86−37919
MM-wave tracking and fire control radar, technological development 87−40994
Mode S and TCAS, secondary surveillance radar future 88−15638
Mode S data link appls. in western Europe 88−15639
Mode S monopulse secondary surveillance radar for ATC 88−16877
monogenic function range resolution radar 87−76828
monopulse SSR radar, data processing 88−15633
Monte-Carlo computer simulation for studying freq. stability problems *(Chinese)* 86−65023
moving target position, radar estimation using broadband signals 87−49920
MTI radar raingauge system, development and evaluation tests 85−47587
MTI weather radar, ground clutter rejection and precipitation echo meas. 85−47586
MU radar obs. of troposphere and lower stratosphere, backscattered VHF echo power, aspect sensitivity 87−19192
multi-baseline spaceborne interferometric SARs 88−10538
multi-parameter weather radar data colour graphics display system, knowledge based 88−61639
multicell storms, evol. from single Doppler radar obs. 88−68639
multidimensional signal design problem with constraints 88−3089
multifrequency continuous wave radar for ocean wave and turbulence meas. 85−64755
multifrequency microwave radar for ocean surface currents meas. 85−26912
multifrequency polarimetric SAR for remote sensing 87−63931
multiple SAR images and surface shape reconstruction 88−10539
multipolarization radar images for geologic mappingand vegetation discrimination 86−44765
multiradar tracking in the new ATC system atMazatlan (Mexico) area control center 86−17513
MV VHF radar for air and precipitation particle motions within cold front meas. 86−23976
nadir-looking radar for simultaneous ocean cross section and rainfall meas. 87−63969
naval radar design, modular approach 88−15616
navigation aids, radar reflector, radar beacons and transponders appl. 87−76883
navigation by computer processing of marine radarimages 86−11193
navigation system based on computer processing of marine radar images, sea trials 87−41000
navigation systems and ILS 87−70164
navigational safety system in Zurich airport *(German)* 86−70513
Netherlands post 1945 developments 85−58237
NEXRAD advanced weather radar network siting 87−41017
noise and clutter rejection in radars and imaging sensors, conf., Tokyo, Japan (Oct. 1984) 85−49266
nondivergent environmental winds, single Doppler vel. signature interpretation 87−71335
nowcasting, use of meteorological radars 88−15586
nowcasting data acquisition and handling system 88−16917
ocean, azimuth travelling surface waves, response of SAR imagery 88−10583
radar applications continued
ocean, directional-wave spectrum contamination, elimination from noise in elevation meas. 86−32554
ocean, radar meas. *(Russian)* 86−65549
ocean backscatter depression in C and Ku bands due to surface oil 87−4153
ocean current measurement method for coastal area, HF radar technique 86−6129
ocean currents, meas. by radar backscatter, error minimisation 85−26913
ocean directional wave spectra, approaches for comparing remote and in-situ meas. 87−71384
ocean gravity wave imaging by Seasat SAR, models 85−31098
ocean imaging, model for small to moderate incidence angles 87−28647
ocean internal wave currents, estimation from SAR and IR scatterometer imagery 87−57395
ocean internal wave detection by radar, real aperture method 85−26907
ocean internal wave surface patterns, airborne SAR imagery analysis 87−63973
ocean internal waves imaging, origin of intensity modulation in SAR images 86−44812
ocean nearshore tidal and residual circulation, fine struct., HF radar obs. 87−71381
ocean radar imaging model comparison with SARSEX data 88−30175
ocean radar remote sensing, normal incidence microwave backscatter theory 88−60210
ocean real time wave spectra prod. from SIR-C SAR 88−10576
ocean remote sensing, appl. of side-looking radar of Cosmos-1500 satellite 87−35491
ocean SAR imaging, model 88−10584
ocean short wavelength fetch-limited wind waves, directional spreading 87−71382
ocean surface, soliton model for HF scatt. 86−32562
ocean surface current meas. using multifrequency microwave radars 85−32014
ocean surface current meas. with backscattered HF radar 85−43486
ocean surface current measurement method, using interferometric radar method 87−71396
ocean surface object detection, problem of optimal discrimination in presence of receiver noise 87−50567
ocean surface radar scattering, calc. method including polarization effects 88−5191
ocean surface sensing 85−53183
ocean surface waves, SAR imaging 88−10585
ocean surface waves, SAR imaging, importance of motion related contributions 87−15075
Ocean Topography Experiment proposals 86−50755
ocean wave directional spectra, aircraft remote sensing 87−71385
ocean wave directional spectra, radar remote sensing technique 85−32004
ocean wave directional spectra sensing by SAR satellite method 85−32010
ocean wave directional spectrum meas. from HF radar Doppler spectra 86−59937
ocean wave Doppler radar remote sensing, airborne method for wave directions 87−57325
ocean wave height and wavelength determ. using SIR-B 88−10586
ocean wave imaging by SAR, inverse methods 85−64766
ocean wave imaging with ship radar, 2-D power spectra ambiguity removal method 85−32005
ocean wave meas. by shipboard radar, for wave height and dominant period 85−32011
ocean wave parameter remote sensing method, using dual-radar system 87−71368
ocean wave radar remote sensing, by 3 freq. microwave scatterometry 85−32013
ocean wave remote sensing, radar Bragg scatt., simulation using wire wave sensor 87−77885
ocean wave remote sensing by radar, method for nonlinear wave parameters 87−57324
ocean wave remote sensing by SLAR radar method 85−59490
ocean wave spectra, comparison of SIR-B and Seasat radar obs. with simultaneous buoy data 88−10534
ocean waves, airborne radar obs. rel. to new model for fetch-limited wave growth 88−10579
ocean waves, multilook images processing by SAR 87−56232
ocean waves, SAR image spectra, numerical simulation 87−15074
ocean waves, SAR images 3D formulation 87−4145
ocean waves, SAR imaging, effects of sea surface motion 85−64756
ocean waves, two-dimensional synthetic aperture radar imaging simulation 86−70534
ocean waves energy spectra estimation from SAR imagery 87−71386
ocean waves energy spectra estimation using radar ocean wave spectrometer 87−71387
ocean with swell, physical radar cross-section model 86−32560
oceanographic remote sensing by radar altimeter on satellite, instrument description and signal processing 88−5188
oceanographic remote sensing by radar altimetry, Poseidon radar system 88−5187
oceanography, Ocean Surface Current Radar (OSCR) vector meas. on inner continental shelf 87−50562
oil films on sea surface, radar remote sensing and ocean wave Marangoni effect 88−54748
oil films on sea surface, radar signatures 88−4086
oil pollution at sea, X-band SLAR radar observations and technique 88−4113
oil slick detection, appl. of side-looking airborne radar 87−63975
oil spill detection and analysis, results from radar and microwave radiometry 87−63976
oil spill detection and monitoring using AVHRR data 86−12200
oil spill detection using X-band side-locking airborne radar 86−12201
oilspill estimation with radar and microwave radiometry 86−56271
online non-invasive meas. in industry, conf., Manchester, England (Apr. 1983) 85−27973
S Ontario, rain and snow boundaries in storms, radar meas. 88−22199
optoelectronic fog detectors with continuous sinusoidal modulation, signal backscatter *(Polish)* 87−56273
overtaking maneuvers of vehicles, Doppler echoes *(German)* 88−35579
Pacific Weather Centre satellite facility 88−16920
passive telemetry, radar reflectors with controllable reflectivity appl., code detection method 85−47157
passive telemetry system using radar reflector with bidirectional communication capability *(Japanese)* 86−23986
peat bog props. eval. using ground probing radar *(Finnish)* 87−41007

radar applications continued
permittivity of smooth convex target, noncontact meas. using bistatic radar technique 85−4079
phase comparison monopulse side scan radar 85−63769
photogrammetry, digital monoplotting expt. from orbital radar imagery 87−50536
planets, radar observation, extended sources of cosmic radiation use 86−49758
point echo freq. determ. from coded meteorological radar reports 85−64743
polar ice sheets, radar echo sounding computer simulation 88−16924
polarization diversity radar in 3 to 35 GHz range for remote sensing of rain 85−7644
position meas. using laser beam tracking, expt. 88−47223
position-fixing needs of merchant ships, Portland Bill to Thames Estuary area assessment 88−29000
positioning systems *(Swedish)* 85−52420
precipitation associated with lightning, Doppler spectra transient changes 87−76848
precipitation intensity potential determ. from geostationary meteorological satellites and radar data 88−74968
precipitation velocity meas. using Doppler radar and ocean surface reflection 85−64737
precise range and range rate equipment, PRARE, aboard ESR-1, capabilities and performance assessment 87−63060
primary surveillance radar, hazardous weather conditions detection and recognition 86−17449
primary surveillance radar with weather channel 88−15625
proximity warning system for light aircraft, low power Doppler radar with stereo AF tone output 88−60256
Ps 6 micropulsation event, assoc. ionospheric plasma and electrical parameters determ. 88−53347
pulsed incoherent radar, multiple target reflected signal, spectral width determ. 86−30857
radarclinometry, mathematical theory and algorithm 87−21753
radargrammetry in a mountainous region 85−64696
RADARSAT for ocean and ice meas. for Canada 86−65547
radio acoustic sounding system, atmosphere wave front anal., temperature and wind profile 88−4098
radio acoustic sounding system, atmospheric wind and temp. meas., range limitation *(Japanese)* 87−42235
radio camera: imaging with large aberrant arrays 88−4116
radiosonde pressure sensor performance: evaluation using tracking radars 87−77859
rain attenuation meas. by dual-frequency radar, factors affecting accuracy 85−47585
rain backscatter obs. and remote sensing method 9 to 95 GHz 88−61637
rain cell model, propagation appls., expt. background 87−61376
rain cell size statistics derived from radar obs. 87−15048
rain intensity, real-time display using GOES-IR and Manually Digitized Radar data combination 88−35582
rain measurement, using radar in bistatic dual polarisation mode 85−9371
rain measurements, reduction of errors due to melting snow 87−71336
rain millimetre wave attenuation, cloud contrib. meas. using radar and radiometers 88−34298
rain patterns, automatic extraction, collection and description for modelling 87−63032
rain rate estimation from radar polarisation meas. 88−61642
rain-rate profile remote sensing by dual wavelength radar, algorithms 88−42648
raindrop size distrib. determ. from VHF Doppler radar spectra 87−63954
raindrop velocity, altitude adjustment for Doppler radar analysis 87−70116
rainfall data simulation method 86−30867
rainfall estimate using meteorological radar clutter rejection and calibration 86−32549
rainfall estimation, dual-polarization radar rel. to disdrometer meas. over Illinois 88−10541
rainfall rate measurement, depend. of spatial correl. function on elevation angle *(Japanese)* 88−45696
rainfall rate measurement by radar, effects of surface partial specular refl. *(Chinese)* 85−4454
rainfall type identification from weather radar data 88−74974
Rainsat precipitation analysis system in real-time use, evaluation 88−15594
Raman scattering spectroscopy lidar for atmospheric pollution monitoring, metrological support 86−44813
Ramp's new primary surveillance radar for ATC 85−43458
range selective intrusion detector, design 87−70135
RAVEN surveillance RPV, system design 88−15683
RDAS−a color-graphics-based system for radar data acquisition, display and analysis 88−47233
real time microwave imaging systems, traffic applications, movement recognition by echo signals *(German)* 86−70206
reflectivity image processing for tornado-related motion detection 85−37110
remote diagnostics in the MM waveband 88−4636
remote sensed holographic stereograms, production in Canada, production in Canada 88−30155
remote sensing, 215 GHz pulsed radar system design for backscatter meas. 88−60239
remote sensing, quasi-real time presentation of data 87−63993
remote sensing, results from SLAR mode of dual-mode radar with very low PRF 87−63904
remote sensing by imaging radar, polarimetry data volume reduction method 88−5148
remote sensing by radar, image processing using NEDIPS computer *(Japanese)* 88−52543
remote sensing by radar, X-band SAR and SIR-C radar systems 87−57355
remote sensing by radar imagery, detectability index for SAR image features 88−5150
remote sensing by SAR radar, new satellite instrumentation for land observation 87−57356
remote sensing by satellite radar, SAR systems future requirements 87−57354
remote sensing of Earth resources, ERS-1 satellite SAR radar 88−16896
remote sensing of Earth surface from satellite, Doppler FM rate theory 87−77833
remote sensing of land cover, accuracy improvement by image sectoring 85−26879
remote sensing of land surface with 35 GHz radar, use of fading model 88−61612
remote sensing of rain, spaceborne radar appl., sea clutter effect calculation 85−59501
radar applications continued
remote sensing of sea-surface conditions, HF narrow-beam radar systems appl. 86−65524
remote sensing radar backscatter measurement accuracies using digitalDoppler processors in spaceborn scatterometers 86−56247
remote sensing radar imagery, SAR data compression techniques 88−5149
remote sensing radar imagery relative calibration 86−60927
remote sounding signal spectral width meas. 86−38959
remote-sensing in mining−a review of techniques and applications 85−43499
RF test standards, automated, review of problems and solutions 88−60594
Rhine navigation, radio and radar appl. *(German)* 85−31122
river ice and frazil meas. 88−10581
SABRE radar observations in the auroral ionosphere 86−59078
salt deposit prospecting and mining, ultra short wave radar application *(German)* 87−61464
SAR appl. to sea surface, image norms 85−53189
SAR applications, slot arrays design 87−75612
SAR appls., conf., Frascati Italy (Sept. 1986) 87−43807
SAR characts. and anal. 88−9646
SAR data filtering for classification 88−16889
SAR data for agriculture and forestry 87−49182
SAR data products simulation 87−49178
SAR data thematic classification method 88−15566
sAR detection of ships and ship wakes 87−49180
SAR for Australian ERS-1 programme 87−77903
SAR for internal waves imaging 86−32575
SAR for Magellan mission to Venus 87−28713
SAR for oceanography 86−32572
SAR for oceanography, image form. 86−32573
SAR for sea ice imaging 85−64763
SAR for simple moving target imaging 85−63767
SAR for snow and glacier monitoring system 87−49177
SAR for soil moisture mapping 86−56255
SAR for surveying buried pipes and cables *(Japanese)* 88−60251
SAR image processing architecture 88−9920
SAR image reconstruction algorithm with complex phase correction *(Japanese)* 87−77891
SAR imagery, airborne, processing and analysis, segmentation technique 86−55379
SAR images, land use feature detection 87−49183
SAR images, textural information 86−44764
SAR images from satellites and aircraft, coherent scatt. effects 88−74023
SAR imaging, inversion problems 85−63748
SAR imaging of ocean tidal-current interactions, implications for bathymetry determ. 85−64697
SAR imaging of rough surfaces, speckle statistics depend. on backscatter cross-section fluctuations 88−16888
SAR imaging of surface currents and wave-current interactions, intensity modulations 86−32576
SAR interferometry for digital terrain models 88−10537
SAR ocean imagery, model and optimal algorithm 85−26909
SAR on-board image generation equipment for Earth Observation System missions 88−9650
SAR performance, ionosphere and troposphere effects 86−60934
SAR techniques for map making by side-looking airborne radar *(German)* 87−49160
SAR transmitter and receiver, satellite-borne, for Earth obs. 87−63048
SARSAT signals processing, basic concepts 87−56229
satellite altimeters, pulse train simulation and appls. 85−47588
satellite altimetric radar, wideband 150 μs optical delay line for ground testing 88−65180
satellite imagery, pattern anal., statistical model for localised natural features 85−53152
satellite radar altimetry methods, technique for radar pulse return averaging 87−63902
satellite radar remote sensing digital processing for geology 88−73212
satellite remote sensing, microwave scanning radiometry and SAR technology, image processing developments *(Japanese)* 88−10512
satellite tracking by radar, general relativity and the radar delay effect *(German)* 87−42220
SAW temperature sensor and remote reading system 88−60940
scanning lidar bathymeter for water depth measurement 87−41040
scattering coefficient, sensitivity to ocean winds 86−38954
scatterometer meas. of ocean winds, directional ambiguity analysis. 88−30157
sea, radar images, optical anal. using PRIZ modulator 87−56248
sea backscatter due to thin surface pollution, obs. using marine radar *(Japanese)* 85−24815
sea clutter, compound K-distribution model, significance and scope 88−15634
sea fog nowcasting system 88−15592
sea ice, backscattering cross-sections 86−56268
sea ice, Bayesian classification of surface-based ice-radar images 88−36673
sea ice, microwave remote sensing 88−35580
sea ice, SAR automated remote sensing 87−57388
sea ice, surface roughness meas. *(Japanese)* 87−57382
sea ice, thickness, radar meas., automated technique 88−61661
sea ice remote sensing by radar, theoretical model for microwave reflection 88−10577
sea ice surface-based marine radar imaging techniques 85−48487
sea ice thickness, radar meas. accuracy increase using cepstral anal. of reflected signals 86−25445
sea ice thickness meas., UHF band step frequency radar *(Japanese)* 88−35584
sea ice tracking by SAR using nested correlations 88−16925
sea level determ., EM bias of 10 GHz radar altimeter meas. 85−19125
sea level determ., EM bias of 36 GHz radar altimeter meas. 85−19124
sea state remote sensing by ground-wave radar 88−48373
sea state sensing using HF ground wave radar, appl. of 2-D digital signal processor 85−53194
sea surface, radar image spectrum anal. *(Russian)* 85−59492
sea surface backscatter, meas. at extremely low grazing angle by C-band Doppler radar 87−57399
sea surface height estimator using SAR complex imagery, comments and reply 85−26911
sea wave measurements using ship radar, directional wave spectrum determ. 87−57398
sea wave spectra determ., appl. of EM techniques 88−16931

radar applications continued
sea waves, along-track meas. in Barents Sea by side-looking airborne radar 85−59491
sea-ice dynamics from SAR images, automated analysis techniques 88−30173
Seasat microwave altimeter meas. of ocean gravity wave equilib.-range spectral behaviour 87−57404
Seasat SAR and Landsat TM data, merging process 87−63991
Seasat SAR imagery, methods for extracting sea ice data 87−15072
seashore monitoring system to be operated at oil stockpiling site *(Japanese)* 88−29236
second-order Doppler return from ocean surface 86−32559
secondary image products for radar imagery interpretation 87−57348
secondary surveillance radar for ATC 87−63895
secondary surveillance system, recent improvements *(Japanese)* 88−68604
sensors for inland vessel traffic obs. and control 88−15642
shear modelling and detection, first-passage problem, anal. 88−4118
ship detection by over-the-horizon radar, use of max. entropy spectral analysis 87−56246
ship radar imaging, by inverse range-Doppler technique 88−4085
ship-borne type wave height meter using microwave Doppler radar *(Japanese)* 85−48484
shipboard Doppler current profiler data merging with LORAN-C data, absolute current estimation 87−9024
shipborne integrated navigation system status and prospects 87−41142
shipborne X-band radar for ocean waves imaging 88−10582
shiphandling performance assessment, radar observations appl. *(Japanese)* 85−25915
short range imaging, appl. of multistatic radar principles 87−13771
short surface wave propag. on longer gravity waves 87−50563
Shuttle Imaging Radar-B, multi-angle data set evaluation 86−18546
Shuttle Imaging Radar-B, multiple incidence angle studies 86−17482
Shuttle Imaging Radar-B appl. to geology and vegetation remote sensing in Mineral County, NV, USA 88−67478
Shuttle Imaging Radar-C appls. 86−18547
Shuttle SAR imaging of directional wave spectra off Chile coast 86−32577
side-looking radar for remote sensing, imaging geometry and errors 87−76822
side-looking radar imagery from Cosmos-1500 satellite, digital processing 87−35483
simulation studies of tidal analysis using meteor echo returns 87−20600
simulator studies of crossing encounters in fog 86−55357
simulator training for inland waterway shipping 88−28941
SIR-B data collection expts. over Japan 88−53363
SIR-B data use for ocean wave spectra estimation 87−71389
SIR-B expts. in Japan, image reconstruction 88−52536
SIR-B expts. in Japan, rice crop truth data collection 88−53361
SIR-B expts. in Japan, sensor calibration at Akita Airport 88−53357
SIR-B expts. in Japan, sensor calibration at Kashima test site 88−53360
SIR-B expts. in Japan, sensor calibration at Sarobetsu wild-land test site 88−53358
SIR-B expts. in Japan, sensor calibration at Yamagawa test site 88−53359
SIR-B imagery, radiometric calibration anal. 88−74017
SIR-B images, image grey values depend. on topography 88−74022
SIR-B ocean-wave enhancement with fast Fourier transform techniques 87−71390
SIR-B oil pollution expt. in Japan 88−53366
SIR-B oil-pollution expt. in Japan 88−53362
SIR-B rice crop expt. in Japan 88−53365
SIR-B sensor calib. expt. in Japan 88−53364
SIR-B stereo-radargrammetry of Australia 88−74021
SIR-C sensor electronics 88−4107
SIR-C systems design for real time global ocean wave spectra 88−9651
SIRIO satellite and radar data for raindrop size estimation 87−62881
SIRIO SHF experiment, radar simulation and bistatic link, rain scatter interference results 87−62883
skywave sea-state radar techniques, auroral zone latitude, expt. investig. 86−65528
SLAR, side looking airborne radar, imagery segmentation guided by a priori knowledge 88−59336
snow, scattering properties, 10 to 90 GHz range 86−69825
snow buried object detection/recognition, 3D imaging X-band radar system using multi-freq. holography *(Japanese)* 88−35586
snow containing buried objects, holographic radar method for 3D imaging 88−68614
snow cover radar remote sensing, study of mm backscatt. props. 88−61614
snow cover remote sensing by mm-wave radar, SNOWMAN test program 88−61615
snow covered terrain radar remote sensing, 94 GHz radar obs. 88−61613
snowfall, rate and accumulation, radar obs. 85−59476
soil roughness measurements, results from multipolarisation aircraft SAR data 88−5126
solid-state radar systems for ATC 88−15628
SOUSY radar system for air turbulence detection *(German)* 85−52423
SOUSY VHF radar measurements in the lower and middle atmosphere 87−15050
Sousy VHF radars for atm. meas. *(German)* 88−74976
space debris tracking radar, multimetre wave, system study 88−28952
space radars optimisation for geological anal. in tropical environments 85−15401
space remote sensors for higher level robotic systems 87−29884
space-based bistatic radar for future tactical air surveillance 86−17507
space-based radar driven by near-millimeter free electron laser amplifiers 88−60253
space-based radar for the united nations' international satellite monitoring agency 85−42644
spaceborne distributed aperture-coherent array processing technology in remote sensing 87−63994
spaceborne imaging radar for the 1990s 87−71283
spaceborne imaging radar system for global resource monitoring, terrain models and SAR simulation 85−38331
Spaceborne Imaging Radar-C, hardware, subsystem and interfaces 88−10518
spaceborne imaging radars, Earth and planetary obs. 87−29921
spaceborne modest resolution radars for remote sensing 87−63929
spaceborne remote sensing, conf., Baltimore, USA (April 1986) 87−65036
spaceborne remote sensing systems (book) 87−22975
spaceborne SAR, Doppler parameter estimation 85−25929
Spain, PEP area cloud systems, radar characts. *(Russian)* 88−15579

radar applications continued
Spectrasat hybrid radar ocean wave spectrometer/SAR approach for wave monitoring 87−71392
Spectrasat radar ocean-wave spectrometer, design and operation 87−71393
Spectrasat radioaltimeter/SAR instrument design and processing of data 87−71394
Spectrasat system, design for ocean waves meas., assoc. communications and ground support 87−71197
Sperry Ltd. radar predicted areas of danger display for collision avoidance 88−28942
sporadic E layer, acoustic shock passage, radio wave diffraction 86−68749
sporadic-E layer, incoherent scatter radar studies with 300 m resolution 88−53341
squall line multiple Doppler anal. 88−42651
STAR-1 SAR data and digital terrain mapping 87−63928
stereophotogrammetry using combined SIR-B and Landsat TM images 88−74955
storm cells, active-passive radar obs. *(Russian)* 88−68630
storms, radar reflectivity and surface rainfall correlation 87−77867
strategic missile defense, decoy discrimination using ground-based high-power microwaves 88−54823
stripmap SAR digital processing and absolute radar calibration 86−4737
submarine relief features on radar image and Skylab optical photograph, comparison 88−60242
submillimeter gyrotron for space based radar 88−60254
subsurface radar, cepstrum signal processing problems 86−23070
subsurface radar, introduction 88−67467
Surface Contour Radar, wave meas. capabilities, comparison with the Airborne Oceanographic Lidar 87−71388
Surface Contour Radar for wave meas., capabilities comparison with Airborne Oceanographic Lidar 87−71388
Surface Contour Radar use for ocean directional wave spectra 86−12179
surface rainfall measurement, use of radar data adjusted by sparse gauge obs. 86−50744
surface roughness models of radar backscatter 87−63995
surveillance and air defense radars, signal processing techniques, review 86−11168
surveillance of autobahn toll sticker in Switzerland 86−4745
surveillance-based automated air-traffic control radar system 87−21743
synthetic aperture imaging airborne radar 86−17509
synthetic aperture radar (SAR) for RPVs 88−15682
Syowa Station, Antarctica, 50 MHz Doppler radar for auroral ionosphere obs. *(Japanese)* 86−4728
Syowa Station 50 MHz Doppler radar 86−59933
t trees, radar backscatter characteristics at 215 GHz 88−61610
tactical multifunction rotating electronically scanned radar (RESR) for air surveillance 85−47580
target identification by means of radar 85−42643
TERPROM radionavigation system for aircraft *(Dutch)* 86−43912
terrain backscattering at nadir 86−44763
terrain cover identification using optimum polarimetric classifier 88−48315
terrain height meas. by SAR with interferometer 86−50733
terrain mapping, radar image processing techniques 85−64698
terrain mapping with MMW radar 87−49201
three-body scattering produces precipitation signature of special diagnostic value 87−34660
thundercloud-warning system, development *(Japanese)* 88−22198
thunderstorm nowcasting using Doppler radar and soundings 88−15589
thunderstorms forecasting and detection using 50 mm Doppler radar 88−15588
tides in middle atmosphere, MST radar detection 86−25425
topographic mapping with SIR-B radar imagery 88−30152
topographic photogrammetric mapping using SIR-A, Large Format Camera and Metric Camera 88−74959
topography mapping from SIR-B stereo radar images 87−63927
tornadic thunderstorm, press. and buoyancy fields determ. from Doppler radar data 85−48479
traffic appls. of fast millimeter wave imaging 85−63749
traffic information detection, FM CW radar, 24 GHz passive microwave reflector system 85−20269
transmission lines, radar, electro-optical visual methods of studying bird flight 86−6387
triple-Doppler radar use for convective storms obs. 87−71322
tropical convective clouds, radar echo zones vertical profiles *(Russian)* 87−57364
Tropical Rainfall Measuring Mission (TRMM) 88−30168
tropical upper troposphere-lower stratosphere vertical vel., Arecibo 430 MHz radar meas. 88−74973
troposphere temperature profile determ. by radar-acoustic sounding 85−43478
turbulence profile determ. method for atmospheric boundary layer 87−71345
TWS, track-while-scan, angular accuracy anal. 88−15676
UK National Scale Modelling Centre, backscatter information, sub-MM wave techniques use 88−28984
ultrashort wave waveguide propagation over sea, conditions detection by lidar 86−48584
underground cable fault location using HV radar with thumping equipment 88−75185
underground mapping of utility lines using impulse radar 88−67470
underground object imaging, resolution improvement and clutter reduction 86−49732
underground object imaging system with computerized reconstruction 87−28688
underground obstacle detection and mapping, computerised radar system 85−59792
underground pipe detection by synthetic aperture techniques 87−3233
underground pulse-radar imaging, synthetic aperture approach 85−52435
underground radar, polarisation diversity method for object imaging and pipe detection 85−52436
underground radar system, water pipe leak detection appl. *(Japanese)* 88−9636
undersnow radar using microwave holography 86−69824
unmanned aircraft, potential in EW for reconnaissance, jamming and weaponry 87−28672
Uno-Takamatsu sea area radar watch in dense fog *(Japanese)* 87−34656
upper atmosphere turbulence, high-resolution obs. using MU radar 86−25426
Valensole skywave radar appl., North Sea meteorological fronts detection 86−65510

radar applications continued
vegetation cover of land surface, SAR imaging method 88−42633
vegetation remote sensing, C-band radar for helicopter 88−42634
vegetation remote sensing by 35 GHz bistatic radar, scatt. pattern 88−61611
vegetation remote sensing with C-band radar on helicopter 88−42635
vehicle licence plate identification using radar technology *(Japanese)* 88−74026
vehicular radar sensors for improved safety during poor visibility 88−69877
Venera 15 and 16 side scanning radars, data processing procedures 86−29997
Venus, ground-based high resolution radar obs. 88−67502
Venus, radar imaging and nomenclature 88−15582
Venus, radar survey methods used by Venera spacecraft 86−30925
Venus, volcanic features anal. 88−15581
Venus Radar Mapper, implications of Gestalt formation in stereo-radargrammetry 87−3214
Venus Radar Mapper, theory of radarclinometry method for topography 86−37969
vertical air vels. from VHF Doppler radar spectra 87−63954
vertical SODAR for planetary boundary layer acoustic sounding *(German)* 87−3252
vertical wind measurement with Poker Flat and Chatanika radars 86−6105
vHE radar to make terrain elevation models through tropical jungle 88−60264
VHF, vertical incidence, backscatter power range resolution dependence 86−4727
VHF clear-air radar meas. of anisotropic permittivity structure 86−22685
VHF Doppler radar backscatter, diurnal var. over Colorado and Alaska 86−23981
VHF Doppler radar spectra use for vertical air vel. and drop size distrib. 87−77856
VHF Doppler radar three and four beam methods for atm. momentum flux determ. 88−54736
VHF mesosphere-stratosphere-troposphere radar, appl. to cloud physics 85−53177
VHF radar for altitude dependence of vertical velocity spectra observations 86−23980
VHF radar measurement of atm. parameters in Taiwan during Typhoon Wayne 88−60243
volcanic aerosols, skywave radar detectability 85−25936
Volga River Basin, USSR, convective cloud seeding experiment, cloud suitability, radar meas. *(Russian)* 88−15578
waterway navigation by polarimetric radar 88−9679
wave height meas. using shipborne microwave Doppler radar 85−53185
wave meas. at sea using radar *(German)* 87−77888
weather Doppler radar, ambiguity resolution methods 85−59472
weather Doppler radar for snowfall obs. *(Japanese)* 87−63039
weather echo signal processing, coherent integration and Doppler spectral processing 88−16912
weather radar, hazardous weather detection with primary surveillance radar 86−17449
weather radar for air terminal navigation, traffic control and safety 86−17504
weather radar receiver output signals anal. mean power estimation with recursive digital filter *(Czech)* 87−47640
weather radar reflectivity images, spatial and temporal anal. 87−62256
weather radar systems, sensitivity 87−76846
Weddell Sea, midwinter ice thickness meas. 88−30178
West Africa, tropical squall line, thermodynamic and kinematic struct., dual Doppler radar obs. 87−71353
wind, comparison of meas. by radar and Navaid windfinding systems 87−71340
wind Doppler radar velocities de-aliasing 88−61646
wind in mesosphere and thermosphere, meteor radar system 88−41743
wind measurement by Doppler radar, thin scatt. layer influences 88−41747
wind measurement by HF groundwave radar, COSRAD facility for seebreezes 86−44794
wind measurement by MST/ST radar, errors due to finite range vol. effect 88−41746
wind measurement by MST/ST radar, finite range volume effect errors 88−41745
wind over oceans, NASA radar scatterometer meas. system 85−31996
wind profiler measurements, precision and accuracy 88−61641
wind profiling by radar, radar system at Colorado, USA 85−26897
wind profiling with UHF Doppler radars 88−5178
wind remote sensing by K_u band backscatter from sea surface 88−68617
wind remote sensing by radar, wind estimation algorithms 88−42649
wind remote sensing by radar on satellite, instrumentation on Columbus polar orbit satellite 88−5172
wind shear detection at low altitude using Doppler radar 87−71347
wind shear recognition using Doppler radar 87−63949
wind velocity measurement by radar spaced antenna technique, statistical errors 88−23179
wind vertical vel. obs. by Flatland radar, Illinois 88−47201
wind waves influence on radar reflection by sea surface 88−72546
winds in upper middle atmosphere, MF Doppler and spaced antenna radar meas. 88−36664
windspeed gradient meas. using low PRF radar 88−54745
Winter Marginal Ice Zone Expt. 1987 operations 88−48340
Worldwide Atmospheric Gravity-wave Study (WAGS) 88−53345
X-band optic links using high-speed delay lines, eval. for radar test set appls. 88−73956
X-band radar, ground clutter suppression 87−76839
X-band synthetic aperture radar, Shuttle borne appls. 88−28953
X-SAR system, performance sensitivity 88−10519
CO_2 laser radars, optical resonator design 87−41036
$LiNbO_3$ 3 GHz bandwidth Bragg cells 88−51613
NO_2-mapping using laser-radar techniques 88−47224

radar clutter
active phased array radar, dynamic range and sensitivity requirements 88−15681
adaptive airborne MTI radar receiver, auxiliary channel approach 87−56226
adaptive clutter power elimination, maximum entropy method appl. 85−46831
adaptive clutter processing, main tap position effects 86−17460
adaptive moving target indicators, clutter suppression perform. of adaptive filtering algorithms 87−28662

radar clutter continued
adaptive MTI based on AR map, detection performance 88−15659
adaptive MTIs, target signal preservation using adaption delay techniques 88−15660
adaptive noise canceller for radar signal using microprocessor 88−28936
adaptive optical target detection using correlatedimages 85−58170
adaptive polarisation filtering 86−17502
adaptive radar clutter suppression, model-order selection algorithms 88−67452
adaptive radar clutter suppression schemes 85−14355
adaptive radar clutter suppression schemes using multisegment max. entropy method *(Japanese)* 87−56210
adaptive radar clutter suppression using the adaptive least-squares lattice algorithm 87−49146
adaptive radar detection 85−63731
adaptive signal processing and mapping in Doppler radar 88−72978
adaptive structured optimum receiver for targetdetection in the presence of clutter 86−30849
adaptive suppression using distributed digital processing architecture 85−47595
adaptive whitening, radiometric detection in clutter 85−46830
air traffic control radar clutter suppression 85−48451
airborne pulse Doppler radar, CFAR analysis 88−67460
airborne pulse doppler radar, digitiser requirements 88−12468
airborne pulse-Doppler radar clutter, efficient closed-form computation 86−17438
analysis in IR background, filtered and unfiltered states determ. 88−21316
angels in Finland, clear atmosphere dynamics *(Finnish)* 88−27508
anomalous clutter interference in relation to inversion layers 85−52404
AR models, clutter cancellation limits 85−46828
arched-clutter phenomenon anal. *(Chinese)* 86−4696
Arecibo 430 MHz radar meas. of tropical upper troposphere-lower stratosphere vertical vel., clutter effects 88−74973
ATC radar, moving target detector with weather channel 87−56257
backscatter measurement using mobile spectrometer 85−31092
backscatter tests 87−8341
birds and insects as radar targets, review 85−47553
bistatic-radar receiver, clutter spectrum simulation *(Japanese)* 86−17428
bistatic/multistatic radar bibliography 87−13772
CA-CFAR radar processor in presence of compound Gaussian clutter, performance anal. 88−60209
CAT radar echoes, spectral parameter estimation in presence of fading clutter 85−52401
cell-averaging constant false alarm rate design, for window spanning clutter fields 86−49707
CFAR, adaptive design, sea clutter anal. 85−47583
CFAR detection techniques 87−8353
CFAR operation, characterisation 85−63728
CFAR problems in a non-Gaussian clutter environment, threshold estimation technique 86−30851
CFAR problems in Weibull clutter 85−37092
CFAR-processor, ordered statistic based 86−17456
clutter noise, signal processing for radar signals detection 85−46829
clutter suppression and target detection 85−46824
coherent radar detection in log-normal clutter 86−23945
coherent Weibull clutter, signal detection 87−63010
coherent Weibull clutter simulation 88−53332
coherent-pulsed surveillance radars, digital signal processing techniques *(Spanish)* 85−52421
compact FSK signals for radar clutter rejection 85−47560
complete lattice-ladder scheme for detecting andestimating radar signals in clutter 86−30873
composite terrain, amplitude distribution and K-distribution 85−14329
conference, New York, NY, USA (April 1988) 88−55823
constant false alarm rate design concept, heterogeneous clutter operation 87−20594
constant false-alarm rate processor, ordered statistics based, performance in log-normal clutter 88−41717
constant heading trajectories, maximum likelihood estimation 88−15555
constant track false alarm rate, maintenance 88−15667
correlated *K*-distributed clutter models 86−30852
correlated clutter environments, simulation 88−15599
correlated clutter textures in coherent images, noise models 88−73193
correlated targets radar detection 87−34633
CW radar systems, frequency jump modulation technique for near clutter reduction *(German)* 87−20597
detection algorithm of optical targets in clutter 87−47684
detection performance of Rayleigh fluctuating targets in correlated Gaussian clutter plus noise 88−53326
detection prediction in K-distributed sea clutter and thermal noise 87−49133
detection prediction in sea clutter using compound K-distrib. model 86−17422
detection theory in coherent Weibull clutter 87−40979
detection thresholds for clutter backgrounds 85−63730
detection thresholds for tracking in clutter, connection between estimation and signal processing 85−42629
digital MTI system using weighted pulse trains, S/N ratio *(Korean)* 86−4701
discrimination of radar clutter by texture analysis 86−49704
displaced phase centre antenna clutter suppression in space-based radar applications 88−15550
distributed sensor networks, joint probabilistic data association 87−12948
distributed target tracking 88−67480
distributed target tracking in cluttered environment 88−53331
Doppler and elevation estimation in near field experiments 87−63029
Doppler weather radars siting to shield ground targets 85−58202
Doppler wind fields meas. with fast scanning radars, signal processing techniques 88−61643
Doppler-ambiguous radar, bimodal clutter cancellation 86−17448
double clutter identification using extended Levinson recursion for ARMA models 86−48918
dual polarisation radar design for clutter analysis 85−58187
dual polarisation scattering matrix radar rain backscatter meas. eval. in X and Q bands 87−47215
dual position radar for polarimetric clutter suppression 86−49717
dual-frequency scattering from ocean, clutter background limitations removal 85−64758
echoes, log-normal distrib., fixed target detection 86−17420
EM inverse scattering problem, current state-of-the-art 87−47162

radar clutter continued
exogeneous modelling of non-Gaussian clutter 87−70117
experimental clutter model, simulation and eval. 87−63030
extended lattice predictor, simultaneous cancellation of two clutters 85−46823
false alarm rate probability, numerically efficient calc. 88−28925
fixed target detection by radar in K-distributed sea-clutter *(Portuguese)* 87−75952
FLIR imaging, scale invariant target detection using optical processor 88−47227
FM-CW bistatic radar imaging system for shallow stratum profiles, surface clutter rejection methods 85−52434
greater-of and censored greater-of detectors, multiple target environments, performance 88−52415
ground clutter, optimum discrete two, three and four state waveforms 88−4093
ground clutter, propag. effects 86−55349
ground clutter meas. in large bistatic angle airborne radar system, calibration considerations 88−60231
ground clutter rejection and calibrating procedure forrainfall estimate in meteorological radar data 86−32549
ground clutter simulation, flight test verifications 86−30871
group delay processing of radar signals 87−27443
HF ground-wave radar, progress in ship tracking 88−15523
HF radar sea echoes, Bragg coherence 87−20595
high PRF clutter suppression using recursive and nonrecursive MTI filters 88−67441
high PRF pulse-Doppler radar, range ambiguity resolution 86−17441
iceberg detection system using ground wave Doppler radar, software model and expt. study 87−28655
icebergs, radar cross sections 88−15651
ICERAD high resolution pulse Doppler radar for small target detection in sea clutter 88−15650
IF clutter signal generator 88−15552
imaging array radar, adaptive image processing to suppress noise and clutter 85−47605
imaging sensor jitter compensation for clutter rejection 88−22179
importance sampling simulations, optimisation, radar clutter appl. 88−27908
incoherent scatter autocorrelation function meas., klystron radars full average power appl. 87−20601
injection locked magnetron, phase noise meas., Doppler weather radar system appl. 87−17621
interferometer angle accuracy, variance estimator use 88−60270
inversion method to extract phase information from SAR 88−47197
IR detector signal-to-background clutter ratio with two-dimensional spatial filtering 88−21314
IR tracking system performance assessment, using dynamic simulator 88−47228
joint probabilistic data association in distributedsensor networks 86−4704
JPDAM algorithm simplification 87−8340
land clutter charact., anal. and suppression *(Chinese)* 87−63008
land clutter models for radar design and analysis 85−47552
least squares ladder algorithm for automatic signal processing, performance 85−47590
lidar design, false alarm and detection probability factors 88−28983
lidar design, false alarm and detection probability 88−74041
linear prediction for clutter cancellation 88−67443
linear prediction method, clutter suppression 85−46827
log-lattice detector for radar targets in seaclutter 86−49728
log-normal and Weibull-distributed sea clutter 88−35577
log-normal clutter, coherent model 87−40981
log-normal clutter cancellation 87−28638
log-T detector in K-distributed clutter 87−49142
long range radar, eclipsing effects with high duty factor waveforms 86−17437
long-range radar, eclipsing effects with high-duty factor waveforms 86−17421
LPI techniques and implementations for radar systems 88−60212
macroscopic spatial-temporal correlation properties ofradar clutter 86−55346
maneuvering target tracking in clutter 85−14336
maneuvering target tracking in clutter, algorithm 85−14332
marine radars, subclutter visibility 86−37920
maritime surveillance radars, fast-scan processing for sea clutter rejection 85−47594
Markov random field structs. for clutter modelling 88−15537
measurement using I-band radar system 87−49175
meteorological radar clutter suppressor, pluviometric meas. appl. *(French)* 86−50745
mm wave clutter modeling, site-dependent for hardware-in-the-loop simulation 88−15608
MM-wave airborne radar stationary ground targets detection 86−37937
mm-wave airborne radars for non-moving target detection 86−55365
MM-wave radar system trade-offs 88−60257
MMW land clutter model update 88−15536
MMW radar reflectivity overview 88−60232
model-free clutter description based on coherency matrix formulation 85−14348
monopulse FMCW radar sensor adaptive MTI simulation 86−55337
moving target indicator filtering, optimum vel. response functions 85−3491
MTI filter design using adaptive techniques 88−74033
MTI improvement factor, statistical distribution 86−17457
MTI pseudoregistration approach for IR background clutter rejection 88−22180
MTI radar, detection of slowly moving targets in clutter 85−47601
MTI radar raingauge system, development and evaluation tests 85−47587
MTI radars, use of delay-line cancelers for clutter reduction 87−63063
MTI target visibility 86−49712
MTI weather radar, ground clutter rejection and precipitation echo meas. 85−47586
multiobject tracking, random point process approach 88−9633
multipath fadings over sea at 94 GHz 87−70118
multiplier-free filters for ground clutter suppression 86−20719
multiscatter targets detection in K-distributed clutter 85−25916
multisensor algorithms for tracking in presence of clutter *(French)* 88−22191
multisensor tracking of a maneuvering target in clutter 87−76834
multispectral sensors, target acquisition 87−56267
multistatic radar, overview of detection theory 87−13749

radar clutter continued
multitarget trackers, state estimation using variable correlation gates 87−56214
narrow band sources, detection and tracking 85−3495
noise and clutter rejection, non-cooperative game theory problem 85−47591
noise and clutter rejection in radars and imaging sensors, conf., Tokyo, Japan (Oct. 1984) 85−49266
noise properties of generators, origins, cures and meas. 85−52399
non-Rayleigh clutter, asymptotically optimum radar detectors 88−15506
noncoherent ground clutter characterisation 85−52397
optimisation of signal/cluster ratio using polarisation diversity 88−35572

PEF in non-Gaussian clutter, performance 85−46826
planar array 3D radar from Thomson CSF 87−49169
polarimetric clutter suppression, optimum polarisation concept 86−69811
polarimetric radar digital simulation 85−20252
polarimetric target model with backscattered EH fields, real-time, statistical approach 88−46041
polarisation and statistical properties 85−52392
polarisation diversity in radars 86−43887
polarisation diversity techniques for clutter cancellation 85−47593
polarisation information utilisation in primary radar 85−58183
polarisation purity assessment in meas. and imaging of distributed clutter 85−63743
polarisation vector signal processing for clutter suppression 85−63744
predictive adaptive moving target indicator 86−30866
primary surveillance radar, hazardous weather conditions detection and recognition 86−17449
probability of radar target detection with MTD processor in exponentially and log normally distributed clutter 87−49143
pulse Doppler radar, block adaptive approach for clutter suppression 86−17434
pulse radar, adaptive clutter cancellation, comparison of optimum and linear prediction techniques 87−56200
quadriphase code, radar pulse compression signal 88−53320
radar, clutter residuals, modelling and estimation 85−37090
radar pulse compression waveforms 88−60226
rain clutter cancellation using circular polarisation 86−17429
rain clutter in relation to rain attenuation 85−52402
range ambiguous radar, false alarm rate implications 88−15675
RAT 31-SL, multiple beam radar for 3D long range detection 87−49167
receiver cross-modulation influence on HF radar dynamic range 88−22197
rejection, impact of strong scintillation on space-based radar design 85−51440
rejection, nonlinear processing scheme 85−46832
rejection at medium and long range using within-pulse Doppler discrimination 86−17436
remote sensing of rain, spaceborne radar appl., sea clutter effect calculation 85−59501
retrospective detection algorithm for enhanced target acquisition in clutter and interference environments 85−3493
RFI presence, moving target indication 86−17458
robustness of a modified greatest-of CFAR detector 87−34632
S-band radar, observations on long range clutter 85−52403
S-band track while scan radar system, development of analogue MTI system 85−47602
SAR clutter image interpretation 85−47563
SAR image segmentation, data reduction 88−15623
SAR imagery, predictive compression methods appl. 87−33792
SAR images, homogeneous and nonhomogeneous, spectral analysis 88−15509
SAR images of moving targets 87−70111
SAR processing, prior knowledge 86−37927
SAR with high resolution moving target imaging 87−20621
scan to scan adaptive MTI for clutter suppression 85−47598
scatterometer with mm-wave network analyzer 88−28938
sea clutter, asymptotically optimum radar detect. 86−30874
sea clutter, compound K-distribution model, significance and scope 88−15634
sea clutter, K-distributed, spatial correlation 87−76825
sea clutter, meas. and modelling using envelope statistics 86−11149
sea clutter, non-Gaussian, simulation by time series anal. 88−74006
sea clutter, research on polarisation properties 85−52405
sea clutter meas. at Alexandria 85−20271
sea clutter signals suppression by pattern identification method *(Japanese)* 88−74001
sea clutter-type noise, nonlinear metallic targets detection, simulation study 85−46834
sea ice and ships detection 85−47584
sea return simulation model 88−15553
sea surface pollution effect 85−47557
search radars, trade-off between Durbin-Levinson and Burg algorithms for clutter cancellation 85−58179
self-clutter cancellation and ambiguity props. of subcomplementary sequences, comments with reply 86−43882
semi-active radar homing head, clutter spectrum calc. 85−52394
semi-active radar homing missile, clutter effect on guidance 86−59927
sensitive UHF radar at Arecibo, Puerto Rico, clutter properties in middle atmosphere obs. 85−52400
shipborne X-band radar for ocean waves imaging 88−10582
sidelobe cancellation, BYSON research radar 88−15662
signal filtering/processing, computer simulation 86−30868
signal processing, clutter sensors evolution 85−52408
signal processing, review 85−52384
signal processors, targets and disturbances models 86−17443
simulation in radar clutter suppression *(Japanese)* 86−11166
simulation of clutter return for an airborne pulse Doppler radar 88−15600
simulation of correlated K-distributed random clutter 86−43886
simulation using digital quadrature modulator 88−15607
sky wave and ground wave systems 87−76861
space-based radar, main-beam clutter spectrum narrowing using high-aspect-ratio antenna 88−28923
space-based radar clutter cancellation techniques 85−8460
space-link stimulation of airborne multimode radars 87−20606
spatial processing, signal detection in clutter, potential effectiveness 85−36275
spectra meas., results 85−52393
spectral characteristics of radar echoes from aircraft-dispensed chaff 85−37102
spectral methods of radar detection in clutter *(Spanish)* 87−13755

frequency source for use in agile radars based on SAW oscillator 86−11156
frequency-agile coaxial magnetron with linear-motor-driven tuning element 85−55391
frequency-agile radar magnetron performance improvement by tuning-fork design 87−3228
gain of a standard radar IF amplifier 88−4103
gate array integrated circuits, signal-processing engine 86−17481
General Electric A/VLSI programmable signal processor, avionic, telecommunication and military appls. *(Spanish)* 87−73493
gimbal design, 2-axis, for tactical aircraft and missile systems 85−37104
grid pulsed TWT, 9 GHz 50 kW, for radar appls. *(Japanese)* 86−58211
ground speed sensors, design and performance, agricultural equipment and vehicular appls. 86−5304
gyroklystron amplifier for radar facility, 34.5 GHz, 400 kW 86−47241
H2S development, historical account 86−11191
harbour surveillance radar echoes, image processing, vessel gross tonnage estimation *(Japanese)* 87−56234
helix TWTs, high peak power, with wide bandwidth 88−71285
high frequency quartz crystal oscillators undervibration 86−35955
high peak power transistors for phased-array radars inL band and S band 86−53062
high performance ICs impact for fire-control radar *(French)* 86−59950
high speed opto-isolator for radar applications 87−46703
high-resolution instrumentation radar for X-band 87−49158
highly linearised mm-wave voltage controlled oscillator for FMCW radar applications 88−56971
identification by hostile electronic support measures system, prevention 87−70130
IF clutter signal generator 88−15552
image rectification using interferometry 87−57349
interference attenuator, realisation and test results *(Polish)* 85−37105
interference-signal compensator, quantisation effect 86−37943
interrupted signals detection, using RC phase-shift type synchronous oscillators 87−76868
Ku-band low noise airborne synthesizer for frequency agile radar, design and performance characts. 88−18960
Ku-band radar, performance in environmental rain 87−8361
L-band radar module, 2 kW design using 550 W quad building blocks 86−11169
L-band radar transceiver, MMIC amplifiers and phase shifter design 86−35116
limited aperture multimode radar, high resolution signal processor 87−20622
LNAs, test set for improved interpulse performance 85−25932
low-cost target detecting device for altimetry and fusing 86−11195
magnetostatic reflective array filter status 86−22028
magnetron oscillators, multiple-freq. mode *(Russian)* 87−17617
management of technological developments, w.r.t. international market place 87−28678
marine radar, echo enhancement by new display techniques 85−47592
MATE compatible electro-optic tester 88−35845
measuring receiver set for 40 to 60 GHz *(German)* 85−31428
Meatgrinder inductive storage and transfer circuits, theory, expts., appls. 88−43312
microcomputer hardware for radar signal processing withdistributed architecture 86−16489
microprocessor-based systems for signal processing in radio and radar *(German)* 86−43712
microstrip integrated circuit transceivers for 35, 60 and 94 GHz 87−41015
microwave, H2Ss development, Marks IV and VI, historical account 86−11192
microwave Doppler effects for semi-active air-to-air missile seekers 86−69832
microwave radar and communications equipment, power flux prediction and meas. 85−15011
microwave transmit/receive unit based switch for handicapped people 86−53061
military MM wave radar development 87−3230
miss-distance indicator, development 85−42645
Mitsubishi Signal Processor with dynamically reconfigurable computation network, SAR appls. 85−52429
MM-sensors using fin line and E-plane technologies, design and radar appls. 86−27574
mm-wave guidance systems testing, ATE techniques for high-volume production 86−43903
MM-wave integrated monopulse radar demonstrator, 94 GHz 87−76865
MM-wave integrated radar transceiver, appl. of low cost packaging techniques FM CW 86−52290
MM-wave low-range radar altimeter for helicopter appls., expt. results 88−15670
MM-wave monolithic ICs, technological developments and appls. *(German)* 88−32423
MM-wave monolithic integration technology for communications and radar appls. *(German)* 88−56939
MM-wave transducers and radiometric sensors technical advances 86−37940

radar equipment continued
MMIC distrib, amplifier for phased array transmit/receive module, optical gain control/PCM 88−71117
MMIC modules for array radars, developments 87−63041
MMIC technology for EW system design, developments 87−37560
MMIC transmit/receive modules for phase array radar appls., technological developments 88−9641
MMIC-based T/R modules, optical control and interconnects using fibre optics 88−50375
Mode S monopulse secondary radar realisation and achievements 87−56256
moving target detector, hardware implementation 86−30879
moving window integrator, detection performance 87−76836
MTI filter design using adaptive techniques 88−74033
MTI filters, staggered PRF, with complex coeffs., anal. and design 85−47600
MTI radar, detection of slowly moving targets in clutter 85−47601
multifunction optical fibre communication system for connection between a radar head and display area 85−31021
multimode airborne radar sensor and display processing 87−42094
multimode radar for tactical fighter appl., design and test results 85−8478
multimode radar performance evaluation, air-to-air and air-to-surface capabilities 87−76869
multiplier-free filters for ground clutter suppression 86−20719
navigation aids, radar reflector, radar beacons and transponders appl. 87−76883
nonlinear chirp radar waveforms with improved tolerance to Doppler shifts 87−53872
obstacle avoidance for helicopters, mm-wave solution 86−6032
oceanographic surface current meas., CODAR intercomparison, Delaware Bay (1984) 87−9011
optical phase locked loop using laser diodes, for feeding phase array radars 85−41542
passive telemetry, radar reflectors with controllable reflectivity appl., code detection method 85−47157
phase correlator reduces MM-wave radar cost 86−55367
phased array radars, miniature hybrid ICs vs. MMICs 87−49173
ported coax intrusion sensor, perimeter line sensor for guided radar appls. 85−25927
postintegration of radar images *(French)* 87−13790
precise range and range rate equipment, PRARE, aboard ESR-1, capabilities and performance assessment 87−63060
programmable doppler filter-bank using charge-coupled devices *(Chinese)* 87−40990
pulse compressor, digital matched filter design for real-time signal processing 86−59945
pulsed radar, imaging radar, and synthetic aperture radar *(Japanese)* 86−4719
pulsed radar signals, closed-loop AGC system for processing transients 86−69814
PWB assembly development, thermal coeff. of expansion tailored, for military appls. 87−37663
radar dish power density, predictive model for range-dependence 85−15012
radar echo simulator based on μP TMS320 86−27387
radar scatterometers, appl. to X-band and L-band backscatter meas. of agricultural crops, forest stands, and single trees 87−57441
Radarsat prototype synthetic-aperture radar signalprocessor 86−55375
real time signal analyzer 88−22204
real time simulators, advanced approach 88−74037
real-time signal processing with cornerturning transfers, processing bounds and fast allocation 86−43280
reconfigurable 64-tap transversal filter with 8-bit multiplier accumulators 88−70838
reflector with bidirectional communication capability, passive telemetry system appl. *(Japanese)* 86−23986
reliability and availability increase, through reliability growth program 85−33254
remote sensing Bar'er miniature velocimeter, adjusting and checking apparatus 85−3508
residual number system/systolic design method for VLSI processors 86−57879
RF environment simulation using simulator/modulator combination 85−58211
S-band bipolar microwave transistors a new approach for high power 87−37580
S-band integrated T/R modules with GaAs MMICs, design for phased array radar appls. 85−63757
S-band PLL frequency synthesizer for agile radar 88−35589
S-band radar frequency agility with 3 MW wideband pulsed klystron 87−3229
S-band track while scan radar system, development of analogue MTI system 85−47602
SAR, image shift, three look correlation accuracy *(Japanese)* 86−30884
SAR, spaceborne, real time processor based on VLSI technology 87−49172
SAR altimeters, synthetic aperture processing for full-deramp radar altimeters 88−42630
SAR instrument studies, summary 87−49185
SAR processor with high-speed real-time digital image processing fns. 86−59946
SAR real time acousto-optic processor, implementation 88−53371
satellite altimeters, pulse train simulation and appls. 85−47588
satellite altimetry method for ice sheet topography and height 88−61625
satellite radar altimetry methods, technique for radar pulse return averaging 87−63902
SAW pulse compression filters for multi-channel radar appls., Racal MESL technology 86−55362
SAW pulse compression system with low side lobes 86−17501
SAW pulse compression systems for radar appls. *(German)* 87−46283
SAW pulse compression systems with digital waveform generation 87−53871
SAW technology for radar and communicationssystems 86−68148
scan to scan adaptive MTI for clutter suppression 85−47598
scatterometer with mm-wave network analyzer 88−28938
scatterometers, roundoff noise analysis for digital Doppler processors 87−57378
secondary surveillance radar, impedance-matched radomes 88−14557
semicoherent Doppler processing technique 86−23960
shaft-angle digitizers, gimbal-angle meas. techniques 86−11707
ship's radar, appl. to ocean waves directional spectrum meas. 87−57398
shipboard search radars, power transistor selection 85−3500

radar equipment continued
short-period wiggler millimeter-wave free electron laser for plasma heating and space-borne radar 88−27198
sidelobe adaptive interference canceller, field tests 85−47604
signal analyser, orthogonal Walsh fn. based for object recognition *(Russian)* 86−43897
signal detector cct 86−69816
signal processing, high-speed VLSI devices, architectures and implementation 86−59944
signal processing, overload tolerance in real-time distributed systems 85−37541
signal processing using VLSI processor array 86−65026
signal processor, hybrid, with high-speed optoelectronic track-and-hold ccts. 87−29038
simulator using personal computer, development *(Japanese)* 88−4100
single DRO rapidly switches three frequencies 88−4099
soft copy imagery interpretation capability 85−3498
sonar scan convertors 86−11187
Sousy VHF radars for atm. meas. *(German)* 88−74976
space-link stimulation of airborne multimode radars 87−20606
space-time signal processing of radar set with 2D antenna array 86−69078
spaceborne radar scatterometer system configuration, from NASA, simulation on NROSS 87−63061
spaceborne synthetic aperture radar sensor technology 87−3234
spacecraft on-board SAR processing technology for Earth observing system-type missions 88−25269
Spectrasat SAR satellite for global collection of ocean wave spectra 86−12184
speed-gun controller for false target generation 86−69817
stable frequency sources in communication technology *(Polish)* 86−67073
surveillance, adaptive moving target detector processing, data extraction 87−3224
synthetic aperture imaging airborne radar 87−20619
T/R module ageing effects 88−47203
tactical communications jamming, technology and capabilities 86−3503
target enhancement, constraint optimisation filter design 87−27441
target signal modelling and validation 87−8350
technological developments, review 86−11167
thyristor based modulator appl., airport runway traffic monitoring *(French)* 85−20998
tracking filters, statistical anal. 86−4729
trainer simulation, microprocessor controlled system *(Czech)* 86−17472
two-level data-flow architecture for programmable signalprocessing 86−59948
TWT, dual mode coupled cavity tube for airborne radar 87−45538
TWT high-power amplifier, Dornier range, design and appls. *(German)* 88−56900
US unmanned air vehicle programs 87−70129
USW active receiving radar antenna for salt deposit location *(German)* 87−61464
VHF crystal oscillators for airborne applications, configs. and resonator selection criteria 88−18987
VHSIC demonstration radar signal processor 88−67483
video, radar display to television scan conversion *(Czech)* 85−42651
vLSI fast Fourier transform digital signal processor chip 87−37379
VLSI image processing, book 86−33911
VLSI systems, CAD using hierarchical building blocks, radar subsystem appl. 86−58588
W-band microstrip for guided weapon applications, technological considerations 87−11025
waveguide filter, variable cutoff freq., for radar diplexers 86−53014
waveguide filters with variable cutoff frequency for radar diplexers 88−56878
wideband tracking frequency multiplier 86−23984
X-band coupled-cavity TWT for airborne radar, linear, high power 85−52425
X-band integrated transceiver, design 88−41739
X-band optic links using high-speed delay lines, eval. for radar test set appls. 88−73956
GaAs MMIC phase shifter, L-band, continuously variable config. for radar appls. 88−7048
GaAs MMIC transmit/receive radar module for X-band phased array appls. 88−9643
GaAs TX/RX module for S-band phased array radars, 2 W 88−15584
GaAs X-band and Ka-band monolithic PIN diode variable attenuation limiters 88−63874
YIG magnetostatic devices for variable delay, tunable filtering and chirp transform at microwave frequencies 87−46399
YIG oscillator and VCO assembly for military applications 88−38710

SAR, signal detection, interference presence 87−56247
SAR motion compensation, inertial sensor noise specification 88−67459
sidelobe adaptive interference canceller, field tests 85−47604
sidelobe narrowband interference cancellation 85−47603
sonar, receiver array technology 86−11184
space-time correlation function of interfering reflections of a radar signal 88−35574
speckled imagery enhancement, perspective on techniques 88−59295
SSR-systems, high traffic loading, interference probability *(German)* 87−56242
thunderbolts, relation with radar echoes of summer thunderclouds 85−63736
tracking radar, superresolution appls. 86−17492
two-scatterer interference study with polarimetric FM/CW radar 85−63740
vertical radar coverage, nonuniform reflecting terrain, simulation 87−56258
VHF, interference problems caused by TV and FM broadcasting 86−30885
Weibull radar imagery, robust detection of object boundaries 88−73262

radar measurement
3D air motions over Baiu front, VHF Doppler radar obs. 88−74028
3D laser radar range imaging and scene anal. 87−70143
4.3 MHz ocean wave-radar modulation transfer function meas. 86−37926
14 GHz FM-CW/pulse compression radar for obs. of satellite-Earth path precipitation *(Japanese)* 86−37945
34.5 and 11.5 GHz propagation between ETS-II satellite and Kasima ground *(Japanese)* 86−48579
35-GHz-Doppler radar for law enforcement agencies in Europe , operation and expt. eval. 88−74036
accuracy of radar measurement of the azimuth of a moving target 88−41722
aerial targets, nonlinear aspects in radar tracking *(French)* 88−47200
aerodynamic roughness determ. from backscatter meas., appl. in aeolian sediment transport studies 88−67466
Airborne Doppler lidar for wind meas., error evaluation 87−71331
airborne lidar for pollutant transport and conc. distrib. determ. 88−16936
Airborne Lidar Plume and Haze Analyser obs. of power plant plume over hilly terrain 86−18579
airborne SAR imagery, statistical modelling of intensity distribs. 88−10533
airborne SAR images calibration using active radar calibrators and ground-based scatterometers 88−5140
airborne SAR imaging of azimuthally-travelling ocean surface waves, LEWEX expt. plan 88−10535
aircraft radar errors caused by inaccurate antenna stabilisation *(Russian)* 87−63036
altimetry, and fusing, low-cost target detecting device 86−11195
AN/APS-506 maritime search radar, SAR mode 88−60266
asteroids shapes determ. from radar echo spectra, new theoretical approach 88−35624
atmosphere, folded radial vel. rectification to Cartesian space 87−71337
atmosphere, refr. index gradient determ. from turbulence charact. 88−4111
atmosphere, temp. and vel. var., implications for radar sounding 88−35581
atmosphere eddy dissipation rates determ. from Doppler vel. spatial spectra and Doppler spectrum widths 87−63944
atmosphere precipitation remote sensing, anal. of dual-wavelength surface reference radar techniques 87−71295
atmosphere temperature and moisture, short-term changes determ. from single Doppler radar data anal. 88−15591
atmospheric temperature and wind profile, acoustic, wavefront anal. 87−56261
atmospheric turbulence simultaneous remove sensing by double star scintillometer and VHF radar 86−6124
atmospheric wind meas., 405 MHz phased array antenna design 87−19327
aurora electron drift vel. meas. with STARE/SABRE system 86−12169
auroral backscatter, multi-radar obs. 88−53344
automatic single-Doppler wind field anal. real time system 88−15590
autoregressive modelling with appl. to target identification 88−60229
backscatter meas. in remote sensing, 215 GHz pulsed radar system design 88−60239
backscatter tests 87−8341
backscattering of aircraft, German experiments 85−58189
Barker-coded multipulse expts. with incoherent scatt. radars 88−53340
bistatic radar for geological probing 85−9367
blast furnace burden level meas. using FM radar based phase modulation method *(Japanese)* 87−41638
CFAR operation, clutter characterisation 85−63728
characterisation of target by extended freq. anal. method *(French)* 88−22193

radar measurement continued
Chilbolton dual-polarised radar, new developments 87−56259
clear-air Doppler radars, bistatic and monostatic 86−69820
cloud extinction profile measurements by lidar usingKlett's inversion method 87−4125
CNET backscatter HF radar, antenna arrays 88−47222
CODAR HF radar obs., status report 86−65535
CODAR HF radars, tidal and storm-surge meas. 86−65533
CODAR ocean surface meas., distorted antenna patterns correction 86−64049
CODAR surface-current appls., least-squares and closed-form dual-angle methods 86−65018
coherent radar cross-section and imaging measurement systems 88−47206
compact radar cross-section meas. range at Ohio State University 85−20266
complex radar cross-section matrix meas. for small dielectric and metallic objects 88−15547
conference, New York, NY, USA (April 1988) 88−55823
convective rain cells measurement, objective method for cells anal. and tracking 88−16909
cross-section compact range, new approach 87−3227
cross-section meas. of wingtip vortices 86−4732
cross-section measurement at short distance 88−9639
cross-section measurement using I-band radar system 87−49175
CW radar cross-section measurement facility in X-band 85−20250
D-region, auroral, EISCAT UHF radar meas. 88−53342
Delft Atmospheric Research Radar for clean air turbulent plumes meas. 88−4112
differential absorption lidar, using Q-switched CO_2 laser 85−24469
directional wave spectra, approaches for comparing remote and in-situ meas. 87−71384
distortion free SAR imagery and change detection 88−60219
distribution function approach to point targetresolution 86−37090
Doppler frequency and range ambiguities resolution *(German)* 86−37929
Doppler imaging radars, response charact. determ. using speckle 87−28679
Doppler radar based procedure for counting moving objects as they stop 87−14237
Doppler wind fields meas. with fast scanning radars, signal processing techniques 88−61643
dual channel polarisation diversity precipitation radar at rotating linear and circular polarisations 86−49718
dual-channel precipitation radar, correlation meas. at linear polarisation 86−10093
dual-Doppler lidar measurement of winds in the JAWS experiment 87−71307
E-pulse techniques, radar target measured response, natural frequencies extraction 87−63011
E-region, auroral type 1-4 VHF echoes, ion cyclotron harmonic struct. 88−67464
E-region plasma waves and electron heating, EISCAT obs. 88−53346
Earth surface imaging, effect of meteorological conditions on satellite imagery 87−35482
EDIA and EISCAT obs. of sub-auroral region 88−60247
EISCAT Polar experiment and high-latitude ionosphere flow 88−53351
EISCAT science, conf., Bad Lauterberg, W Germany (1987 March) 88−49330
EM wave scattering from thin dielectric disks 86−22652
ERS-1 satellite with ocean radiometer/radar remote sensing capability for weather forecasting *(French)* 85−15435
eSM evaluation facility 85−26853
ESM systems, signal sorting 85−24882
extrasolar planetary systems, possibility of radar studies 86−30916
F-region, non-Maxwellian ion vel. distrib., EISCAT meas. 88−53352
F-region, non-thermal plasma, scatt. power observed by EISCAT, coherent echoes 88−53353
FET processor based phase noise measurement system for radar ATE 88−36176
finite planar structure coated with lossy dielectric, radar cross section anal. 85−3486
forest signatures in imaging and non-imaging microwavescatterometer data 86−55820
forest stands, L-band radar backscatter modelling 87−71278
fractal dimension radar signals and cross section measurements 87−13758
frequency counter for mm-wave radar testing, up to 110 GHz 86−4724
gauge adjustment of radar rain rates by normalized norm analysis 87−20604
generalized pulse-phase method for range measurement 88−28930
geophysical prospecting, microprocessor-based data acquisition system for borehole radar 87−71276
glacier thickness meas. 85−31980
global rainfall mapping, conceptual design of spaceborne radar 88−5173
global winds mapping with satellite-borne Doppler lidar 88−4120
Grahamstown all-sky meteor radar, system and obs. of meteors and thermospheric wind 88−60248
gravity waves measurement, effects of Doppler shifts on wave spectra observed by MST radar 87−29931
ground clutter meas. in large bistatic angle airborne radar system, calibration considerations 88−60231
ground clutter meas. using high-speed sampling device for X-band radar *(Japanese)* 86−55370
ground speed sensors, design and performance, agricultural equipment and vehicular appls. 86−5304
gust fronts, automatic detect-by radar 87−71332
hailstones, simulated, radar technique for meas. of rot. props. of falling oblate ice spheroids 87−71330
hailstorms detect. via radar backscatter, implications of distrib. of water in hailstones 85−38338
height estimation of level flight cruising aircraft, method using using ATC radar *(Japanese)* 87−70808
height finding radar for NAMS navigation accuracy meas. system, calibration, error evaluation *(Japanese)* 85−47615
helicopter navigation systems, strapdown, automatic, for combat and military transport 88−16842
heterodyne radar, radial velocity meas., atmospheric turbulence, error estimation 88−22185
HF four-element CODAR beam forming 86−65024
HF ground-wave Doppler radar, icebergs remote sensing 86−65538
HF ground-wave radar remote meas. of Celtic Sea ocean wave and current, NURWEC 2 project 87−56263
HF multifrequency radar obs. of currents and current shears 86−65536
HF narrow-beam design, remote sensing of sea surface conditions 86−65524

radar measurement continued
HF radar, ionospheric probing 88−47220
HF radar, receiving system linearity requirements 88−47221
HF radar, Rijkswaterstaat interest, North Sea obs. 86−65532
HF radar appl., wind direction temporal and spatial changes obs. 86−65530
HF radar meas. interpretation, linear gravity-wave dispersion relation 86−65539
HF radar meas. of sea surface, gravity-wave dispersion relation role 86−65540
HF radar measurements of ocean wave parameters duringNURWEC 86−65531
HF radar obs., for Canadian east coast 86−65534
HF radar observations of Arctic pack-ice breakup 86−65537
HF radar sea echo interpretation, second-order shallow-water hydrodynamic coupling coefficient 86−65542
HF skywave radar, real-time ocean wave-height mapping, tests 86−65527
HF skywave radar for ship detection 86−65529
high-latitude main ionospheric trough, assoc. plasma convection and precipitation, EISCAT meas. 88−53350
HILAT ground-based program 85−9261
icebergs, marine radar detection, polarisation effect 86−17453
imaging laser radar, heterodyne and nonheterodyne transceivers 86−43906
incoherent scatter autocorrelation function meas., klystron radars full average power appl. 87−20601
incoherent scatter radar power profile meas., interference detection and correction 86−69804
incoherent scatter radar systems, CCD-based real-time spectrum analyser 85−37525
INDI experiment for ion-neutral dynamics in high-latitude ionosphere 88−53348
installation planning, radar detection and measurement system 85−47572
instrumentation radar cross-section measurements 87−49161
instrumentation radars, RS meas. 85−42646
interference attenuator, realisation and test results *(Polish)* 85−37105
interference detection and correction applied to *D* region incoherent scatter radar power spectral measurements 87−56245
involuntary random body movements, quantification by Doppler radar 86−32306
ionosphere, electric field meas. with EISCAT 88−54734
ionosphere D-region 85−31990
ionosphere sounding, overview of Sondestrom incoherent-scatter radar 85−15420
ionospheric meas. of small scale plasma irregularities and flow, radiowave scintillation and EISCAT obs. 88−58855
ionospheric satellite orbit determ. 88−67309
Jindalee sky wave radar for synoptic scale meas. of ionospheric motions 88−66078
JINDALEE skywave radar, remote sea-state sensing, frequency management support 86−65526
JINDALEE skywave radar for remote sensing 86−65525
JRC subsurface radar, design *(Japanese)* 87−63040
large field-aligned vel., EISCAT obs. 88−53349
lidar system for measuring atmospheric pressure and temperature profiles 88−23185
lightning flash forecasting from radar observations 86−55340
linear FM waveforms, Doppler estimation accuracy 86−17440
low backscatter corrugated metal surface design and testing for H-polarised TEM incident waves 85−7611
M- and S-matrix weather-radar meas., anal. and appl. 87−56260
M-ary sequential hypothesis testing, radar signal classification 88−22190
manoeuvring targets from noisy radar meas; state estimation 88−28924
mapping with aircraft and satellite radar images, review 86−12141
marine oil spills, radar detect. via damping effect on wind-excited sea ripples 85−59499
marine oil spills detect., impact of higher-order Bragg terms on radar return from sea surface 85−59498
material refl. characts. meas., in-phase SAR method using UHF TV broadcasting waves *(Japanese)* 86−70211
measuring receiver set for 40 to 60 GHz *(German)* 85−31428
mesocyclonic shear automatic detection using Doppler radar 87−71325
meteor and auroral drifts, simultaneous CW radio meas. 86−49701
meteorological radar theory, theory of excess bias measurement 87−71342
meteorological systems obs. with airborne and ground-based Doppler radars, uncertainties 88−60245
meteorology *(Spanish)* 87−34649
microwave antennas evaluation using enhanced performance compact ranges 85−24940
microwave pulse Doppler radar for wind meas. *(Japanese)* 87−56233
microwave radar sensing, modelling interactions between ocean and environment 87−35496
microwave reflection coeff. phase angle meas. 86−65264
Millimeter-Wave Polarimeter for remote sensing 88−5143
mining industry appl. bunker contents meas. 85−31099
Mirage Systems, automated-radar-measurement system for pulsed I/Q data collection 88−47205
MM wave radar reflectivity, correlation of measured snowpack physical parameters 88−15635
MM waves multiscattering effects, bistatic radar for rain meas., Monte Carlo simulation 88−52229
MM-wave high-resolution instrumentation radar, HIRES-95, config. and performance 86−4741
MM-wave low-range radar altimeter for helicopter appls., expt. results 88−15670
monopulse SSR, theoretical eval. and expt. meas. comparison 88−15538
MU radar for middle and upper atmosphere remote sensing 86−69819
multicell storms, evol. from single Doppler radar obs. 88−68639
multiposition radar, target location accuracy 87−63015
NAMS height finding radar system, height estimation error evaluation *(Japanese)* 85−42655
noisy radar measurements, position, velocity and acceleration estimates 85−25924
ocean internal wave parameters estimation, appl. of backscattered radio signals *(Russian)* 87−77880
ocean radar cross section, airborne meas. at 5.3 GHz as function of speed 87−8342
ocean remote sensing, appl. of side-looking radar of Cosmos-1500 satellite 87−35491
ocean subsurface features imaging by X-band radar, role of nonlinear interactions of short surface waves 88−23189
ocean surface wind meas. with satellite radar scatterometer 86−50741
radar measurement continued
ocean surface wind speed, Seasat radar altimeter, scatterometer and scanning multichannel microwave radiometer obs. compared 86−6114
ocean wave directional spectra, aircraft remote sensing 87−71385
ocean wave energy, Seasat obs. compared with SAR image spectral theory 86−6135
ocean wave parameters, determ. from radar imagery of sea 85−48482
ocean wave system and wind field signatures from Seasat SAR imagery 85−64765
ocean wave two-dimensional power spectrum ambiguity resolution by successive image processing 86−6136
ocean waves, processing of airborne SAR images 88−10580
ocean waves, statistical characterisation of sea surface geometry 86−60946
ocean waves imaging, comparison of SIR-B and Seasat wave spectra with simultaneous buoy data 88−10534
oceanographic surface current meas., CODAR intercomparison, Delaware Bay (1984) 87−9011
oil films on sea surface, radar remote sensing and ocean wave Marangoni effect 88−54748
oil pollution at sea, X-band SLAR radar observations and technique 88−4113
orbital radar imagery, geometric accuracy testing 88−30151
Orwell equation in radar cross section measurement 85−25920
passive localisation algorithm, accuracy anal. 88−3133
peak-detecting laser radars, performance anal. 87−41031
peat bog props. eval. using ground probing radar *(Finnish)* 87−41007
performance anal. of radar systems with hardware implementation and software packages 86−37933
plasma density meas. by EISCAT and dynasonde, comparison 88−54735
polar ice sheets, radar echo sounding computer simulation 88−16924
polarimeter calibration using passive reflectors 87−76845
polarimetry data volume reduction method 88−5148
polarisation diversity techniques for clutter cancellation 85−47593
power density, predictive model for range-dependence 85−15012
precipitation intensity measurement, appl. of radar data for planning of artificial augmentation of precip. 87−77865
precipitation measurement via synthetic aperture radar, beamwidth and precip. sensitivity 88−16906
precipitation pattern motion meas. using radar communication systems attenuation 87−2296
primary and secondary radar systems, computer program for evaluation and monitoring 86−17498
propagation-differential phase shift determ. from sequential orthogonal linear polarisation radar meas. 87−70115
Ps 6 micropulsation event, assoc. ionospheric plasma and electrical parameters determ. 88−53347
pulse radar cross section measurement system 88−60265
pulse repetition frequencies, distance meas., ambiguity elimination algorithm anal. 86−55356
pulsed incoherent radar, multiple target reflected signal, spectral width determ. 86−30857
radar fixed error reduction by weighted counting method *(Japanese)* 86−55339
radar target identification, time and frequency domain feature selection 88−60216
radar targets excited by electromagnetic Gaussian pulses, identification by extended Prony method *(Spanish)* 87−63026
radarclinometry, applicability of surface integral approach 88−68609
radarclinometry, line integral approach 87−50537
radargrammetry in a mountainous region 85−64696
radial track determ. for moving object, appl. of HF backscatter technique *(Chinese)* 88−28921
radio acoustic sounding system, atmosphere wave front anal., temperature and wind profile 88−4098
rain, dual-polarization radar rel. to disdrometer meas. over Illinois 88−10541
rain, microstruct. determ. from multiwave radar attenuation meas. 86−25419
rain cell model, propagation appls., expt. background 87−61376
rain data analysis, functional box-counting and multiple elliptical dimensions for radar data 87−63960
rain patterns, automatic extraction, collection and description for modelling 87−63032
rain rate measurement, appl. of lognormal raindrop size distrib. to differential reflectivity radar meas. 88−16907
rainfall measurement, implications of disdrometer meas. for differential reflectivity radar obs. 86−70530
rainfall measurement, PARAGON system for archiving and adjustment of daily rainfall totals 88−42661
rainfall rate and radar reflectivity, relationship 86−69805
rainfall rate measurement, depend. of spatial correl. function on elevation angle *(Japanese)* 88−45696
range and angular coordinates meas., resolution and accuracy study 85−14343
range dependent calibrated target for MM wave radar, balloon lifted sphere 88−22181
range finding techniques for third generation robots 88−67451
range measuring from rough surface, quasi-monochromatic signal spectral anal. 88−15561
real time signal analyzer 88−22204
receivers, input power, moments estimates 85−25933
remote sensing, backscattering model for foliated deciduous trees at millimetre wavelengths 87−57437
remote sensing, digital processing of side-looking radar imagery from Cosmos-1500 satellite 87−35483
remote sensing, effect of range on backscattering characts. 88−5124
remote sensing, geophysical perspective 86−32508
remote sensing, high-speed image processing system based on custom VLSI for DSP 87−63936
remote sensing, microwave signatures, symposium, Toulouse, France (January 1984) 85−38316
remote sensing, millimetre-wave bistatic radar meas. of sand and gravel 88−5128
remote sensing, performance, calibration, and data validation of ERS-1 radar altimeter 87−57340
remote sensing, radar backscattering props. of simulated geological surfaces 88−10526
remote sensing, realtime SAR processor for C and X-band appls. 87−63935
remote sensing, relationship between differential scatt. coeff. and bidirectional reflectance distrib. function 88−5127

radar measurement continued
remote sensing, results from coherent polarimetric RCS meas. on trees 87−57440
remote sensing, SAR-580 data processing method in Japan 87−63934
remote sensing, scattering model for defoliated vegetation 87−57439
remote sensing, significance of RCS polarisation meas. for tree signatures 87−57438
remote sensing, surface roughness parameters retrieval from dual-freq. meas. of backscatter coeffs. 88−5125
remote sensing, surface-field approach to EM wave scattering from rough surface 88−42636
remote sensing, very fast SAR signal processor for ERS-1 and Radarsat 87−63937
remote sensing, X-band and L-band backscatter meas. of agricultural crops, forest stands, and single trees 87−57441
remote sensing of continental cumulus clouds, obs. of echoes from seeded and nonseeded clouds 87−77863
remote sensing of mesopause region dynamics, review of MF/HF meas. 85−31989
remote-sensing in mining−a review of techniques and applications 85−43499
sampled-aperture radar, angle-of-arrival estimation, high resolution techniques 87−41008
SAR azimuth depolarization ambiguities 88−60244
SAR data for agriculture and forestry 87−49182
SAR data products simulation 87−49179
SAR imagery, spatial considerations in speckle simulation 88−10531
SAR imagery of ocean bottom topography, results from improved model 87−57397
SAR imagery processing, appl. of shape from shading technique 88−10529
SAR images processing hardware pipeline concept 87−70503
SAR imaging, appl. of stereo viewing 85−38326
SAR imaging, information extraction from speckle-degraded images 88−10528
SAR imaging, statistical modelling and suppression of speckle 88−10530
SAR imaging, unsupervised segmentation of speckled images 88−10532
SAR imaging of ocean waves, transformation of wave spectra into SAR image spectra 87−35492
SAR imaging of rough surfaces, speckle statistics depend. on backscatter cross-section fluctuations 88−16888
SAR motion compensation systems with strapdown inertial measurement units 88−60215
SAR radar data correl., appl. of knowledge based processing system 87−41451
SAR remote sensing, comparative evaluation of like-polarisation data for non-renewable resource exploration 88−10527
satellite links, S band meteorological radar for slant path rain profile statistics meas. 85−52415
satellite radar altimetry methods, technique for radar pulse return averaging 87−63902
scanning lidar bathymeter for water depth measurement 88−16923
scanning radar altimeter for global digital topography mapping 88−10521
scattering coefficient meas., model for prediction of precision and accuracies 88−60221
scattering effect investigation 85−14361
scatterometer with mm-wave network analyzer 88−28938
sea, radar images, optical anal. using PRIZ modulator 87−56248
sea bottom radar imaging, implications of surface currents obs. at Nantucket Shoals 87−57396
sea clutter, compound K-distribution model, significance and scope 88−15634
sea clutter meas. at Alexandria 85−20271
sea ice, reflectivity meas., frequency and polarisation props. 86−17452
sea ice, thickness, radar meas., automated technique 88−61661
sea ice sensing, shipborne interface system (STAR-VUE) for tactical ice navigation 87−63977
sea ice tracking by nested correlations 88−16925
sea surface 3D description by marine navigation radar 86−6133
sea surface remote sensing, radar refls. rel. to cm-wave refr. in atmospheric boundary layer 88−5186
sea surface return in C and Ku bands, contrib. of second-order Bragg term 88−16930
sea surface scattering, wind measurements for nonuniform wind fields by spaceborne scatterometers 88−10551
sea surface scatterometry, radar scattering and equilibr. ranges in wind-generated waves 87−63970
secondary surveillance radar antenna, in situ near-field meas. 88−34426
shaft-angle digitizers, gimbal-angle meas. techniques 86−11707
shuttle imaging radar expt. in Germany 87−50487
Shuttle Imaging Radar-A and Landsat images, comparative geological analysis 85−64721
Shuttle Imaging Radar-C appls. 86−18547
single Doppler velocity signature interpretation of nondivergent environmental winds 87−71335
SIR-B antenna, vertical pattern determ. 88−74013
SIR-B data collection expts. over Japan 88−53363
SIR-B expts. in Japan, image reconstruction 88−52536
SIR-B expts. in Japan, rice crop truth data collection 88−53361
SIR-B expts. in Japan, sensor calibration at Akita Airport 88−53357
SIR-B expts. in Japan, sensor calibration at Kashima test site 88−53360
SIR-B expts. in Japan, sensor calibration at Sarobetsu wild-land test site 88−53358
SIR-B expts. in Japan, sensor calibration at Yamagawa test site 88−53359
SIR-B image calibration by a corner reflector array 88−74014
SIR-B oil pollution expt. in Japan 88−53366
SIR-B oil-pollution expt. in Japan 88−53362
SIR-B rice crop expt. in Japan 88−53365
SIR-B sensor calib. expt. in Japan 88−53364
SIRIO SHF experiment, radar simulation and bistatic link, rain scatter interference results 87−62883
skywave sea-state radar techniques, auroral zone latitude, expt. investig. 86−65528
slant path attenuation and depolarization, multiple polarization radar meas. 87−47188
snow cover, microwaves interaction rel. to remote sensing, appl. 88−10565
soil moisture and surface roughness effects on L-band emission and backscatter 88−9620
soil moisture sensing, parameterisation of effect of surface roughness on microwave emission 87−71367
radar measurement continued
SOURCESAT, short-range high-resolution FM-CW radar scatterometer system for backscatter meas. 86−43895
SOUSY VHF radar measurements in the lower and middle atmosphere 87−15050
Sousy VHF radars for atm. meas. *(German)* 88−74976
space based radar design, impact of strong scintillation, noncoherent detection 86−43892
space-time signal processing, composite target, parameters estimate 88−3034
space-time signal processing of radar set with 2D antenna array 86−69078
Spaceborne Imaging Radar-C, hardware, subsystem and interfaces 88−10518
spectral characteristics of radar echoes from aircraft-dispensed chaff 85−37102
Spectrasat radar ocean-wave spectrometer, design and operation 87−71393
sporadic E layer, acoustic shock passage, radio wave diffraction 86−68749
sporadic-E layer, incoherent scatter radar studies with 300 m resolution 88−53341
standard spherical reflectors for calibrating amplitude channels of radar target scattering-matrix measuring systems 88−4102
statistical reliability of radar-derived data on slant-path attenuation 87−47187
stealthy targets in radar detection, RF absorbers *(French)* 86−43899
stereo-radargrammetry, implications of Gestalt formations for Venus Radar Mapper 87−3214
submarine relief features on radar image and Skylab optical photograph, comparison 88−60242
surface atmospheric pressure sensing by millimetric-wave radar 86−4733
surveillance radar, masking jamming effectiveness meas. 88−15674
sweep generator and synthesizer SWP 86−31452
synthetic aperture for arbitrary aircraft motion, basic charact. 86−23983
synthetic aperture radar (SAR) imagery, automated rectification and geocoding 88−5131
target classification techniques comparison 86−43891
target forward scattering meas., by planar near field scanning 87−13782
target natural resonance frequency extraction from measured response 87−34650
target signatures, autoregressive moving average modelling 88−60230
target velocity meas., filtration accuracy effects *(Czech)* 86−11153
terrain height map with stereo side-looking radar, image construction method *(Japanese)* 85−20254
thin scattering layers, effect on wind determination by Doppler radars 88−41747
thunderstorm nowcasting using Doppler radar and soundings 88−15589
thunderstorms forecasting and detection using 50 mm Doppler radar 88−15588
time-domain gating for RCS meas. 88−9645
tropical convective clouds, radar echo zones vertical profiles *(Russian)* 87−57364
tropical station, disdrometer dropsize meas., rainfall parameters 87−40978
turbulence profile determination method, using Doppler radar 87−71345
UK National Scale Modelling Centre, backscatter information, sub-MM wave techniques use 88−28984
underground object imaging, resolution improvement and clutter reduction 86−49732
United State Navy Geosat Mission radar altimeter satellite programme 86−12185
Valensole skywave radar appl., North Sea meteorological fronts detection 86−65510
velocity measurement by moving target database radar, reliability, comment and reply 87−34637
Venus Radar Mapper mission, implications of Gestalt formation in stereo-radargrammetry 86−55397
vertical velocity power spectra meas. with Sousy VHF Radar system 88−42652
VHF radar, interference problems caused by TV and FM broadcasting 86−30885
VHF radar measurement of atm. charact. over Taiwan during Typhoon Wayne 88−60243
VHF-UHF radar systems, the Moon as a calibration target 88−41742
VHF/SHF tropospheric obs. using MU and dual-freq. radars *(Japanese)* 85−43480
weather Doppler radar for snowfall obs. *(Japanese)* 87−63039
Weibull-distributed radar clutter reflected from sea ice 87−56250
wind Doppler radar velocities de-aliasing 88−61646
wind estimation algorithms for spaceborne scatterometers, comparative study 88−10552
wind meas. systematic errors, numerical considerations 88−41746
wind measurement, systematic errors, observational results 88−41745
wind measurement in atmospheric boundary layer, appl. of continuous-wave Doppler systems 85−64742
wind profiling with UHF Doppler radars 88−5178
wind speed extraction with pulse-limited radar altimeter, effect of whitecaps and foam 87−21782
wind vertical vel. obs. by Flatland radar, Illinois 88−47201
Worldwide Atmospheric Gravity-wave Study (WAGS) 88−53345
X-band and false alarm rate, radar sea clutter spectrum props. 88−15535
X-band cross-polarized SAR imagery, calibration, using corner reflectors 88−4106
X-SAR system, performance sensitivity 88−10519
CO_2 laser radar, Firepond, compact and transportable meas. types, technological developments 86−30891

radar receivers
10 GHz radar detector for automatic train control 88−22202
C-band low-noise MMIC phased array receive module 88−71115
acousto-optic channelized receiver, principle, advantages and limitations 86−55364
acousto-optic EW receiver, dynamic range improvement 86−36285
acousto-optic receiver for radar EMS 85−31105
acousto-optic SAR processor, real-time, development advances 86−37942
acousto-optic time-integrating correlator, passive surveillance appls. 86−37941
adaptive airborne MTI radar receiver, auxiliary channel approach 87−56226
adaptive polarisation filtering 86−17502
adaptive structured optimum receiver for targetdetection in the presence of clutter 86−30849

radar receivers continued
air navigation, comparison of multichannel, sequential and multiplex GPS receivers 85−25950
airborne SAR radar, an R&D tool for ERS-1 time frame 88−60260
aircraft raid count by autocorrelation 86−17461
approximation equation for EW receiver sensitivity 87−8355
autocorrelation receiver for short-range Doppler radar systems 85−42647
battlefield radar monitoring systems with the instantaneous frequency measurement receiver (IFMR) 85−8477
beamforming, digital processing role 85−47571
bistatic radars, synchronisation aspects 88−15614
bistatic subsurface radar, mag. field distribs. rel. to depth and size of submerged conducting object 85−14356
bistatic-radar receiver, clutter spectrum simulation *(Japanese)* 86−17428
combat aircraft, radar warning receivers and jammers, conflict, ECM integration 86−17468
compressive receiver using SAW dispersive filters, features, technology 86−55366
countermeasures receiver techniques, history 85−58234
cross-modulation influence on HF radar dynamic range 88−22197
detection sensitivity, meas. technique and calibration instrument config. 88−15565
differential GPS navigation, high precision 87−41109
diffusion process signals, simultaneous detection and estimation 86−4730
digital beamforming radar VLSI processor 87−10915
digital instantaneous frequency meas. receiver, development 85−14363
digital manifold phased arrays, nonlinearities 87−12837
digital signal processing, communications appls. 87−2508
Doppler VOR, design considerations 86−4721
dual polarisation target detection radar receivers analysis 88−15532
dual-channel, phase- and amplitude-tracking radar front enddesigned using microwave IC techniques 86−37935
dynamic range extension using low-noise parametric attenuator 86−17475
Earth Resources Satellite SAR transmitter and receiver test results 86−11175
echo signal selection calcs. *(Russian)* 88−22187
ERS-1 SAR receiver system, amplitude nonlinearities anal. 87−63049
ESM, adaptive thresholding 85−25939
ESM range advantage 85−58166
ESM receiver for CW signals, Bragg cell appl. 85−24881
ESM receiver system based on circular antenna array, enhancement using polarisation information 85−24981
ESM receivers, channelised integrating Bragg cell appl. 85−58196
ESM system, design 85−31088
ESM system design, compressive receivers appl. 87−34654
EW, compressive receiver, magnetostatic wave device appls. 86−23953
EW, digital output detector video receiver systems, primer 85−31096
EW, spurious response minimisation 86−43896
EW receiver acousto-optic technology 85−58207
EW receiver digital instantaneous frequency meas. 85−58206
EW receiver evaluation, automatic test system and techniques 85−63988
EW receiver techniques, survey 85−13148
EW signal processing devices and systems 85−58205
EW system design using microwave and millimeter-wave technology 85−13156
EW systems, magnetostatic wave technology appl. 86−23954
false-alarm probability of conventional and logarithmic CFAR receivers 85−20255
GASP, GEC array-signal-processing test bed, design 86−17503
GPS, altitude aiding 87−41106
group targets, digital detector, multilevel quantization, anal. and optimisation 85−8451
HF ground-wave radar, progress in ship tracking 88−15523
HF ground-wave radar, receiver design 88−47217
HF radar, receiving system linearity requirements 88−47221
HF receivers, max. dynamic range, freq. convertors 86−23665
hyperbolic radionavigation systems, coordinate conversion techniques in microprocessor based receivers 87−41048
IF clutter signal generator 88−15552
IF commutation, monopulse radar accuracy increment 86−30883
IFM receiver, ultra-wideband, design 85−47573
infrared tracking algorithm, simulation study 87−8352
input power, moments estimates 85−25933
JINDALEE, over-the-horizon radar, simulation and modeling 85−47551
K-band receiver for ESM appls. 87−41013
Ka-band receiver front-end, module design using IC techniques 86−23965
laser scanning system, transmitter-receiver parameters 88−41755
laser warning receivers, Marconi developments 87−3245
Lidar, coherent range-resolved differential absorption, description *(Japanese)* 85−31102
local oscillator noise in microwave receivers 87−41020
logarithmic amplifier for LIDAR receivers 87−49191
Loran-C receiver, aircraft flight experiment *(Japanese)* 85−58204
LORAN-C receivers, cross-rate interference impact 85−37120
LRNS, long-range navigation system receiver design in quasi-rangefinder mode 85−37124
military systems, millimeter capabilities addition 85−14365
millimeterwave frequency extension radar warning receiver 88−28951
MLS airborne receiver *(French)* 86−50711
MM-wave integrated receiver front-end in E-plane config., design, characts. and performance 87−24461
MM-wave MMICs, fabrication techniques and technologies, receiver and transmitter appls. 86−47081
MM-wave monolithic MM-wave IC for radio and radar systems *(German)* 88−25523
MM-wave radar receivers, mixer technology developments 87−37540
MM-wave receiver protection devices 87−41022
MM-wave receivers, mixer configs., development and appls. *(German)* 87−45222
mMIC T/R modules for the next generation airborne surveillance platforms (U) 87−13786
modules, semiconductor technologies, cooling and reliability problems 87−13785
monopulse angular accuracy for fluctuating targets 85−37091
monopulse radar interferometer receiver module, MIF-4-4097, design for phase error minimisation 86−23964
monopulse radar receiver with logarithmic amplifier detector scheme, 15.0 GHz operation, sensitivity anal. 86−17477
monopulse radar receivers, design considerations in development 87−63062
radar receivers continued
monopulse receivers for secondary surveillance radar, performance analysis, comments with reply 85−52388
multichannel radar receivers, methods of digital channel correction 85−52424
multistatic radar double-threshold detectors, design and perform. anal. 85−47597
narrowband signals detection, multilevel quantisation 88−52433
noise figure, sensitivity and dynamic range design tradeoffs 85−58208
nonlinear filtering of an elliptically polarized pulsedsignal 86−48928
optical and acousto-optical techniques in radar and sonar, review 85−46895
optical receiver with photomultiplier, background influence on charact. 85−4449
partially correlated Rayleigh targets, exact detection probability determ. 86−49709
performance of the order statistic CFAR detector in twomultiple target environments 87−8362
phased array radar, transmit/receive modules 88−15618
phased array radar transmit/receive module using GaAs ICs 85−14354
post-detection alternate-period cancellation, spurious reflections nonGaussian nature use 88−34692
precise time and positioning using oscillators and clocks 86−17535
pulse probing signal, reflection spectra estimation errors 87−20592
radar target glint/receiver signals joint representation 86−55331
RF signal processing, receiver design techniques 85−25110
S-band front-end module design for phase array antenna 86−23963
SAR depth of focus, extension under arbitrary aircraft manoeuvres 88−60218
SAR transmitter and receiver, satellite-borne, for Earth obs. 87−63048
SAR transmitter and receiver for J-ERS-1, pulse compression test results 87−63050
SAW compressive receiver, radar phase-coded waveforms anal. 85−13581
secondary surveillance radar ground station solid-state transmitter/receiver design 86−30889
Shuttle Imaging Radar-B SAR compact receiver designs and applications 86−4736
sonar, receiver array technology 86−11184
space-time correlation function of interfering reflections of a radar signal 88−35574
surveillance radar CAD and expt. verification 87−13776
tactical tracking radar, monopulse design 86−4723
target scattering props., unmatched reception 86−30855
targets detection in randomly inhomogeneous medium 88−27956
time-of-flight laser receiver for moving objects 86−65027
Touchstone for monopulse receiving system design 87−76853
US Army DF receivers, new directions 86−23991
VHSIC in radar warning receiver design 87−28673
warning receiver, design with improved IFM performance 85−63759
wideband multicorrelator frequency meas. receivers, improvement by design 86−59936
X-band dupletron, magnetron oscillator/duplexer/solid-state receiver package, marine radar appls. 86−20813
X-band monolithic phased-array-radar T/R module, manufacturing cost anal. 88−9644
GaAs IC amps. for radar and radio receivers 86−8524
GaAs MMIC low-noise amplifiers for radar and communications appls. 85−603
GaAs monolithic circuit for FMCW radars 88−67482

radar stations
automatic meteor track radar system and station design *(Russian)* 87−42234
multicriterial optimisation by correlation matrix, generalised indices selection 88−4072
over-the-horizon backscatter radar station construction and operational test 87−49159
primary and secondary radar stations, remote maintenance and monitoring 88−15640
secondary surveillance radar ground station solid-state transmitter/receiver design 86−30889

radar systems
3-D radar signal processing, built-in test equipment 88−15672
3D cartography using radar and graphics 88−22195
3D monopulse localization in airborne IFF interrogator 88−15631
3D radar, efficient design 86−17485
3D scanning Doppler radar for cloud and snow obs. *(Japanese)* 88−10546
10.5 GHz Doppler radar, config. and characts. *(Polish)* 85−3503
14 GHz FM-CW/pulse compression radar for obs. of satellite-Earth path precipitation *(Japanese)* 86−37945
35 GHz radar for cloud obs. 87−71303
35 GHz seeker testbed radar 88−22200
35-GHz-Doppler radar for law enforcement agencies in Europe , operation and expt. eval. 88−74036
50 MHz auroral Doppler spectra dynamics during Harang discontinuity 85−62771
95 GHz 3-D radar target imaging 86−55372
95 GHz coherent high-power radars, system design, military appl. 86−37938
accuracy increasing for range meas. 86−17423
acoustic radar technique, development 86−59955
acousto-optic adaptive processor for sidelobe cancellation 88−4088
acousto-optic ambiguity function processor, design, construction and performance 86−29972
active direction finding antenna for bore holes in salt domes 86−69861
Active Microwave Instrument on ERS-1, SAR image quality requirements 88−10555
active phased array radar, dynamic range and sensitivity requirements 88−15681
Ada-callable procedures utilisation for digital signal processing 85−8475
adaptive clustering algorithm 85−36259
adaptive MTI based on AR map, detection performance 88−15659
adaptive MTIs, target signal preservation using adaption delay techniques 88−15660
adaptive noise cancellation appl. for radar 87−19206
adaptive phased array radars, residue arithmetic techniques for optical processing 87−7802
adaptive radar processing, conf., London (Oct. 1987) 88−11611
adaptive radar systems, angular coordinate estimation in presence of spatially correlated interference 88−22184

radar systems continued
adaptive target detection technique for airborne mm-wave seeker design, real-time operation 85−3499
ADC requirements for radar systems 88−12469
ADC systems and appls., conf., London, UK (Nov. 1987) 88−11614
advanced modulation techniques for radar support measures and countermeasures using advanced modulation techniques 87−28671
Aegis shipborne threat and battle management system, SPY 1-A radar system 88−60238
aerospace and electronics, conf., Dayton, OH, USA (May 1984) 85−5647
aerospace and electronics, conf., Dayton, OH, USA (May 1987) 87−72887
aerospace applications, conf., Vail, CO, USA (Feb. 1987) 87−58552
Aerospace Defense Command: keeping watch on the skies of North America 85−42654
Air Bus A300, navigation system *(Japanese)* 88−68546
air traffic control and expert systems *(Japanese)* 88−42628
air traffic control and secondary surveillance radar improvement *(Japanese)* 85−20267
air traffic control and surveillance radar *(Japanese)* 88−15577
air traffic surveillance processing in the Mode S sensor 88−15632
air transport tracking systems using computer technology *(Dutch)* 85−64665
air-to-air radar, medium PRF, waveform tradeoffs 88−60269
air-to-surface airborne radar, developments and appls., review 86−55358
air-to-surface airborne radar for surveillance, threat warning interception and combat appls. 86−59934
airborne adaptive radars, digital and optical systolic architectures 87−13783
airborne autonomous landing guidance systems 86−56230
airborne data handling recording system, military appl. 85−4406
airborne early warning radar, fundamental parameters and systems 85−47578
airborne early warning radars, antenna sidelobe requirements 88−15551
airborne ECM, advanced radar test bed 86−69833
airborne electronic warfare, embedded training 86−69836
airborne exciter/local oscillator/down convertor 85−20988
airborne fighter radars, technology evolution 86−55351
airborne interception radar, modern techniques 88−74011
airborne Kalman filter based fusion, upper diagonal factorisation 88−68562
airborne low level reconnaissance system, MM wave SAR sensor design 87−20617
airborne microwave rain scatterometer/radiometer, satelliteborne weather radar system *(Japanese)* 87−15069
airborne multifunction radar, future and operation 87−20610
airborne multimode fire control radar, AN/APG-66, design aspects for medium PRF mode 85−47577
airborne pulse Doppler radar, design considerations 85−63761
airborne pulse doppler radar, digitiser requirements 88−12468
airborne pulse Doppler radar, performance anal. 86−17484
airborne pulse-Doppler radar, false alarm control 87−40995
airborne pulse-Doppler radar clutter, efficient closed-form computation 86−17438
airborne radar, development, historical account, book 87−65059
airborne radar, multistatic and backscattering cross sections simulation 87−13762
airborne radar, polarisation effects 87−56243
airborne radar, using electronically steerable antenna technology 86−69829
airborne radar integration, characterisation and trialling 88−54705
airborne radar systems, real-time simulation and human engineering aspects 85−8481
airborne radar track-while-scan system design methodologies 88−74038
airborne SAR, imaging theory 88−15517
airborne SAR imagery analysis, ocean internal wave surface patterns 87−63973
airborne SAR imaging system, based on rotating antennas 86−69831
airborne SAR motion compensation system, implementation 87−20616
airborne SAR radar, an R&D tool for ERS-1 time frame 88−60260
airborne self-protection system, multiple aircraft integration 85−3510
airborne solid state phased arrays 88−15615
airborne surveillance radar, design, construction and early trials 86−17512
airborne X-band side-looking radar, for oil slick detection 86−69830
aircraft detection and identification uses passive electronic-support measures 87−34655
aircraft hazards assessment 87−29905
aircraft height information errors telemetered by secondary surveillance radar systems, anal. 88−16876
aircraft maneuvers tracking using roll-angle meas. 85−26873
aircraft onboard SAR processing using frequency domain fast correlation technique 88−60273
aircraft radar for 21st century, European collaboration *(Dutch)* 87−76840
aircraft signal intelligence and ferret missions, airborne EW systems 86−17469
aircraft targets, fading and glint correlation, expt. investig. 88−15673
aircraft wingtip vortex location, radar cross section obs. 86−4732
airframe company radar simulations, requirements and appls. 87−13789
airport surface detection equipment, ASDE-3 high-resolution radar, design and characts. 85−47576
airport surveillance radar, ASR-9 design and operating characts. 85−47575
Alaska SAR facility features and operations 88−9649
amplitude-comparison monopulse, interfering second target influence 85−42656
amplitude-comparison monopulse radar system, interfering second target influence 85−14357
AN/APG-67 multimode radar, air-to-ground ranging using electronic roll stabilization of monopulse data 88−60271
AN/APS-506 maritime search radar, SAR mode 88−60266
AN/APS-506 radar, SAR mode 88−15622
AN/SPS 48E radar with BIT capabilities 88−41727
AN/SPS-40 radar system, solid-state transmitter 86−17490
analogue beamforming in radar 85−47570
angular estimation accuracy for unresolved targets 88−9654
antennas, propagation, and radar systems 87−28690
anti-ship missile decoy, development 88−41728
antijamming techniques, book 88−11577
aperture-synthesis, digital signal processing by harmonic anal., quantisation noise 86−43898
ARBAT, tracking radar for real-time anal. of modern projectiles 86−17491
Arctic ship trials of a dual-polarized ice navigation radar 88−15652
Arecibo UHF radar, stratospheric echo power and wind shear obs. correlation 86−22683
army radar, origins and developments to 1945 85−58226

radar systems continued
array antennas, angular super resolution, seeker heads appl. 87−19343
array radar systems, review of developments 87−41001
array radars, MMIC module developments 87−63041
ASR-9 airport surveillance radar, improved accuracy and resolution 86−55377
asymmetric scattering matrix, Kennaugh's optimal polarisation concept 86−55333
ATC, Mode S data link, interference problems *(German)* 87−57308
ATC, radar with moving target database signal processing, velocity meas. reliability determ. 85−59408
ATC, Selenia developments status report 86−32499
ATC, space based radar appl. 86−18490
ATC beacon systems development 86−32498
ATCRBS at Sendai airport, false targets calc. 86−4731
North Atlantic anomalous microwave propagation, long-range expt. 87−26765
atmosphere eddy dissipation rates determ. from Doppler vel. spatial spectra and Doppler spectrum widths 87−63944
atmospheric refractive structure, radio and radar holes and multipaths zones 88−34326
atmospheric temperature and wind profile, acoustic, wavefront anal. 87−56261
atmospheric turbulence simultaneous remove sensing by double star scintillometer and VHF radar 86−6124
atmospheric velocity fluctuations spectrum using MST/ST radar 86−23979
attenuation prediction at attenuating frequency, interpretation and anal. 85−42640
auroral backscatter, multi-radar obs. 88−53344
auroral oval density and velocity fluctuations impact 88−53375
auroral radar detection of electrostatic ion-cyclotron waves 88−41744
Australia wartime radar to postwar radio astronomy, development 88−60249
automatic frequency selection device, spatial jammer suppression 88−15677
automatic radar ESM systems, multistage de-interleaving 85−24883
autoregressive spectral analysis methods of radar target detection *(Spanish)* 86−11170
aviation electronics. V. Secondary surveillance radar 88−47211
avionics for helicopter navigation and combat 86−44747
backscatter measurement using mobile spectrometer 85−31092
Barak 1 and ADAMS point defense systems 87−70132
Barker-coded multipulse expts. with incoherent scatt. radars 88−53340
battlefield environment, MM wave transmission through manmade obscurations 87−20620
battlefield radar monitoring systems with the instantaneous frequency measurement receiver (IFMR) 85−8477
battlefield simulation, design criteria for microwave intervisibility meas. system 86−17497
BDFA data-flow multiprocessor architecture 85−8476
beam shrink computation, HP-41C program 85−3501
beamforming, digital processing role 85−47571
bird identification for avoiding aircraft collision, use of DEC MicroVAX II 87−56225
bistatic and multistatic radar, history and appls. 87−13767
bistatic and multistatic radar, survey 87−13766
bistatic and multistatic radar systems, tracking algorithms 87−13751
bistatic pulse-Doppler intruder-detection radar for military aircraft protection 86−17495
bistatic radar, signal processing considerations 88−74040
bistatic radar, system and environmental influences 88−15613
bistatic radar system, Marconi 88−15612
bistatic radar system design for imaging/mapping extrasolar planets 85−47619
bistatic radar system using UHF TV transmitter as illuminator 87−13770
bistatic radars, synchronisation aspects 88−15614
bistatic radars for air defence 88−15611
bistatic radars for future systems 85−25931
bistatic SAR systems, waveform error anal. 88−15554
bistatic systems geometry 87−13768
bistatic/multistatic radar bibliography 87−13772
blast furnace burden level meas. using FM radar based phase modulation method *(Japanese)* 87−41638
Blue Joker 1950s radar, development 85−52418
border surveillance, dynamic system 87−49163
borehole radar, microprocessor-based data acquisition system 87−71276
British countermeasures during World War II, survey 85−58233
buried objects detection using versatile portable FMCW radar scheme 85−37112
buried objects in brick wall detection 85−14358
buried plant detection 88−67469
BYSON research radar 88−15662
C-band medium-power active frequency doubler design 87−76851
CAD and manufacture of hyperfrequency ccts. for anti-missile radars *(French)* 86−40831
calibration of performance parameters using Sun as external RF source 88−15516
CFAR, adaptive design, sea clutter anal. 85−47583
CFAR, performance of the 'smaller of' and 'greater of' detectors integrating *M* pulses 88−74029
CFAR detection techniques 87−8353
CFAR radar processors, non-homogeneous interference presence, performance 85−46825
Chain Home system, construction and performance 85−63753
Chaparral surface-to-air missile, review 85−20262
Chilbolton dual-polarised radar, new developments 87−56259
Chinese military radar, appls. 87−76857
chirped waveform for satellite appl., digital implementation 88−3950
civil and other radars, development and progress 85−58239
clear-air Doppler radars, bistatic and monostatic 86−69820
Close-in-air defense: the Mygale surface-to-air weaponsystem 86−43901
clutter, sea ice and ships detection 85−47584
clutter, sea surface pollution effect 85−47557
clutter spectra meas., results 85−52393
clutter suppression techniques in electronic scanning systems, theoretical/exptl. study 87−28683
CNET backscatter HF radar, antenna arrays 88−47222
CODAR directional biases with a four-elementantenna array 86−56253
CODAR HF radar obs., status report 86−65535
CODAR HF radars, tidal and storm-surge meas. 86−65533

radar systems continued
CODAR ocean surface meas., distorted antenna patterns correction 86−64049
coherent multiposition systems, antennas directivity at receiving points, statistical optimisation 88−15572
coherent polarisation-diversity C-band radar for cloud microphysics and radiowave propagation 86−4734
coherent radar cross-section and imaging measurement systems 88−47206
coherent signal processing for pulsed search radar 85−3506
coherent-pulsed surveillance radars, digital signal processing techniques *(Spanish)* 85−52421
Colorado wind profilers at 50, 405 and 915 GHz, altitude coverage 87−77857
combat cockpit with graphic displays 88−61531
compact radar cross-section meas. range at Ohio State University 85−20266
compendium of papers published in last decade 85−32902
component and system design for radar development, interaction 88−47207
computer communication through a surveillance radar 86−17506
computer control and data processing, book contrib. 87−76858
computer controlled radar-directed air defense system, the Sergeant York gun 87−40997

Mode S and TCAS, secondary surveillance radar future 88−15638
Mode S data link appls. in western Europe 88−15639
Mode S monopulse secondary surveillance radar for ATC 88−16877
Mode-S digital data link for secondary surveillance radar system, charact., capacity and protocols 87−40774
modern search radars including Jupiter, Sea Tiger, Triton, Castor and Canopus types 85−25934
modest resolution radars, spaceborne for remote sensing 87−63929
monopulse radar, processors and postdetection algorithms anal. 86−17439

radar systems continued
monopulse radar systems, angle-tracking performance in presence of interfering second target, anal. 87−70124
monopulse secondary surveillance radar 88−15630
monopulse secondary surveillance radar, expt. eval. *(Japanese)* 87−8358
monopulse secondary surveillance radar for air traffic control 88−41741
monopulse secondary surveillance radars, for air traffic control, computer techniques 86−50723
monopulse SSR, theoretical eval. and expt. meas. comparison 88−15538
monopulse SSR operation at difficult sites 88−15636
monopulse SSR radar, data processing 88−15633
monopulse tracking radar 88−15671
monopulse tracking radar laboratory prototype for student training *(Spanish)* 87−20598
monostatic Doppler radar for meteorological wind vector components estimation 86−23973
monostatic pulse-Doppler HF radar, meteor trail detection rates 85−42658
Monte Carlo simulation and random number generation 88−34530
Monte-Carlo computer simulation for studying freq. stability problems *(Chinese)* 86−65023
Moonshine anti-radar device for aircraft in World War II 86−15971
motion-compensated SAR image ISLR 88−9621
moving target characterisation by radar signature *(French)* 86−11152
moving target indication research at ADRDE, 1943 to 1945 86−17516
moving target selection radar systems, optimisation for non-Gaussian signals 85−14342
moving target selector systems, heterodyne oscillation charact., passive interference suppression 88−74031
MST radar detection of middle atmospheric tides 86−25425
MST radars, online DP techniques 86−23970
MST radars, pulse compression hardware decoding techniques 86−23967
MST radars, spectral moment estimation 86−23971
MST radars for atmospheric gravity wave spectra observation 86−23978
MTI radar, calibration method 88−15663
MTI radar raingauge system, development and evaluation tests 85−47587
MTI radars, use of delay-line cancelers for clutter reduction 87−63063
MTI weather radar, ground clutter rejection and precipitation echo meas. 85−47586
MU radar and Kyoto meteor radar, observations comparison 86−23977
MU radar for high resolution MST obs. of turbulence 86−25426
MU radar for middle and upper atmosphere remote sensing 86−69819
MU radar obs. of troposphere and lower stratosphere, backscattered VHF echo power, aspect sensitivity 87−19192
MU radar with active phased array system, antenna and power amps. 86−23968
multi-application signal processing architectures, military appl. 85−9308
multi-baseline spaceborne interferometric SARs 88−10538
multi-radar tracking simulation 87−28676
multi-radar tracking systems and sensor netting, developments, ATC appls. 86−55359
multi-radar/multi-sensor tracking for air defence centre architecture 88−41750
multi-static radar for long range air defense, bistatic system charact. 86−55363
multi-target tracking/3D surveillance radar system using mirror antenna technology 87−3226
multicriterial optimisation by correlation matrix, generalised indices selection 88−4072
multifunction MM wave radar for all weather ground attack aircraft 87−20613
multifunction phase array radar, solid state operation 87−20611
multifunction radar for airborne appls., conf., Toulouse, France (Oct. 1986) 87−16288
multifunction radar system design, ECCM improvement factor considerations 86−23957
multifunction rotating electronically scanned radar (RESR) for air surveillance 85−47580
multilook SAR images, adaptive enhancement and speckle reduction 87−63055
multimicro structures for synthetic aperture radar(SAR) data processing 86−49733
multimission airborne radar for the 1990s 87−20612
multipactor-tuned magnetron for airborne radar systems 85−61630
multipath signal propagation effects of radar system, anal. 86−49714
multipath-induced errors in monopulse secondary surveillance radar 85−24852
multiple object tracking radar 87−49166
multiple PRF pulse Doppler radar, range ambiguity resolution 87−63043
multiple SAR images and surface shape reconstruction 88−10539
multiplexed optical fibre interferometers, performance anal., radar systems analogy 85−35478
multipurpose search radar, dual frequency band antenna, for 250 to 1000 ton warships 86−17488
multisensor targeting and tracking 88−67484
multisite radar tracking multiprocessor computer architecture 88−15627
multispectral sensor simulation 88−15605
multispectral sensors, target acquisition 87−56267
multistatic, detection and tracking performances, case study 85−58216
multistatic binomial detectors, design and performance anal. 85−52416
MV radar with active phased array system, inhouse equipment 86−23969
MV VHF radar for air and precipitation particle motions within cold front meas. 86−23976
nadir-looking radar for simultaneous ocean cross section and rainfall meas. 87−63969
NAMS height finding radar system, height estimation error evaluation *(Japanese)* 85−42655
NATO's air defence C^3I, strengthening 86−69812
naval radar, 1935-45 development 85−58227

obstacle detection and mapping, computerised radar system 85−59792
ocean imagery, dual-freq. SAR, calibration 87−4152
ocean SAR images simulation via phase history generation 88−60276
ocean surface current measurement method, using interferometric radar method 87−71396
Ocean Surface Current Radar (OSCR), appl. to vector meas. on inner continental shelf 87−50562
ocean wave directional spectrum meas. from HF radar Doppler spectra 86−59937
ocean waves, multilook images processing by SAR 87−56232
oceanic low-angle monopulse radar tracking errors 87−70131
oceanographic remote sensing by radar altimeter on satellite, instrument description and signal processing 88−5188
oceanographic remote sensing by radar altimetry, Poseidon radar system 88−5187
open ocean radar sea scatter measurements 86−17496
optical and acousto-optical techniques in radar and sonar 85−46895
optical disc utilized as a data storage system for reconnaissance 85−3727
optical generation of microwave carriers, source requirements 88−27181
optical network that learns to perform motion compensation in radar imaging 88−66658
optical radar system, noise immunity when using phased array 87−49189
optical techniques for signal distribution and control inadvanced radar and communication systems 85−58219
optimal algorithm for IFF interrogation ofradar systems 86−49734
optimised radar processors, book 88−69984
origins 85−58220
over-the-horizon backscatter radar for early warning 86−4717
parallel plate polariser design and interaction with linear slotted waveguide array 85−41785
parallel processing soln. to ESM 88−50210
passive countersurveillance, overview 85−13165
passive/active airborne surveillance, multimode multistatics 87−20614
PATRIOT guided missile system, reliability, availability and maintainability 87−49164
Patriot radar in tactical air defense appls., computer controlled C-band phased array system 88−53367
PAVE PAWS radar, communication systems susceptibility assessment 87−28680
peat bog props. eval. using ground probing radar *(Finnish)* 87−41007
performance anal. of radar systems with hardware implementation and software packages 86−37933
performance assessment, new criterion 88−15653
performance implications of signal processing in simulated pulsed Doppler radar target signatures 87−13780
performance testing, operability assessment and training, EM simulators appl. 86−17494
personal computer-based automatic vehicle location and monitoring system 85−3546
phase array radar, experimental control 87−70139
phase comparison monopulse side scan radar 85−63769
phased array radar, developments in optical control and signal distrib. techniques 88−74034
phased array radar, search and track functions improvement using adaptive control 86−55361
phased array radar, transmit/receive modules 88−15618
phased array radar pattern synthesis, iterative Fourier transform appl. 88−28934
phased array radar systems, military electronics 87−49157
phased array radars, optical techniques for signal distribution and control 86−17514
phased array systems, addressing and control using optical fibre and waveguide technology 88−67476
phased arrays, book contrib. 87−76859
phased-array, Doppler spectra shape obs., radar clutter characts. determ. 85−52386
phased-array radar elements, relative gains, tuning phases and RF phase shifts estimation 85−41768
phased-array radars 85−42653
phased-array radars, possible violations of 1972 ABM treaty 87−70127
planar array 3D radar from Thomson CSF 87−49169
planar array antenna for ERS-1 SAR 87−61528
planar phased array, effects of antenna element structure on element properties and array pattern 86−29629
planar phased arrays, computer program 88−34503
Plessey radar environment simulator 88−15669
Poker Flat MST radar, clear air scatter, aspect sensitivity 88−10556
polarimetric *X/L/C*-band SAR 88−60259
polarimetric pulse compression system 85−14367
polarisation information utilisation in primary radar 85−58183
polarisation-diversity radars, effects of propagation through rain 85−41617
polarization diversity radar interpretation 87−34646
PORTER history based maintenance system for radar equipment 88−61729
positioning systems *(Swedish)* 85−52420
Possum radar, cost-effective surveillance for battlefield air defence 88−74012
power supplies to space borne radar system using solar battery driven klystron 85−16095
PPI radar with coded pulse and some kinds of jamming *(Czech)* 85−42648
precise time and positioning using oscillators and clocks 86−17535
precision tracking radar, comprehensive decision in dealing with angle noise 88−15655
primary and secondary, computer program for evaluation and monitoring 86−17498
primary ground radar for ATC 88−28947
primary surveillance radar, hazardous weather conditions detection and recognition 86−17449
PROUST radar for UHF stratosphere-troposphere meas. 87−34658
proximity warning system for light aircraft, low power Doppler radar with stereo AF tone output 88−60256

radar systems continued
PS-46/A Doppler effect radar, reliability testing and demonstration 86−4720
PSP/SVP advanced VLSI programmable systolic signal processor 87−27537
pulse compression radar using random binary sequences with maximum entropy *(Japanese)* 87−20603
pulse Doppler radar, new design *(German)* 88−67477
pulse Doppler radar, pulse-repetition frequency set selection 88−74039
pulse Doppler radar cross sections of icebergs and ocean 88−15651
pulse Doppler weather radars, ambiguity resolution methods 86−17451
pulse radar history, US Navy developments 85−58221
pulse repetition frequencies, distance meas., ambiguity elimination algorithm anal. 86−55356
pulse-Doppler processing with frequency diversity signalling, short-time high-resolution method 87−62053
pulse-Doppler radar, calibration method 88−15663
pulse-Doppler radar, complex signal FFT processor with pipeline parallel architecture *(Chinese)* 87−76835
pulsed Doppler radars, sidelobe echoes cancellation 86−64078
pulsed radar system, 215 GHz, design and performance for remote sensing appls. 88−60239
quadrature digitiser system, fast calibration 88−12465
radar ECCM's new area: anti-stealth and Anti-ARM *(Chinese)* 87−63031
radar method for sea state determin., theory and modeling 86−32581
radar rain-gauge system *(Japanese)* 85−4451
radar reflectivity of motor vehicles at 35 GHz 88−28954
Radarsat synthetic aperture radar system for remote sensing satellite 87−28681
radio camera: imaging with large aberrant arrays 88−4116
rain attenuation meas. by dual-frequency radar, factors affecting accuracy 85−47585
rain patterns, automatic extraction, collection and description for modelling 87−63032
raindrop size distrib. by coherent polarimetric radars, three-parameter characterisation 85−41618
Ramp's new primary surveillance radar for ATC 85−43458
